TEACHER BROOM AND MATTRESS MAKING AND CANE-SEATING: HENRY E. MARSHALL,

ENGINEER:

WILLIAM WILDER.

NIGHT-WATCH:
JAMES SHEPHERD.

### PRESIDENT'S REPORT.

To His Excellency, R. B. Glenn, Governor of North Carolina.

DEAR SIR:—I have the honor to herewith transmit to you the biennial report of the Principal, Mr. John E. Ray, and other officers of the State School for the Blind, situated at Raleigh, N. C.; showing very fully and in detail the operation of the institution for the period of two years, ending with the close of the last fiscal year, December 1, 1908.

In view of the completeness of the Principal's report, I do not conceive it essential that I should enter into any lengthy discussion of this great institution and its needs further than to emphasize the fact that your Board of Directors have, I know, kept at all times in closest touch with every phase of the work, and nothing has been left undone by them, which after careful investigation seemed for the best interest of the institution, that came within the purview of the means at their command. How wisely the Legislature of 1905 acted in appropriating \$23,000 to this institution for certain needed permanent improvements will be verified most abundantly, in my opinion, by the increased usefulness of the School in its facility to better equip and qualify the State's most dependent class of citizens for their own support and success in solving the problem of life; and I doubt not that the items enumerated and asked for in this report at the hands of our Legislature are all as wisely conceived and can be as profitably expended as were those above referred to. Certain it is that the item of \$5,000 increase in the maintenance fund will be seen to be absolutely necessary by reason of the well-known increase of the cost of living and the constantly growing number of pupils coming into the institution, as shown by the Principal's report from year to year.

Concluding, would say that it is happily a matter of real felicitation to note that the lawmakers of the Old North State have always shown the most advanced and humane consideration in the matter of all needed provision for the more intelligent and efficient treatment of the blind, who are, in the very nature of the case, almost entirely dependent upon the voluntary will of the people's representatives, through whose intelligent generosity alone must come such opportunities as they may be permitted to enjoy.

With high esteem, believe me, sincerely yours,

Jos. E. Pogue,

Chairman Board of Directors State School for the Blind.

### PRINCIPAL'S REPORT.

To the Board of Directors of the State School for the Blind and the Deaf.

GENTLEMEN: - I submit herewith a statement of the material condition of the State School for the Blind and the Deaf for the biennial period ending December 1, 1908. It has been a period of some progress, and the average attendance has been larger than in the history of the School. As in the past twelve years, strenuous efforts have been made to reach every suitable child in our State who needs the advantages offered by the School. In several cases these efforts have proved unavailing, and there are a good many blind children in North Carolina who ought to be here and are not, and who never will come unless the recently enacted compulsory education law pertaining to blind children is enforced. Most of these are the most needy and deplorable cases to be found. As intimated above, the special session of the General Assembly of the present year passed a compulsory education law applying to blind children, and if the proper officers will faithfully perform their duty many of these can be reached and their attendance can be secured. But herein lies a serious difficulty. There is a deplorable lack of interest upon the part of some of the officers of the law in this direction. Although the statutes make it the duty of the county superintendents of schools to have their census-takers report to them all cases of deaf and blind children, and then in turn report these names to the Principal of this School, and although their failure to do so is made a misdemeanor, punishable by fine or imprisonment, and although blanks for such reports have been sent to each county superintendent, less than onefifth of these superintendents have ever made a report or even replied to letters written them upon this important subject. And recently appeals have been made to some of the officers

[Session]

of the law, urging them to take steps to compel certain parents who are known to have blind children to send them to school, but most of these even have gone unnoticed.

And yet the attendance upon this School is larger in proportion to the population of the State than that of any other State in the Union. In fact, this has the third largest attendance of any similar institution in the whole country, even including the Perkins Institution in Boston, which is for the whole of New England. Ohio is the only State institution which has a larger attendance than this. There are two schools for the blind each in New York and Pennsylvania, and their combined attendance is greater than that in North Carolina. This, then, will make North Carolina stand fourth in the column of the States as to actual attendance. Is this because there are more blind children in North Carolina than in the other States? Hardly; but greater efforts have been put forth to induce blind children to attend her school. And this accounts for another pleasing thing-one seldom, if ever, sees a blind beggar about the streets of our towns and cities, and most of those to be seen come from other States.

With the progress of medical science and general intelligence, it is to be expected that the number of blind children will steadily decrease. There are persistent efforts being made by medical boards and scientific and philanthropic persons to remedy the evil of preventable blindness. This is as it should be. Reports from such States as New York and Pennsylvania show that from 20 to 33 per cent, of the blind children in their schools have become blind from ordinary sore eyes, scientifically called "ophthalmia neonatorum," The proportion of children in this School who are blind from the same cause, so far as definite information reveals the situation, is smaller; but at least 15 to 25 per cent. of the students of this School should never have been blind, and would not have been if the proper medical skill and intelligence had been exercised. Think of it-from 40 to 60 of our students, if not a larger number, might have been saved this great misfortune! Ought not something to be done to remedy this great evil? In some of the States north of us the Legislatures have taken up this matter and have passed laws looking to the relief of the condition. If the proper efforts are used and the intelligent skill applied, there is no doubt but that the number of blind persons will be materially decreased from year to year.

The following will show the actual attendance for the biennial period:

Present December 1, 1906		339
New students admitted	109	
Former students readmitted	17	
_	_	
Total increase		126
	-	_
Total enrollment for two years		465
Graduated since last report	4	
Died during two years	3	
Suspended for misconduct	5	
Time expired	4	
Relieved by ophthalmologists	25	
Returned home as feeble-minded	9	
Voluntarily remained at home	69	
_	_	
Total decrease		119
	-	
Present December 1, 1908		346

#### A SCHOOL.

It is very pleasing to note that the lawmakers of North Carolina have properly classed our School among the other educational institutions of the State, the Revised Code placing the School where it should have been all these years. The students, therefore, are no longer referred to as "inmates" nor the institution as an "asylum."

And there is another phase of the situation which needs emphasis: it is more expensive to properly educate the blind than any other class of educable children; more individual instruction is needed; the teacher must aid each pupil in feeling out every letter and figure in each lesson in language and numbers, until the child has thoroughly learned all the characters. To do this properly experts are essential to the success of the work, and only the very best qualified teachers should be employed in schools for the blind. No school can succeed so long as those in authority believe that "anybody can teach the blind." Why, it requires the best-qualified persons in the land to make a thorough success of such work. To insure the continued success of the School it is absolutely necessary that the maintenance fund be increased at least \$5,000.

And then it should be borne in mind that each school for the blind, properly manned, must employ three different sets of teachers—a corps of literary teachers, one for music and one for handicraft—thus making it trebly expensive. And yet, compared with similar institutions throughout the country, our per capita expense ranks with the very lowest. It is not certain that the School is to be congratulated upon this, since possibly a little more money spent judiciously might bring very much more pleasing results.

#### IMPROVEMENTS.

The last General Assembly voted an appropriation of \$23,000 for several improvements, which were specified. The amount granted was less than the amount asked for by the School, and hence some of the needed improvements could not be made. However, the amount appropriated was as wisely and judiciously expended as practicable. Much of the old, broken and unsightly plastering in the main buildings was torn off and granite fiber plastering put in its stead. The rooms thus renewed present a very pleasing appearance. Steel ceilings were put in all the schoolrooms, in some of the dormitory rooms, in the chapel, office and front hall at the colored school.

But the very first matter claiming the attention of the Board of Directors was the erection of fire escapes for both departments of the School, and five Kirker-Bender spiral steel-encased fire escapes have been erected, and now all the students are protected from the possibility of death from fire in case of a conflagration. Fire drills, too, are practiced each week, to better teach the students the best and quickest way of exit.

A magnificent tubular pneumatic action pipe organ, with electric blower, has been installed in the auditorium of the School. This instrument is of the most modern and approved mechanism and will prove a most helpful means of teaching the students to earn a livelihood after leaving school as organists and teachers of music.

A laundry building has been erected at the colored school and machinery placed in it, as well as machinery for the laundry at the white school. In the erection of the building at the colored school provision was made in the upper story for the carpenter shop. The old tin roof upon the main building at the colored school has been taken off and the building run up a story, thus providing four large dormitory rooms and relieving the seriously crowded condition of that department. This is all furnished with metal ceilings and fiber plastering. Besides all this, the whole of the old building has been covered with slate. This completes the slating of all the main buildings at both departments.

Some very necessary plumbing has been done at both departments and the boys' building put into very much better condition. Plans for the erection of the fireproof library are being prepared and the building will be erected as soon as practicable, and so protect the thousands of valuable books in possession of the School.

#### ADDITIONAL NEEDS.

For four years requests have been made for enough money to pave the sidewalks around our buildings. The private eitizens who live near are required to pave their sidewalks. It seems, then, but reasonable for the State to put the sidewalks around its property in as good condition as the private property adjacent, to say nothing of its appearance.

Two years ago the Legislature was asked to refund the \$900 which had to be borrowed from the land fund to purchase boilers in an emergency. At the same time a small appropriation was asked for a barn at the white school and an enlargement of the dairy barn. The amounts have never been granted.

No pianos have been bought for the School in several years. With the constant use to which the instruments are put, the wear is considerable, and they must occasionally be renewed. The School greatly needs ten new pianos. And please bear in mind the fact that the graduates going out from the music department make a better living than those from the other departments.

There is a growing need for additional land for the white school. There is practically no opportunity for out-of-door Other States have provided for the schools for their blind from 10 to 100 aeres. Here there are only four, and these are largely covered with buildings. Playgrounds and outdoor gymnasiums are needed to induce the students to take Other schools have race courses, football more exercise. ground and such like. Why should not this? If land cannot be secured adjacent to the present buildings, let the Legislature authorize the sale of the present site and buildings and the purchase of more commodious quarters elsewhere. And then there is need for swings, settees, merry-go-rounds, etc., etc., for the health and pleasure of the little ones committed to our eare. Little enough of the sunshine of life gets into their little lives.

The plumbing and steam-heating plants greatly need over-

hauling and renewing. We have had more sickness these past few years than has been our wont. Who knows but that some of this is due to the condition of the plumbing? The boiler inspectors require new boilers to be put in.

It would add much to the sanitary condition and the appearance of the buildings to knock off the balance of the old plastering in the buildings and replace it with fiber plastering. Steel ecilings should be put into all the buildings which now have plastered ceilings. The plaster ceilings are constantly falling off, and in one instance a person was knocked unconscious by the falling material.

The old tin roof on the porches of the main building at the colored school must be renewed, and slate should be used. The fences in the rear of the buildings need renewing.

The woodwork in all the buildings needs paint most seriously. Some of it has not been painted in nearly twenty years.

There are no isolated sick wards at the colored school. If some contagion or infection should visit the school, there is no means of isolation. There is ample space in the attics of the two wings of the girls' building, which, at small expense, could be converted into convenient and modern sick wards. The same might be done in the boys' building. This might save much expense in the way of sickness and the loss of some lives.

#### SUMMARY.

For paving floors and sidewalks\$	2,000.00
Refund of land fund	900.00
For barns	2,000.00
For ten (10) pianos at \$300	3,000.00
For additional land	15,000.00
For outdoor gymnasium, swings and settees	1,000.00
For renewing steam-heating system and plumbing,	10,000.00
For new boilers	3,443.00
For steel ceilings and renewed plastering	3,000.00
For porch roofs and fencing	1,000.00
For painting and repairing woodwork of all build-	
ings	1,500.00
For completing sick wards at colored school	1,000.00

#### INDUSTRIAL DEPARTMENT.

More stress, if possible, is laid upon the industrial work than any other. This, of course, includes the music, because music is taught as a trade rather than as an accomplishment, and for the reason that more students carn a livelihood by music teaching, piano and organ tuning and repairing than by almost any other calling.

Many of the blind girls are earning good money by their fancy work, and the colored deaf girls are fitting themselves for usefulness as cooks, housekeepers, seamstresses, etc., while a large number of the boys have become expert broom and mattress makers, and the negro deaf boys do excellent carpenter work, painting and shoemaking. Quite a number of the graduates are making successes out of their trades.

#### AWARDS OF MERIT.

Since the last report two additional gold medals have been awarded the School by the State Fair authorities—one for each year—for the excellent exhibits made, and a large number of first premiums have been awarded individual exhibits. And it should be remembered that the work of this School is put into competition with that done by seeing persons.

At the invitation of the authorities of the Jamestown Exposition, and after consulting the Attorney-General of the State as to the legality of the matter, the Board of Directors decided to make an exhibit of the work of the School. Besides the material exhibit of the products of the handicraft departments and schoolroom appliances and apparatus—by far the largest and best of its kind upon the ground—a class of girls was taken to Jamestown for some ten days, who exemplified the various phases of schoolroom and industrial exercises in nearly every particular. Hundreds of visitors thronged the exhibit daily and witnessed the excreises with the profoundest interest.

The School band, consisting of twenty-one members, also went. They had new instruments and new uniforms and presented a most attractive appearance. The band was invited to play in the auditorium, grand stand and at other places, which they did with great credit to themselves and the School. They had the honor to play at the dedication of the Aeronautic Building, at the reception given by Governor Swanson, of Virginia, and upon the occasion of the great speech of our own Governor Glenn. Thousands heard them with joy and amazement. So delighted was Mrs. Swanson at the music made by the boys that she made each member a present of a handsome souvenir.

Mrs. General Fred. Grant was present at Governor Swanson's reception and was so delighted with the music of the band that she made a special request that they furnish music upon the historic occasion of Children's Day exercises at the ringing of the bell, preferring, as she said, our band to any upon the grounds. It is a question whether the School ever spent \$500 to better advantage. The authorities awarded a gold medal and diploma for this most interesting and attractive exhibit, which is in the possession of the School.

The exhibit made by the colored department of the School in the Negro Building attracted universal attention. The officials of the United States Government and of the various States who visited the exposition were profuse in their compliments of the exhibit. It is safe to say that no exhibit in the building attracted so much attention and met so favorable comment.

A class of colored students from the School was present for some weeks, and very many witnessed their exercises with the intensest interest. This exhibit was made without expense to the School. A gold medal, too, was awarded this exhibit, which is in hand.

#### ACKNOWLEDGMENTS

The various railroads of the State have continued their former courtesy and kindness, granting special rates to students traveling to and from school. The schools for the deaf throughout the country have sent their publications, which have proved a source of considerable interest and assistance. Some of the State papers have also been sent without cost to the School.

The officers of the State have been uniformly courteous and have shown many favors when in their power.

It would not be meet to close this report without referring to the kindness and consideration shown the School by the authorities of the State Agricultural Society at their annual fairs.

And to you, gentlemen of the Board, are all under special obligations. Your interest, your labors, your counsel and your approval have had much to do with the success which has attended the labors of officers, teachers and scholars. You are entitled to the hearty thanks of all.

For detailed accounts of the financial, sanitary and health conditions of the School you are most respectfully referred to the documents herewith handed you.

Very sincerely,

JOHN E. RAY,

Principal.

# PHYSICIANS' REPORTS.

Raleigh, December 1, 1908.

To the President and Board of Directors of the State School for the Blind and the Deaf.

Gentlemen:—I have the honor to herewith transmit my report for the last two years—from December 1, 1906, to December 1, 1908.

At the department for the whites there have been since my last biennial report a great many minor ailments and several severe ones, as well as a number of surgical cases, such as accidents, etc., which required my services.

Catarrhal troubles, bronchitis, tonsilitis and la grippe during the sessions of 1906-'07 and 1907-'08 and the present term, and stomach and bowel disorders, especially dysentery, during the sessions of 1906-'07 and 1907-'08, were very prevalent.

We have also had measles, 1 case in May, 1908; pneumonia, 3 cases, 2 in April, 1907, and 1 in November, 1907; malaria, several cases in October, November and December, 1907, and January, 1908; typhoid fever, 2 cases, 1 each in October, 1907, and November, 1907; scabies, several cases during session 1907-'08 and the present term; diphtheria, 2 cases, 1 diphtheritic croup in October, 1907, and 1 nasal and pharyngeal in April, 1908; catarrhal fever, 2 very severe cases in November, 1907; hookworm disease, 1 case in March, 1908, and fracture left thigh, 1 case in May, 1908, with most excellent results.

Four deaths have occurred: Evan McNight died on February 20, 1907, of acute meningitis consequent upon suppurative disease of the ear; Herbert Stephenson, on April 8, 1907, of typhoid pneumonia; Albert Dawson, on November 11, 1907, of pneumonia and inflammation of bowels, and

Sophronia Ethel Lee, on April 14, 1908, of acute bronchitis and Bright's disease, secondary to a very severe case of nasal and pharyngeal diphtheria.

I cannot commend too highly the benefits, especially to the blind, in the way of greater physical development, etc., derived from the gymnasium and physical culture exercises. I hope, therefore, you will give all the aid and encouragement in this direction in your power.

The food furnished the pupils is plain and wholesome.

Respectfully submitted.

Hubert Haywood, M. D., Physician to the Department for the Whites.

To the President and Board of Directors of the North Carolina Institution for the Education of the Deaf and Dumb and the Blind.

Gentlemen:—I have the honor to herewith transmit my report for the past two years, ending December 1, 1908.

At the department for the colored there have been since my last biennial report a great number of minor ailments and several major ones, as well as a few surgical eases, which required my services. Tonsilitis, enteritis and bronchitis were all very prevalent during the school year 1906-'07-tonsilitis and bronehitis during winter months and enteritis more prevalent during spring months. Colds, sore throat and stomach disorders had to be contended with during the school year 1907-'08, but not so much so as in 1906-'07. ter part of the session of 1907-'08 we had an epidemie of chieken-pox, having about 32 cases, confined mostly to smaller ehildren. At the beginning of the session of 1908-'09 we had many cases of whooping-eough, all of which have recovered satisfactorily. We have also had during the year 1906-'07 and 1907-'08 three eases of typhoid fever (one ease having pneumonia as a complication), two cases of pneumonia, two eases of tuberculosis (both sent home after diagnosis) and

many cases of measles and malaria. Through faithfulness to duty by all concerned, accidents have been few. We have had no deaths.

The good health enjoyed by the student body as a whole is due in a great measure to the devotion, kindness and carefulness of all concerned. Now that we have more dormitory space, and yet crowded, we feel that there will be a greater improvement in the general health of the student body. To the fact that we have no possible means of completely isolating a contagious or infectious disease is due the circumstance that when we have one case we have many more. Therefore I wish to recommend the erection of a hospital building or some addition to one of our buildings, so that we can control the spread of any disease that might be infectious or contagious, as well as take better care of all diseases.

I would also suggest the replacing of the old floors in the dining room and dish room of the main building with cement flooring, as it would be much more sanitary and beneficial to the health of the students.

We greatly need a gymnasium, so that the students may obtain the exercise necessary to properly digest their food and keep their bodies in normal condition without having to go out on the cold and damp playgrounds, where they contract cold and diseases that cost much. Yet they must have exercise. To keep them indoors the cost would be greater.

The sanitation of our buildings and grounds is very good.

Much credit is due our boarding department. The food
purchased for the students is good in quality, ample in quantity and satisfactory in variety.

Respectfully submitted,

J. O. Plummer, M. D.,

Physician to the Department for the Colored.

# REPORT OF OPHTHALMOLOGISTS.

To the President and Board of Directors of the State School for the Blind and the Deaf.

Gentlemen:—We have continued during the past two years the practice, begun on the initiation of the present Principal when the institution was first placed under his care, of making a careful examination of every new pupil in the two departments, white and colored, early in each session. The condition of the eyes is recorded and a decision made as to whether any improvement in vision may be expected from an operation or by the prescription of spectacles. As soon as practicable after this the cases calling for either kind of treatment are carefully attended to.

In addition to this work, we have frequently been called upon to treat pupils, old and new, for various troubles that fell within our specialty of the eye, ear, nose and throat.

Respectfully submitted,

Lewis & Battle, Ophthalmologists.

# REPORT OF MUSIC DEPARTMENT.

Music Department, November 16, 1908.

JOHN E. RAY, Principal.

SIR:—Gratifying progress has been made in this department during the last two years, both teachers and pupils, as a rule, having continued to work with earnestness and success.

No important change, except in one particular, has been found necessary in our established plan of work; but, as explained in my report for the term ending in June, 1908, slight changes have been made from time to time to suit special conditions. That is to say, while less than the usual attention has been given to individual voice training, the average of attainment in all the vocal classes has been higher than ever before. Class work in harmony, also, seriously interfered with as it is by the demands of other departments on the time of the students, has been placed on a more satisfactory basis.

The usual thorough instruction has been given in piano playing, vocal music, musical theory, normal work, piano tuning and repairing, and other branches. After an interval of some years, the study of the pipe organ has again been made part of our regular course. The object aimed at in making our musical course so extensive and thorough, as frequently stated in these reports, is to prepare as many as possible of our students to earn a livelihood as teachers of seeing pupils, as organists, public performers, tuners, etc., and in this endeavor the department has been eminently successful.

The excellent organ lately placed in our auditorium makes the present equipment of this department more nearly complete than ever before in its history. It is to be regretted, no doubt, that the available funds did not admit of the purchase of a three-manual organ; still the school is to be congratulated on the possession of so fine an instrument—one that will certainly be of great value, not only as a means of musical culture, but also as a means of training a number of our students to be church organists, and so to enter what is probably the most hopeful field of labor now open to blind musicians.

The other instruments used in the music department, thanks to the care taken of them by the teacher of tuning and band playing, are for the most part in fairly good order. The instruments used in the colored department, however, are old and badly worn, and it is impossible to keep them in a serviceable condition. That department greatly needs three new pianos and a reed organ.

Respectfully submitted,

John A. Simpson, Director of Music.

#### COLORED DEPARTMENT.

Raleigh, November 18, 1908.

MR. JOHN E. RAY,

Principal School for the Blind, Raleigh, N. C.

Dear Sir:—I beg to report that our music department is in great need of three good pianos and one reed organ. We have only three pianos, and they are almost worn out, having been in constant use for from fifteen to twenty years. We have about forty pupils in the music department; therefore have needed more pianos for some time. Our pupils are doing good work. Many are earning their living by their music.

Very respectfully,

Geo. D. Meares, Musical Director.

# STEWARD'S REPORT.

To the Honorable Board of Directors of the North Carolina Institution for the Deaf and Dumb and the Blind.

GENTLEMEN:—I have the honor of submitting my report of receipts and expenditures for the School for the Blind and the Deaf for two years ending November 30, 1908.

1906.		
Dec. 1.	Balance ou hand\$	9,049,59
	To annual appropriation for the two years	20,000.00
	To special appropriation for the two years	23,000.00
	To annual appropriation library for the two years	200.00
	Iudigent pupils' fund for the two years	8,611.30
	Earnings and other receipts for the two years	5,351.63
		166,212,52
	Vouchers paid for the two years	162,192.93
	Balance on hand December 1, 1908\$	4,019.59

Profit ....

In addition to the above we have material on hand amounting to \$911.27.

Operations of the garden for the two years:

Receipts			 	\$5,774.80
Expenditures f	or cultivating,	etc	 	4,131.77
				N. 1

rofit ......\$1,643.03

In addition to the above we have the following: Three acres in oats, four acres in clover, three acres in turnips, one acre in onions, one-half acre in cabbage, one-half acre in strawberries and dewberries, fourteen milch cows, seven yearlings and calves, six hogs and twenty-five shoats.

In submitting my report, gentlemen, it is very gratifying to me that, while we have no balance, we will have but a small deficit. When you think of the great increase in the cost of living for the past two years, the continued yearly increase in attendance, and now a compulsory education law for the blind, you can very easily see that we cannot possibly get through two years more without an increase in our maintenance fund

Respectfully submitted,

N. G. YARBOROUGH,

# STATEMENT OF TREASURER EX OFFICIO.

Raleigh, December 7, 1908.

Board of Directors State School for the Blind and the Deaf.

Gentlemen:—On examination of the books in this Department and those of the Steward, it is found that the transactions for the two fiscal years ending November 30, 1908, are as follows:

Balance December 1, 1906	.\$ 9,936.44
Receipts fiscal years 1907 and 1908-	
Appropriation for support\$120,000.00	
Appropriation (special) for improvements 23,000.00	
Appropriation (special) for books 200.00	
Indigent pupils 8,611.30	
Earnings from Steward 5,351.63	
	\$157,162.93
Total receipts	\$167,000,27
Disbursements for the two years	
Total balance	.\$ 4,333.21
Outstanding warrants	. 313.62
Net balance	.\$ 4,019.59

The books of the Steward are neatly kept, and the Steward and management of the School are to be congratulated upon the large balance to the credit of the School carried forward for the incoming year.

Respectfully submitted,

B. R. Lacy, Treasurer ex officio.

Examined:

W. F. Moody, Chief Clerk.

# RULES AND REGULATIONS FOR THE ADMISSION OF STUDENTS.

The State School for the Blind and the Deaf is located at Raleigh, the capital of the State. It is strictly an educational institution, having for its object the moral, intellectual, industrial and physical training of the young hlind and colored deaf of hoth sexes residing in the State, and is, therefore, neither a house of refuge for the aged and helpless nor a hospital for the treatment of disease.

The School consists of two departments—the white and colored. The two classes are in separate huildings, situated a distance of a mile apart; still each enjoys equal privileges and advantages with the other, being, as they are, under the same Principal and Board of Directors.

The arrangement of the School is such as to secure the separation of the male and female pupils, except in the work of the schoolrooms, where they are under the supervision of their teachers.

The officers and teachers of the School recognize the fact that a high and holy responsibility is resting upon them, and at all times endeavor to exercise the same tender watch-care and kindness towards the pupils committed to them as they would wish their own children to have if they were in the same condition. Special attention is paid to the cleanliness of their rooms and the wholesomeness of their food; and every pupil of the School is required to bathe at least once a week in rooms prepared and arranged expressly for that purpose.

Each pupil in the School is required to work two hours per day. The trades taught the males are mattress making, broom making, chair seating, piano tuning and repairing, shoemaking and mending, dairying and gardening, for the deaf. The girls are required to sew, knit and to do the mending necessary for themselves and the male pupils, and are also instructed in bead work and fancy work. A department in

dressmaking has also been established, and the colored deaf girls are taught cooking.

The school year commences in September in each year, and continues for ten school months, leaving the vacation during the warm season.

Applicants who are under six or over twenty-one years of age are not admitted.

No person of imbecile or unsound mind, of confirmed immoral character or incapacitated by physical infirmity for useful instruction will be knowingly received into the School; and in case any pupil shall, after a fair trial, prove incompetent for useful instruction, or willfully and persistently disobedient to the regulations of the School, such pupil will be thereupon discharged.

All are required to come provided with an adequate supply of good, comfortable clothing, embracing suitable articles for both summer and winter wear, in such quantities as to admit of the necessary change for washing and repairing, the whole to be neatly packed in a good trunk with a good lock and key.

Each article of clothing should be distinctly marked with the owner's name, in order to prevent confusion or loss, and must be sent in good order and condition, not only upon the entrance of the pupil, but also at each subsequent return from home after the vacation.

The course of study pursued at the School embraces all the English branches, consisting of spelling, reading, writing, arithmetic, higher mathematics, geography, grammar, the sciences, kindergarten training, and vocal and instrumental music.

Pupils from this State are admitted to all the privileges of the School, upon compliance with the rules, free of charge, being provided with board, washing, fuel, tuition, books, medical attendance, and everything necessary, except clothing, shoes and traveling expenses.

Where the parents are unable to furnish clothing and shoes, or where the child is without living parents, the county in which such child lives must do so, in which ease twenty dollars will be the amount so required, payable invariably in advance. From this rule there will be no variation.

All letters to pupils should be addressed to the care of the Principal of the School, in order to insure their prompt delivery.

Persons desiring to procure the admission of pupils should apply, by letter or otherwise, to the Principal of the School for instructions as to the manner of procedure, and no pupil should be sent to the School until such instructions have been fully complied with. It is to the interest both of the pupils and the School that they should enter at the beginning of the session, and therefore such rule must be observed.

A special appeal is made to any one seeing this circular and knowing the whereabouts of any blind or deaf colored person of the proper age to become a pupil of the School to inform the Principal of the name and post-office address of the said person and his or her parent or guardian. This is requested, even though the parents may be unwilling to allow their children to attend school. Pupils are not allowed to go home Christmas.

The use of tobacco in any form, and of spirituous liquors, as a beverage, by the pupils is strictly prohibited. Parents are urged to use their utmost endeavors to prevent the formation of these habits by their children before they come to school and their practice during the vacation.

Parents and friends of the pupils cannot be entertained at the School over night.

We have an arrangement by which we can obtain railroad tickets for pupils at reduced rates.

For further information address the Principal of the School at Raleigh, N. C.

## REPORT OF BOARD OF DIRECTORS.

STATE HOSPITAL,

Raleigh, N. C., December 11, 1908.

To His Excellency, R. B. GLENN,

Governor of North Carolina.

Six:—In submitting our biennial report, we beg to express our gratitude to your Excellency for recommending and to the honorable Legislatures of 1907 and 1908 for making the appropriations to adequately provide for all of the State's insane and mental defectives.

The State Hospital Commission appointed by you, under the provisions of the Bickett bill, purchased for this institution the 1,139 acres of adjoining land, for which we have such imperative need, upon which it has contracted to erect four colonies—two for the epileptic and two for our convalescing patients. It has also built an addition to the male department for the accommodation of 100 patients, which has been furnished and this day turned over to us. This will greatly relieve the pressure upon us for admissions, and there is no doubt but that every room will be occupied by some meritorious applicant within a very short time.

The demand upon the Commission for making prompt provisions for the epileptics and the dangerously insane imbeciles has been persistent and insistent by the immediate friends of those unfortunates, but, the appropriation at its command having to be distributed through four years, there were not funds sufficient to make ample provisions for all at the same time; hence it gave the preference to the curables, and in this we think it acted wisely. After having provided for the curables, the Commission has now in the course of erection buildings for the epileptics and other mental defectives, which buildings will doubtless be ready to turn over to us by the middle of next year. When completed and turned over, we

think that meritorious applicants should be promptly admitted, and would therefore respectfully suggest that we ought to have a *per capita* appropriation available for the care of such patients.

The colony building for the accommodation of eighty women of the convalescing class will be ready by April 1st. It will be promptly filled, and will greatly relieve the congested condition of the present building.

We herewith transmit the report of Dr. James McKee, Superintendent, whose recommendations the board unanimously endorse.

In conclusion, we congratulate your Excellency on the pronounced progress that has been made during your administration for the care of the insane, and we welcome the early approaching day when all the State's insane can be cared for in its own hospitals.

All of which is most respectfully submitted for the Board of Directors.

JNO. W. THOMPSON,

President Board of Directors.

## REPORT OF SUPERINTENDENT.

Mr. John W. Thompson, President, and Gentlemen of the Board of Directors of the State Hospital at Raleigh:

I herewith submit to you my report for the biennial period ending November 30, 1908.

## MOVEMENT OF POPULATION DURING THE PERIOD.

	Males.	Females.	Total.
Remaining November 30, 1906	190	251	441
Admitted during past two years	161	184	345
Total number under treatment past two			
years	351	435	786
Average daily population	229	339	568
Discharged during past two years	135	149	284
Discharged as recovered	72	99	171
Discharged as improved	3	6	9
Discharged as unimproved	1	3	4
Discharged as not insane	5	3	8
Transferred to other hospitals	4	2	6
Total number died during past two	-		
years	50	36	86
Per cent. of recoveries on admissions			49
Per cent. of deaths on number treated			10

#### TOTAL NUMBER UNDER TREATMENT FOR PAST TWO YEARS.

Seven hundred and seventy-five were supported by the State and eleven were admitted as pay patients and kept at private expense.

The per capita cost for the biennium, with daily average of 568 patients, including money not appropriated by the State, but obtained from pay patients and the sale of junk, rags, etc., is \$185.24. On the money appropriated by the State the per capita cost is \$167.25.

For other statistical information I refer you to tables herewith appended.

It is exceedingly gratifying to be able to report that no homicide has occurred in the institution during the period, and no suicide has occurred during the two years. The general physical health of the patients has been fairly good, and might be considered exceedingly good, on account of the age and the long residence of some of the patients in the Hospital. We have had no cases of contagious or infectious diseases. The death rate during the period is higher than it has ever been during the existence of the Hospital. We have had very few cases of tuberculosis, owing largely to the fact that we have declined to admit them as a matter of protection to the patients already in the Hospital.

We have had very few escapes from the Hospital. Most of them have been returned. Some recovered during their absence and were discharged. We have endeavored to be careful in discharging patients as recovered, but it is almost impossible to make an accurate diagnosis in cases of recurrent mania. They are apt to have their recurrences and have to bereturned to the Hospital. We still adhere to our system of permitting patients of stationary convalescence, but of doubtful recovery, to go home on probation or trial. We still adhere to the rule of classifying the pay patients, and there are three classes: first, the patient who pays the amount charged by the Board of Directors; second, those who pay what it costs per capita for maintenance per month; third, those who pay over and above what it takes from their income to support those who are legally dependent upon them. In the first class there is an average of eleven; second, three; third, none.

#### EXPENDITURES OF APPROPRIATIONS.

During the past two years appropriations for maintenance amounted to, annually, \$95,800, making an aggregate of \$191,600. To that can be added \$7,863.74, being some money left over from the appropriation made for equipping the new building for females. This does not include cash receipts from the pay patients.

Appropriations for maintenance, \$95,800; \$95,000 being the amount asked for for maintenance for 537 patients, that being the capacity of the Hospital. It was evident to my mind that the Legislature intended to give us \$8,000 instead of \$800 (this was probably a clerical error) to meet the expenses of water and lights, as we asked for \$2,000 for water and \$800 for lights.

The Steward's report discloses the fact that for the fiscal years 1907 and 1908 the cash receipts and expenditures from December, 1906, to December, 1908, were:

Cash receipts for 1907	\$100,588.52
Expenditures for 1907	100,542.66
To balance	\$ 45.86
Cash receipts for 1908.	\$109,764.21
Expenditures for 1908	109,899.59
To balance	\$ 135.38
Cash receipts for 1907 and 1908	\$210,352.73
Expenditures for 1907 and 1908	210,442.25
To balance	\$ 89.52

This includes the amount collected from pay patients and the sale of junk, rags, etc. We have expended a great deal of our appropriation for maintenance that could not have been very well dispensed with. It is well enough to classify in this report what it is.

THERE HAVE BEEN EXPENDED IN THE LAST TWO YEARS THE FOLLOWING AMOUNTS:

To overhauling, renovating, scraping walls, replastering	
and hard-finishing same, and building nine bed rooms and	
one general dining room, two bath rooms with cement	
floors, complete with closets, tubs, lavatories, etc., and	
furnishing same (over laundry)\$	1,780.00
To eight three-room cottages, 18 x 46, frame buildings, com-	
plete, for outside employees	3,200.00
To one frame metal-roof building, 36 x 80, containing fif-	
teen box stalls, feed and harness rooms, with hayloft	
overhead, complete	3,100.00

To improvements and additions to greenhouse\$	300.00
To entting ditches for reclaiming and draining low grounds	
on Grimes land, and digging post holes for pasture	
fences	1,481.00
To recovering and repairing the Spring Hill house, occu-	
pied by farmer	300.00
To new floors put down in buildings	460.00
To one sawmill, complete	680.00
To excess on appropriation expended on storehouse, cold	
storage, carpenter shop and equipments	3,483.25
To one 150-ton silo, complete	317.00
To supplies for engineering department, pipe, etc	1,575.00
To one two-story, metal-roof building, brick, 16 x 22, for	
cannery	290.00
To amount expended for water and lights last two years—	
Water ,	4,220.71
Lights	5,576.20
To cost of 1,500 rods wire fencing	444.73
To repairing roof, brick, mason work, glass, putty, tools,	
cutting cord wood, and other expenses incurred in im-	
provements and repairs	4,364.84

\$31,572,73

I am under the impression that, under the provisions of the Biekett bill, the Hospital Commission would at least aid in meeting the expenses just mentioned, for it was absolutely necessary to do so, and by the eareful purchasing of supplies we have been able to get through the biennium with a deficit of \$\$9.52.

The Hospital Commission ordered the erection of an annex to the male department, which has been completed, at a cost of \$64,000. It is most sanitarily built, well heated, well ventilated, giving an abundance of good, pure, fresh air. They have also given a contract for some colony buildings. The grounds have been broken for two of them. One is situated just southwest of the western terminus of the female annex, and will accommodate eighty patients. In this house we intend placing our best patients, so that they can more rapidly convalesce.

1909.]

#### NEEDS OF THE HOSPITAL.

Tabulated list of the most urgent needs of this Hospital appears as follows:

Annual appropriation for maintenance for 1909, Hospital	
capacity, 695 patients\$115	00.000,
Annual appropriation for maintenance for 1910, Hospital	
capacity, 695 patients	00.000,
Annual appropriation for 1909 for water 3	3,500.00
Annual appropriation for 1910 for water	3,500.00
Annual appropriation for 1909 for lights	3,500.00
Annual appropriation for 1910 for lights	3,500.00
To purchase tile, drain pipe, keep up and improve road-	
ways 2	2,000.00
	3,500.00
Electric lighting machinery and wiring large enough to	
light the Hospital	1,500,00

The storeroom is about being completed, and as soon as the proper shelving can be placed in we will put in the storekeeper and store it with goods.

I again, sir, eall your attention to the necessity of wiring the old building and to obtain a general electric lighting plant, the cost of which will be \$11,500 (for the items of eost I refer you to the Engineer's report), which can be done with our own force. This is very essential to the good management of the Hospital, for if under any circumstances the gas plant in Raleigh should become inoperative, we would be entirely without light; and, again, the new buildings are wired, and all they need is some power to operate it.

I desire to call your attention to the reports of the heads of the departments, which you will find herewith appended.

I desire to express my appreciation of the valued counsel and the active co-operation of the members of the board, and especially the Executive Committee, who have at all times tendered me their most hearty support and timely advice.

To the staff I must aeknowledge my high estimate of their intelligent and painstaking interest in the discharge of their many duties.

Respectfully submitted,

James McKee, Superintendent.

## CHAPLAIN'S REPORT.

To the Board of Directors of the Central Hospital for the Insane, Raleigh, N. C.

Gentlemen:—As Chaplain of the State Hospital at Raleigh, I beg leave to report that during the year 1908 I conducted religious services on the Sabbath, conducted the funeral services over those who were buried in the Hospital cemetery, and in other ways endeavored to minister to the well-being of the patients.

Yours truly,

THOS. N. IVEY, Chaplain.

## TREASURER'S REPORT.

STATE TREASURY DEPARTMENT, RALEIGH, N. C. January 14, 1909.

I hereby certify that the receipts and disbursements of the State Hospital, Raleigh, for the two fiscal years 1907 and 1908, were as follows:

Balance brought forward, December 1, 1906, ... \$ 9,509.14

Appropriation for support, 1907	95,000.00 10,555.79 9,434.36 800.00	
Total\$	125,299.29	
Warrants paid for all purposes		\$104,690.85 20,608.44
Total		\$125,299.29
Balance December 1, 1907\$ Appropriation for support, 1908 Appropriation for contingent repairs Earnings, 1908	20,608.44 95,000.00 800.00 6,100.47	

Total \$122,508.91

#### STEWARD'S REPORT.

DIX HILL,

STATE HOSPITAL AT RALEIGH, RALEIGH, N. C., November 30, 1908.

DR. JAMES MCKEE, Superintendent.

Dear Sir:—It is with pleasure that I present to you and the Board of Directors the Steward's report for the fiscal years 1907 and 1908 in tabulated form.

In Abstract F you will note that our Improvement and Repair account is unusually large, owing to the many necessities for which we had to spend these funds. You will find attached a list of the moneys used for the above-stated purpose.

Abstract A shows the monthly expenditures.

Abstract B shows expenditures classified.

Abstract C shows cash receipts from various sources.

Abstract D shows products of farm, garden and dairy, with their estimated values.

Abstract E shows the appropriations, expenditures and outstanding accounts for the two years.

All of which is respectfully submitted.

CHAS. HARDESTY.

Steward.

243.11

#### ABSTRACT A.

To excess on appropriation expended on storehouse, cold	3,483.25
storage, carpenter shop and equipments	
Total\$	14.784.25
To amount forward\$	14,784.25
To one 150-ton silo, complete	011.00
To supplies for engineering department, pipe, etc	1,575.00
To one two-story metal-roof building, brick, 16 x 22, for	
	290.00
ro amount expended for water and lights last two years—	
Water	4,220.71
Lights	5,576.20
To cost of 1,500 rods wire fencing.	444.73
To cost of 1,500 four wife relating work, glass, putty, tools,	
cutting cord wood and other expenses incurred in im-	
provements and repairs	4,364.84
	31,572.73

#### ENGINEER'S REPORT.

Dr. James McKee, Superintendent,

State Hospital, Raleigh, N. C.

Dear Sir:—I herewith present to you the report of this department for the fiscal years ending November 30, 1908. It includes the eare of the boilers, steam-heating, laundry machinery, ice and refrigeration, lights, water pipes and plumbing, roof and drain pipes. Below you will find all permanent improvements for each department, also the most urgent needs of this department.

A need that I think should be given your best effort to obtain is an electric lighting plant, the cost of which will be about \$11,500. Itemized cost as follows:

Some of the new buildings are so far away we will have to have some means of lighting them.

I would recommend a change in the heating system of the seventh, eighth, ninth and tenth wards, connecting and making it the same as in the new building adjoining, as then we could heat it without extra cost, and save the cost of about 40 horse power per day.

TO PERMANENT IMPROVEMENTS AND REPAIRS, WATER AND STEAM PIPE.

To 150 feet of 3/4-inch water pipe.

To one large pot, bricked up in eannery.

To renewing 1,200 feet of 11/2-ineh steam pipe to wards.

To renewing and enlarging green house, 600 feet of 1-inch pipe.

To putting in 1 dish-washer and connecting same with hot and cold water, steam and drain pipe; 150 feet of drain pipe for congregated dining room.

To three bath tubs, three lavatories, two water-elosets, one dish sink, 250 feet of 34-ineh water and drain pipe.

To three steam radiators, 80 square feet each; one steam trap and 200 feet of 1-inch steam pipe for rooms over laundry.

To making one steam box, or prover, for bake oven; 30 feet of steam pipe for connecting same.

To 550 feet of 1-inch water pipe and three hydrants at farm hands' houses.

To renewing 150 feet of 1-inch water pipe and putting up one 25-horse power engine and boiler and chimneys for sawmill.

To 1 30-horse power engine and 200 feet of 3-inch steam pipe, and 100 feet of 34-inch water pipe for carpenter shop, and 200 feet of drain pipe.

To new cold storage.

To 3,000 feet of 11/4-inch pipe put in cold storage.

To lining ceiling with galvanized iron.

To one new brine tank.

To 20 new ice cans.

To 4 new ammonia coils, and taking out old brine tank and moving it in new storehouse and rebuilding same, and putting in new brine pump, new condensing coil, new ammonia receiver, and connecting it all to our old compressor through 150 feet of 12-inch drain pipe packed with cork and pitch, connecting new storehouse with hot and cold water pipes; 400 fect of pipe.

To 300 feet of 41/2-inch drain pipe.

To 120 feet of 11/2-inch pipe connecting new male annex with gas.

To taking out water-closets and all water and plumbing works in 7th, 8th, 9th and 10th wards.

To putting in 300 feet of 18-inch drain pipe in front of carpenter shop on driveway.

#### LIGHTING DEPARTMENT.

To one new 15 K. W. generator for motors and fans.

To wiring rooms over laundry, for 24 electric lights, putting up three combination gas and electric fixtures, 17 drop-lights.

To 4 electric fans in laundry.

To 4 electric call bells and push buttons on J, K, L and M wards.

To one 10-horse power motor and 700 feet of No. 6 electric light wire, and putting up same at cow barn.

To wiring seven houses for 21 electric lights and 21 drop-

lights; 3,000 feet of electric light wire, putting up same, connecting farm hands' houses with lights.

To wiring new stables for electric lights and three drop-lights.

To three new combination gas and electric fixtures for Administration building.

#### LAUNDRY.

To 41/2 squares of tin roof.

To 10 feet 3-inch conductor pipe.

To 24 feet 4-inch drain pipe.

To 12 feet of 10-inch vent pipe; one ventilator, receiving room.

 ${\rm To}~5$  squares of new tin roof on laundry and 4 new ventilators.

To 50 feet of 12-inch galvanized iron air pipe.

To 1 10-gallon bluing can.

To overhauling two washers.

To 1 new brass end to cylinder.

To new tight and loose pulleys.

To 4 new gear wheels.

To 4 new pinions.

To 1 new governor for engine.

#### GENERAL REPAIRS.

To 200 feet of new guttering.

To 4 squares of new tin roof.

To 50 feet of 5-inch conductor pipe.

To 40 feet of 4-inch conductor pipe.

To 1 8-inch ventilator.

To 1 1/2-gallon dipper and 4 large dustpans.

To 12 tin buckets for Administration building.

To 50 feet of conductor pipe on female wards.

To 20 feet of 5-inch gutter.

To 13 feet of 3-inch conductor pipe at cow barn.

To 6 squares of tin roof on cannery. To putting up corn mill at cow barn.

I have been constantly employed in renewing leaking pipes and valves, and keeping up all plumbing repairs, gas burners and all repairs in my department.

Very respectfully,

L. A. Kuester, Engineer.

#### GARDENER'S REPORT.

Dr. James McKee, Superintendent,

State Hospital, Raleigh, N. C.

DEAR SIR:—I herewith submit the biennial report of the operation of the farm, garden and dairy for the fiscal years ending November 30, 1908.

The Hospital grounds have been enlarged from one hundred and seventy-five acres to thirteen hundred and fifteen acres. The Hospital came into full possession of the Grimes land on the 1st day of January, 1908. This farm had been badly neglected, therefore it was necessary to incur an expense of cutting 12,135 yards of ditches. The Hospital enclosed one hundred acres for a swine pasture. Three months later we had the misfortune to lose the greater part of our herd by cholera. The infection was supposed to have been carried by the buzzards from the nearby pasture of a neighbor. A part of the farm was also enclosed for a cow pasture. This gives us an opportunity to raise all our calves, which, in the course of time, will give the Hospital returns in milk and beef.

The garden has furnished the Hospital with a sufficient supply of vegetables.

The dairy has fifty-three head of cows, which have supplied the Hospital with an average of ninety-four gallons of milk per day. With the enlargement of the Hospital it will be necessary to increase our cow barn.

The Hospital is situated on the ridge of a hill, and in time of heavy rains the roads are badly washed out, and before we can keep them in proper shape an underground pipe is necessary to carry off the water.

The garden, farm and dairy are at the present under my supervision, but with the enlargement of the farm I need an assistant, or the farm should be divided into departments.

The needs for the farm, garden and dairy are as follows:

and the same of th	
Enlargement of barn	\$ 500.00
Implements for the farm	500.00
Drain pipe and ditching	2,000.00
Enlargement of greenhouse	1 000 00

Very respectfully,

James Adams, Gardener.

## CARPENTER'S REPORT.

Dr. James McKee, Superintendent,

State Hospital, Raleigh, N. C.

DEAR SIR:—At your request I submit herewith a report of all the work done by this department during the past two years ending November 30, 1908.

There have been built by the Carpenter's Department:

Eight eottages 18 x 46 feet for quarters for farm help, etc.

One barn with metal roof 38 x 80 feet, containing fifteen box stalls, one feed room, one harness room and hayloft.

One storehouse 38 x 70 feet, three stories high, for general storage purposes and iee plant combined.

One carpenter shop 40 x 80 feet, with a blacksmith shop 30 x 35 feet attached.

The carpenter's shop has been equipped with one planing machine, one buzz planer, one band-saw, one cut-off and rip saw, one mortising machine and one 30-horse power engine to drive the above machines.

One second-hand sawmill has been purchased, repaired and installed by this department, and has sawed 50,000 feet of lumber used in building cow sheds, etc.

One 150-ton silo has been built for the farm and garden department.

One two-story building 16 x 20 feet has been built for a cannery and the night watchman's quarters.

The laundry has been overhauled, and nine bedrooms have been fitted up for the laundry help, with dining room and two bath rooms with bath tubs, sinks, etc., complete.

One shed 16 x 102 for young stock has been built in pasture.

Fifteen hundred rods of pasture feneing has been built for cattle and swine.

The Grimes house has been recovered and repaired.

One broom eloset has been added to gangway.

An eight-foot board fence has been placed around the male court.

New floors have been laid in the Administration building and in the wards where they were most needed.

The dance-hall floor has been overhanled.

The walls in the Administration building have been seraped and partly hard-finished.

The snmmer houses, lawn seats, etc., have been repainted.

All repairs of the Hospital, such as keeping Administration building and wards in repair, repairing furniture, vehicles, farm implements, etc., etc.

I would recommend that, in order to replace the sash in all of the old buildings, which have been in use since the Hospital was built, and are so rotten that the putty and glass will not stay in, a sash machine and shaper be purchased at a cost of about \$1,200 with which to make the sash out of our own material.

I also recommend for sanitary purposes, etc., that all the woodwork in the old buildings in the wards be repainted at an early date.

Also, that the entire woodwork on the outside of the Administration building, kitchen and laundry be repainted, as it is essential to the preservation of the wood as well as to the general appearance of the Hospital, at a cost of \$3,100.

I also recommend that the Grimes honse, now occupied by the Gardener, be thoroughly overhauled and painted at once, at a cost of \$400.

Respectfully submitted,

T. A. Holliday, Carpenter.

## MATRON'S REPORT.

#### PRESIDENT'S REPORT.

To Honorable R. B. Glenn,

Governor of North Carolina.

DEAR SIR:—The Board of Directors of the North Carolina School for the Deaf and Dumb have the honor to submit to your Excellency this their ninth Biennial Report, and respectfully ask your careful examination of the condition, progress, and needs of the Institution of which they are the State's humble custodians.

This School is yet in its teens, having been established by act of the Legislature of 1891. This body realized the necessity of placing the blind and the deaf in different schools, for obvious reasons, and accepted the generous offer of Morganton's progressive citizens, and located the school there. They "builded wiser than they knew," for nowhere else in the State is there a situation commanding superior advantages. The elevation above the malarial line, the excellent natural drainage, the pure water and exhilarating breezes, the panorama of the world-famous mountains, which walls the northwest, together with the salubrious climate here found, make the situation ideal. Long have the citizens of Morganton been celebrated for their intelligence and social culture, and this adds much to the desirability of the location for the School.

The history of the early struggles, the gradual and yet successful progress of the North Carolina School for the Deaf and Dumb during its eighteen years of life, is an open book in this State, and one to which the Board of Directors point with pride. It has had difficulties, it has had problems; but neither have swerved the Board from their sense of obligation to the State, or duty to the unfortunate class for whose best physical, mental and moral development the School was founded.

The members of the Board have ever fully appreciated the sacred privilege placed in their hands by the State of North Carolina. We are the custodian of a class of boys and girls whose ears have been stopped, whose lips have been sealed, who do not comprehend the meaning of life in any sense of its

sacred relations, and who cannot realize the sacred obligations it imposes. But for this beneficent provision made by the State these children must be a burden on their parents during their ehildhood and youth, and on the State in their maturity and old age. It is a glorious privilege to help unseal these dumb lips and to unstop these deaf ears by educational policies. of which we have the directing power here; and to unfold to their mental and moral vision the material, the intellectual. the moral world with their wonderful reaches and stretches of beauty, of truth, of life; and to make happy, prosperous, independent citizenship possible to them. By means of schoolroom instruction they reach a standard of scholarship in spelling, writing, English, arithmetic, history, geography, and eoordinate branches, equal to the best public-school course of study. By means of trades teaching, girls are taught plain sewing, dress-making, eutting and fitting, and eooking; boys are taught printing, shoc-making, eabinet-making and earpentry, and agriculture with its allied industries of dairving, and cattle and hog-raising. Thus they become independent and useful eitizens of the State.

In the education of the deaf, two methods are recognized, the oral or German method, founded by Samuel Heinieke, and the manual or sign method, or French method, founded by Abbe de l'Apee. For more than a century these methods have been on trial in the old world, each method accomplishing much. A large majority of the schools of Europe, about 83 per eent, use the German, or Oral method. In former years, in fact till 1867, the manual or sign method was exclusively used in the United States. Since that period, at which time the first oral school in this country was established, there has been a great many changes in methods; in fact, if one takes into consideration the fact that there was necessarily a lack of competent and experienced oral teachers, the growth and development of the German idea in American schools is remarkable. Fully two-thirds of the pupils under instruction in the Ameriean schools at the present time are being taught speech, speech-reading and writing, which is the oral method.

The North Carolina School is what is known as a Combined School, as are most American Schools for the Deaf. Every child that enters the School is first placed in the oral department, and given a fair opportunity to learn speech, speech-reading and writing; and he is kept there unless after thorough trial it is found that through mental or physical imperfections, or advanced age, he cannot be taught successfully by the oral method.

This policy of the North Carolina School is the policy of almost every progressive school for the deaf in America, except where oral methods are employed entirely. A resolution was passed by the Convention of the Deaf-Mute Instructors, presided over by Dr. Gallaudet, the most conservative, perhaps, of all the combined school advocates in this country, at Berkeley, California, in 1886, that "persistent endeavors should be made in every school for the deaf to teach every pupil to speak and read from the lips." And again at a Conference of Superintendents and Principals in Colorado, in 1892, a resolution was passed without a dissenting vote or voice that "pupils who are able to articulate fluently and intelligently should recite orally in their classes." Thus it will be seen that we are not ultra in the North Carolina School, but only in line with this generally adopted policy. Those who condemn our policies and methods at Morganton, put themselves in an attitude of antagonism to, and criticism of, the methods recommended by a large majority of the profession in this country; and our experience so far abundantly justifies the correctness of methods employed in this School.

But not only does the school try to make scholars of those intrusted to its care, but to give them such instruction along industrial lines as will fit them to earn an independent living for themselves and families. Of the students in school now, ten are in the carpenter shop, twelve learning to make shoes, thirty-one learning the art of cooking, seventy in the sewing classes, twenty studying farming and gardening, twelve learning to be printers, and sixty-seven studying Primary Handicraft. Many of those who have been here have gone out into this and other States and have taken good positions, thus reflecting much credit on the North Carolina School's efforts in their behalf.

Two years ago serious charges were preferred to your Ex-

cellency against the Superintendent and the Board of Directors of this School. We asked for an investigation. Your representative, Hon. B. C. Beckwith, spent about two weeks here sifting every charge preferred. Every facility for a fair and full inquiry after the truth was afforded him, the officers and the books of the School were put at the disposal of the Court, and the result was that not a single charge of the complainants was verified, and the mouth of every self-respecting critic of the School was closed. The records of this investigation, and the results, are in your office. For the opportunity you gave us to clear ourselves of these charges, we are very grateful to you.

During this year the School has suffered serious loss in the deaths of Mr. J. G. Neal, of Marion, on April 11th, a faithful member of our Board, and Mr. W. G. Lewis, August 4th, the able and efficient President of our body. We feel the loss of these genial and patriotic citizens of the State deeply, and the School will greatly miss their wise counsel and sympathetic efforts.

For the enviable reputation which the North Carolina School for the Deaf and Dumb holds among American schools, the Board wish to acknowledge the great debt the deaf and the State owe to Superintendent E. McK. Goodwin, to whose wisdom in the selection of a corps of men and women, teachers the equal to any in the profession, and to whose superior executive ability in the administration of the affairs of the arduous position which he has held since the establishment of the School, so much of its success is due.

In order to meet the increased cost of living and the increased attendance, occasioned by efforts of local officers of the law, and compulsory attendance law now on the statute books, we most earnestly and respectfully ask an annual appropriation of \$50,000. To accommodate the increased number of classes we need another building, and we respectfully ask an appropriation of \$40,000 for this purpose. The State has dealt generously with her afflicted ones, but she must provide school room for those she is compelling to enter by law.

In the schools for the hearing children of the State the motto is, "No footstep backward." Those who have charge

of the North Carolina School for deaf children, as long as it is in their hands, will defend it from the clutches of those who would do violence to that motto in training these unfortunates, in sealing lips that ought to be taught to lisp His name, and stopping ears that can be made to hear the truest harmonies of life.

Respectfully submitted,

MARTIN H. HOLT,
President of Board of Directors.

## SUPERINTENDENT'S REPORT.

To the Hon. M. H. Holt, President, and the Honorable Members of the Board of Directors, of the North Carolina School for the Deaf and Dumb.

GENTLEMEN:—In accordance with statutory law and requirements, and your regulations, I have the honor to submit herewith for your consideration my Ninth Biennial Report of the North Carolina School for the Deaf and Dumb, for the period ending November 30, 1908.

During this period we have had 323 pupils enrolled—174 boys and 149 girls. This, you will see, is the largest attendance in our history, and to-day our enrollment for the present session is 249, representing every section of our State. This is the largest attendance, according to our population, of any Southern State, and yet there is still a large number who are eligible, not in school, although we have a compulsory attendance law.

It is very gratifying to note the interest many County Superintendents of Schools are taking in the education of the deaf, and we confidently believe that the day is not far distant when we shall be able to reach almost every deaf child in the State. It is gratifying, too, to note that we are recognized as part of the educational system of the State, and not merely as a custodial home for the deaf for a period.

#### OUR FINANCES.

It has never been my boast to show how cheaply I can run this School, but rather how well, with the means at hand. We have had to exercise the most rigid economy in every department to accomplish the results in accordance with the purpose for which the School was created. Yet, with all of our economy, we are compelled to report a small deficit; but while we show a deficit, we have assets from purchases during this period to more than balance this debt.

In the spring of 1907 a piece of land adjoining our property

was thrown on the market at a reasonable price, and the Board purchased same, which land serves as a matter of protection to our property. The price paid for this land was \$2,800, and to-day it could be sold for more than it cost. I respectfully ask that you ask the Legislature to make appropriation to meet this deficit.

For a more detailed financial statement I respectfully refer you to the records and report of our Clerk and Steward, Mr. J. R. Clodfelter, who presents herewith his report and classified accounts.

#### ENROLLMENT.

During this biennial period we have enrolled 249, forty-three of whom entered this session for the first time. This indicates that we will very soon have an attendance of over 300 pupils. Indeed, there must be more than 400 deaf children of school age in the State, and to meet the demand upon us we will have to build another building to accommodate 100 more children, for at present we are reaching only about two-thirds of those who are eligible, and we are not doing our full duty until every child is reached. The building should be in keeping with the present buildings and the dignity of the State, for we are building for the future. Such a building cannot be built for less than \$40,000. This building was in our original plan.

#### OUR CORPS OF TEACHERS.

It has been our constant aim to get together a strong corps of teachers who are specially trained for the arduous duties of teachers of the deaf. Less than a score of years ago there was practically no special training for teachers of the deaf, while to-day the young teacher entering the work must have had special preparation, in addition to the necessary educational training required of teachers in our best public schools. No well-regulated school would accept a teacher to begin the work of teaching the deaf who could not obtain a first-grade certificate to teach in the public schools of the State. Well-trained teachers of experience are in demand, and their services command better salaries than teachers of the hearing.

While there has been much progress and advancement in all branches of teaching, it is nowhere more marked than in the methods of teaching the deaf, and the American schools have doubtless led the world in these wonderful strides in advancement.

#### CHANGES IN OUR CORPS.

There have been a number of changes in our corps of teachers, some of our best teachers going elsewhere to teach because of higher salaries paid.

Since our last report Miss E. T. Welsh, Supervising Teacher, resigned to accept a position in the Rhode Island School, where she commands a higher salary. In her place we secured the services of Miss Louise Upham, formerly of the Northampton, Massachusetts, School. Miss Upham came to us with splendid training and experience. At the close of last session Miss Mabel Haynes, who had taught in our oral department for seven years, resigned to go to Cuba as a missionary, and Miss Carrie Haynes, who taught in the manual department for the same length of time, resigned to teach in Texas. The Misses Haynes had both been very faithful and efficient teachers.

Miss Lucy May Johnston, who organized our Primary Handicraft Department, and had been a faithful and enthusiastic advocate of the department, resigned to travel and study abroad. This vacancy was filled by the selection of Miss May Hunter, who had graduated from our Normal College after taking a four years' course.

After continuous service of more than forty years, Mr. D. R. Tillinghast retired from the work. He had been a faithful teacher. To fill these vacancies, we secured the services of a number of well-trained teachers,—some of whom had liberal experience and are proving themselves faithful and efficient.

At the close of the school year, 1907, Capt. Geo. L. Phifer, who had been our steward ever since our School opened, resigned on account of failing health. The vacancy was filled by the selection of Mr. J. R. Clodfelter of Charlotte, who has filled the position very acceptably. Some other changes have been made, of which note has been made from time to time.

#### COMPULSORY ATTENDANCE LAW.

The General Assembly of 1907 passed a law requiring every

deaf child in the State to attend school at least five years. The moral effect of this law has been good, and while we have not attempted to enforce attendance, I do believe the law has aided in reaching some, and will doubtless be the means of getting nearly every eligible child in school.

#### THE SCOPE OF OUR COURSE OF STUDY.

The statute prescribes the public-school course of the State. The majority of the pupils do not stay in school long enough, however, to complete the course, while a few do complete it and take an extra year or two for special preparation to enter Gallaudet College, of Washington, D. C., where deaf students, who are capable, can graduate with degrees. We have five students there now—two young men and three young women, all taking the regular college course, and standing creditably in their college work.

#### METHODS OF TEACHING IN VOGUE IN THIS SCHOOL.

Our School is a *combined school;* that is, we teach both by the oral and the manual methods, as does almost every State school in America. In some States a larger proportion are taught orally than in others; but it is conceded by all branches of the profession that from year to year a larger percentage of the deaf are being taught successfully by the oral method. We hold that not all deaf children can be taught orally to the best advantage, but hold also that the percentage is small that cannot be best taught orally. In both departments the same course of study is pursued, using the same text-books. The one uses speech and speech-reading and writing, while the other uses the manual alphabet and writing, the ''sign language'' being cut out by manualists as well as oralists in the class-room.

For a more detailed account of the educational work, including methods, I refer you to the report of Prof. T. V. Archer, the principal of the Educational Department.

#### MR. ARCHER'S REPORT.

To E. McK. Goodwin,

Superintendent North Carolina School for the Deaf and Dumb.

Dear Sir:—I have the honor to submit for your consideration the following report, covering the work of the Educational Department of this School for the biennial period, December 1, 1906, to November 30, 1908.

It is gratifying to report that this period has been one of general progress. I think it may be said without egotism that the high standard of the School, of which I was pleased to speak two years ago, has been fully maintained.

The second year particularly has been one of harmony and general advancement. The methods of instruction and the general policy of the School remain as I found them and as they were reported two years ago. This School, along with the majority of schools of the country is, and has always been, a combined-system school. It has two methods of instruction, known as the oral and the manual. In the former the education of the child is carried on by means of speech, speech-reading and writing. In the latter it is done through finger-spelling and writing. The difference, be it clearly understood, is one wholly of method and not in the amount or character of work given. In both departments the course of study is the same and the text-books are identical.

As to policy, it has long been the custom of this School, as it is of practically all schools of the country, to place all the entering pupils in the oral department. We believe it to be the right of every deaf child to be given the opportunity to learn to speak and read speech, if possible. Our experience has been that when children are given this opportunity, with anything like favorable environment, a large majority of them are able to go on and do all their work under this method; thus not only getting everything that can be given to pupils educated under the manual method, but getting it more in accordance with the laws that govern the development of normal children, and in addition attaining to some degree of proficiency in speech and speech-reading.

As the surroundings of the pupil become more favorable for the development of the speech and speech-reading habit, the greater the per cent of pupils that can be educated by the oral method. This is not saying that eventually all can be educated by this method, but it is saying that a large majority of them can be.

Our experience, too, along this line has been that of a large number of the most progressive schools of the country; and to-day the School at Morganton is recognized by the profession as among the best in the country. While adhering to the policy above set forth, the School never has, and I trust never will, keep a pupil in one department when it believes he can be better educated in the other. We use the term "educated," too, in its broad sense, meaning thereby the highest possible development of the child, mentally, morally and spiritually.

In enrollment the School has increased from 219 to 249—the largest number in the history of the School,—of these seventy-five are in the manual department under the instruction of six teachers, being an average of 12.5 pupils to the class. One hundred and seventy-four are in the oral department, under the instruction of fifteen teachers, an average of about 11.5 to the class.

In numbers we have reached the full capacity of our buildings. In the school building every room is occupied by a regular class, and one temporary room has been provided on the third floor. One other small room can be utilized and it is already planned to put a class in it within the next few weeks. When that is done it will be impossible to provide for another class in this building.

It is a matter of considerable pride that up to this time no eligible child has ever been denied admission to the School. This record, however, cannot be maintained another year in the present buildings. We simply have not room for any more and are face to face with this plain proposition—either limit the attendance or provide additional accommodations.

Two years ago the Legislature, in its wisdom, saw fit to pass a law making it compulsory on the part of deaf children to attend school. We heartily commend such legislation and already see its beneficial effect. In no instance has it been necessary to invoke the penalty of the law to secure attendance, but it has brought to light a number of apparently eligible pupils, and has brought the School to the attention of a few parents of deaf children, who before were not aware of its existence. It has enabled us, too, to form a more correct estimate of the number of deaf children, for whom this School must yet provide, if they are to receive any education. Two years ago I placed the minimum number of these at 100. There is every reason to believe that 200 would be more nearly correct, and certainly 150 is a conservative estimate.

A building that would accommodate this additional number is a necessity and cannot be overlooked without doing injustice to the deaf children of the State.

The course of study, as reported two years ago, has been more systematized and the series of text-books at that time adopted is still in use.

I would again emphasize the necessity of having teachers well trained for this special line of work. Those that we have have shown a very commendable spirit in availing themselves of opportunities for advanced study in methods and the general work of teaching the deaf. During the last two years six of them have taken the summer course offered by the Clarke School at Northampton, Mass.

It is reasonable to suppose that an illness of sufficient severity to cause deafness would leave in its train other ailments more or less serious. We find from experience that this is true. I have now for your inspection a list containing the names of more than seventy-five pupils, who, it seems, are suffering from dieases more or less acute of the ear,

eye, nose or throat. Many of these would be greatly benfited by the attention of a specialist and all would be more or less relieved.

The Industrial Department should be placed more nearly on an educational basis. Many of the pupils who have taken the training offered in this department are now making a very fair living; but for lack of funds we have been compelled to pay too much attention to turning out work and too little to teaching the industries.

The School is fairly well supplied with material for teaching; this is constantly being worn out and must be replaced. One of the most valuable assets in this direction is the supplementary books. We need more of these, and in no way can more be had for the money than in supplying plenty of suitable reading matter.

The Department of Primary Handicraft has been reorganized and a course of systematic instruction inaugurated. There are now sixty-seven primary pupils under instruction in this department.

Frequently we are asked to take children who are mentally incapable of pursuing the course of study required of deaf children having normal minds. There is no place provided in the State where these can receive training and their deplorable condition alleviated. It is now the only class for which the State has not provided. There should be a school for feeble-minded children established where they could be trained, many of them, into self-supporting citizens. Otherwise they are almost sure, sooner or later, to become charges upon the charity of the State, if nothing worse.

I wish to thank you for the unfailing support given me in my work, and through you to express also my appreciation of the work of the teachers, without whose sympathy and co-operation the high standing of the School could not be maintained.

Respectfully submitted.

T. V. ARCHER,
Principal Educational Department.

November 30, 1908.

#### INDUSTRIAL DEPARTMENT.

The primary purpose of the creation and establishment of this School, was the education of the deaf children of the State; and by education we mean the teaching of these unfortunate children to read and write understandingly, and to teach them the primary and fundamental branches taught to the more fortunate of our children. But in schools for the deaf, where in children spend so much of their young lives, it becomes necessary to have industrial training, to go hand in hand with the literary education. We endeavor to instill in them habits of industry, as well as inculcate in them that labor is honor-

able. Indeed, we have attained some gratifying results in our industrial training, for many of our boys and girls are earning a competent living; indeed, in many instances, doing better than the average of their respective hearing brothers and sisters. We have said before, that we did not expect to turn out leaders in the industrial world, but we can prepare them to become independent, self-supporting and self-protecting men and women.

Our industrial work for the boys is limited to wood-work, including carpentry and cabinet-making, shoe-making, printing and type-setting, and farming and gardening. The girls are taught sewing and dress-making, cooking and general domestic work, such as every girl in any well-regulated house should receive.

For the deaf young man I believe farming is by all odds the best vocation in this State. It gives him an opportunity to have, in connection with his regular farm work, any of the several collateral branches of industry that can be practiced on the well-regulated farm with small outlays—such branches as stock-raising, poultry-raising, trucking, bee-raising, and other industries quite as profitable. Every deaf boy should be taught some industrial pursuit while taking his school course, for they are shut out of taking a regular apprenticeship open to their hearing brothers.

#### PRIMARY HANDICRAFT.

In addition to our regular industrial training for both boys and girls, we teach primary handicraft to the younger boys and girls. The purpose of this branch is at least two-fold: it awakens the backward, undeveloped ones and stimulates the brighter ones. The department was opened three years ago; the results not only justify the outlay, but would justify broadening its scope and increasing its facility.

#### APPLICATION TO ADMIT DEAF-BLIND CHILD.

The State has made no provision to educate children who are deaf, dumb, and blind. We have had only one application for such child — Minnie Lovitt, of Catawba county. This child was admitted to this School in January, 1908, but her

parents removed her from school to move to a distant part of the State. During the brief period that Minnie Lovitt was in school she proved to be an apt pupil and gave evidence that she could be educated and led out of the pitiable darkness in which she is groping. It is agreed by leading educators of the deaf and of the blind, that the methods used in educating the deaf, and the environments of a school for the deaf, are more adaptable for the deaf-blind than the methods used in teaching the blind and the environments of the school for the blind.

To assume this added responsibility there should be special provisions made, and it would cost at least \$600 per annum. Will you assume this added responsibility?

#### PHYSICAL CONDITION OF OUR PLANT.

The plant of this School, while not elaborate, nor is there any attempt or desire to make it so, is reasonably well equipped, as far as our plans have been carried out, for the purpose of its creation. We do need many appliances and added equipments, which some schools have, and which would add to the efficiency of our work. There are many repairs needed, especially the painting of all outside wood work, as a matter of protection. Our boiler-house needs general overhauling to make it convenient and economical. The wood yard should be graded down. We should macadamize roadways through our grounds, which now become almost impassable in winter months.

The sanitary condition of the buildings is as good, if not better, than at the time of our report two years ago. Our plumbing needs renovating, however, to avoid what may prove serious results.

#### WORK OF LADY PRINCIPAL.

Two years ago we dwelt on this department in our report, and we deem the need of the position more manifest now, as our experience is extended; and the position can best be filled by one thoroughly acquainted with the deaf, their characteristics and their needs in the broadest sense of the word.

Mrs. Winston has wielded a most wholesome influence over our deaf girls, supplying the instruction that girls usually get from their mothers in the best-regulated homes—instruction that can come from no one so well as from a mother of a daughter.

In addition to her other duties Mrs. Winston edits the Deaf Carolinian, a bi-weekly publication issued from our printing office. This publication is a medium of communication between parents and the School, and gives the boys learning the printer's trade an opportunity to see their work in practical form.

The Lady Principal has been especially valuable in moral and religious teaching to all of the pupils.

For further details of her work I refer you to her report, herewith included.

#### LADY PRINCIPAL'S REPORT.

To Mr. E. McK. Goodwin, Superintendent of the North Carolina School for the Deaf.

DEAR SIR:—There is such similarity from year to year, in the record of work in an institution of this kind, that the report I submit to you at this time cannot differ widely from the one of two years ago.

Recognizing the fact that the institution exists for the pupils, and that we, its officers and teachers, are its servants, and are here to do all we possibly can for their present uplift and their future good, I have endeavored to help our boys and girls along some important lines. There are so many things that ought to be known by our pupils that do not come under the head of school-room work, that I have tried to meet this in weekly talks to them.

During the winter and spring of two years ago there was a most decided religious awakening among our pupils—fifty-six professed faith in Christ, and forty-seven of these joined churches in town, and the past year there were twenty-three conversions. This was no doubt the climax of years of religious instruction. The majority of our pupils, those who have reached the age of understanding (this is much later with the deaf than the hearing), are Christians. I in nowise claim all this, for the Christian Endeavor Society, the religious teaching of conscientious teachers, the exemplary walk of those who do not teach, Sabbath afternoon lectures by our men teachers, Mr. David Tillinghast who was chaplain for two years, Mr. Archer and yourself, have had much to do with the religious life of our pupils.

Of the material work which I have endeavored to do it is needless for me to attempt a detail. It is here and speaks for itself. It is more or less in every part of our household. I can no more define it than the housewife can define what she does. It is the hundred-and-one little things here and there which, daily looked after, keep the house in order.

I have, without thought of whether it was strictly within my province or not, endeavored to do my duty to the institution by suggestion, advice and a live interest in the success of the individual or the department wherever I saw it needed.

#### THE DEAF CAROLINIAN.

The printing department has done excellent work. Two years ago last September, Mr. W. B. Tarkinton, who thoroughly understands his business, was installed instructor in printing and has, with a class of twelve boys, averaging seventeen years of age, printed not only our school paper, This Deaf Carolinan, an eight page bi-weekly, but has issued for more than a year the North Carolina White Ribbon, an eight-page monthly. In addition they printed last year (and will again this) the report of the Annual Convention of the Woman's Christian Temperance Union and our own school report in pamphlet form, averaging fifty pages each.

This outside work has added something over \$300.00 annually to our treasury. They have also printed in the way of lessons, programs, etc., for school-room purposes, scores of pages. Last year they got out a Christmas number of forty-four pages, which was, both for its mechanical and literary execution, complimented, not only by our own people, but many of the exchanges from schools for the deaf in other States have said very kind words of our Christmas number.

The grade of work done on the White Ribbon and the reports has been spoken of in terms that can be but a recommendation for our boys and their instructor. Our paper has been considered by the profession worthy of a place in the Volta Bureau at Washington, D. C. A year ago it was indexed. Miss Upham, Chief Instructor of the Oral Department, has during the past year (Miss Welsh the previous year) edited the Children's Page.

#### THE OBJECT OF OUR PAPER.

The object of a school paper is to show the results of training received by the class in printing, to furnish a medium for the discussion of topics of interest to the deaf and teachers of the deaf, and to keep the State and profession informed as to the progress of the school. To print and edit a school paper for the deaf involves more mechanical labor, all things considered, than the publishing of any class of newspapers, due to the bar of language and the learner's lack of English. It is seldom that an article, void of errors, can be set up by the average deaf boy without three readings of the proof. Often the correction must be corrected. But the encouragement lies in the fact that the deaf boy is very adaptable after he has served his apprenticeship, which, of course, takes a longer period of time than with the hearing.

I consider printing one of the very best, one of the most lucrative

occupations that can be taught the deaf. The profession everywhere is bearing testimony to this.

I wish to take this opportunity to express my appreciation of your cordial support and assistance at all times.

Respectfully yours,

L. A. WINSTON,

Lady Principal,

November 30, 1908.

## HEALTH OF THE SCHOOL.

Our health record has been unusually good during this biennial period. We have had no serious epidemic, and have had only one death. In April, 1908, Lucile Swain of Tyrrell county, a very delicate and frail girl of eleven years, died of heart disease after a very brief illness. Her death was not a great surprise to us nor her relatives.

We have had one light case of scarlet fever, but observing the most rigid precautions and treatment, we had no serious result with the case, and no further spread of the disease in the School.

For a more detailed report of the health, I refer you to Dr. J. R. Anderson's report, herewith attached.

#### DR. ANDERSON'S REPORT.

To Mr. E. McK. Goodwin, Superintendent North Carolina School for the Deaf and Dumb.

DEAR SIR:—I have the honor to submit herewith my biennial report.
The health of the children has been much better than heretofore. We have had only one or two infirmary cases and there have been no epidemics, though at present we have a good many cases of whooping-cough in the School.

At the beginning of the term, I found two cases of itch; no other cases developed. We have had one case of pneumonia, two fractures of the clavicle, one of the thigh bone, and one of the hand. We have also had several lacerated wounds of the hand, one of which required the amputation of a finger, one case of palmer abscess, and quite a number of chills, malaria in children from the low country. These cases soon yielded to treatment, and very little time was lost in school. We lost one child from acute inflammation of the heart. This child was deformed in body and dwarfed intellectually, and was a great sufferer from rheumatism.

We now have under treatment one case of scarlet fever, which has been in the infirmary some weeks. The boy is doing well and will soon be discharged.

I am of the opinion that the laying of the basement floor (where the

children play) in cement, has been remediable in some particular, as the health of the children has been much better since, the old floor giving off a great deal of infected dust. Our plumbing, by constant repair, has served our purpose, but it needs constant repairing and is in bad condidition. I would urgently recommend that a better and more up-to-date system be put in.

I also further recommend, that we ask for an appropriation for a small amount, say \$800, for special eye, nose and throat work, as well as for dentistry. I am confident if we could have more of this work done, the health of the children would be greatly improved and the acquirement of knowledge much facilitated.

I wish to say, in closing, that the children are excellently cared for, well nursed and well fed. I am very much indebted to you, as well as those who assist me in caring for the children, for your hearty co-operation and support.

Very truly yours,

J. R. Anderson, M. D.

November 30, 1908,

#### OUR NEEDS.

When plans were laid sixteen years ago we then planned for a third building, and two years ago we reported that the time had come when we needed such building, and the Legislative Committee approved same, but the appropriation was not made, however. I beg to renew this request, and emphasize the fact that we will be compelled to have more room or shut the doors to many applicants. Such building will cost at least \$40,000. With such building we can take care of the deaf for a number of years.

I have often said that our State has been as liberal to the deaf as her means would justify, but the time has come when the State is amply able, and no good citizen would deny the afflicted children of North Carolina what the State is able to give.

#### A SCHOOL FOR THE FEEBLE-MINDED NEEDED.

In every report that I have made to be transmitted to the Legislature, I have recommended that a school for the feeble-minded children of the State be established. Every year since this School was opened we have had to return one or more children home because they were feeble-minded, and not deaf. Although we take the greatest precaution not to allow such children to come in, from year to year they are sent to us, and

records show that there must be quite as many of this class as there are deaf and dumb; and their condition is the most pitiable of all the afflicted children. Doubtless some of these children could be educated to some extent, and under proper treatment the condition of all could be ameliorated. I most earnestly ask that you ask the Legislature to create a custodial home-school for the feeble-minded children.

## SERVICES OF SPECIALIST NEEDED FOR EYE, EAR AND THROAT.

There is no class needing the services of a specialist more than the deaf children, and especially do we need a specialist for the ear and throat. Many children suffer so seriously from ear and throat trouble that their general development is materially hindered, much more their education.

This class of work does not come under the practice of a general practitioner. Special treatment of the ear, removing tonsils or adenoids, will often materially improve the whole physical being and make the process of education possible, when otherwise the whole being would have been dwarfed. Often, too, our children's eyes need attention. Being deaf, their eyesight is doubly valuable to them.

We need, also, the services of a dentist. The necessity of dental work is no longer an open question, but a recognized absolute necessity. For this special work I most respectfully recommend that you ask for a special appropriation of \$800. I most respectfully refer you to the State Board of Health, as well as our attending physician's report.

#### MORAL AND RELIGIOUS TRAINING.

Deaf children, even those coming from the best-regulated homes, are dependent upon their teachers for their moral and religious teaching, and if this training is not done in school their education is sadly neglected. When a child has learned to read sufficiently he is given a copy of the Bible and taught to read and reverence it.

We have chapel exercises every Sunday, conducted by the Superintendent, Principal and gentlemen teachers. We have Sunday-school every Sunday, every teacher taking part. We use the International lessons and helps. Ministers of various denominations preach for us occasionally, and our pupils always pay most respectful attention and often give evidences of understanding quite as well as their hearing brothers and sisters.

The pupils have their Christian Endeavor Society, and I realize that this society has had a most wholesome effect on the moral and religious life of the School. Many parents have expressed their gratitude to the School and its management for moral and religious teaching received while in school.

#### ACKNOWLEDGMENTS.

The Superintendent begs to acknowledge the courtesy of all railroads of the State, making concession of one cent-a-mile rate to our School. It has enabled many to attend who would have otherwise grown up in pitiable ignorance.

We acknowledge with grateful appreciation the kindness of Mr. William Wade, of Oakmont, Pa., for the donation of books, periodicals, and numerous substantial kindnesses to many of the deaf children.

To the ministers of the various denominations, who have preached for us on many occasions, we express our profound gratitude.

As Superintendent, I acknowledge with most grateful appreciation whatever support and assistance have been rendered to me by subordinate officers, teachers and employees, in whatever capacity they have served.

And to you, Mr. President and gentlemen of the Board, for your courteous and kind consideration of me at all times. This kind co-operation has made my tasks lighter and my efforts more successful.

This report is respectfully submitted.

RALEIGH, December 23, 1908.

BOARD OF DIRECTORS,

School for the Deaf and Dumb, Morganton, N. C.

GENTLEMEN:—The undersigned, a committee of the State Board of Health, appointed to make the regular sanitary inspection of the State institutions at Morganton, made such inspection of your school on the 21st inst., and beg leave to report:

We made a careful and thorough inspection, and are pleased to say that we found the school buildings in an excellent condition from a sanitary point of view. The rooms and halls were very clean and neat, and the plumbing in good condition. A serious mistake was made in the original construction of the dormitory building in providing inside toilet rooms. As arranged, they get very little 'daylight of any kind, and never a ray of sunlight. This is contrary to the rules of sound sanitation, and if it can be done, should be remedied.

We calculated the air space allowed each pupil, and while not equal to the ideal requirements, the steam heating by the direct-indirect method with the arrangement of the ventilating flues, makes the conditions practically satisfactory. But the limit has been reached, and before the number of inmates can be safely increased, additional room must be provided.

As deafness in a very large majority of cases results from diseases of the nose and throat, as for example enlarged tonsils, adenoids and deformities of the nasal passages, undue prevalence of such troubles is to be expected in the pupils of a school for the deaf. They therefore require to a greater extent than ordinary children, special treatment, and we recommend some arrangement by which the regular services, at proper intervals, of a competent aurist who can also look after their eyes, be secured.

In conclusion, we can say with sincerity, that in our judgment the State is to be congratulated on the admirable condition of this school.

Respectfully yours,

GEO. G. THOMAS, M.D., RICHD. H. LEWIS, M.D., Committee.

ASHEVILLE, N. C., October 14, 1908.

To E. McK. Goodwin, Superintendent, Deaf and Dumb School, Morganton, N. C.

My Dear Mr. Goodwin:—In reference to the work which I have occasionally been doing in your school during the last three years, I wish to say that there seems to have been a considerably larger proportion of children with defective eyesight and diseased conditions of the nose and throat than obtains in our common schools.

In view of the great need in any school of medical supervision,

especially of the condition of the eyes, ears and throats of the children, and realizing the importance of correcting these abnormal conditions early in life in order to prevent their far-reaching effects on the general system, and since in my opinion, judging from my three years' observation in your school, the deaf pupil is more prone to these abnormal conditions than is the pupil who can hear. I would therefore suggest to you the advisability of having each year an examination of each pupil showing any signs or symptoms of abnormal conditions of these organs of sense, and to have the same immediately treated and corrected.

Very truly yours.

H. H. BRIGGS.

Raleigh, N. C., December 1, 1908,

MR. E. McK. Goodwin, Superintendent, Morganton, N. C.

DEAR SIR:—Replying to your favor of the 28th ult., I will state that it is the opinion of the highest authority in dental surgery that the critical period of dental development is between six and sixteen years. The want of dental service during this period is of the most incalculable injury, not only for the facial development, but to the comfort and health of the pupils while they are being educated, and this neglect is often the cause of general disorders which would prevent a proper development of the whole system, and a child might be disfigured and mainted for life.

It is of paramount importance that your pupils should be overlooked constantly by a well-qualified dental surgeon, in order to give them a fair prospect for health and comfort.

Very truly

V. E. TURNER.

Pres. National Dental Association.

# LETTER OF TRANSMITTAL.

Morganton, N. C., December 9, 1908.

His Excellency, R. B. GLENN,

Governor of North Carolina.

Six:—In conformity with law, there is hereby transmitted to Your Excellency the reports of the operations of the State Hospital at Morganton for the biennial period ended November 30th of the current year. The reports of the Superintendent and other officers are so full and intelligible that it is not necessary to weary you with a lengthy paper of transmission.

In all the circumstances we congratulate ourselves upon the results achieved here during the past two years. There were admitted during the period 425 patients; removed, 353; remaining November 30th, 1,142. The annual death rate shows the remarkably low percentage of 3.4, while the percentage of recoveries upon admissions reached the gratifyingly high figure of 34 per cent. There has been freedom from epidemic and the general condition of health has been good.

We regret having to report a debt of \$20,000, which is due to the insufficiency of the appropriation of the last General Assembly for support: but though the most rigid economy has been exercised by the management, the creation of this obligation was unavoidable unless we were to allow our patients to suffer. Your Excellency, in a fine spirit of humanity, authorized us to receive applicants up to the capacity of the institution, assuring us that the means of support would be found. In obedience to this instruction, we have admitted patients to the full limit of our capacity and even beyond the point which marked the limit of the best working conditions. Notwithstanding this overcrowding and the generous provision by the General Assembly of 1907 of a half million dollars for the State's insane, half of which has been spent or contracted to be spent, the demands upon us for room were never so great or insistent as now.

Quite two hundred insane men in this district are unprovided for and many women as well. We have no more room for men than we had two years ago nor any appropriation for enlargement for them. A nurses' home, now under construction, and which will probably be ready for occupancy next month, will afford accommodation for one hundred more female patients by the transfer of nurses from the main building to the new home. The need for a colony building for one hundred men, on land already bought, is very great, and the cost of this would not exceed, and might fall below, \$30,000.

Owing to causes set forth in the Superintendent's report, we cannot decently support our present population for less than \$175,000 a year for the next two years, and we respectfully request Your Excellency to ask the General Assembly for this appropriation for this institution for support, giving you the assurance that no part of it will be spent except for necessary purposes, but that the close economy which has marked the history of this Hospital will be observed in its expenditure. We need, in addition, \$30,000 for increased capacity for men; \$10,000 for a spur track from our coal yard to the tracks of the Southern Railway in Morganton, and \$2,500 for a new and larger bake shop. The economy to be realized from the appropriation for the spur track will be seen when it is shown that the hauling of coal alone from the Morganton station costs \$1,000 a year.

Since our last report a deep shadow has fallen upon the Hospital in the death of Dr. P. L. Murphy, late its capable and devoted Superintendent. This stroke was a calamity to the State, and especially its insane people, whom he had served with an ability and zeal which have linked his name forever with the records of North Carolina. The institution and the State are most fortunate in that his mantle has fallen upon Dr. John McCampbell, who had for twelve years before the death of Dr. Murphy been an apt and trusted colaborer with him here. He has carried on the work with an extraordinary degree of efficiency, as proved by the results secured and by the perfect order and discipline maintained. To Dr. McCampbell, the medical staff, the subordinate officers and employes, the Board of Direc-

tors owes gratitude for their fidelity and for the satisfactoriness with which they have discharged their several trusts.

To Your Excellency, upon the eve of your retirement from your high office, we make acknowledgment of thanks for the interest, sympathy and assistance you have so freely given us in the discharge of our solemn responsibilities to our helpless charges, the most pitiable of all our people, and whose welfare we have safeguarded, with unselfish concern, to the utmost of our ability.

Respectfully submitted for the Board,

J. P. CALDWELL,
President

# REPORT OF SUPERINTENDENT.

Morganton, December 9, 1908.

To the Honorable the Board of Directors.

Gentlemen:—I have the honor to herewith present a report of the work of the Hospital for the biennium ending November 30, 1908, this being the first report since my succession to the superintendency, which took place on the third of October, 1907, and was caused by the death of the late Superintendent, Dr. P. L. Murphy, whose constant labor, undivided attention and wonderful judgment and skill the institution had enjoyed since its opening in 1883, and I wish here to record the full recognition that such measure of its continued success as may be ascribed to human agency is largely due to his splendid example and precepts.

The following table shows the movement of patients for the period above referred to:

		1907.			1908.		Totals.						
	Male,	Female.	Total.	Male.	Female.	Total.	Male.	Female.	Total.				
Remaining November 30, 1906	426	646	1,072

Discharged not insane													
Died	26	21	47	22	20	42	48	41	89				
Total removed	60	100	160	81	112	193	141	212	353				
Remaining November 30	455	665	1, 120	458	684	1,142							

There is nothing out of the ordinary to be deduced from these figures. They show that there were remaining at the close of the period 458 men and 684 women, or a total population of

1,142. There were admitted during the period 173 men and 250 women—in all 423. There were removed a total of 353; of these 144 were discharged as recovered, making the recovery rate 34 per cent. of the admissions; 89 died, showing an annual death rate of 3.4 per cent. of all under treatment, which is remarkably low. This, taken in connection with the fact that a vast majority of the deaths occurring (as shown by Table No. 5) were not dependent upon removable causes, speaks well for the sanitary condition of the institution.

We are very fortunate in being able to report a continuation of the general good health which has prevailed during the past several years. We have had nothing which could have been considered an epidemic. It is gratifying to notice a falling off in the proportion of deaths ascribable to tuberculosis. This may be accidental, but we are inclined to attribute it to the greater opportunity for outdoor life and the more intelligent management by the nurses of infected individuals.

Three suicides occurred among the male patients, and a full account of the circumstances attending each of these was presented to you at the time of the occurrence, and where any possible obscurity as to the cause of death existed the coroner was notified.

It will be seen by reference to the last biennial report that it was estimated, upon close calculation, that \$150,000 per aunum would be required for maintenance alone. This estimate was too low, as subsequent and unforeseen events will show.

Early in 1907 you, in your wisdom, found it necessary to increase the wages paid attendants and other help in almost every department. This raise was absolutely unavoidable, since at that time we were unable to procure a sufficient number of reliable men to earry on the work with the rate of pay then prevailing. This increase in wages amounted in the aggregate to between \$5,000 and \$6,000 per year. This, together with a decided increase in the cost of supplies generally, brought our per capita cost of maintenance to \$152.55, and, with a daily average population of 1,016 members, our expenditures were \$155,000 per annum, which, with an annual appropriation of \$145,000, leaves us in debt to the amount of \$20,000. When the necessity for incurring this debt was seen there appeared to be

no way by which it could be avoided except by restriction in, or discontinuance of, the admission of patients, and, with the incessant demand on the part of the public, this seemed unwise and impracticable. The matter was laid fully before the Governor, who urged us to admit every deserving applicant possible, and very generously assured us that he and the Council of State would provide the necessary funds. Acting upon the Governor's instructions, we have admitted up to the limit of capacity, even going beyond to the extent of crowding, and the close of this year shows a greater number in the institution than ever before.

In view of the limited money available, the strictest economy was practiced, and we have very little to show in the way of permanent improvements, having merely kept up necessary repairs and made only minor improvements. We have completed the small pavilion for female consumptives and the same is now occupied and is giving general satisfaction. A similar structure will soon be erected for male patients, an appropriation for this having been made by the last Legislature. The Nurses' Home, now nearing completion, will, by removing the sleeping quarters of the female nurses from the wards, give additional room for 100 female patients, making the total capacity of the Hospital 1,150 beds.

This brings us to the consideration of needed appropriations. Of first importance is that for support. During the past two years, with rigid economy and curtailment in certain directions, which should not be necessary, it has been found that a per capita cost of \$152.55 is the least figure attainable with anything like proper regard for our charges. Thus, for the maintenance of our present population, \$175,000 per annum will be necessary. It is confidently expected that the Hospital Commission will build colony buildings on the Wagner lands, recently procured by the Hospital, to accommodate 100 men. This will probably require \$15,000 additional for their support during a part of the year 1909 and all of 1910. Some provision should be made for this.

In view of the fact that the last Legislature appropriated onehalf a million dollars for buildings and increased accommodations for the insane, a recital of the needs of this institution in that direction would appear out of place in this report. But

I should consider myself derelict in my duty to this most unfortunate class were I to lose an opportunity of calling your attention to the needs of this Hospital district in that particular, and especially so, since, notwithstanding the above referred to appropriation, not one bed for male patients has been added to this institution. Upon a most conservative estimate, there are at least 200 men, probably more, in this, the Western Hospital District, in urgent need of hospital care and treatment, who are, as yet, unprovided for, and I would respectfully ask that you urge upon the Hospital Commission, or, failing there, upon the Legislature, the importance of an appropriation of \$30,000 to build and equip colony buildings on the Wagner and Brittain lands. This will afford an opportunity to provide for 100 men in an inexpensive, vet highly approved manner, and at the same time render valuable these lands that otherwise, owing to their distance from the Central building, are of very little value.

The urgency of this need is patent when it is known that owing to the lack of room we have been compelled to refuse admission to 73 men applying in 1908, and this does not take into account those applying previous to that time, many of whom are still insane and at large, or confined in jails or poorhouses.

Our kitchen, which is a part of the original plan and designed for a population of about 425, is still doing service, and without any enlargement, for a population of 1,050, more than double the original intention, and, as a consequence, is crowded beyond a tolerable degree, and with the immediate increase in number of patients will be altogether inadequate. This difficulty can be met by moving the bake shop, which occupies an adjoining room, to a separate building constructed for that purpose, and using this space for cooking. The building and bake ovens will cost \$2,500.

You will recall that some six years ago the matter of laying a spur track from the Southern Railway to the Hospital was discussed, and at that time it was considered that the same would result in a very decided saving to the Hospital. Since that time there has been a steady increase in heavy hauling, until the project becomes a simple business proposition. The Engineer's estimate of the cost of this road with equipment is \$10,000.

Hauling the one item of coal now costs us \$1,000 a year, to say nothing of the damage to it by the excessive handling in loading and unloading from wagons. There are, of course, other items of freight, the exact amount of which I am unable to determine, but certainly enough to effect saving sufficient to more than cover the cost of keeping up and operating the road, thus leaving a net return of 10 per cent. on the investment, which will be very materially added to by the future growth of the Hospital.

To summarize: We will need for support for the next two years \$175,000 per annum.

For increased capacity	\$30,000.00
To building bake shop	2,500.00
To build spur track to coal vard.	10.000.00

The Hospital is under many obligations to the following papers for complimentary copies furnished, all of which are regularly read and enjoyed by the patients: Presbyterian Standard, Fayetteville Observer, Roxboro Courier, Raleigh Christian Advocate, N. C. Christian Advocate, Concord Times, Newton Enterprise, Biblical Recorder, Charity and Children, Henderson Gold Leaf, Union Republican, Charlotte Daily Observer, and Progressive Farmer.

In conclusion, I want to express my sincere thanks to each of you gentlemen for your guidance and support in my work and also to all subordinate officers for the loyal and exceedingly efficient way in which they have performed their various duties.

The usual statistical tables follow.

Respectfully submitted, John M

John McCampbell, Superintendent.

#### IN MEMORIAM.

Whereas it has pleased Almighty God to remove from among men our friend and coworker, William E. Crosland, whose death occurred on July 23, 1908; therefore, be it

Resolved, That the loss of Mr. Crosland comes as a personal grief to each member of this Board, upon which he has served so long and so efficiently; and the suddenness of his death reminds us most forcibly of the uncertainty of all things mortal.

Resolved, That as a member of the Board Mr. Crosland brought to the discharge of his duties the same conscientious fidelity that has always characterized his actions with reference to his private business. He was perhaps the largest individual farmer in North Carolina, and his personal affairs called constantly for much time and thought, yet such were his ideas of duty as a public official that he never felt that he had the right to miss a meeting of the Board, and during his seven years of service to the State as a director of the Prison he rarely failed in attendance upon the monthly meetings. To the family he leaves the heritage of a simple, carnest Christian life, without a stain upon it, and to the State he bequeathed a model for the public service worthy of all emulation.

Resolved, That these resolutions be spread upon the minutes of the Board, and that a copy be forwarded to the family of our deceased friend.

# REPORT OF DIRECTORS.

RALEIGH, N. C., January 1, 1909.

To His Excellency, GOVERNOR R. B. GLENN.

Six:—We have the honor to submit herewith the financial report of the State's Prison and of the Hospital for the Dangerous Insane for the years 1907 and 1908, embracing the report of Hon. J. S. Mann, Superintendent; John M. Fleming, Warden, and Dr. James R. Rogers, Physician in charge.

These reports and the recommendations contained therein have all been carefully considered and approved by this Board, and are respectfully commended to your serious consideration.

Respectfully,

J. G. HACKETT, Chairman.

R. H. SPEIGHT, S. H. HEARNE, JNO. P. KERR, W. I. EVERETT.

## REPORT OF SUPERINTENDENT.

RALEIGH, N. C., January 1, 1909.

To the Honorable Board of Directors of the State's Prison:

I beg to submit to you my fourth biennial report as Superintendent of the State's Prison.

On yesterday (December 31st) we paid every outstanding obligation of the Prison, and at the close of the day had on hand \$141,356.70 in cash and \$13,319.23 in solvent credits not due, and in farm products, unsold but valued at current market prices, and other cash assets, making a total balance of \$154,675.93.

In 1906 we paid \$6,584.07 for paving the walks of Capitol Square. In 1907 we paid to the general fund of the Treasury \$175,000, and during 1907 and 1908 we have paid for the support of the Hospital for the Dangerous Insane \$9,200, making a total previously paid from the earnings of the Prison to the use of the State of \$190,784.07. This, added to the balance on hand December 31, 1908, would make the sum \$345,460. Deducting from this \$20,615.11, which was the net balance received from the management of the Prison under Governor Russell's administration, and we have left \$324,844.89, which represents the surplus of earnings over expenditures under the present management during the last eight years, embracing the administrations of Governor Avecck and Governor Glenu.

The General Assembly of 1907 enacted three laws affecting the revenues of the State's Prison.

Chapter 152, Public Laws, directs the Board of Prison Directors to deposit with the State Treasurer, on or before January 1, 1909, a sum sufficient to pay what are known as "Prison bonds" and which amount to \$170,000.

Chapter 262, section 6, Public Laws, appropriates \$5,000 per annum for the support and maintenance of the Hospital

for the Dangerous Insane, and directs the same to be paid out of the State's Prison funds—a total appropriation for the two years of \$10,000.

Chapter 896, Public Laws, directs the Board of Prison Directors to pay to the State Treasurer \$175,000 for the use of the general fund of the State.

On April 3, 1907, the Board of Prison Directors, upon the written request of the State Treasurer, paid into his hands \$104,600 North Carolina 4 per cent. bonds and \$70,400 in cash for the use of the general fund of the State, in full compliance with chapter 896.

Since April 1, 1906, up to January 1, 1909, we have entirely maintained and supported the Hospital for the Dangerous Insane out of the earnings of the Prison, and have expended for this purpose the sum of \$9,200. We have therefore complied in full with chapter 262, section 6.

This was a financial burden never before imposed upon the Prison; but, on the contrary, the policy of the State seems to have been to keep the Hospital for the Dangerous Insane as an institution entirely separate and distinct from the State's Prison, although physically connected with it.

In September, 1908, the State Treasurer requested the Superintendent of the Prison to give him as early information as possible as to the amount the Prison would be able to pay on the "Prison bonds," as directed by chapter 152 of the Public Laws. At their regular meeting in October the Board of Directors instructed the Superintendent to mail the following letter to the Assistant Attorney-General for his advice:

Raleigh, N. C., October 1, 1908.

HON. HAYDEN CLEMENT,

Assistant Attorney-General, Raleigh, N. C.

Dear Sir:—The General Assembly of 1907 passed an act authorizing and directing the Board of Prison Directors to deposit with the State Treasurer, on or before the first day of January, 1909, a sum sufficient to pay what are known as "Prison bonds." (See chapter 152, page 164, Public Laws 1907.)

There are now \$170,000 of these bonds outstanding and due January 1, 1909.

The General Assembly of 1907 also passed an act authorizing and directing the Board of Prison Directors to pay to the State Treasurer \$175,000 out of its earnings for use of the general fund of the State. (See chapter \$96, page 1288, Public Laws 1907.)

The Board of Prison Directors, on April 3, 1907, complied in full with chapter 896 and paid the State Treasurer the \$175,000 for the

general fund, as directed.

At this time we think the Prison will have on hand on January 1, 1900, in cash, farm products and other cash assets, about \$150,000, more or less. These assets, except a part of the farm products, can be paid to the State Treasurer on January 1, 1909, to be applied to the payment of the Prison bonds, as directed by chapter 152 of Public Laws of 1907, but there will not be a sufficient amount to pay the bonds in full, and nothing will be left for the maintenance and support of the Prison after January 1, 1909. The General Assembly, however, will again convene during that month, and could, of course, provide for the future maintenance of the institution.

The Board of Directors respectfully ask your legal opinion as to their official duty, under the statutes referred to. The statutes seem mandatory and unconditional. Can the Directors, therefore, exercise any discretion and retain a part of the Prison funds on hand January 1, 1900, for the future support and maintenance of the Prison, or are they required to pay all such funds as may be on hand at that time to the State Treasurer, to be applied as far as they will go to the settlement of the Prison bonds, and look to the next General Assembly for the future maintenance of the institution?

Thanking you for an early reply, 1 am,

Yours very truly,

J. S. Mann, Superintendent.

By order of the Board of State's Prison Directors,

On October 20th the following letter in reply was received from the Attorney-General's Department:

Raleigh, N. C., October 19, 1908.

HON. J. S. MANN.

Superintendent State's Prison, Raleigh, N. C.

DEAR SIR:—Your Board of Directors requests my opinion upon the following statement of facts, to-wit:

"The General Assembly of 1907 passed an act authorizing and directing the Board of Prison Directors to deposit with the State Treasurer, on or before the first day of January, 1909, a sum sufficient to pay what are known as 'Prison bonds.' (See chapter 152, page 164, Public Laws 1907.)

"There are now \$170,000 of these bonds outstanding and due January 1, 1909.

"The General Assembly of 1907 also passed an act authorizing and directing the Board of Prison Directors to pay to the State Treasurer \$175,000 out of its earnings for use of the general fund of the State, (See chapter \$96, page 1288, Public Laws 1907.)

"The Board of Prison Directors, on April 3, 1907, complied in full with chapter 896 and paid the State Treasurer the \$175,000 for the general fund, as directed.

"At this time we think the Prison will have on hand on January 1, 1909, in cash, farm products and other cash assets, about \$150,000, more or less. These assets, except a part of the farm products, can be paid to the State Treasurer on January 1, 1909, to be applied to the payment of the Prison bonds, as directed by chapter 152 of the Public Laws of 1907, but there will not be a sufficient amount to pay the bonds in full, and there will be nothing left for the maintenance and support of the Prison after January 1, 1909."

I have given this matter the careful examination and consideration that a matter of such grave importance demands, and am clearly of the opinion that you should pay over as much money as you have ou hand on January 1, 1909, to the payment of the Prison bonds. two acts seem to have been drawn hastily and without due consideration, but they are, as you suggest, mandatory and directory. It leaves uothing in the discretion of your Board, but confers a positive duty on you to pay over the money or as much thereof as possible. The act should, of course, have stated that you pay the Prison bonds and, after retaining enough for running expenses, cover the balauce in the State Treasury for the general fund. But this is a mistake of the Legislature, with which we have nothing to do, and I think it is our duty to follow the law as laid down, so that we will not be criticised. It is indeed fortunate that the General Assembly meets so soon after this mouey is paid over, and I know we will have no difficulty in having an amount appropriated by them sufficient for running expenses of the State's Prison. Very sincerely yours,

> HAYDEN CLEMENT, Assistant Attorney-General.

On December 3d the Board of Prison Directors asked a conference with the Governor, and laid before him all the facts and fully explained to him the embarrassing condition of the Prison. The Governor called together the Council of State and, after the most careful and thorough consideration of the matter, formally advised the Board of Directors not to comply with chapter 152, Public Laws 1907, for two reasons, viz.:

1. That to do so would require every dollar of the Prison

funds and leave the institution helpless and a burden upon the State, and even then it could not pay the entire amount of the "Prison bonds."

2. That it was his opinion and the opinion of the Council of State that the Legislature did not intend to deal with the earnings of the Prison in such manner as to require an appropriation for its future support.

The Board of Directors earnestly desired to accept the advice of the Governor and his Council of State, and felt that in doing so they would best serve the interest of this institution and the State. At the same time they did not feel that they could conscientiously disregard and ignore a plain mandate of the Legislature. They have therefore to-day issued a voucher for \$141,356.70, which represents the total eash balance belonging to the Prison, and have handed same to the Treasurer, as directed by chapter 152 of the Public Laws. But they have requested the State Treasurer, and he has consented, to hold this youcher and not use it or any portion of it in the payment of the "Prison bonds" until after the Legislature of 1909 shall have convened, in order that it may, if it so desires, pass an aet authorizing him to return the voucher to the Board of Directors and not require the expenditure of the Prison earnings in payment of the bonds. If the Legislature shall take this course the Prison will have ample funds for its future maintenance; but if the Treasurer is required to use the voncher as a payment on the bonds, there will remain in the hands of the directors only \$13,319.23 of assets, and serions embarrassment may result.

#### PHYSICAL CONDITION.

The physical condition of the institution is entirely satisfactory. The buildings and furniture are in good repair. The supply of drinking water from the new well, 752 feet deep, recently drilled and equipped, at a cost of \$5,000, is abundant and excellent. The buildings and grounds are in sanitary order. The general health for the past two years

has been good and the death rate low. There has been no disorder, but on the contrary the inmates have been obedient to authority and respectful in demeanor—a result, I believe, of firm but kind treatment and a liberal provision of the necessaries of life.

Brickmaking was discontinued in midsummer, for the reason that there was but little demand for brick, and I found it convenient and more profitable to use the labor in other work. The brick plant is in good order, and we have on the yard at least 800 cords of dry wood for future use. Arrangements have been made to resume work in the early spring.

#### THE STATE FARM.

The farm has not yielded as well as usual for the last two years. Heavy rains and river floods were very destructive to the growing crops during both seasons, but particularly so in 1908. The damage by the river in August last, by careful estimate, amounted to at least \$25,000. Almost the entire corn crop was destroyed, as was also the crop of field peas. Portions of both the cotton and peanut crops, too, were utterly ruined.

We have employed about 300 prisoners, as usual, in cultivating the farm. Many of these, however, are not robust, either on account of age or other physical infirmities, and, while capable of doing various kinds of farm labor, could not be profitably used in other work.

New and comfortable dwellings have been built, at a cost of \$3,600, and are now occupied by the supervisors and their families. These add much, not only to the value, but to the attractiveness of the farm. Other buildings have been kept in repair, and all are in good condition.

#### CONTRACTS.

We have found from experience that there are usually about 300 prisoners available for contract work, and have endeavored to keep that number thus employed.

For nearly a year and a half we have had a camp of seventy-five men in Surry County at work upon the Elkin and Alleghany Railroad, and seventy-five in Hyde and Beaufort counties at work upon the Mattamuskeet Railroad. The State is interested as a stockholder in both of these enterprises and pays to the Prison the regular contract price for its labor.

For several years we have had a contract for 150 men with Messrs. Wade & Morrison, who were engaged upon work for the Atlantic Coast Line Railroad, but this expired on yesterday (December 31st) and has not been renewed. I have, however, made two new contracts for seventy-five men each and extending until May 1, 1909—one with the Atlantic Improvement Company, of Fayetteville; the other with the Navassa Guano Company, of Selma. Since September, 1906, the contract price for Prison labor has been \$1.50 per day for each man. This price remains unchanged in the new contracts.

### COUNTY CHAIN GANGS.

In our desire for internal improvements in North Carolina, and especially for good roads, we seem to have lost sight of the fact that crimes are committed, not against the county, but against the State. The convicted criminal is the property of the State and not of any county. It is the duty of the State not only to protect the law-abiding by depriving the criminal of his liberty and punishing him for his crime, but it is also the sacred duty of the State to protect the criminal from cruclty, abuse and inhuman treatment, and to provide in a proper manner for his welfare and maintenance.

Under special acts of the Legislature about forty counties in North Carolina have organized what are known as chain gangs and use them in the construction and improvement of their public roads and highways. From the report of the Board of Public Charities it will be found that there are more than 1,200 prisoners in these chain gangs serving seutence for crime. The State has granted to the counties abso-

lutely and unconditionally the full management and control of these prisoners, and has endeavored to surrender its responsibility for them, not even reserving a supervisory or inspectionary authority. Without the least concert with one another, each county is in supreme control of its own gang, prescribes its own rules of discipline, of clothing, of feeding, of guarding, of quartering and of working. Consequently, in addition to what is known as the State's Prison, North Carolina has forty wholly independent State prisons, under forty separate and distinct managements, with forty different and distinct sets of rules and regulations, and over which there is absolutely no State supervision and inspection. The hospital facilities, at least, of all these many prisons are inadequate and defective, for in none of the counties is there a place, except the jail or workhouse quarters, where the sick or the enfeebled or the demented can be cared for and cured. I have been informed, but cannot substantiate the statement, that the average life of a road convict is less than five years. All prisoners are at least human beings, very many are intelligent, and some are possessed of refined sensibilities. A large proportion of them are capable certainly of serving their sentences and afterwards of becoming useful citizens. None are mere working machines which the State should condemn to unremitting toil and unendurable hardships, only to be worn out and buried within a few months or, at most, in a few years. The law evidently intends the punishment to fit the crime, and that persons convicted of felony and given long terms shall be sent to the State's Prison, while those convicted of less serious offenses, especially misdemeanors, shall be given shorter terms and lighter work upon the roads. And vet, under existing conditions, it is strangely true that harsher and more vigorous punishment is inflicted upon the petty offender than upon him who commits the more serious crime.

The present chain-gang policy of our State—it is in no sense a system—cannot be successfully defended, and ought to be at once discontinued. The civilization of our age de-

mands it. I believe it to be in every respect as defective and as full of possibilities for wrongdoing, cruelty and inhumanity as was the old convict-lease system, now long since abolished. I do not mean to charge that acts of cruelty and brutality have been actually committed in any county, nor that the prisoners of any county have suffered from overwork and neglect, but I do mean that the possibility for such things has existed and does exist, and, if the present policy is continued, I feel it will be only a matter of time when it will bring upon our State deserved criticism and an unenviable notoricty. The State cannot surrender nor evade responsibility for those whom it has fettered for crime.

Every person in North Carolina under conviction and serving a term of imprisonment for crime should be under the direct, immediate and exclusive care, management and control of the State.

They should all be subject to the same identical prison rules and discipline.

They should all be comfortably clothed, and all of the same degree of crime should wear the regulation uniform.

They should all be given the same quality and a sufficient quantity of wholesome food, properly prepared.

Prompt medical attention and adequate hospital facilities should be provided for the sick and those who during their term have become worn and debilitated or demented.

The necessity for building and improving public highways and of obtaining labor for this purpose at a minimum cost was responsible for the original formation of the county chain gangs. Much progress has been made in road building since then, and good roads are now recognized as perhaps the best agency for local and State development. I believe the State can use its convict labor to no better advantage than in constructing permanent public highways in the most scientific and thorough manner, but always under the management and control of the State and not of the county. I therefore respectfully submit for your consideration the following recom-

mendations, with the request that, if they meet with your approval, you will transmit them to the Governor and ask his endorsement of them to the General Assembly:

That all chain gangs in North Carolina be totally abolished.
That all persons convicted of felony, less than capital, be committed direct to the State's Prison.

That all persons convicted of misdemeanors and sentenced to terms of imprisonment be committed either to the State farm or to the nearest misdemeanor eamp.

That all persons committed to jail to await trial, except those charged with capital felony, be given the privilege, with the consent of the State authorities, to join the nearest established misdemeanor camp as a member and subject to the rules and discipline thereof until the time of trial, and, if convicted, the sentence given to be shortened by the length of service before conviction, and, if acquitted, to be paid by the State authorities the same wages per day for the service rendered before trial that is being received for misdemeanor prisoners, less the cost of transportation.

That all persons serving sentences for crime, whether felony or misdemeanor, shall be under the management, direction and control of the Board of State Prison Directors as fully and completely and exclusively as the State Prison now is.

That the said Board of Directors shall have full authority to transfer misdemeanor prisoners from one point in the State to the State farm or to any other point, in their discretion, either for work or for hospital attention, but shall not be authorized to mingle together persons convicted of felony and those convicted of misdemeanors, either at the farm, in eamps or upon any kind of work.

That all misdemeanor prisoners be required to wear an adopted uniform, but not the regulation convict stripes.

That a competent civil engineer be employed by the State and paid an annual salary, whose duty it shall be to lay out in a proper and scientific manner any public road or highway in the State which is proposed to be constructed or improved with convict labor. That any county in the State that desires to use convict labor in the construction or improvement of its highways shall apply first to the State Engineer to lay out and make plans for said work or to approve plans already made.

That the said county shall then apply to the Board of State Prison Directors for the number of convicts desired for the work, this number in no case to be less than fifty.

That the Board of Directors, as soon as possible after the receipt of the application and the approval of the State Engineer, shall furnish the labor requested and proceed to construct or improve the highway, under the direction of the State Engineer.

That all applications from counties for convict labor shall be honored in turn according to the date of their receipt, except that no county may use at any time more than 100 if an application from another county is pending and no labor is available for it.

That counties using convict labor shall pay to the State therefor the sum of \$1 per day for each laborer, shall pay all transportation charges one way, shall furnish quarters, to be approved by the Board of Prison Directors, for prisoners and employees; shall also furnish pure drinking water and necessary firewood for eamp use, and shall furnish overseers to direct the work. All other expenses of every kind whatever shall be borne by the Board of Prison Directors.

#### THE HOSPITAL FOR THE DANGEROUS INSANE,

This hospital is located in the west wing of the State's Prison, with wards and equipments for the accommodation of fifty patients. It was incorporated by the Legislature of 1901 and placed under the management and control of the Board of State's Prison Directors. (See chapter 755, Public Laws 1901.) The act of incorporation endeavored to entirely separate the hospital from the Prison, and yet to locate it within the Prison walls and within the Prison building itself and under the management of the Prison Directors.

Section 1 of the act provides "That the Hospital for the Dangerous Insane is hereby created a corporation, * * * and shall be under the direction and management of the Board of Directors of the State's Prison. * * * The said hospital shall be located in the wards of the State's Prison, where the dangerous insane are now cared for." * * *

Section 3 provides: "It shall be the duty of the board of directors of said corporation, as soon as practicable, by partitions, walls and otherwise, to fully and completely separate the said hospital from said Prison, and they shall change the same so as to conform to the purpose of a hospital for the insane; * * * and the said hospital shall not be a part of the State's Prison, but shall be the State Hospital for the Dangerous Insane."

An appropriation from the State Treasury was made for the maintenance of the hospital and another for the improvements, while no appropriation was made or needed for the State Prison. The Board of Prison Directors have earnestly striven to carry out the wishes of the Legislature as manifested in the law, and to keep the institutions as separate as the conditions would permit.

In my report dated January 1, 1905, I said: "The capacity of the institution is fifty, but there are now fifty-four inmates. In consequence of this overcrowded condition we are compelled each night to lock four patients in Prison cells, thus violating the spirit if not the letter of the law."

In my report dated January 1, 1907, I said: "The department is intended and built to accommodate fifty people, while the average number cared for during the year has been fifty-three. This crowded condition has necessitated the confinement of three each night in cells of the Prison."

It becomes my duty now to report that during the past year the average number of patients has been sixty-one, and of this number we have been compelled to confine thirteen each night in Prison cells, The Legislature of 1907 still further obliterated the line of division between the institutions by requiring the Prison, out of its earnings, to maintain the hospital, instead of making an appropriation from the Treasury for its support, as in the case of other State insane hospitals.

Eight years of experience in the service of the Prison have but strengthened my conviction that it was a mistake to make this hospital in fact a department of the Prison. The humanity of our law will not permit an insane person to be convicted of crime. Neither will it permit an insane person to be punished for committing an act which would be a crime if committed by a sane person. I am therefore unable to see either logic or humanity in the law which authorizes or permits confinement in the State's Prison, and actually in felons' cells, of persons who have been formally declared by the courts themselves to be insane and irresponsible for their acts. I believe this hospital ought to be separated in fact from the Prison and made an independent institution, or else connected with other insane hospitals and its inmates given the same considerate care, attention and treatment that the State's other unfortunates of the same class receive.

The Hospital for the Dangerous Insane must receive and treat patients of both races and both sexes. This requires the maintenance of four separate departments and the utmost vigilance and care on the part of the management and attendants to prevent wrongdoing and scandal.

The cost of maintaining the institution during the past fiscal year has been \$5,768.36.

I am glad to be able to report the department in good physical condition. The inmates have been well cared for and provided with the necessaries of life. The general health has been good and no serious trouble of any kind has occurred.

If the hospital is to remain as at present located, and the management expected to receive all who may be committed to its care, even if necessary to consign them to cells for safe-

keeping, then it will be necessary to ask for an appropriatio of \$7,500 per annum instead of \$5,000, as heretofore. Bu an appropriation of \$5,000 per annum will be sufficient for the support of the institution up to its capacity.

Respectfully submitted,

J. S. MANN, Superintendent.

## REPORT OF WARDEN.

Raleigh, N. C., December 31, 1908.

Hon. J. S. Mann, Superintendent.

Sir:—As Warden of the State's Prison, I have the honor to submit the following as my report for the two years ending December 31, 1908:

#### DISCIPLINE.

The discipline of the Prison is good—has never been better. There has been no outbreak against the rules, and everything is moving along smoothly.

#### MACHINE SHOP.

The work of the machine shop has been confined to repairs.

#### BRICKYARD.

We have made and sold \$15,521 worth of brick and have on hand about 70,000.

#### GARDEN.

Our garden has furnished an abundant supply of vegetables in their season.

#### RELIGIOUS SERVICES.

Religious services are held every Sabbath; Sabbath school by Messrs. Whiting, Pullen, Blake and Sandwich, and Mrs. Blair and Rev. C. Johnson, from 2 to 3 o'clock, and preaching from 3 to 4 by a minister of the city.

I have in bank to the credit of the Sabbath school and library fund about \$560, which will be expended for books as a nucleus for a library.

Respectfully submitted,

JNO. M. FLEMING, Warden.

## REPORT OF PHYSICIAN.

RALEIGH, N. C., January 1, 1909.

To the Superintendent and Honorable Board of Directors of the State's Prison:

Gentlemen:—I have the honor to submit herewith my biennial report of the Medical Department of the State's Prison for 1907 and 1908. The table below will show the character of work done.

During the two years there have been admitted to the Prison 324 persons. Of this number, 43 were unsound and 281 were sound. Our mortality for all causes, except consumption, has been very small, and, compared to the number treated from the central prison and including those returned from the farm and the camps, the death rate from tuberculosis has been also very small.

The sanitary condition of the entire Prison is good. The grounds, cells and wards are clean and well kept. The new sewerage system, leading entirely away from the building and emptying into the main sewer with the A. and M. College and the city, will prove a great protection.

The drinking water, coming from deep wells, is abundant, pure and less liable to infection, and is a step forward above the line of modern sanitation. We have not had a single case of typhoid fever originating in the Prison during the two years. There were, however, several very malignant cases sent to the Prison from the camps, two of which died in a few days after reaching the Prison.

Respectfully submitted,

James R. Rogers, M. D.,

Prison Physician,

# BIENNIAL REPORT OF MEDICAL SUPERINTENDENT STATE HOSPITAL FOR DANGEROUS INSANE.

Raleigh, N. C., November 30, 1908.

To the Honorable Board of Directors:

The Medical Superintendent of the State Hospital for Dangerous Insane submits herewith his biennial report for two years ending November 30, 1908.

The general policy of the medical department of this institution has been maintained along the lines previously established, and set forth in full in my biennial reports of 1902, 1904 and 1906. The dangerous insane hospital, as you know, continues to be located in the west wing of the State's Prison building. The disadvantage of earing for this class of patients within the penitentiary enclosure I set forth in my first report, in 1902. A centrally and rurally located institution, where all the dangerous insane of the State may be cared for, is urgently needed.

I wish particularly again to emphasize the fact that the population of the hospital is steadily increasing, while the capacity of the present building has been taxed to its utmost from the very beginning. I would again call attention to the fact, which I have previously reported, that it is necessary, because of lack of room, to confine dangerous insane patients at night in prison cells in the State's Prison. Ten per cent. are now sleeping in prison cells. This means that we have actually not room to take care of our patients at the present time, while, in spite of this fact, more patients are constantly being committed by the Judges and forced upon us. I again most respectfully request that this matter be looked into and corrected, either by providing room for a larger number of patients in the hospital or by authorizing us to refuse to accept more patients than we can accommodate in the present building.

The improvements which I deem necessary at the present time, and which should be provided for by the present Legislature, are as follows:

To replace the old, worn wooden stairways by fireproof ones, and to place permanent partitions between certain of the wards which are now separated by flimsy temporary board ones.

The floors of water-closets and bath rooms in an institution of this sort should be of nonabsorbent material, either cement or tile. The wooden floors which we have used up to this time are hard to keep clean and free from odor with this class of patients.

It is absolutely necessary, also, that permanent provision be made for the increase in population. The increase over last report has been 15 per cent. As stated above, 10 per cent. are sleeping in prison cells. We have to ask, therefore, that the matter of providing for this increase be seriously considered at once by this session of the Legislature.

For maintenance of the department, aside from permanent improvements, an annual appropriation of \$7,500 is required.

The appended tables summarize the cost of maintenance, the changes in population during the past two years, and records, admissions and discharges since my last report.

## DANGEROUS INSANE DEPARTMENT.

### LETTER OF TRANSMITTAL.

To His Excellency, GOVERNOR R. B. GLENN,

Raleigh, N. C.

GOVERNOR:—I respectfully submit herewith for your consideration the biennial report of the Board of Directors of the State Hospital at Goldsboro, N. C.

No serious calamity has befallen the institution within the two years, for which we are thankful to the Giver of all good.

The report of the Superintendent, Dr. W. W. Faison, shows careful and economical management during a period of continued advances in the cost of living. It meets with the full approval of the Board, and we trust you will find it very satisfactory to yourself.

We have supplemented the fairly liberal appropriation by the Hospital Commission with the income from the labor of the inmates, chiefly on the farm, and there is now but little lacking to render perfectly efficient the machinery and other appliances necessary to the perfect working of an institution of such magnitude.

The estimate by the Superintendent of the needs of the institution for the next two years is well within the probable demands, and we trust that the incoming Legislature will appreciate this fact and at least deal justly with so meritorious a charity.

Respectfully, your obedient servant,

D. E. McKinne,
President Board of Directors.

## SUPERINTENDENT'S REPORT.

Goldsboro, N. C., December 10, 1908.

To the Board of Directors of the State Hospital at Goldsboro.

Gentlemen:—The report of the management of this Hospital for the biennial period ending November 30, 1908, is herewith respectfully submitted.

#### MOVEMENT OF POPULATION.

	Males.	Femal	es. Total.
Number remaining on roll November 3	0,		
1906	. 223	333	556

Whole number discharged	. 159	214	373
Number on roll November 30, 1908	. 250	404	654
Daily average for two years			634.767

More patients have been admitted during the time embraced in this report than in any previous biennium. The opening of the Miller building at the beginning of this term enabled this to be done. Owing to the erowded condition of the Hospital for several years prior to the opening of the Miller building, a great many patients were denied admission; consequently there was a large accumulation of the colored insane throughout the State needing hospital eare. A considerable number of these were confined at their homes, in the jails and county homes. As soon as it was known that additional room had been provided, urgent requests began to be made for admission of patients. All of those applicants deemed worthy were admitted, many of whom were old, already demented and in a most deplorable physical condition, and there was no hope of doing more for them than making them comfortable for the short time they might live.

I desire here to call the attention of the Board to the fact that this institution, since the enactment of a law by the last Legislature, is no longer a hospital solely for the insane, but is also an asylum for the epileptic, the idiot and all other mental defectives. This being the case, the percentage of cures will necessarily be smaller and the mortality greater. Though we have had no epidemics among the patients, there has been a good deal of sickness incident to a hospital of this kind. Tuberculosis, which has become the scourge of the negro, is very prevalent among our patients. Every succeeding year a larger number of them have it on admission, while many cases develop here. More than one-third of the deaths during the past two years were due to tuberculosis. As far as possible, these tubercular patients have been kept in separate wards. The Hospital Commission has recently let a contract for the construction of four detached buildings that will accommodate twenty patients each, two of which will be for the care of tubercular patients, male and female, and two for epileptics, male and female. These buildings are now being erected and are to be completed in six months. The removal of these two unfortunate classes from our general wards has long been desired, and will prove most beneficial to them, as well as to those who necessarily have to come in contact with them

For the maintenance of the institution for 1907 the Legislature appropriated \$65,000, and the same amount for 1908. But this appropriation was not sufficient to maintain as many patients as we had room for. Many applications were being received, and in order to make provision for these applicants the Board of Directors, at their April meeting in 1907, appointed a committee to confer with the Governor and his Council in regard to this matter. They laid the matter before the Governor, and he made arrangements by which they could admit all worthy applicants to the capacity of the institution. The number of patients has steadily increased, until now there are enrolled 654 patients, which is 98 more than we had at

the beginning of the biennium. The Legislature having provided for the maintenance of a daily average of only 557 patients, and a daily average of 604 having been cared for, there was a deficit of \$11,000.

#### LABOR AND WAGES.

Early in 1907 we had great difficulty in keeping our employees. Labor was in great demand and at much higher prices than we were paying; consequently we lost several of our best attendants. To enable us to secure suitable and sufficient help, the Board was compelled to make a very considerable advance in the wages of most of our employees in every department. This advance, with the additional number employed as the Hospital has grown, has caused an increase of \$380 in our monthly pay-roll over what it was in November, 1906.

#### THE FARM.

Our farming operations have been greatly increased during the past two years. As most of the labor is done by the patients, the profits to the Hospital have been considerable. I am sorry to report, however, that the crop of 1908 was greatly damaged by the unprecedented freshet in August. The potato crop of fifteen acres was entirely destroyed, and the crops of cotton, corn, peas and hay greatly cut off. We estimate that the damage sustained was at least \$2,000.

# NEEDS FOR THE NEXT TWO YEARS.

With a constantly growing population and an advanced cost of living, it is estimated that we will need—

	for 1909	
Total		9179 750

The reports of the several departments are appended, and I respectfully refer you to them for a detailed account of the work of the institution.

### RESIGNATION AND APPOINTMENT OF OFFICERS.

Dr. W. C. Linville, who had most acceptably filled the position of First Assistant Physician for two years, retired May 1, 1908, to enter private practice at Winston-Salem. He had endeared himself to all, and we were sorry to lose his services. Dr. J. E. Brothers, of Edgecombe County, was elected to the vacancy and has entered earnestly into the work.

Credit is due and is hereby gratefully acknowledged to the Board, the officers and the employees for valued assistance in the discharge of my duties.

W. W. Faison,

Superintendent.

# STEWARD'S REPORT.

STATE HOSPITAL AT GOLDSBORO, N. C.,

To Dr. W. W. FAISON.

November 30, 1908,

Superintendent.

I herewith submit my biennial report covering the two fiscal years, December 1, 1906, to November 30, 1908, consisting of statements showing receipts and disbursements for maintenance, accompanied by classified statement of such disbursements; statement of average population, with per capita cost of maintenance; summary of receipts and disbursements on local cash account, with detailed statement of such receipts and disbursements; statement of dairy account, and a statement showing expenditures for purchases and improvements authorized by the State Hospital Commission.

Respectfully submitted, J. W. Bryan,

RECEIPTS AND DISBURSEMENTS FROM DECEMBER 1, 1906, TO

Steward.

# BIENNIAL REPORT

OF THE

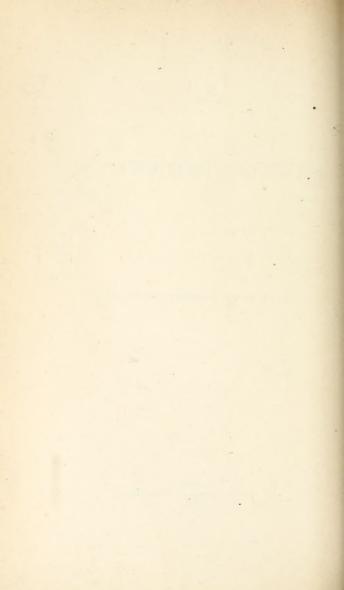

# STATE LIBRARIAN

FOR THE

Two Fiscal Years Ending Nov. 30, 1908.

RALEIGH:

E. M. Uzzell & Co., State Printers and Binders. 1908.

RALEIGH, N. C., December 1, 1908.

To His Excellency, ROBERT B. GLENN,

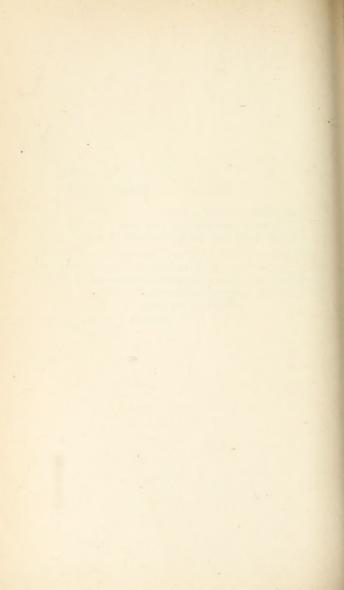

Governor and ex officio Chairman of the Board of Trustees of the North Carolina State Library.

DEAR SIR:—As State Librarian, I have the honor to present to you, as Chairman of the Board of Trustees of the State Library, my Biennial Report of the transactions of this office for the two years ending November 30, 1908.

Respectfully submitted,

MILES O. SHERRILL,

Librarian,

#### BIENNIAL REPORT

OF THE

# STATE LIBRARIAN

FOR THE

TWO FISCAL YEARS ENDING NOV. 30, 1908.

To the Hon. Robert B. Glenn, Governor; Hon. J. Bryan Grimes, Secretary of State, and Hon. J. Y. Joyner, Superintendent of Public Instruction, as Trustees of the State Library.

Gentlemen:—I have the honor to submit to you my report of the years 1907 and 1908, showing the additions made to the Library during that period by purchase, exchange and donations; also books disposed of as provided for by law.

In order that we do not have too much repetition in our report, I will call the attention of those who feel an interest in matters connected with the State Library to the last report, made in 1905 and 1906, which goes more fully into detail. Prof. R. D. W. Connor, Secretary of the North Carolina Historical Society, has been appointed a member of the purchasing committee to take the place of Professor Moses, resigned.

We have added to the State Library in the past two years by purchase 325 volumes books and 50 pamphlets, and by donation 73 volumes books and 64 pamphlets. Received through exchange 976 volumes books and 505 pamphlets. Received from the General Government 269 volumes books and 1,553 pamphlets. A few years ago the Board of Trustees decided to quit the purchase of books of fiction unless written by a North Carolina author, and to purchase mainly books of reference, history, biography, etc., especially all books, booklets and pamphlets by North Carolina writers. The patronage of the State Library by the various schools and colleges of North Carolina has greatly increased within the past two years. Our collection of North Carolina news-

papers, bound in book form, which is our current history, running back one hundred years or more, has become a source of very great information, not only to the schools, but to the general public. The great educational movement in North Carolina, which has gathered such momentum within the past eight years, has also awakened new interest in Library work, and not only secured the patronage of the schools and colleges for the whites, but the Library is regularly patronized by the schools for eolored people; so that the Library is not confined to race or sect, but is general in its benefits to all our people. The persistent efforts of our Superintendent of Public Instruction and those working under him are bringing about a revolution, not only in education, but in library work also, for a good library is a great power in the educational work in our State. The organization of the North Carolina Historical Society is a movement that the people of our State ought to appreciate and encourage. Many very valuable manuscripts and papers of great historie value are being brought The gentlemen who are connected with this work would be very much handicapped if it were not for the State Library; in fact, the Library is indispensable in their work. There is seldom a day passes that there are not students from the colleges at work in the Library. It is to be regretted that so few people of our State realize what a valuable property we have in our State and Supreme Court libraries, and what a loss to the State should they be destroyed by fire. destroyed, no amount of money could replace the two libraries, for the simple reason that there are many books and newspapers that cannot be replaced. Our crowded condition cries aloud for more room, and the best interest of our State demands a fireproof building for the books and papers as a matter of economy.

#### LIBRARY BUILDING.

Excuse me for repeating and emphasizing the ealling of especial attention to the condition of the building in which the State and Supreme Court libraries are located. The building was constructed on a cheap plan and is liable to be destroyed by fire at any time. For want of room the basement has to be utilized for the storage of books and papers for the State, which, of course, augments the danger of fire. The two libraries are worth many thousands of dollars and should by all means be in a fireproof building. The State, of course, pays insurance on all books and bound newspapers, which is proper, but if the books and bound newspapers were destroyed, many of them could not be replaced under any circumstances for love or money. To provide a fireproof building in order to save what the State now has is one of the most important things that the Legislature can consider. To defer it might bring disaster and great loss.

#### COLONIAL AND STATE RECORDS.

Since our last report we have received from the press the remaining volumes (XXII and XXIII) of the Colonial and State Records—in all, twenty-six volumes. We regret that we have not the index volumes and caunot set a time when they will be ready. North Carolinians do not seem to appreciate our Colonial and State Records and North Carolina Regimental Histories as they should, if we may judge them by the small number we sell. We have sent out the twenty-six volumes of Colonial and State Records and five volumes of North Carolina Regimental Histories to the Superior Court Clerk's office of each county in North Carolina (except Lee), placed there by the State for the use and benefit of our people.

#### ACCOUNT OF SALES.

Since my last report I have paid to the Treasurer of North Carolina from sale of books as follows, to-wit:

Moore's Roster	\$ 2.15
North Carolina Regimental Histor	ies 51.30
Colonial Histories	357.25
7P-4-1	8440.50

#### PORTRAITS.

Since our last report we have received only two portraitsone a life-size portrait of the Rev. W. E. Pell, D. D., who was not only prominent as a preacher of the gospel, but was the efficient editor of the Raleigh Daily Sentinel just after the great Civil War, when we needed such a paper here in the South. It took courage to fill the position Dr. Pell occupied then, and our State owes him a debt of gratitude for his work at that trying time, and his portrait is worthy a place in onr art gallery. The painting was done by Duncan S. Harding in Paris, in 1907, and presented to the State Library by the son, George P. Pell, Esq., attorney at law, Winston, N. C. The other portrait is that of Old Fort Raleigh, at Manteo, North Carolina, in the year 1585. This work is presented to the State Library by Mr. A. V. Evans, Register of Deeds of Dare County. Any person desiring a copy can secure it by writing to Mr. Evans, Manteo, N. C.

#### MAGAZINES.

The following magazines are received at the Library, to-wit: Arena, Atlantic Monthly, Bookman, Cosmopolitan, World To-day, Current Literature, Harper's Monthly, McClure's, Munsey, Ladies' Home Journal, Popular Science Monthly, Literary Digest, North American Review, Review of Reviews, Scribner's, World's Work, South Atlantic Quarterly (Durham, N. C.), Trinity Archive, University Magazine, Wake Forest Student, Outlook, State Normal Magazine, American Historical Review, Johns Hopkins University Studies, The Merchants' Journal, Southern Farm Magazine, Southern Furniture Journal, Southern History Association, Confederate Veteran, Youth's Companion, Scientific American, The Nation, North Carolina Booklet, Maryland Historical Magazine, Success, Journal of American History, American Historical Magazine, The Quarterly Texas State Historical Association, Educational Review, Everybody's Magazine, University of Missouri Studies, American Journal of Archæology, Political Science Quarterly, Uncle Remus' Home Magazine, Red and White, Journal of Education, Southern Lumber Magazine, Louisiana Planter.

#### NEWSPAPERS DONATED-DAILIES,

Asheville Citizen, Charlotte News, Charlotte Observer, Evening Tribune, Durham Herald, Winston-Salem Journal, Winston Sentinal, Daily Record, Industrial News, Goldsboro Argus, News and Observer, Raleigh Times, The Morning Star (Wilmington), Daily Enterprise, Evening Mascot (Statesville).

#### WEEKLIES AND SEMI-WEEKLIES,

Wadesboro Ansonian, Times-Mercury, Monroe Journal, Our Church Record, Davie Record, The Central Banner, Beacon, Eastern Carolina News, Morganton Herald, Newton Enterprise, Lenoir Topic, Fayetteville Observer, Tar Heel, Statesville Landmark, Biblical Recorder, North Carolina Baptist, Gold Leaf, Argus, Reidsville Review, New Bern Journal, Orphan's Friend, Cleveland Star, Tarboro Southerner, Polk County News, Washington Progress, Eastern Reflector, Christian Sun, Christian Advocate (Nashville, Tenn.), North Carolina Christian Advocate, Raleigh Christian Advocate, Presbyterian Standard, Wilson Times, Commonwealth, Watanga Democrat, Smithfield Herald, Davidson Dispatch, Eastern Courier, Franklin Times, Concord Times, Webster's Weekly, Union Republican, Farmer and Mechanic, North Carolinian (Raleigh, N. C.), Progressive Farmer, Caucasian, Windsor Ledger, Graphic, Messenger and Intelligencer, High Point Enterprise, Roanoke-Chowan Times, The Commoner, Charity and Children, Madison County Record, Carthage Blade, Williamston Enterprise, The Warrenton Record, Greensboro Patriot, Robesonian, North Carolina Journal of Education, Durham Recorder, Labor News, Montgomerian, Southern Laconic, North State, Sylvan Valley News, French Broad Hustler, Catawba County News, Mocksville Courier, Thomasville Times, Hickory Democrat.

The papers published in the State are bound in book form and placed in the Library. I repeat here what I stated in a former report: "In behalf of the State I extend thanks to the 'editors and proprietors of the newspapers thus furnished to the reading public gratis. The newspapers are a power in educating the masses, and the people of our State should appreciate them."

Some papers have discontinued since our last report; others have been added to the list. During the past two years the Library has been well patronized by schools, colleges and individuals, more especially books of reference and periodicals. We have a great many letters of inquiry from other States.

There is absolutely no suitable place for legislative files. The great and growing State of North Carolina should not neglect this important matter. I take this occasion to thank the Board of Trustees and the purchasing committee for their encouragement, assistance and uniform kindness to us during the past two years. In the management of the Library I have had the earnest co-operation of my assistant, Miss Carrie L. Broughton, and we both have been diligent in looking after the interests of the State as well as that of the people.

Respectfully submitted,

Miles O. Sherrill, State Librarian.

For list of books, etc., received the past two years, see Appendix, as a part of this report.

# APPENDIX.

The following list shows the number of books, etc., that have been purchased since December 11, 1906:

seventy Centuries, by J. N. Larned 2 vol	1.

## REPORT OF STATE HOSPITAL COMMISSION.

Raleigh, N. C., December 29, 1908.

His Excellency, Hon. R. B. GLENN,

Governor of North Carolina, Raleigh, N. C.

SIR:—The State Hospital Commission, which you appointed under and by virtue of chapter 191 of the Public Laws of 1907, herewith respectfully renders you a detailed statement of what it has done, and the amount of money expended from the date of its appointment to the close of the present fiscal year, to-wit, December 30, 1908.

The main object of the act creating this commission was, as we understand it, to provide for additional accommodations for all white and colored insane, all epilepties, and all other mental defectives, and, incidentally, to make only such repairs to the several institutions as the commission deemed absolutely necessary. In order that the commission might intelligently proceed upon the work before it, our first task was that each member should thoroughly inform himself as to the condition of the several institutions, and of the number of unfortunates in the State who require its care and protection.

Accordingly, we visited the hospitals at Raleigh, Morganton and Goldsboro, and made a thorough inspection of those institutions, ascertaining the needed repairs at each place, the absolute necessity for more land at each, and the strong and pressing demand from every section of the State for admittance into the several hospitals of unfortunate insane and epileptics who were confined in the county jails and county homes, we immediately realized that the progress of the commission would not be as rapid as we had hoped, on account of the appropriation for these purposes being limited to \$125,000 per year.

Being hampered in this way, we have done the best we could as we saw it, and we trust the people of the State fully understand why more has not been accomplished.

When the commission was organized, we ascertained that the State had an option on what was known as the Grimes land, a tract of 1,137 acres, which adjoins the Hospital at Raleigh, for the snm of \$53,500. This option would expire in a few days, and, therefore, this important matter first demanded our attention. We found that the Joint Committee on Insane Asylums for the General Assembly of 1907 had recommended to the General Assembly the purchase of this land. Your Excellency had also recommended it in your message to that session of the General Assembly, and, upon our failure to secure an extension of this option, the commission, after a thorough inspection of the land, decided, with the approval of the Governor and the Council of State, to purchase the same, which we did, and for which we paid \$53,500, and for which the State now has a good deed, duly executed and recorded.

The commission did not think, at the time of this purchase, that the State at present actually needs all of this land, and, as the owners would not sell a part of the same, we thought it best to buy all of it, and we feel that the land is well worth the money, and that we could to-day sell it for considerably more than we paid for it.

The commission discovered, soon after its organization, that the Hospital at Raleigh was, in a great many respects, inferior, especially in buildings, sanitation and equipment, to the Hospital at Morganton. The Raleigh buildings are much older, and have been in use for many years. The plumbing, toilet rooms and closets in many instances were old and out of date. We found that the Morganton Hospital had snperior and more modern buildings, better equipment, better ontbuildings, a better lanndry, better boilers, a better and more modern system of dining rooms, more and better land, and better and more beautiful grounds, and that it cared for about twice as many patients.

On these and perhaps other accounts the commission readily concluded that there has justly grown up in the State a feeling that the Morganton institution is superior, from many standpoints, to the Raleigh institution. Accordingly, we adopted the policy of trying to place the two institutions on an equality, if possible, not only as to accommodations for about the same number of patients, but also as to equipment, furniture, etc. We believe this the correct policy, for we think it unjust that either of these institutions should be considered better than the

other. They both belong to the State, and each should be equally esteemed and regarded by the people of the State.

For the Hospital at Raleigh we have ereeted and furnished and turned over to the directors an annex, which will accommodate one hundred men. This building is a modern, fireproof structure, is comfortably furnished and equipped, and is, in our opinion, a credit to the State. It, with furniture, fixtures, etc., cost, approximately, \$70,000, and is now being filled by insane men from both the eastern and western districts.

We are now erecting a new building at Raleigh which will accommodate one hundred convalescent women, and are also erecting there a group of three buildings, on the colony plan, for one hundred convalescent men.

The commission, after careful deliberation, decided for the present to locate the buildings for all white epileptics also at Raleigh. Some of the members of the commission, however, were decidedly of the opinion that the epileptic buildings should be on land in a different locality and under an entirely different management, but we are now erecting there a group of three buildings for one hundred epileptic men, and another group of three buildings for one hundred epileptic women. We are, therefore, erecting at the present time at Raleigh ten buildings, the contract price for which, exclusive of plumbing, heating and furniture, is \$66,539. When these buildings are completed we will have provided room at Raleigh for five hundred additional patients.

We have also decided to provide a system of associated dining rooms at Raleigh, and to install there new bathrooms and toilet rooms, which will give room in the present buildings for about seventy-five additional patients.

We have also creeted a new storeroom at Raleigh, and also

a carpenter shop there.

We have appropriated for the Hospital at Raleigh \$198,456.-76. This amount covers what has been paid out, as well as the amount which will be due on uncompleted contracts, and will pay for the eleven buildings and the land at Raleigh, but will not furnish the ten buildings under construction. A detailed statement of the appropriations for the Hospital at Raleigh is hereto attached, marked Exhibit A. We found the buildings at Morganton in good condition, and little was requested there in the way of repairs. We found it necessary to purchase 154 acres of land adjoining that institution, to be used for farming purposes. This land cost us \$5,000. An addition to the laundry was provided; eight tenement houses were erected for employees at the Hospital.

We have crected at Morganton a building known as the nurses' home. In this building all female attendants will be quartered. This building, with furniture and equipment, cost, approximately, \$25,000. This building enables the Hospital to provide for one hundred and two additional female patients.

We have also authorized the erection of three buildings on the colony plan at Morganton to accommodate one hundred men, to cost, with equipment and furniture, about \$30,000. Plans and specifications have been adopted, and these buildings will be erected with the greatest possible dispatch.

In this connection we desire to say that we have granted every request made of us by the directors of the Hospital at Morganton. We have done this just as soon as our appropriations were adequate for this purpose, after making provision for other buildings and improvements which we thought to be more urgent and pressing.

A detailed statement of the appropriations for the Hospital at Morganton is attached and marked Exhibit B.

The commission found a bad state of affairs at the Hospital at Goldsboro. The engines were worn and almost unfit for use; there was inadequate fire protection, one boiler was practically burnt out; the water supply was foul and not healthy, the water-closets were unsanitary; the lighting plant was in very bad condition; the ice plant and cold-storage room needed repairing; there was a lack of farming tools and equipments; there was not sufficient room for the employees, and the institution needed additional land. This gives a fair idea of the conditions there, and it was difficult for the commission to understand how the officers of that institution had managed to get along at all, or to conduct it with any sort of success.

We have remedied these troubles, and the institution now has a respectable equipment.

We are now erecting at Goldsboro four buildings, two for consumptives and two for epileptics. These buildings, when completed, will make room in the present buildings for eighty-four patients, and will cost, exclusive of equipment, \$23,650.

A detailed statement of the appropriations for this instituion is attached and marked Exhibit C.

#### RECAPITULATION.

From the above it will be observed that when the buildings and improvements now under construction are completed, we will have provided for 575 additional patients at Raleigh, which will double the present capacity of that institution. We will have provided for 102 additional female patients at Morganton and also 100 males at Morganton, and eighty-four new patients at Goldsboro, a grand total of 861.

The commission has begun, as herein stated, the erection of buildings at Raleigh to provide for all that class of white epiceptics known as insane epileptics, some of whom are now in the Hospitals at Raleigh and Morgauton, many more being in the county homes and jails. It contemplates the crection, in the near future, of additional buildings for that other grade of epileptics (not insane now), and for those unfortunates called mental defectives, who are not admitted to the Hospitals, but are in county homes and private families.

We think that all epileptics and all mental defectives should be under one management, and to this end we recommend to the General Assembly through you the enactment of such a law as will require these classes of unfortunates to be provided for at the same place.

The commission is also of the opinion that all tubercular white insane should be cared for at the same place, and, as we have provided for epileptics, as stated above, at Raleigh, we are of the opinion that it would be reasonably fair and just and economical that the tubercular insane should be cared for at Morganton, not only for climatic reasons, but for the further reason that a special care and treatment is required for this form of disease, and we do not think it economical to maintain two separate places for this purpose.

Your commission desires to make one other recommendation to the General Assembly through you, and we beg of you that you will give it careful consideration.

There is more or less rivalry between the Hospital at Raleigh and the Hospital at Morganton. There is a feeling in the State that the Morganton institution is better in every respect than the Raleigh institution. It is a well-known fact that the Morganton buildings and management, owing to a continuous management over a long period of years, is recognized as the better institution of the two. This commission has determined, as far as is in its power, to place the two institutions on an equality as to buildings and equipments, and to dissipate, if possible, the idea that either institution is better than the other.

In our judgment, the most effective way to bring about this condition of public sentiment is to have one Board of Directors for the State, who shall have in charge and control all three of the State Hospitals. This board should be composed, in our opinion, of one member from each congressional district. It should be required to meet often, and to diligently supervise each. It should buy all of a certain kind of supplies for each institution, thereby securing them cheaper. The expense of this one board would be cheaper than the expense of three.

This plan would not only prevent this unnecessary rivalry and especial effort on the part of each institution to obtain larger appropriations from the General Assembly in order that each might excel the other, but would enable the board to ask for only such appropriations as would be actually necessary to run all institutions economically under one system. It would also be greatly to the benefit of the State, in that it would have the effect to cause the boards to be independent of all local influences, or the influence of any officer of any one institution. It would effectively abolish the rivalry between the white institutions, and in dissipating the sentiment that one is better than the other.

We cannot close this report without expressing to your Excellency our grateful appreciation for your invaluable assistance and advice in helping us to perform the responsible duties we have had before us. At all times you have been ready to aid us in the difficult tasks of this great and important work, and it has been extremely gratifying that we have had not only your advice and assistance, but your sympathy and approval of what we are trying to do.

Respectfully submitted,

Chas. A. Webb, Chairman,

J. W. McNeill, Secretary.

J. H. WEDDINGTON,

E. F. AYDLETT,

W. A. ERWIN.

## INAUGURAL ADDRESS

OF

# WILLIAM W. KITCHIN

GOVERNOR OF NORTH CAROLINA

TO THE

## GENERAL ASSEMBLY

**JANUARY 12, 1909** 

RALEIGH
E. M. UZZELL & Co., STATE PRINTERS AND BINDERS
1909

### INAUGURAL ADDRESS.

Members of the General Assembly, Ladies and Gentlemen:

Political parties are not only natural, but necessary in our government. Under our Constitution, all the legislative powers of the State every two years, and all the executive powers every four years, are returned to the people, to whom all governmental powers belong, and the electors at these stated intervals determine into whose hands these powers shall be committed. The Democratic party has again been charged by the people with responsibility for the proper exercise of these powers during the constitutional periods. By thus further entrusting public affairs to this party, they have endorsed its record and have approved its declaration of principles as set forth in its Charlotte platform. In approving its record they did not intend to declare it faultless, or to approve every act committed in its name. No human being is perfect, and no organization of men is perfect. The people did, however, approve its fundamental doctrines and its well-considered policies. As no man is altogether bad, no political party is altogether bad. In disapproving the record of the Republican party and rejecting its platform the people did not declare that nothing in that record is good and nothing in that platform desirable, but they expressed their judgment that the record as a whole of the Republican party in this State has been harmful, that its platform criticism of the service of the Democratic party to the public is unjust, and that its denunciations of Democratic policies are unwarranted.

In assuming to-day, in obedience to the will of a majority of my fellow-citizens, the weighty responsibilities of the Chief Executive of this Commonwealth, it is unnecessary to give assurance that the recognized principles of the Democratic party shall be encouraged and pursued by the incoming administration. We have been commanded to maintain and promote, so far as we can, the great policies which have been continued or inaugurated during the last eight years, as well as to undertake the establishment of the new policies propounded in the platform which was endorsed at the polls, with the provisions of which you are already familiar.

#### PRIMARIES.

Many electors unfortunately have the easy disposition of failing to exercise their right of suffrage, or of exercising it in the general elections, with other motives than the high purposes of strengthening the party representing their political principles, and selecting officials who will, in their judgment, best serve the country's interests. Every precaution should be taken to assure each elector's having, and understandingly having, an equal voice in naming the candidates of his party. This assurance will largely eliminate such other motives. A properly safeguarded direct primary for selecting the nominees of all political parties is the best plan that has been or can be devised. It enables the people to have closer touch with, and more effective control of, their officials. It renders harmless efforts to trade against the wishes of the electors. It does much to destroy the cry and more to nullify the attempt of ring rule. It ought to diminish the expenses of campaigns for nominations. Should such expenses for legitimate purposes increase as they have increased in recent years, it will soon be that none but a wealthy man can hopefully aspire to our higher offices unless others pay his campaign expenses for the nomination. If others pay his expenses, he will feel under obligations to them, and will not be in position to render the people his best service, especially in matters involving doubt as to the path of public duty. The public should insist on having every official free from obligation for his nomination for office except to the people. Every reasonable safeguard should be thrown around our nominations and elections to secure the accomplishment of the honest judgment and unconstrained wishes of the electors, and to render less effective the shrewdness of astute politicians in furthering mere personal purposes and reaching mere personal ends. Ability, patriotism, character, service, and the principles and policies of aspirants are rightfully the elements which appeal to the judgment of electors, and these should be the source of success. To partially attain to this standard and to partially eliminate other considerations, the publicity, before convention and election, of campaign funds and the names of contributors, as favored in the last Democratic platform, will be effective, and a suitable law should be enacted to accomplish the purpose of that plank. Whether you favor a general mandatory primary law or not, there are provisions to which there may be no serious opposition and which ought to be enacted and made applieable to all counties in which primaries are held. Among these provisions are the following: First, delegates should be required to cast the vote on the first ballot according to the primary result. Second, there should be a registered list of party voters subject to challenge. Third, the Legislature should fix the date of primaries for all parties for State. judicial and congressional offices, and also fix another date for primaries for legislative and county offices, with a provision permitting the county executive committee in its discretion to adopt for any county primary the State and district primary day. Fourth, all corrupt use of money for primary effect should be made an offense against the law. Fifth, when only one candidate gives notice in writing of his eandidacy to the proper executive committee by a stated period prior to the primary day, the committee should have the legal power to deelare him the party nominee. This period should be longer for State and district than for county candidates. Sixth, the willful publication of any false charge concerning his political record, or reflecting upon his moral character for the purpose of injuring a candidate in the primaries with the people, should be penalized by law.

#### PROHIBITION.

The people having, after much agitation and full discussion, ratified by a large majority State prohibition, the Legislature should not seriously consider any proposition to repeal the prohibition law. No one doubts the right of the people to have their will in this matter duly, fairly and earnestly expressed, to reign as the law of the State. Every good citizen, whether he originally favored this law or opposed it, should insist upon its honest and faithful enforcement. It is an experiment with us, but no State ever entered upon the experiment under more favorable conditions than confront us, and I trust that a unity of purpose will inspire all good citizens to aid in rendering enforcement as successful as possible. No one expects the law to remain unviolated, but we have a right to expect its penalties to be upon those who violate it. Our punishments are

not for purposes of cruelty or revenge, but are, unfortunately, necessary to diminish violations of law and to obtain compliance with the people's will in their effort to elevate themselves and improve the conditions under which they struggle to better and happier circumstances.

#### EDUCATION.

The blessings of education no good man denies, its necessity no wise man doubts, and its opportunities no just citizen would withhold from the public. Pride thrills the heart of every patriotic North Carolinian in contemplating the rapid strides with which great improvement in our public schools is continuing. Larger and more comfortable schoolhouses taking the place of inferior ones, a higher class of teachers and instruction constantly appearing, and attendance day after day increasing, cause gratification over our system. I have in mind no general reform in our educational work, but a deep conviction that we should more thoroughly develop a system already constructed by patriotic wisdom. Nothing can strengthen your determination to advance the educational interests of our State to the utmost of your ability while duly considering the public revenues, the sonrces from which they are derived, and the other needs of the State appealing to your judgment. We are not a wealthy State in market or taxable values in comparison with States a vast part of whose wealth has never been swept away by war and its blighting aftermath, and the same rate of taxation will not raise for us as much money as they receive per capita. The less wealthy a State is the greater burden a given rate of taxation is, as from every one's income his fixed nccessary living expenses must first come. The State is doing well, and as her wealth increases she will do better.

Under present conditions every child in the State may receive, at public expense, an education, limited though it be, which will greatly benefit him in the contest for life's rewards. The basic purpose in public education is good citizenship. In a republic, to have a government certainly just, and to insure the punishment of wrong and the protection of virtue, to prevent oppression and guarantee right, to distribute the blessings arising from organized society equally, and to levy the burden

of its sustenance equitably upon persons, property and privileges, three things are essential in citizenship—a heart so honorable that it cannot be corrupted, a soul so courageous that it cannot be intimidated, and a mind so intelligent that it cannot be deceived; for the three methods the hosts of wrong attempt are to corrupt, intimidate and deceive. With a people merely conscientious and courageous oppression has easy contests and fruitful conquests, but with such a people education becomes the bulwark of liberty, increasing their honor and courage, discovering the purpose and plan of the oppressor, and enabling them to resist indirect and insidious assaults, as our uneducated ancestors repelled the direct wrongs against them centuries ago. While there will continue to be bad men, whose evil conduct will ever emphasize the virtue of others, it is fortunate that in our civilization good men, though not perfect, predominate, and with the people educated this majority is greatly strengthened and its effectiveness for right, truth and liberty more than doubled.

No State can afford to do otherwise than be liberal, both with her ordinary public schools and with her higher institutions of learning. In an agricultural State, such as ours, too much stress cannot be placed upon agricultural education. A great majority of our people live upon the farm. A man good in his avocation or profession, whether farmer, doctor, blacksmith or other, is apt to be a good citizen, and the probability of success and contentment is largely in his favor. The skilled man in his line of work adds rapidly to the wealth of the State and thus strengthens the revenues upon which the State depends for all the great work she undertakes. With telephones, rural free delivery of mail, and good roads, there is needed to make country life more profitable and enjoyable a knowledge comprehensive and accurate as may be of agriculture, of preserving and increasing soil fertility, of plant selection and plant life, of rotation, drainage, diversification, farm economies and comforts, and other matters to make happier and more remunerative the business of those who woo necessities of human life from the soil with patience and toil. Not a dozen great colleges can adequately supply it to the people. We recognize the great value of those men here and there in

the State, some of them graduates of our institutions, whose intelligent, practical and progressive farming is an example and an inspiration to whole communities. Doubtless, in the long years the desired results will be reached under the present rate of progress, but the magnitude and the magnificent possibilities of our agricultural interests justify every reasonable effort to quicken it. I shall encourage a policy already adopted, urging that the simple essentials of agriculture be thoroughly taught in our public schools. With such essentials taught to the boys, I predict a thirst in them for more information which will increase the attendance upon our institutes, the subscriptions to agricultural papers, and the study of farm bulletins and kindred literature, all of which will promote the pleasure and profit of agricultural life.

I am strongly impressed with the importance that in addition to regular instruction in hygiene, there should be special instruction upon typhoid fever and tuberculosis, and especially upon precautions to limit and avoid them, both of which, in the opinion of the medical world, are largely preventable diseases. Those who know, even partially, must teach those who do not know, and when teaching is one's business, what should he teach rather than how to protect human life from its most terrible enemics? Teachers are not expected to be doctors, but some simple text-work on the prevention of these two diseases should be taught. Their prevalence and fatality, and the fact that they are avoidable, justify the teacher in preparing suitable lectures, or, better still, in securing some physician to lecture on them. The noble profession of medicine, which does so much charitable work. I doubt not has members in every county who will gladly lecture to the schools on these subjects.

#### CHARITABLE INSTITUTIONS.

The good people of our State have no cause for greater pride in their governmental undertakings than in their care of and provision for the unfortunates within our borders. Our institutions for the education of some and for the maintenance and treatment of others shrink not in comparison with such institutions in our sister States. No better work, or one closer to the hearts of us all, is being done by the State. The State should not be profligate, but it should be liberal with these institutions. With liberality for such worthy purposes should go the closest scrutiny into expenditures, and a constant determination not to be careless with taxes willingly paid for meritorious public purposes, and not to be extravagant in public generosity.

PENSIONS.

The Confederate veteran needs no further eulogy than he has always had, and will always have, from every brave and patriotic North Carolinian, but many veterans need more assistance from the State whose honor they maintained, whose glory they increased, and to whose cause they gave an unstinted devotion in the days of their young manhood. I trust that, with a due regard to other matters requiring your appropriations, you will find the conditions of our revenues such that you can increase our pensions.

RETURN OF PROSPERITY.

We congratulate the State that its manufacturing industries are emerging from the shadows of the recent panic. While prices of some of our farm products have not been very greatly depressed during this period of general hard times, yet the low prices of the important crops of cotton and peanuts wrought serious injury to large sections of the State. With the revival of business throughout the country, which always follows panics, our State will reap her share of benefits. State policies never yet caused a general panic, and State Legislatures can do nothing to avert one. Our people were extremely fortunate in being so well prepared to weather the storms which they did not produce and could not escape, for the industries of no State withstood the panic better than ours and suffered less its direful effects. Every citizen should do what is in his power to hasten the full return of prosperity to our farms and factories which they so richly deserve and which will assure similar prosperity to all other industries.

#### FACTORY LIFE.

Factory life is increasing in our State and factory conditions will constantly press upon the attention of all. Factories should not be hindered or crippled in their great work, but should be urged forward to greater triumphs. However, the object of effort is not to pile brick upon brick, or to merely perfect processes of earning money. Human happiness is sought, not merely for the few, but for all. He that works to help another amass a fortune is entitled in addition to his wages to healthful surroundings and pleasant conditions, otherwise his struggle for happiness is handicapped and fruitless. While many of our mills are sanitary to a high degree, especially those of recent construction, our factories have attained to that magnitude that the public may rightfully require that hereafter every mill erected shall be constructed in accordance with the demands of sanitation to avoid as far as possible disease among operatives, as they are now constructed in accordance with insurance demands to avoid as far as possible fire losses.

Every right-thinking man is against child factory labor, vet every one knows that under present conditions, unless our homes for the aged and infirm and our orphanages are vastly enlarged, some children must labor. Neither the counties nor the denominations are ready to shoulder the expense, however good in theory, of maintaining all those whom children now help to support and such children themselves as now have to work. Child labor of some kind at present is an unavoidable evil. It appears that those children who must toil can earn more in factories than on farms, and often they and theirs prefer the factory. The mill children of to-day will be the ancestors of many mill workers of the future. For our factories to compete with others, high-class labor will be essential. High-class labor must be healthy. A far-sighted wisdom makes our mill owners anxious not only to preserve, but to improve, the health of every operative, both for present results and future safety.

Our law prohibiting children under thirteen years of age from working in factories should be enforced. I doubt not that our mill managers endeavor to comply with its provisions. There should be some official inspection to aid in its enforcement, and it should be under the Bureau of Labor and Printing. We know the difficulty of refusing employment to the child who must work, and who can earn more money in a factory than elsewhere; but the law which has been written should be obeyed. While a system lodging in some official the duty of

investigating each case of proposed child labor and ascertaining how otherwise the child, or a disabled father, or a widowed mother could be supported, or whether admittance to some asylum could be had, the conditions under which such child work, his physical development, the number of hours required and other facts bearing on it, and requiring upon such investigation a decision in writing, giving reasons, and either permitting or denying employment, might be better than the system we have adopted, yet ours was adopted, as I understand, upon mutual agreement of those employing labor, those representing the employed and those representing the public, and it remains for the authorities of the people, including the Legislature, to see that our system is properly carried out. In wise efforts to perfect this system you may confidently expect the co-operation of our mannfacturers.

#### CORPORATIONS.

The Attorney-General should be authorized to examine every proposed charter for a corporation to see that it violates neither the written nor unwritten law. He should be specifically charged with the duty of enforcing our law against all corporations, domestic and foreign, habitually violating its provisions. When a corporation is conducting a business in violation of law, no one feels that it is his special duty to act, but every one is inclined to wait for some one else to proceed, and where the greatest violation is committed, there the corporation may create strong sentiment against its prosecution. Many of the wrongs committed by corporations against our people are under circumstances which the State cannot control, and cannot be wholly remedied except by the Federal Government. Yet the State can do something for the public, and has a duty to do for her own interests. We should require every foreign corporation to obtain license to do business in this State, and should provide that such license should be revoked when it is engaged in violating our law, or is attempting under the powers of monopoly to exact from the industrial life of the State unreasonable profits with which to pay dividends upon fictitious values or watered stock. Such license should also be revocable when any such corporation maintains an established office in

this State for the transaction of its regular business or the collection of its revenues, enriching itself from our people under our laws and by our comity, and yet fails to submit to the jurisdiction of our courts, as all domestic corporations are required to do. I am aware, of course, of the criticism which may be expected from such foreign corporations as desire to be let alone in their wrongdoing, and of the opposition which they will offer to our efforts to compel them to conform to the rule of justice and equity. The State, however, owes her people the high duty which a brave citizenship should require to be performed. No corporation lacking confidence in our courts should desire to enter our midst to gather wealth from fields it did not cultivate, and no corporation having contempt for our sovereignty should be permitted to reap golden harvests where it did not sow. We have reached that stage of industrial and material strength where, if every foreign corporation should unite in withdrawing from our State, domestic corporations obedient to the public will, respecting the people's law, will take the places, perform the functions and render the services now by such foreign corporations performed and rendered.

Our State has always dealt and will continue to deal kindly with corporations. Their importance, usefulness and necessity in developing our natural resources are recognized. They have universal praise for their part in the upbuilding of our State. in the increase of wealth, in the employment of our people, and for the spirit of progress which they exhibit and inspire. They have rights which are and will be respected and encouraged. Unjust burdens and wrongful restraints have not been and will not be placed upon them. They have special privileges which individuals, however enterprising, cannot have-privileges which justify special burdens and require a more careful supervision by public authority than individuals. Creatures of the law, they owe an obedience to its mandates stricter, if possible, than individuals who created the law. Without soul, conscience, or physical body, exempt from remorse, from fear of future punishment, and from jail, it is natural that they should more easily than individuals yield to temptations to violate the laws in their effort to make money-the great purpose of their existence. Yet, owing to the high character of

the men who control them. I doubt not that nine-tenths of our corporations comply with the law and do absolutely honest business, and are therefore entirely free from public complaint. These corporations, like individuals, suffer the injury inflicted by men and corporations that violate the law. The law-abiding corporation has the desire to enforce the law against its lawdefying fellow, for no one can have a greater business interest to prevent corporations from violating the law than the corporation that lives within its bounds. The State believes in justice evenhanded and universal, and it strives towards the attainment of universal right, regarding not whether a corrupt man or a corrupt corporation impedes its progress. As it discriminates between the man who obeys the law and the one who violates it, so should it discriminate between the corporation that obeys the law and the one that violates it. The Legislature prescribes the law as a rule of conduct commanding what is right and prohibiting what is wrong, and in my opinion only the man or corporation that fears the right or follows wrong needs dread the wisdom of the people or the action of their Legislatures. The man who by foul means willfully and needlessly takes the life of a rival, under our law forfeits his own. The corporate monopoly that by foul means willfully and needlessly destroys its rival by wrongdoing for the purpose of exacting unjust profits from the public, should forfeit its existence. All the power of the State in all of its departments should be exerted to destroy every unnatural monopoly, every industrial trust that commits wrong upon the people and their industries. And the fixed policy of regulating the natural monopolies, the public service corporations, should be maintained.

GOOD ROADS AND DRAINAGE,

It would be difficult to overestimate the value of good roads. While various counties are doing much in this direction, many counties are doing very little. We are but on the threshold of the good-roads movement, and the next generation will witness wonderful progress. We of this day should in every practicable way encourage it. Whether it is feasible to adopt a general plan of State aid to, or co-operation with, the counties under the present condition of our revenues is extremely doubtful. The State can enact an improved, up-to-date, law which shall apply to every county that hereafter adopts the taxation plan of building good roads, and thus promote uniformity of system. A thing to be considered in adopting a State-aid plan is, that if the State should help the counties, either in accordance with their wealth or population, the counties which need it most would get the least help per mile of road. In my judgment a State highway commission may with great advantage be created to consider the whole matter and report to the next Legislature, as we have no department charged with the duty of investigating and reporting upon this important subject.

We have vast areas of swamp lands awaiting drainage to become fertile and profitable. In many cases the timber will pay the cost of drainage. The time cannot be far distant when these lauds will be drained and become largely free from their present disease-breeding conditions, and will be the most productive lands in the State. The State can undertake the drainage and levy assessments on the benefited land for expenses, but I do not think there is a present necessity for this method. An experiment on a small scale is worth trying in the drainage of some of our swamp land. Also, some comprehensive, liberal and effective law should be enacted authorizing, upon just terms and under proper regulations, private owners of swamp lands to enter upon the lands of others for the purpose of effectual drainage.

BANK DEPOSITS.

The last platform upon which the incoming national administration was elected declares for postal savings hanks, and it is not unreasonable to presume that before that administratiou ends Congress will obey the pledge of the Republican party and establish postal savings hanks. The National Democratic party is likewise conditionally pledged to postal banks. Under present conditions certain results may confidently he predicted from the postal savings-bank system. Vast sums of money in small individual accounts, much of it now in the pockets of the people, will be placed in these postal hanks, as the Federal Government will guarantee its safety. This money will, in turn, be deposited in the national hanks, with the inevitable result that a greater proportion of the cash of the country will find its

way to the national banks in the money centers-that is, in the larger eities of the country, not one of which is in our State. These results will tend to drive every State bank out of business, as State banks eannot be expected to stand the competition with rivals having such advantages over them, and thus a mighty impulse will be given to centralization and a serious blow upon the industrial independence of the State inflieted. As no national bank can have a capital of less than \$25,000, there would be danger that many of our small towns would be deprived of banking facilities which they now enjoy. Our State banks are the creatures of our own legislation. They have blessed the State, and especially the smaller towns. They have aided and encouraged our enterprises. Their record has been one of merit and safety. In comparison with national banks, when measured by assets lost or deposits involved in failed institutions, our State banks do not suffer, as the history of the last generation shows. Under present conditions, when a bank's solveney is suspected by other banks and other banks are the first to suspect it, then every bank in that vicinity is, in self-defense, compelled to hoard its eash and withhold it from solvent borrowers for legitimate purposes, so as to be prepared to meet any probable run on it eaused by the anticipated failure of the suspected institution. With the present stockholders' liability and proper inspection, our State system is rightfully pronounced sound and safe. Yet something further is needed, not merely to encourage our people to deposit their money instead of hoarding it, to moderate the effects of panie, to prevent runs on solvent banks, and to insure depositors, but to enable our banks to survive the postal savings-bank system. In my judgment, the bank-deposit guaranty policy will benefit not only the banks but very greatly the public. All successful banks prosper on the money of depositors. State and Federal governments require security for their deposits with banks, yet these public deposits produce but a small part of the profits of banks. The individual depositor contributes the greater part of the money from which profits arise. Every banker ought to be willing to have these deposits which enrich him thoroughly guaranteed. I realize that a Governor, who has no power to forbid or veto harmful legislation, can

have little power in advancing beneficial legislation. He can, however, and it is his duty to recommend to the Legislature what he regards as wise and helpful, leaving it, as it ought to be left, to the judgment of the Legislators, chosen by the people for this purpose, in their wisdom to follow or reject his suggestions. It is with such recognition that I have thought proper to mention bank-deposit guaranty. A compulsory system is advisable but not necessary. I believe the same purposes will be accomplished by enacting a guaranty law for the benefit of those banks which desire to avail themselves of its provisions. Let provision be made that when a certain per cent, of the State banks, say sixty, representing a certain per cent, of the State banking capital, say fifty, shall file with the Corporation Commission a request to be admitted to its provisions, the Corporation Commission shall certify that fact to the Governor. who shall proclaim the act to be effective from and after the first day of the ensuing July or January, whichever comes next, upon all such banks and upon others which may thereafter file a similar request. Should the Legislature favor the policy the details of the legislation will not be difficult, and any fear that irresponsible and unsafe banks might be organized can be allayed by appropriate provisions.

#### RAILROADS.

The railway business of the State is so important that I deem it proper, in this inaugural address, in formal fashion to set forth some of the views entertained by me and which I have in public speeches often declared concerning railroad matters.

Every thinking man realizes that railroads are necessary, that they bless every community they touch, that they must be profitable in order to give proper service, that they deserve fair treatment at the hands of Legislatures, and, moreover, that any legislation that would deprive them of just compensation would be futile under the Constitution. The people are willing to be charged such rates for travel and freight as will pay the legitimate expenses of every kind and character, including liberal wages to all employees, keep up the roads in good repair and safe condition, and then pay fair dividends upon the value of the property. But the people are unwilling for com-

namies chartered for the public benefit to exact from the public, under an almost unlimited power to extort when unrestrained by law, additional rates to pay dividends on fictitious values, or to enable railroad magicians by trickery to make millions overnight, or to justify them in saddling upon the public millions of securities in watered stock. In my judgment, the fundamental wrong in the American railroad problem is watered stock. The great question with most railroad managers is how to make one dollar's worth of property earn dividends and interest on two dollars of stock and bonds. This tends to two great evils; overcharging the public on one hand, and stinting the roads in labor and equipment on the other. This overcapitalization, and the fact that, except in rare instances, the owners of railroads do not live among, and have little sympathy with, the people they serve, are at the bottom of most railroad evils. Oftentimes a manager serving a far-away corporate head, not knowing how long he will hold his position, endeavors to make a record by charging the public all he can, and by exercising a temporary economy that leads finally to defective roadbed, dangerous track and insufficient equipment, for he is expected above all other things from his position to make the property earn dividends upon original and watered stock. is evident that one of the essentials of a proper regulation of railroad charges is to provide by statute for ascertaining the value of railroad property in order to have a basis upon which to consider rates.

The last Legislature reduced passenger fares. The rates now in force, which save thousands of dollars annually to the people from the old rates, have been approved by the railroads as just and reasonable. Conditions justify us in anticipating no agitation for any change in passenger fares during the term of the incoming administration.

The discriminations in freight rates practiced by railroads in favor of some and against other cities is properly receiving much attention. As far as competing cities are concerned, it is more important that they have relatively just rates than that either have absolutely just rates. All rates may be too high, but even then, relatively they should be equitable. Some of our North Carolina cities have been compelled to pay millions of

dollars of freight over and above what other cities have paid for the same distance. The freight on a car load of corn from Cincinnati to Greensboro is much more than the freight would be should the car go on to Lynchburg. A car load of molasses from New Orleans to Lynchburg pays less freight than if it stops in Charlotte. Over such discriminations in interstate commerce the Interstate Commerce Commission has sole jurisdiction. On the face of the above instances there is injustice, and they show that companies whose directing heads live away from the section served do not of their own accord always deal fairly and mete out even-handed justice to the communities they reach, and to remedy such wrongs the people must look elsewhere than to the managers of the railroads. The fixing of proper rates is a great problem. Each city is entitled to all natural advantages, but no railroad company should carry freight to one city at a loss and then be permitted to overcharge other communities to recover that loss. Under no conditions and for no purpose, in my judgment, should any community be charged more than a just rate for the service rendered it, regardless of profits or losses on rates to other cities.

The State should do all that is properly within her power to abolish the discriminations against our towns and cities, and to secure for our enterprises and business interstate rates as fair for our citizens as the rates enjoyed by the citizens of other States in their enterprises. The last Legislature appropriated five thousand dollars to help bear the expenses of efforts to secure from the Interstate Commerce Commission correction of existing wrongs against our people in interstate rates. Such assistance should be continued until all reasonable efforts have been made to secure justice to the interests of the State.

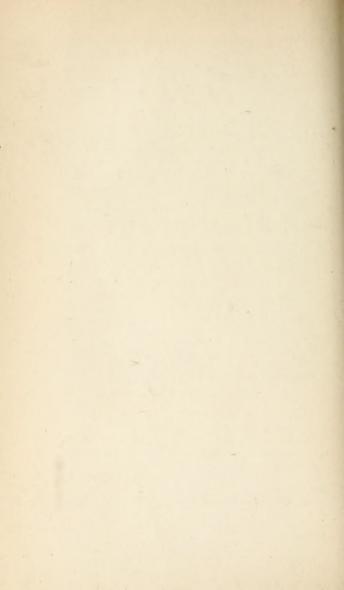

#### ECONOMY.

In the Treasurer's report it appears that, owing to the value of our taxable property not increasing as much as the last Legislature anticipated, our expenditures for the last two years exceeded our receipts. This fact emphasizes the necessity of practicing the governmental virtue of economy.

The sentiment of our people and our financial strength forbid parsimony, but there are limitations upon our treasury, and the Legislature will regard these limitations, and display that wise statesmanship which will appropriate justly for all worthy purposes and yet keep the appropriations within the bounds of our probable revenues, bearing in mind that a surplus is usually more desirable than a deficit. The Legislature will make proper provision for refunding that part of the State's debt which falls due in 1910.

Sincere gratitude for the people's approval of my past public services and profound appreciation of their confidence in calling me to the responsible duties of Governor, shall constantly determine me to dedicate whatever ability I may have to the prompt, unselfish and faithful performance of such duties. With hope and pride, and yet with fear and humility, I take the high office from my able, patriotic and distinguished predecessor. Fully conscious of my own weakness, I would dread to undertake the discharge of its obligations, except for the wisdom and strength of those whom the people have likewise elected to serve in the conduct of the State's affairs, and on whose counsels I hope to lean in matters of doubt and in hours of trial. Even with their aid I cannot hope to avoid mistakes, evade criticism or escape being misunderstood, but, relying upon the good sense and fair judgment of the people of the State to uphold my hands and to sustain my efforts to serve them constantly, honestly and fearlessly, I shall devote my time and talents to their cause. Let us trust that under the guidance of ever kind Providence in the ensuing years plenty and peace shall bless our people, prosperity enrich our industries, happiness dwell in our homes, the spirit of harmony and fellowship grow among men, and devotion to law and order increase.

WILLIAM W. KITCHIN.

## LETTER OF TRANSMISSION.

NORTH CAROLINA BOARD OF HEALTH,

OFFICE OF THE SECRETARY,

RALEIGH, June 15, 1909.

His Excellency, W. W. KITCHIN,

Governor of North Carolina.

Sir:—I have the honor to present herewith the Twelfth Biennial Report of the North Carolina Board of Health. Very respectfully,

> RICHARD H. LEWIS, M. D., Secretary and Treasurer.

#### TWELFTH BIENNIAL REPORT

OF THE

## NORTH CAROLINA BOARD OF HEALTH.

1907-1908.

The past two years, from the sanitary point of view, have been uneventful. Beyond an outbreak of typhoid fever of unusual severity in the little village of Council, Bladen County, extending through two seasons, but limited in extent because of the small population, there has been no epidemic worthy of the name. Smallpox has continued to crop out at various times and points, but has been decidedly less in extent than for several years, and of the same extremely mild type.

The most noteworthy event of the past biennial period is the establishment of the State Sanatorium for Tuberculosis. The General Assembly of 1907 passed an act authorizing its establishment, and appropriated \$15,000 for the purchase of a site and erection of buildings and \$5,000 annually for its While the amount appropriated was altogether support. inadequate, it was nevertheless the beginning of what we hope and have reason to believe will develop into an institution of great value in the crusade now waging all over the civilized world against man's most deadly enemy. Considerable difficulty was found in securing a satisfactory site, but finally an excellent location with a clear title, in the pine-clad sandhills at Montrose, on the Aberdeen and Rockfish Railroad, eight miles from Aberdeen, just across the Moore County line in Cumberland, was obtained. We doubt if a site more nearly ideal for the purpose can be found east of the Mississippi. With a capacity of thirty-four, it was opened for patients in November, 1908, and has already done good work.

For an account of the work of the Board in detail, the reader is referred to the pages following.

#### MEETINGS OF THE BOARD.

# MINUTES OF THE ANNUAL MEETING AT MOREHEAD CITY.

Morehead City, June 12, 1907.

The annual meeting of the Board was held in the Atlantic Hotel, President Thomas in the chair. Members present: Drs. Thomas, Battle, Way, Anderson, Spencer, Register, Lewis (R. H.), and Colonel Ludlow.

The minutes of the last meeting were read and approved.

Dr. McCarthy, Biologist of the State Laboratory of Hygiene, read his report. On motion, its consideration was temporarily postponed, with the understanding that a report of the action of the Board thereon would be made to him at the end of the meeting.

On motion of Dr. Speneer, Dr. C. A. Shore was elected Director of the Laboratory of Hygiene, at an annual salary of \$2,000, beginning January 1, 1908.

On motion, the Treasurer was instructed to pay Dr. Mc-Carthy, Biologist of the State Laboratory of Hygiene, the sum of \$500 for the purchase of his typewriter and to cover all claims against the Laboratory for fees for special analyses and for all other claims, as set forth in his report of this date; and it was further ordered that his services be continued until March 1, 1908, at the rate of \$2,000 per annum, beginning June 1, 1907. This was accepted by Dr. Mc-Carthy.

On motion, the salary of the chemical assistant in the Laboratory, Miss Daisy B. Allen, was made \$75 a month, beginning July 1, 1907.

The Secretary having called attention to the fact that the terms of office of all the members of the Board of Embalming, by limitation or by change in the personnel of the Board of Health, had expired, Messrs. Harry and Simpson, embalmers, having held over, the following were elected as members from the Board of Health:

Dr. J. Howell Way, Waynesville; term expires 1909.

Dr. E. C. Register, Charlotte; term expires 1908.

Dr. R. H. Lewis, Raleigh; term expires 1912.

The Secretary was instructed to prepare resolutions of appreciation of the valuable aid extended to the Board of Health in its laboratory work by the State Board of Agriculture and to make them a part of these proceedings.

The President was requested to appoint, at his convenience, the committees for the inspection of the public institutions of the State.

Adjourned after midnight, to meet again in the morning.

RICHARD H. LEWIS,

Secretary.

Morehead City, June 13, 1907.

The Board reassembled with the same members present as the night before.

On motion of Colonel Ludlow, the Secretary was instructed to obtain a United States Geological Survey field outfit for water analyses, with the necessary supplementary apparatus for the bacteriological examinations of water supplies, and to employ in emergency a suitable man to make the examinations whenever in the opinion of the Engineer and the Secretary it might be deemed advisable.

On motion, Colonel Ludlow and the Secretary were elected delegates to the American Public Health Association.

The term of office of the Secretary having expired at this meeting by limitation, Dr. Way nominated the present incumbent and moved that the Present be instructed to cast the ballot, there being no other nomination. The motion was carried, the President east the ballot of the Board and the present incumbent was re-elected for a term of six years.

The Treasurer presented his reports, with vouchers, for the Board of Health and for the Laboratory of Hygiene. Colonel Ludlow and Dr. Anderson were appointed by the President a committee to audit the same.

The engineer of the Board was requested to continue his supervision of the public water supplies.

The auditing committee reported that they had examined the accounts of the Treasurer and found them correct.

On motion, the Board adjourned to meet at 12 M. to-morrow in conjoint session with the State Medical Society.

RICHARD H. LEWIS,

Secretary.

#### CONJOINT SESSION

WITH THE

# STATE MEDICAL SOCIETY AT MOREHEAD CITY,

JUNE 12, 1907.

The conjoint session of the State Board of Health with the State Medical Society, according to custom, was held at 12 M. on June 12, the second day of the meeting of the Society. Dr. George G. Thomas, President of the Board of Health, in the chair.

REPORT OF THE SECRETARY.

The Secretary read his annual report, as follows:

ANNUAL REPORT OF SECRETARY OF THE NORTH CAROLINA BOARD OF HEALTH, MAY 1, 1906, TO MAY 1, 1907.

During the past year we have suffered no special ontbreak of disease and the health of our people in general has heen about as usnal. A detailed statement of the work of the Board will be found in the Eleventh Biennial Report, which has been for months and still is in the hands of the printer. A copy will be sent to any one asking for it as soon as it is published.

The work of your Secretary has been for the most part of the usual routine character, special attention having been paid to the further distribution of the pamphlets on the prevention of tuberculosis. The indications are that the wide circulation of this publication has made an impression upon our people and has been of real assistance in the campaign against this most fatal of all our diseases. I am satisfied that the plan adopted of sending the pamphlet direct to the individual, with a letter urging him to read it and to assist in its distribution, has added much to its effectiveness. Over 100,000 copies have been mailed to date, and I am confident that no expenditure of our meager appropriation has brought forth better results than that paid out for the postage on this pamphlet.

With January came the meeting of the General Assembly, which is always a period of mingled hopefulness and anxiety. While the attitude of the last Legislature was, perhaps, less friendly to our license law than has been the case for many sessions, its interest in the public health was more pronounced than nsnal—an interest that was not simply academic, but one that did something worth while. In *The Bulletin* for April I printed all the acts of general

interest bearing on the public health, both directly and indirectly, but it may not be amiss to refer again in this place to the more important.

The act creating the State Laboratory of Hygiene, which carried no annual appropriation from the general fund for its support, was so amended as to give it two thousand dollars annually; at the same time increasing the annual tax of sixty dollars upon water companies by four dollars. This latter does not materially increase the income of the Laboratory, but all the companies would not pay expressage on water samples, and the four dollars were added to cover that. With the tax from the water companies, now numbering fifty-one and gradually increasing year by year, the income will be sufficient, with the money on hand, to adequately equip and conduct an excellent laboratory without outside help. In this connection it is proper to call attention again to the fact that without the generous aid given us by the Board of Agriculture we, in all probability, would not have had any laboratory at all. It should be remembered that at first the Board of Agriculture had biological analyses of drinking-water made for us in their laboratory free of chargeuntil the water tax was obtained four years ago-and that since that time it has, in addition to furnishing the Laboratory with gas and water, paid \$750 a year towards the salary of the Director, I hope suitable acknowledgment of the enlightened liberality of the Board will be made by the conjoint session. The report of the Director for the past year is appended.

In order to extend the benefits of the Laboratory as far as possible to the people, an act was passed authorizing the preventive treatment of rabies by the Director—who, in the reorganization, will doubtless be a thoroughly trained medical man—when it can be done without interfering with the legitimate work of the Laboratory proper.

A decided advance in State medicine was marked by the enactment of the bill establishing a sanatorium for tuberculous patients, appropriating \$15,000 for a plant and \$5,000 annually for support. The chief credit for this particular legislation is due to Dr. J. E. Brooks, of Greensboro, who was "the man behind the gun," and the Hon. J. R. Gordon, M. D., member from Guilford of the House of Representatives, who was mainly instrumental in securing its passage. Acknowledgment of this was made by the Board of Directors, of which the Secretary of the Board of Health is ex officio a member, at their first meeting, in the election of Dr. Gordon Chairman of the Board and Dr. Brooks Superintendent of the Sanatorium. While the appropriation is very small, it will provide for a beginning, and as the Superintendent is not only an intelligent and capable physician, but an enthusiast on the subject, I feel confident that it will succeed.

As the competency of our physicians is of the highest importance

to the public health, anything bearing upon our medical license law is of importance to us. During the session of the Legislature bills for the relief of physicians in Cherokee, Clay, and Graham counties and in Chatham County were enacted into laws. In the one ease physicians having diplomas were allowed to practice without license until May 1, 1909, and in the other simply to stand the examination for license without exhibiting a diploma. The reason given for this legislation was the same in both cases—that in the remote, sparsely settled, and physically rough regions physicians so well educated as to meet the requirements of our very high standard had not settled, and that unless such action was taken the people in the affected regions would be without medical aid. While actively opposing the first-named bill for fear it might be an entering wedge threatening the jutegrity of our license law, I could not deny the facts, nor in my own mind deny the inherent reasonableness of the contention in the light of those facts. It was indeed the realization of what we have been anticipating, and I was thoroughly impressed with the importance of devising some means of practically lowering the standard to meet such conditions lest our license law should be emasculated in the near future. As a means to this end I approved, as Chairman of the Society's Committee on Legislation, the passage of a bill authorizing the Board of Medical Examiners to reciprocate with other States in their discretion. I welcomed this bill the more gladly because it enabled me to secure the voluntary suppression by its author of another bill requiring the Board of Examiners to graut licenses to any one presenting a diploma from the American Association of Medical Colleges and a liceuse from any State. As the standard of some States is extremely low, and in nearly all lower than in ours, the passage of this bill would have practically repealed our license law and have undone the work of fifty years for the elevation of our profession and the protection of the people against incompetent physicians. Before the present meeting of the Board of Medical Examiners I addressed a circular-letter to each member of the same, calling attention to the conditions above set forth and to the importance of action on their part to meet them as far as possible, suggesting reciprocation with the lowstandard States when the conditions for this concession demanded it, and also that it would probably be well to lessen the rigor of the examination somewhat by granting certificates on the brauches passed, and thereby encourage men to come a second time and finish up successfully rather than give up in despair and take the chances of practicing illegally. I was, therefore, much gratified to learn from President Kent, who stopped over in Raleigh on his way to the meeting for the purpose, that he had secured from the Assistant Attorney-General an opinion to the effect that it would be legal for his Board to grant a license and to require the recipient to sign a contract to restrict his practice to a certain county or section, the Assistant Attorney-General writing out the form of the said contract. The judicious use of this privilege will, I think, solve the problem,

#### SMALLPOX.

I am very glad to state that smallpox has been very much less prevalent. In 1905 the total number of cases was 7,375 with 31 deaths; in 1906, 6.049 cases and 17 deaths, while during the year ending May 1, 1907, the total number of cases was only 1,897 with 6 deaths. The following is a tabulated statement of the disease by counties:

In compliance with the instructions given the Secretary at the meeting of the Board the night before, he presented the following resolutions of appreciation of the great service rendered the cause of the public health by the State Board of Agriculture in having made for the Board in its laboratory sanitary analyses free of charge for two years and upon payment by the Board of Health of half the salaries of

the Biologist and his assistant for four years longer, the Board of Agriculture defraying all other expenses of the laboratory, which were unanimously adopted:

Resolved, by the North Carolina Board of Health and the Medical Society of the State of North Carolina in conjoint session assembled:

- 1. That as the special custodians of the health and lives of our people they desire to place on record their appreciation of the generous assistance in preventing disease, given by the State Board of Agriculture in the use of its laboratory, including the services of its bacteriologist, for making analyses of driuking-water suspected of causing typhoid fever, and other hygienic analyses, bearing all the expenses for two years and fully half for four years more, until funds could be secured for its support.
- 2. That the benefit to our people in the prevention of typhoid fever alone has, if computed in terms of dollars, exceeded many times over the amount expended, and they owe a debt of gratitude to the Board of Agriculture that should ever be remembered.
- 3. That these resolutions be spread upon our records and that a copy be sent to the Commissioner of Agriculture, with the request that he transmit it to his Board at its next meeting.

[Owing to the failure of the stenographer employed by the Medical Society to furnish his report to the Secretary of the same, there is no record of the discussions.]

# MINUTES OF THE ANNUAL MEETING AT WINSTON-SALEM.

WINSTON-SALEM, N. C., June 16, 1908.

Annual meeting. Present: Drs. Thomas, Anderson, Way, Spencer, Register and Burroughs, Colonel Ludlow and the Secretary.

The minutes of the last meeting were read and approved.

Dr. Shore, Director of the Laboratory of Hygiene, read his report.

On motion of Dr. Spencer, the Secretary was authorized to employ an assistant bacteriologist.

The Secretary stated that by allowing part of her time to the Laboratory, he had reduced the cost of the stenographer to the Board from \$35 to \$25 a month.

On motion of Dr. Way, the Secretary and such other members as may attend were appointed delegates to the next meeting of the American Public Health Association, their expenses to be paid, if there should be money enough in the treasury after meeting the regular charges thereupon.

The President was authorized to appoint, at his convenience, committees to make the regular inspections of the State institutions.

Drs. Spencer and Register, who were appointed as auditing committee, reported that they had examined the accounts of the Treasurer and found them correct.

On motion, the Board adjourned, to meet in conjoint session with the State Medical Society at 12 M. to-morrow.

RICHARD H. LEWIS,

Secretary.

### CONJOINT SESSION

WITH THE

# STATE MEDICAL SOCIETY AT WINSTON-SALEM.

JUNE 17, 1908.

The State Medical Society was called to order at 3:30 with the President, Dr. J. Howell Way, in the chair.

THE PRESIDENT: The Society will be in order. We will now have the conjoint session of the State Medical Society and the State Board of Health. Gentlemen, I present the President of the State Board of Health, Dr. George G. Thomas, who will preside over the conjoint session.

Dr. Thomas: The conjoint session is now open for business. We will be glad to have the report of the Secretary.

# ANNUAL REPORT OF THE SECRETARY OF THE NORTH CARO-LINA BOARD OF HEALTH—MAY 1, 1907, TO MAY 1, 1908.

The health conditions of our State during the past year have been marked by nothing out of the common run, and the work of your Secretar, has been chiefly routine. There have been some small epidemics of typhoid fever, and an investigation by the Board was requested by County Superintendent of Health Evans of one at Council, in Bladen County, and by Mayor Montgomery, of Reidsville, of an outbreak in that town. The former was investigated by President Thomas and the latter by Engineer Ludlow. Their respective reports are appended.

Tuberculosis has lost nothing in importance or interest. Our distribution of literature on the subject has, I believe, borne fruit in the education of the people as to the best methods of preventing its spread. In August last, at the request of the authorities, a committee of the Board visited the State Hospital at Morganton and advised with the management as to the location of special quarters for tuberculous patients. Their report is appended.

Although not under the control of the Board of Health, its Secretary is, ex officio, a member of the Board of Directors of the State Sanatorium for Tuberculosis, and a review of the health conditions of the State would not be complete without reference to it. Its establishment was authorized by the last Legislature, but it has been unavoidably delayed by the inability to secure a site suitable to the permanent establishment of so important an undertaking. Fortunately,

the necessary abandonment of one or more locations fixed upon, owing to the inability to secure a sound title, finally resulted in the selection and purchase of as nearly an ideal site as can well be imagined. Situated in the sandhills of Cumberland County, about eight miles from Aberdeeu, it is traversed by the Aberdeen and Rockfish Railroad, and is, therefore, easy of access. The purchase contains about nine hundred acres, and its highest point, which has been selected for the location of the buildings, overlooks a wide panoramic view of at least three-fourths of a circle of miles upon miles of rolling pine forest. Work has been begun on the buildings, and it is hoped, I am told by Dr. Brooks, the Superintendent, that patients can be received in the early fall.

The International Congress on Tuberculosis, which is to meet in Washington, September 21st to October 12th, is an event of worldwide interest and will well repay a visit. I hope that many of our health officers and physicians will attend.

Smallpox has been slightly more prevalent thau during the preceding year, the record being 2,011 cases, with 8 deaths, against 1,968 cases and 6 deaths in 1906-07. During the past year the disease has been much more prevalent among the whites than among the negroes, which is just the reverse of the year before. To state it accurately: In 1906-07 there were 620 white cases, with 2 deaths, and 1,348 colored cases, with 4 deaths; while during the past year there were 1,168 white cases, with 6 deaths, and 842 colored cases, with 2 deaths. The number of counties infected was just the same in each year—48. Owing to its continued mildness, and the fact that it has become such an old story—just ten years old—it produced little concern and practically no interference with business. The following is a tabulated statement, by counties:

In compliance with the instructions of the Board, I have prepared a new and up-to-date edition of Instructions for Quarantine and Disinfection, and it will be mailed to all the physicians of the State as soon as I can get a complete and accurate list of them. This work is now in progress.

The chief and most important work of the year has been the reorganization and refitting of the State Laboratory of Hygiene, which,
while a separate entity, is placed by the law under the control of the
State Board of Health. Upon the retirement of Dr. McCarthy, we
were fortunate in securing as Director of the Laboratory a man well
educated academically and well trained technically, an M. S. of our
own University and an M. D. of Johns Hopkins, with a biological
laboratory experience of nearly ten years—Dr. C. A. Shore, who, by
the way, is a citizen of this goodly town. We have been likewise no
less fortunate in securing as chemist Miss Daisy B. Allen, who, I am
assured by Dr. Herty, professor of chemistry at the University, has
never been excelled, if equaled, by any graduate of that department
during his incumbency. Thanks to the generosity of the Legislature,
we were enabled to thoroughly refit the Laboratory with the most approved apparatus, and first-class work can be expected.

Those who have read the monthly Bulletin regularly will remember that the last General Assembly authorized the preventive treatment of hydrophobia by the Director of the Laboratory, when the Board of Health should think it wise to undertake it, provided the funds at their disposal sbould justify it without interfering with the regular work. With the \$2,000 annually appropriated by the last Legislature, in addition to the tax on public water companies, I helieve this could now be done, to the great relief of many of our poorer citizens, unable to afford the expensive treatment of the various Pasteur institutes. This, however, would necessitate the employment of

a competent assistant, as the director, even now, has all his time occupied in the general work; but we can now afford it, and we recommend it. The report of the Director of the Laboratory accompanies this. As the Laboratory is intended for the benefit of the people, through the medical profession, it is hoped that the physicians will freely avail themselves of its help.

Dr. Thomas: Gentlemen, you have heard the report. Are there any remarks thereon? Then, if there is no objection, the report will go on file.

Gentlemen, it is my pleasure to introduce to you Dr. Charles Wardell Stiles, Ph. D., Chief of the Department of Zoology of the United States Public Health and Marine Hospital Service, who will give you a special address on "Soil Pollution, with special reference to Hookworm Disease."

Dr. Stiles: Before passing to the reading of my paper I wish to say that Surgeon General Wyman sends his best regards to the Association, with his best wishes for a successful meeting.

I have taken the liberty of changing my paper somewhat, although I shall speak on the same general subject as in the program. The title of my paper reads:

# THE MEDICAL INFLUENCE OF THE NEGRO IN CONNECTION WITH ANEMIA IN THE WHITE.

MR. PRESIDENT AND GENTLEMEN:—In responding to your kind invitation to return to North Carolina and to address your meeting, I invite your attention to a certain phase of the same subject upon which I spoke before you several years ago. In my former address I discussed the general subject of hookworm disease. To-day I wish to speak on the negro as a factor in the spread of this malady, and his resulting influence upon the health of the white race. In bringing this subject before you, it is needless for me to state that I appeal to no race prejudice, but that I simply bring forward certain harsh, cold, scientific facts, which must be faced, not only in the interest of the white, but in the interest of the negro as well.

As many of you know, I have for some years past been especially interested in studying medico-zoological conditions in the rural districts of the South, and this work has led me to spend about a year living among the tenant whites. During these studies I have made

inquiries among all classes of people regarding their ideas relative to the origin of the present impoverished fluancial and physical condition of the "crackers," "sandhillers" and "harrenites," and the information obtained, combined with my own investigations, has led me to a conception of these people which is not altogether in harmony with the general opinion entertained regarding them. So far as I can analyze the subject, these people are the joint product of certain medical and industrial conditions, as follows:

In ante-bellum days, if a mau was wealthy enough to own slaves, he was wealthy enough to own good plantation land. If not wealthy enough to own slaves, it is not reasonable to assume that he could buy the better class of farms. The latter people, therefore, would naturally be forced into the poorer lands, if owners, or to serve as overseers, to hecome tenants and, in general, to compete with slave labor. Such seems to me to be the most reasonable of the several explanations I have heard regarding the origin of these people. In different parts of the South they are known as "shad-bellies," "poor Bukra," "poor whites," "crackers," "sandhillers," "sand Billies," "barrenites," "boor Johns," etc.

The old-time negro had a great contempt for the white mau who could not own a slave, and this contempt culminated in the expression, "poor white trash." This same contempt is reflected in the negro song, "I'd rather be a nigger than a poor white man."

The expression, "poor white trash," has become very well known, despite its offensive character, and, unfortunately, the average more fortunate whites, both those who know these people and those who have not seen them, have too commonly allowed their judgment of these people to become somewhat clouded by the judgment formed by the old slaves. In fact, very few persons have any sympathy for these people, who have been repeatedly referred to in my presence as "lazy," "shiftless," "good for nothing," "indolent," "untrustworthy," etc. One Southerner whom I recently met stated that be bad had twenty-five years' experience with them, and that he cousidered "they were not worth trying to help." He was kind enough to inform me that I was wasting my time in living among them and studying their conditions. This reflects in an exaggerated form the average opinion I have encountered during my studies among these people, now carried on at various intervals for nearly six years, the total study amounting to about one year's time.

Actual experience among them for the purpose of scientific study, and actual association with them, involving sleeping in their homes, board with the "dirt eater" and "snuff dipper," playing with their children, visiting their schools, seeing them on farms, in mines, in mills, hospitals and orphanages, have led me to a conception of them which is different from the opinions just mentioned, and I am forced to take radical issue with any person who looks upon them as "lazy,"

"indolent" or "good for nothing," and I cannot refrain from expressing surprise that any man should have twenty-five years' experience with them and use so little intelligence and acumen as to come to the conclusion that they are "not worth trying to help."

Since these people are peculiar to the South, in order to understand them it is necessary to understand certain other factors which are peculiar to this same region. There are three factors in particular which come into consideration, namely: (1) the area under discussion presents the most intense negro population of any part of the country; (2) this area also presents the area of most intense hookworm infection; and (3) the same area presents the most intense malaria infection of any portion of the country. The question now arises:

Iu what relation do these four factors (the tenant white people, the negroes, hookworms, and malaria) stand to oue another?

I need not argue to you the fact that both hookworm disease and malaria are found both in the white and in the negro, for this is well established. I may, however, invite your especial attention to an important point, too often overlooked, namely, that these two great anemia-producing diseases which are so severe on the white are relatively less severe on the negro race. This fact, that the negro presents a relative immunity to the physical effects of these two infections which are so common to his race, is one of very great importance, for it points us to a couclusion from which there is no escape, namely, that the negro race forms a great reservoir for the supply of these infections.

Take malaria, for instauce. It is a well-established fact that the malaria parasite is exceedingly common in the blood of negroes. It is a fact of common knowledge, which can be easily verified by any doubting Thomas, that the negro does not trouble himself very much to screen against mosquitoes. What is the result? Since the uegro does not suffer from the effects of this infection so severely as does the white, the negro is not so likely as the white to come under medical treatment; accordingly, he is more likely to form a source of infection to the mosquito; add to this the fact that he does not screen against mosquitoes so much as does the white, and it is clear that relatively he forms a greater source of infection to the mosquito than does the white. Now, let a white man take what precautions he will against malaria in his family, the mosquitoes in the negro's house on the back street still form for this white mau's family a source of dauger, over which he has practically no coutrol. The couclusion is evident: Theoretically and practically, the negro race, living side by side with the white race, is, when viewed from the standpoint of malaria, a great aud serious reservoir of infectiou.

Take next hookworm disease. A given infectiou with this disease may put a white person in his grave or may make him so sick that he remains at home, and it is likely to bring him under medical treatment. Thus this infection is either brought to an end or it is more or less confined to the immediate premises of this particular family.

That same infection will produce less serious physical results on the negro, who will, therefore, not be so likely to be confined at home, and he will not be so likely to come under medical treatment. The conclusion naturally is that, relatively, the negro is, and from theoretical conditions necessarily must be, a greater spreader of hookworm disease than is the white man.

The immense importance of this latter fact can be seen when we compare the white and the negro as a soil polluter. In this connection I would state that I have collected statistics for 366 farmhouses in North Carolina, Sonth Carolina, Georgia and Alabama, and I find that of these 366 cases only 115 houses, or 31.4 per cent, were provided with privies of any sort; in other words, 251 of these houses, or 68.5 per cent, had no privy, and on this account the soil pollution on these premises reached a theoretical maximum. Of the 366 farmhouses in question my records show that 73 were occupied by whites and 83 by negroes, but I have no record of the race of the occupants of the remaining 210 houses. Of the 73 houses occupied by whites 56.1 per cent, or 41 houses, had privies, and 43.8 per cent, or 32 houses, were without privies. Of the 83 negro houses 20.4 per cent, or 17 honses, had privies, while 79.5 per cent, or 66 houses, had no privy. In other words, the theoretical maximum of soil pollution was reached in 43.8 per cent of the houses occupied by whites and in 79.5 per cent of the houses occupied by negroes. From these statistics it would appear that the negro is nearly twice the soil pollnter that the white mau is, and this conclusion is in harmony with what we know of the generally poorer condition of the negro privy, when one is present, and also with the complaints so often made regarding the pollntion of alleys in cities by the negro.

Comparing the white and the negro, numerically, as au inhabitant, we find that in the States of Virginia, North Carolina, Sonth Carolina, Georgia, Florida, Alabama, Mississippi and Louisiana the average ratio is 1,000 whites to 833 negroes. The ratio in these States varies between 1,000 whites to 494 negroes in North Carolina and 1,000 whites to 1,415 negroes in Mississippi.

From the foregoing data it is seen that in the area under discussion we have the following combination:

- (1) Two races (whites and negroes) are living side by side.
- (2) As inhabitants they bear the ratio of 1,000 whites to 833 negroes (a proportion of negroes far in excess of what exists in other States).
- (3) As soil polluters they bear the ratio of 438 (in whites) to 795 (in negroes).
- (4) Two diseases (hookworm disease spread by soil pollution, and malaria spread by mosquitoes) are present in high percentages.

[Session

(5) These anemia-producing diseases are especially severe on the white, but relatively less severe on the negro.

To my mind, the foregoing combination of facts leads inevitably to the conclusion that the white race in the South is living under a hygienic handicap which is not paralleled in any other part of the country, and, were it not for the greater intelligence and better financial condition of the whites, whereby they are able to protect themselves more or less against these diseases by sanitary measures, it would be only a question of a few generations before this handicap would exterminate the whites from those portions of the South which are especially favorable to these infections.

The whites of higher education and in better financial condition are able to protect themselves against this handicap, the burden of which has, therefore, fallen more especially upon that class (namely, the rural white tenant class) which has been kept in financial impoverishment through generations of competition with negro labor; and the result is exactly what theory demands it should be, namely, the present impoverished physical condition of so many thousands of the tenant white people, especially those living in the sandy and mountainous districts, where the sanitary arrangements are so inferior.

The physical condition of these people can be appreciated only by persons who have been among them. Those of ns who have lived among them need not be surprised to find their blood from 10 to 70 per cent below normal, nor need we be surprised, upon entering a poor farm hovel, to foresee death, in many instances, in 40 per cent of the children (namely, 2 of the 5, or 4 of the 10 children of the family) before they reach twenty-one years of age. I visited one farm on which I found father, mother, five children, and fifteen children's graves. I asked the physician what had killed these fifteen children, and he replied: "I do not know what the disease is, but if you can tell me what is killing that girl there, you will know what killed the other fifteen children." "That girl there" was a severe case of hookworm disease, in the dirt-eating stage. Think of it, gentlemen; 75 per cent of the rising generation of this family had already paid the extreme penalty of soil pollntion, and one further member of the family already had one foot in the grave!

Gentlemen, let any one call me a theorist if he will, but, in all fairness to the tenant white class of the rural sand and piney-woods districts of the South, let him first see the sights I have seen before hankes fnn of those people and before he jokes about their sick and dying women and children. Before any man who claims to be humane considers these people "lazy," "good for nothing" and "not worth trying to help," let him reflect upon the following statistics, based on about 10,000 examinations I have recently made among this class of people:

- (1) At least 13 per cent (women over 20 years) to 18 per cent (girls 16 to 20 years) of these women of maternity age are suffering from the anemia-producing hookworm disease, which prevents them from properly nourishing their bahes.
- (2) Of the girls under 16 years, at least 18.7 per cent have this same infection, which thus adds a serious strain upon their bodies (in addition to the strain incident to their sex) and which tends to retard their physical development, so that many of them reach maturity two to five years late; and even after they have reached maturity this disease renders them irregular in their menstrual functions.
- (3) Of the hoys under 16 years, at least 24.9 per cent have this same infection, which inhibits both their physical and their meutal growth.
- (4) Of the hoys 16 to 20 years, 20.7 per cent, and of the males over 20 years, 5.8 per cent, show these same symptoms, which decrease their labor capacity and their military efficiency.

Now, my friends, in all kindness, let me submit to you a question for thoughtful consideration: Nearly half a century ago the country freed the slaves, but in these decades that have elapsed since theu what has our country done in order to better the conditions of the tens of thousands of the rural tenant whites who have been kept in financial porerty through competition with negro labor, and in physical poverty through the two great anemia-producing diseases for which the negro forms the great reservoir of infection?

All honor to the few noble men and women who, by great personal sacrifice, are struggling to support efforts looking to a betterment of their condition; all honor to the few physiciaus who have let it he known that they will treat hookworm cases among these people without professional fee; all honor to the Southern cotton mill which is enabling thousands of these people to earn an honest living and thus to uplift themselves. But think a moment. In comparison with what this country is doing for the negro of the South, for the Chinaman in Asia, and for other people of different races, what is our country doing in order to elerate these tens of thousands of people of our own race in our own country?

Does it tend to elevate them if we refer to them as "lazy" and as "good for nothing"? Would it not help them more if we could send to the chain gaug people who indulge in that kind of pseudo-wit?

Gentlemen, there is a rational solution to the problem before us, and I submit to you for consideration a plan which I maintain is well founded from a theoretical point of view, and feasible from a practical point of view. It is the same plan which I submitted a few days ago to the Alabama State Medical Association, and which the Association has unanimously endorsed. It is this:

Let us start out on the general principle that it is much easier to teach children than adults. With this truth in mind, I propose the introduction of a "Public Health Week" into every schoolroom in the South. During this week let us utilize the class in physiology, in order to teach to the children the three great and fundamental principles of public health so important for the South. These principles are:

First. Do not spit on the floor, for this habit spreads tuberculosis and diphtheria,

Second. Do not pollute the soil, for this habit spreads typhoid fever and ground itch, with its resulting hookworm disease.

Third. Protect against mosquitoes, for mosquitoes spread malaria, yellow fever, dengue, and elephant foot.

Besides working through the schools, let us use every other means by which we can carry on a merciless campaign against soil pollution. In the last analysis, soil pollution is an evil in itself; it is in the nature of "malum in se"; it is an "aggravated offense against the public welfare"; hence it should be prohibited and made a crime, and any person guilty of polluting a highway or back alley should be sent to the chain gang.

Let us extend this campaign to the farms especially, and, if possible, persuade, but, if necessary, compel, the farmer to build a sanitary privy and to keep it clean.

Let us appeal to the clergy, to the lawyers, to the husiness men, and especially to the school teachers and the mothers, to join in this campaign. If I can gain the mothers of the South for this movement, and be given a chance to do so, I will agree to practically eradicate hookworm disease from the South in one generation's time, and by this eradication I will agree to elevate the condition of the rural tenant whites.

In conclusion, gentlemen, let me emphasize a very important point in the plan I propose, namely, that it is absolutely necessary to avoid any distinction between the whites and the negroes in this campaign of sanitary education, for—

- (a) The white man who fails to recognize the important necessity of improving the sanitary conditions under which the negro is living fails to go to the root of the evil, and he unconsciously invites disease and death, especially to the women and children of his own race; while—
- (b) The negro who fails to recognize the important necessity of improving the sanitary conditions under which the negro is living overlooks the fact that he is placing a very serious handicap in the way of a higher mental development of his race; for the point must not be forgotten that hookworm disease, in addition to its physical effects, to which the negro is relatively immune, has also a serious effect upon the mentality, and it has not been shown that the negro is immune to this latter effect.

Dr. Thomas: I would like to say that I owe Dr. Stiles an apology for my error in introducing him. He is well known to this Society.

Dr. Julian: I am sorry that I did not get here in time to hear this very valuable paper of Dr. Stiles'; but some years ago Dr. Stiles came to my town and assisted me in eradicating hookworm disease at the Thomasville Orphanage. At the time he assisted me he was satisfied the box privy was the source of the epidemic. I reported the matter to the trustees. We pulled down the box privies, dug a deep well, have water throughout the building, and after a few months we have never seen a case of the disease.

Dr. Lewis: I wish to eall to the attention of the Society that the Laboratory, as it already knows, is ready to make examination of the fæces. All they have to do is to write the Laboratory at Raleigh for a container and send a sample of the fæces to the Director of the Laboratory.

DR. JULIAN: The examination is very easily made by any doctor who is acquainted with the microscope, by introducing the finger into the rectum, getting a small amount of the fæces, placing it on the slide, and in a few drops of water.

Dr. Thomas: We will now have an address by Dr. Tait Butler, State Veterinarian of North Carolina, on

# OUR MILK SUPPLY AND SOME OF IT'S RELATIONS TO PUBLIC HEALTH.

In accepting the invitation of your Secretary, Dr. Lewis, to read a paper at this meeting on the public or market milk supply of the State, I did so with a distinct purpose in view. It is, perhaps, telling no secret, and it is certainly not meant offensively, if I state that the average practicing physician is none too familiar with the real problems involved in putting into the hands of consumers a wholesome milk supply. But this, in my opinion, is not of great importance. It is not necessary, however desirable, that the physician possess expert dairy knowledge or that he be capable of performing the duties of a scientific dairy inspector. A much more important matter, as affecting any effort for the improvement of our milk supply, is that he have a full and accurate knowledge of the real importance of pure milk for the consumption of those under his care.

Many of those here have given special study to this subject. Others who are investigators have full knowledge regarding certain phases of it, but the general practitioners have not given that attention to the subject which its importance demands. Moreover, the general practitioner gets closer to the public thau any other man, and it is through him that the general public can be best reached; therefore, in this paper I have decided to talk to the general practitiouer and to assume the part of an agitator rather than an educator.

All freely admit the importance of a wholesome wilk supply as a general proposition. But how many know fully and accurately the awful results of our criminal neglect in the past along this line? How many have an accurate knowledge of the quality, or lack of quality, of the milk now being sold throughout the State? How many realize the full measure of filth which it carries, and what that means in misery and death to the innocent babes who must consume it?

Gentlemen, it is not the ravings of a fanatic nor the extravagauce of a sensationalist, but a conservative statement of terribly serious facts when I say to you that the almost total ignorance of dairy science on the part of our milk producers, the lack of kuowledge of what constitutes first-class milk, and the care it should receive on the part of consumers, and the almost criminal indifference and inertia of the medical profession, who are the accepted guardians of the public health, are seeds, the awful but legitimate harvest of which are ill health, miscry and death to hundreds upon hundreds of iunocent consumers during our long, hot summers.

The indifference of the public generally, and the indifference and inactivity of the medical profession in particular, along the lines of milk and meat inspection, are little short of tragic, and I wish I might say something that would help, in a small way at least, to arouse and increase interest in this long-neglected branch of sanitation.

There are three general ways in which the milk supply may have a direct relation to the public health:

- It may be a means of carrying and transmitting disease from man to man—such, for instance, as typhoid fever, diphtheria, scarlet fever, cholera, etc.; but of these phases of our subject I shall take for granted you are better informed than I, and omit their discussion.
- 2. Milk may be a meaus of carrying and transmitting disease from cows to man, such as tuberculosis, authrax, foot and mouth disease, cowpox, etc. Of these, one alone is common—tuberculosis—of which I shall have something to say later.
- 3. Milk may cause disease in man by conveying disease-producing agents or materials, such as filth and the conditions which it favors for the growth of bacteria and the development of toxins and other deleterious substances; also the products of mammitis and other septic troubles.

Of the distinct diseases affecting the cow, which also affect man and which may be communicated from one to the other, tuberculosis is of first importance.

When Koch discovered the bacillus of tuberculosis and proclaimed the identity of bovine and human tuberculosis, there was little hesitancy in accepting a conclusion so closely in harmony with the experience and observation of scientific workers in both human and veterinary medicine. Later investigators called attention to the difficulty in transmitting human tuberculosis to bovines, and still later the fact was pointed out that the bacilli from boyine and human sources often possessed morphological and cultural peculiarities sufficient to differentiate them; hut when Koch followed, in 1901, with the remarkable declaration that bovine and human tuberculosis were different and not intercommunicable, few scientific investigators were willing to accept the dictum on the insufficient evidence produced, and at once investigations were started all over the civilized world to determine the truth or falsity of Koch's declaration. In the meantime progress towards preventing the communication of bovine tuberculosis to man received a decided sethack.

The results of the investigations, stimulated by Koch's dogma, indicate, as clearly as the nature of the case will permit, that bovine tuberculosis may be and is communicated to man.

It has been shown that the hacillus from human tuherculosis is capable of producing tuberculosis in many animals, but for no animal, unless man is the sole exception, is it so virulent as the hovine germ. If the hovine bacillus is more virulent for all other animals, including monkeys and apes, it very logically follows that it probably is also more virulent for man than the human bacillus.

Of course, Koch has not recanted. He still maintains the position taken in 1901, but the fact is now pretty generally recognized that bovine tuberculosis may be a source of danger to man.

The next question to arise was, naturally, To what extent is bovine tuberculosis a source of infection to man?

In their efforts to show that bovine tuberculosis was rarely communicated to man, the fact of the greater frequency of pulmonary than abdominal tuberculosis was pointed out, and the claim that intestinal tuberculosis of children, the greatest consumers of milk, was rare, were made much of.

Recently much evidence has been developed showing that intestinal or abdominal tuberculosis of children is not so rare as claimed by those who maintain that bovine and human tuberculosis are not intercommunicable.

And still further to the dismay of those who cling to old beliefs because they are old, even the time-honored assumption that the chief mode of entrance of the infection agent is through the inhalation of germ-laden dust particles has been challenged and met with an array of facts and reason which may well receive serious consideration by all those interested in the question of the relation of the milk supply to the public health.

It has been clearly shown that the introduction of the bacillus into any part of the hody—blood vessels, intestines, abdominal cavity, or even a part so remote as the tail of the cow—is generally followed by thoracic tuberculosis, instead of necessarily tuberculosis at the point of entrance or of nearby organs.

Again, when tuberculosis of the intestines is found, especially in children, the bovine germ, which may be recognized, is frequently found in these cases of human tuberculosis. Is this not more than passing strange if the bovine germ does not produce tuberculosis in the human?

In short, recent investigations show plainly that not only is bovine tuberculosis communicated to man, but that this is probably not so uncommon as the comparative infrequency of abdominal tuberculosis was thought to indicate.

To question the old inhalation theory of the entrance of the tubercle germ from sputum, pulverized, is, I know full well, among the medical men here, likely to lessen the respect which you will have for the other statements I may make, but I cannot resist the temptation to state that it never did have any scientific evidence worthy of consideration to support it.

It is an old, well-known fact that drying and sunlight rapidly kill tubercle bacilli. One hour of sunlight will kill tubercle bacilli in transparent layers of sputum, while five hours exposure to sunlight will kill the bacilli in thick opaque layers. Sputum is mixed with mucus, is tenacious and hard to pulverize, unless thoroughly dried. Yet we accept the statement that tubercle bacilli resist this drying and pulverizing process to such an extent that this way, and this way almost exclusively, is tuberculosis thought to be introduced into the human system.—The theory is not only not supported by facts, but is most unreasonable. Furthermore, if the tubercle germs enter by way of the air cells, why is it that tuberculosis starts in the capillaries instead of in the air cells? Why is it that tuberculosis starts in the apex of the lung, where there is a smaller proportion of air cells than in the base of the lungs?

Another discovery has recently been made, namely, that probably before the tubercle bacilli are expelled from the body in any considerable numbers through other channels, they may exist in large numbers in the manure. Years ago, I remember reading in Novy's "Laboratory Work in Bacteriology" that there was a bacillus frequently found in cow manure that stained like the tubercle bacillus—very much like it, indeed, because it probably was the tubercle bacillus.

Now, the chief filth in milk is cow manure. That cowy odor is usually plain, vulgar, filthy cow dung.

In the face of these facts, what is our position? We know that tuberculosis exists in our dairy herds; we know that when tuberculosis exists in a herd, owing to the passage of the hacilli through the udder, and through the iutestines and mauure, which almost always contaminates the milk more or less, milk from such a herd is almost certain to contain tubercle germs. We know that infants, the largest consumers of milk, have intestinal tuherculosis more frequently than adults, and that the bacillus causing this disease is frequently of the bovine type. In short, we know that our neglect to exclude tuberculous cows from our herds is causing the death of many human beings, and yet we are doing nothing, literally nothing, to prove ourselves worthy the title of guardians of the public health.

The tuberculin test is the only means of detecting tuberculosis before the products of the eow are likely to be infective, but we are uot forcing the dairymen of the State to do what is to their own financial interest to do—test their cattle and exclude the tuberculous animals.

Tuberculosis is not over common in this State, except in the dairy herds, and is not as prevalent there as in many States, but it will steadily increase unless controlled. Moreover, if we admit its existence even, and the possibility of its communication to the cousumer of milk, we have no right to stand idly by and permit any human being to take that chance, no matter how small the chance may be.

In my opinion, diseases of the udder and those conditions of milk included under the general term "filthy" are the most fruitful source of injurious effects upon the consumers of milk. All forms of garget, mammitis or other diseases resulting in pus and other inflammatory products entering the milk are unquestionably the source of much of the diarrheal troubles of infants resulting from the consumption of impure milk. Filth, manure from the cows and stables, which is the most abundant and common contaminating material of unclean milk, has not, in my opinion, been given its full share of responsibility for the high death rate from diarrheal diseases, so fatal to young children. Especially is this so in North Carolina.

In short, tuberculosis, diseased udders and filth are the three main sources of danger to the consumers of milk in this State.

How are these conditions to be corrected? In the first place, clean milk is worth more than dirty milk, and it costs more to produce it. Are our people willing to pay for clean milk? I believe we are now paying a price—eight to ten cents a quart—which entitles us to a fairly good quality of milk. If this is not enough to enable the producers to put clean milk on the market, then you, the guardians of the public health, must educate the public up to the point where it will pay for good milk.

In the second place, few of our dairymen know sufficient of dairy science and practice to enable them, unassisted, to put clean milk on the market. The general supply of milk can be improved, but for many years yet cannot be brought up to the standard necessary for the feeding of infants and sick people. Comparatively few men anywhere are able to put such a quality of milk on the market. What is to be done?

First, start here to-day such a campaigu for pure milk as will arouse public opinion, stimulate dairymen to greater efforts, and result in a competent milk inspection and supervision in every town of 3,000 population in the State. This can be done, and will improve the general condition of the milk supply. In every town where the demand will justify let a certified milk commission be established to encourage some one or more men to produce and put upon the market a firstclass milk product. And, last, as a temporary and doubtful expedient, if filthy milk must still be consumed by many, establish under municipal control, where conditions render it practicable, a pasteurizing plant, where all milk below a certain standard must be pasteurized before being sold. Pasteurizing will not make unclean milk clean, but it may lessen its injurious effects. If generally adopted, it is likely to encourage filthy practices rather than correct them. It probably lessens the digestibility of the milk, and is only advisable as the lesser of two evils. As between reasonably clean milk and pasteurized milk, there is no question in my mind of the superiority of the former, but if it is still necessary to put up with dirty milk, then by all means pasteurize. The chief objectiou to it is that its use is likely to prevent as great an effort to secure clean milk as would be made were pastcurizing not practiced.

How is the general quality of the milk supply to be improved?

First, by a proper system of inspection. Three forms of knowledge are requisite for competent milk inspection—first, a knowledge of cows in health and disease—possessed by the veterinarian; second, a knowledge of dairy science and practice, which should be possessed by the so-called practical dairyman, but in our State rarely is; third, a knowledge of milk, bacteriologically, chemically and microscopically.

The milk inspection of a municipality may well be administered by a milk commission; but if so, it should be made up of men chosen for their knowledge of the work. For such a commission a physician, a practical dairyman and a veterinarian are logically competent men. Or the administrative part of the work may be left to the city health officer; but the success and efficiency of any system of milk inspection depends on the efficiency of the inspector and the quality of the laboratory work done.

First, there should be a frequent and thorough veterinary inspection of the cattle. The inspector should also be a practical, scientific dairyman who has had experience in dairying. If it is claimed that such a man cannot be employed, then the milk inspection will fall short of a full sneess just to the extent that the inspector falls short of these requirements.

1909.7

Our dairymen are not desirous of putting filthy milk on the market, but they don't know. The inspector must be able to teach and lead, rather than try to force rapid changes.

In most instances too much importance or reliance is placed on laboratory examinations. These are essential, but they will not take the place of frequent and competent inspections of the dairies and the manner of handling the milk. Bacteriological examinations should be made, for unquestionably a high bacterial content is indicative of a high filth content. If there be a high bacterial content, then the inspector must seek the cause and correct it. He must have accurate dairy knowledge and practical experience to do this.

A microscopic examination may be made, for a high leucocyte and streptococci content, with the presence of fibrin, which indicates inflammation of the udder, but this is of most value when examinations are made of the milk of individual cows.

In the city of Raleigh we have a so-called milk inspection, which is practically nothing more than a bacteriological examination and publieity of the results or findings. No competent inspector is employed, no tuberculin test is made of the cattle, and a violation of the regulations does not usually mean any sort of punishment; but, with all this, good has been accomplished. For instance, in 1906, after a complete neglect of duty for three months, the commission was forced to make a pretense of doing its duty by public criticism through the press, and from March 27 to April 27, 1906, fifty samples, the first taken after this period of neglect, gave twenty with a bacterial count of over 1,000,000 per cc. From March 27 to April ... 1907, fifty samples gave seven with a bacterial count of over 1,000,000 per cc. From March 26 to April 28, 1908, fifty samples gave eight with a count of over 1,000,000. In September, 1905, ten samples gave an average bacterial eount of 1.111,500 per cc. In September, 1906, ten samples gave an average count of 846,000 per cc. In September, 1907, ten samples gave an average count of 164,000 per cc. In August, 1906, twenty-three samples gave an average count of 2,570,000. In August, 1907, nine samples gave an average count of 890,000 per cc.

An improvement, but what filth still exists! Fancy, during the months of March and April, milk from three to five hours old, in which sixteen per cent of the samples have from one to two million bacteria to the ee!

A bacteriological examination of milk is of importance, but its chief value is lost unless supplemented by and done in eo-operation with an intelligent dairy and cattle inspection. A high bacterial count means either age or filth, and large numbers of liquefiers mean in all probability filth, and, where dairies are not of fairly good grade, dairy practice rather than age influences most the bacterial count.

We must keep in mind that a healthy cow gives a wholesome product of fairly uniform quality. If the milk is put on the market in bad condition or of greatly varying composition, it means bad dairy practice. Very frequently I hear of this physician or that one who insists that the cow shall receive no cotton-seed meal, or no silage, or some other excellent food is tabooed. I have heard of this sort of thing in our city of Raleigh, and yet our system of handling milk makes it almost certain that the fat content of the milk from any one dairy may vary from 2.5 to 8 per cent.

This has actually occurred, and is due to the fact that milk is sold from a large can instead of being bottled at the dairy. The faucet being at the bottom of the can, and the cream rising to the top, the customers first served get the 2.5 per cent milk, while the last get milk containing 8 or 10 per cent butter fat. No sort of feeding will produce a change of over one-half of one per cent in the butter fat content. In fact, it is doubtful if any effect on the fat content can be regularly and consistently produced by any sort of feeding; therefore, it will avail most to give more attention to the handling of the milk, for it will certainly mean discomfort, if nothing more serious, to any delicate infant to receive 2.5 per cent milk to-day and 8 per cent milk to-morrow.

Good milk will not be put on the market until the dairyman is required to bottle it at the dairy, under proper sanitary and dairy conditions

Some of the points that need attention in our North Carolina dairies are:

- 1. Test all cows with tuberculin, and exclude the diseased ones. The North Carolina State Department of Agriculture will do that free of charge, on certain reasonable conditions.
- 2. Institute an intelligent inspection of the cows, and exclude all those with any disease of the udder.
- 3. Prohibit the selling of milk except in bottles, and require that the milk be kept below a certain temperature.
  - 4. Prohibit feeding during or just before milking.
- Compel dairymen to keep their cattle clean. Cows can be cleaned, but milk cannot.
- Compel dairymen to wear clean clothes and wash their hands before milking.
- Wipe the udders off with a damp cloth and use a covered milk pail.

These can only be brought about by an inspector capable of leading and teaching. We cannot have entirely clean milk at once, but we might have cleaner milk with an intelligent effort.

As an illustration of how the cleanliness of milk is influenced by dairy practice, as indicated by the bacterial count, I desire to present the following charts, the data for which have been taken from bulletins No. 42 and No. 48 of the Storrs (Connecticut) Agricultural Experiment Station.

It has been stated as an excuse for the filthy milk which so many of our dairymen are putting ou the market that, from lack of kuowledge, capital or other facilities, they could not produce and put clean milk on the market. These charts show that certain practices produced a wonderful improvement in the quality of the milk, as indicated by the bacterial count, and yet all these things could be done by our dairymen. They are all simple, practicable and inexpensive.

Diagram showing relative bacterial content of milk drawn into a Stadtmueller covered pail and into an ordinary pail, in a dairy where little care is given to cleanliness.

In all of the experiments furnishing the data upon which these diagrams are based, more than ordinary care was taken to follow correct dairy practices. In all experiments, except in the ones comparing open and covered pails, the Stadtmueller covered pail was used, and all other conditions except those being tested were as near alike in all cases as it was possible to make them. In dairies where little

regard is paid to cleanliness the results would still more forcibly demonstrate the effects which the methods of handling the milk has on its cleanliness and the bacterial count.

Dr. Silvio von Ruck, Asheville: I have listened to Dr. Butler's paper with much interest, but he has made many statements which are radical and not proven.

He tells us that tuberculosis is transmitted from cattle to man with great frequency, and even that bovine tuberculosis is the almost exclusive source of infection for man, while human infection through sputum is of little importance.

He has misquoted Professor Koch, who did not state that infection of man by milk of tuberculous cows could not happen at all. Koch announced at the London Tuberculosis Congress in 1901 that he had not been able to produce infection in cattle with tubercle bacilli of human origin; that the human and bovine type of bacillus were not identical; that in the light of the rarity of primary intestinal tuberculosis and reasoning by analogy he did not believe that human infection from bovine sources was of frequent occurrence. He did not deny that it might never occur.

There are two sides to this question, one of which Dr. Butler has entirely ignored; and aside from bacteriologic investigations and animal experimentation, we have much evidence in support of Koch's position. This also requires consideration.

For example, it is well known that in Japan, before foreign eattle were imported, bovine tuberculosis was not prevalent. Further, the number of cattle in proportion to the population is so small that milk is not an ordinary article of diet. Nevertheless, Japan has shown and continues to show as great a pro rata mortality from tuberculosis as other countries. In Sweden and Norway, where almost all children are nursed by their mothers, there is as great a percentage of tuberculosis mortality as in countries where cow's milk is more commonly used for infant feeding. In Berlin records have been kept of the method of feeding infants, and the number of deaths from tubereulosis is equally divided, as shown by statistics cited by Fraenkel, between those who were nursed by the mothers and those who were fed on eow's milk.

There is much more evidence of like character which tends to show that the tuberculosis of eattle is not the great source of danger that has been asserted; but an actual experiment on man has been made, although at the time not with the view of determining this question.

Baumgarten has given us the details of it. Based upon Rokitansky's theory of the antagonism between tuberculosis and eaneer, a number of patients suffering from inoperable malignant disease were inoculated with bovine tubercle bacilli in the hope that their malignant disease might thereby be favorably influenced. All eventually died of their malignant disease, and Baumgarten performed the autopsies. He found no evidence of tuberculosis, and even critical microscopie examinations failed to reveal tubercle or tubercle bacilli.

As Dr. Butler has stated, it has been found that primary intestinal tuberculosis is not quite as rare as was supposed at the time Professor Koeh made his announcement in London, but while the thoracic glands may become affected as a result of ingestion of tuberculous material, this, according to all results and investigations, is rare. It is generally conceded that by whatever route the bacillus enters, be this by ingestion or by inhalation, the first localization occurs in the nearest regional lymph gland. However, since 1901, the subject has been most carefully and painstakingly studied at the Imperial Health Bureau in Berlin and elsewhere, and it has been proven conclusively that in the majority of cases of primary intestinal tuberculosis the tubercle bacilli isolated from the intestine or mesenteric glands were of the human type. Up to the present time the eases in which bovine infeetions have been proven to have occurred in man are about

33 in number, 18 of which have been examined at the Imperial Health Bureau, while 15 are reported by other observers.

Apart from any danger to man from tuberculosis of eattle, the question is of importance from an economic standpoint as well, and if, as appears, the danger to man is but little, it should not be necessary to destroy hundreds and thousands of cattle simply because they be shown to have acquired tuberculosis.

Besides, as Professor Koeh points out, we can protect ourselves from such danger as may exist by boiling the milk and cooking the flesh of such cattle as are or may be tuberculous.

With Dr. Butler's views as to the importance of cleanliness in our dairies, I am heartily in sympathy. Irrespective of the tuberculosis question, clean milk is essential, and for many other reasons we should use our influence to obtain it.

Dr. Burroughs, Asheville, N. C.: Mr. Chairman, I have listened to Dr. Butler's paper with interest. But there are one or two points on which I think that the doctor, as our State Veterinarian, has not been sufficiently explicit.

I wish to state that no tuberculous eow should be milked nor is milked at any dairy that produces healthful milk. The herds are usually tested every six months. And all additions to herds are tested before being allowed to mingle with the cattle already tested.

Dairy cattle of Asheville are under the direct supervision of a veterinary surgeon; and all milk is under the supervision of one man, who tests milk at his will, with full authority to act.

The eattle are kept on the hills and in the valleys a portion of the day and also a part of the night. And the milk is collected twice daily.

The eattle are driven to a large corral with a shed attached to the stables where they are fed. In this shed the cattle are brushed off, and while they are being fed their teats are washed with an antiseptic solution. Following this come the immaculately dressed milkers with strainer pails. The milk is then carried to the chemist, with his assistants, where it is standardized according to the requirements of Mr. Wilson in the Department of Agriculture of the United States Government. The milk is then iced and delivered in sealed glass jars.

One statement made in Dr. Butler's paper I do not understand, and I am certain that other members of the conjoint session do not understand, which I wish the doctor to explain, and it is this: that "thoracic tuberculosis is very frequently contracted from the cow's tail." (Laughter.)

Dr. Butler closes: Just a word in reply to the gentleman's (Dr. Burroughs') thrust. I didn't say it.

I know I didn't cover this subject thoroughly. If I had I would have kept you here until to-morrow morning. I stated in the start I wasn't going to talk to the specialists and investigators, but to the general practitioner.

I could meet Dr. Von Ruck's statistics with statistics if time would permit. I could tell you of investigators who have found as high as 41 per cent of the abdominal tuberculosis of children of bovine origin, but I did not have time to do it or to go into this matter fully.

I wanted to say further—and I thought I made that point clear—that the old idea that you can tell the mode or channel of entrance of the tubercle germ by the location of the lesion is no longer tenable. It is nonsense to say, because you find tuberculosis in the lungs, that the germ necessarily entered through the air passages. I said you could put the germs in the tail of the cow and the chances were the tuberculosis would develop in the lungs, not in the tail. Why? Because tuberculosis is primarily a disease of the lungs, and the germs go to where they like to live. They find the most suitable place for their development. You can inject the tubercle germs into the abdominal cavity, and you may feed them through the month; you may put them into the circulation or into any part of the system, in any way you like, and in the majority

of cases you will get tuberculosis in the lungs. That is what I meant to say. Thank you.

My paper is better explained with the drawings given the Secretary.

Dr. Thomas: Gentlemen, the next subject to be presented is "Pellagra," by Dr. E. J. Wood, of Wilmington, N. C.

#### PELLAGRA.

Pellagra is a disease supposed to be due to an intoxication derived from diseased maize and characterized by a triad of symptoms; symmetrical erythema, gastro-intestinal disturbances, and various nervous and mental manifestations.

Spain was the first country in which pellagra was recognized. This was in 1735, and the disease was regarded as a variety of leprosy. The disease later appeared in Galatia, and later in Castilia, Rome, and Aragon. To-day it is very prevalent in Navarre and Galicia. The name lepra asturiensis was one of the many by which it was known. Next the disease was noted in the northern provinces of Italy. Trapalli, in Lombardy, gave the name pellagra (pelle and agra, rough skin).

At the present time pellagra is very prevalent in Ronmania. In 1882 there were 4,500 cases; in 1888 there were 10,626 cases out of a population of 5,339,650; in 1894, 6,694 cases; in 1896, 19,796 cases; and a more recent estimate places the number above 50,000 cases, who were affected with the disease in some stage. It also occurs in the south of France. Since 1856 it has been present in Corfn. The Asturias are still the chief seat of the disease in Spain. One sporadic case is said to have occurred in England.

When the disease first appeared in Italy it was in the neighborhood of the Lago Maggiorl. During the last century it extended into Emilia and Tuscany. In central Italy it is little known and in southern Italy and Sicily is unknown.

Bouchard describes the disease in Mexico. It has occurred also in Brazil, Argentine Republic, and Uruguay. Many cases have been reported in Egypt and some in South Africa.

The disease has almost disappeared from France, but there are still small areas in the Pyrenees and in Garonne.

Sporadically cases have been seen in the Tyrol, Servia, Bulgaria, Greece, and Asia Minor.

Italy and Roumania are considered the disease centers. In Italy it is endemic. According to a reliable source there were 100,000 cases or 10 per cent of the rural population affected with pellagra.

The disease was supposed not to occur in this country, and many of the best text-books fail to mention it. Probably the first article

on the subject appeared in the Journal of the American Medical Association for July 6, 1907, by Dr. G. H. Searcy. The disease appeared, according to this report, in 1901, in Tuscaloosa, Alabama, but at the time was not recognized. In 1906 there occurred in Mount Vernon, Alabama, 88 cases of acute pellagra, with a mortality of 57 or 64 per cent.

In 1905 the disease was present, unrecognized, in Wilmington. Certainly as far back as 1900 there was a case in Jones County.

Dr. James McKee, Superintendent of the State Hospital for the Insane at Raleigh, has kindly furnished me with notes of three cases under his care, and suggests the possibility of the disease having been present in the institution for a number of years.

Dr. R. H. Bellamy, of Wilmington, at the recent meeting of the American Medical Association reported ten cases.

Dr. J. C. Gilbert, of Hope Mills, in a letter to Dr. Bellamy reports seven cases under his care.

Certainly there have been thirty cases in North Carolina. It is probable, however, that the correct number will run into hundreds, It is also probable that the disease is rapidly increasing. We have many reasons to believe that the disease has existed in North Carolina for some years, but that these cases were sporadic; otherwise the condition would long ago have been recognized. As there has been an increase from a few sporadic cases to a number which is daily increasing, the question of the disease becoming endemic with us must be seriously considered.

Pellagra seems to be generally distributed throughout the South. Merrill reports a case from Colorado, Texas, and Babcock reports nine cases occurring in the Hospital for the Insane in Columbia, S. C.

#### SYMPTOMATOLOGY.

Weeks and even months before the appearance of the erythema of pellagra there may be symptoms which, while usually very indefinite, would lead one in a pellagrous region to make the diagnosis, provisionally, of the disease. There is often progressive weakness, especially of the feet and legs, gastric disturbances and loss of appetite. Roussel regards the loss of appetite and gastric disturbances as complications, and dryness and burning of the mouth with a sensation of heat in the stomach which may develop into a true pyrrhosis as the first symptoms of the disease. Further, he considers voraclous appetite, vomiting, cardialgia and diarrhoea of purely nervous origin. Besides these symptoms there are vagabond pains in the extremities and hack, timitus, weakness of vision, general malaise, especially in the mornings; sometimes pain in the joints. Headache, vertigo and melancholia follow.

In many respects these symptoms are common to the whole group of acute infectious diseases; but still, when headache, vertigo, sensations of weakness, especially in the lower extremities, are present, often accompanied by diarrhea and occurring about the middle or end of winter, our suspicious at least should be aroused.

According to Theodori, about four weeks after these pellagrous symptoms occur the unmistakable signs of the disease appear. This period is often much longer, in some instances being as much as a year.

The first skiu lesion almost always appears in the spring and the parts affected are usually those parts exposed to the suu's rays. Many of the best observers think that as an etiological factor the rays of the sun have little effect. Among these are no less authorities than Procopin and Tuczak, to whose works we are much indebted for our information. Many other writers think that the violet rays are certainly a predisposing cause of the skin lesions, if nothing more. The last word on the subject has not been said. In our cases we are disposed to belittle the solar influence: (1) Because the disease appears with us so early that we can exclude any very intense action; (2) in some cases it appears over the steruum, in the vagina, and in patients who have been in bed for days and weeks with a pellagrous lesion ou the hands and face we see the extension to the feet, even though previous to their admission to the hospital they had not gone barefooted.

The skin lesions usually appear first on the back of the hands over the metacarpal regiou, either with a swelling and a red spot in the eenter or else with a diffuse redness. Oftentimes blebs appear. The blebs contain clear, alkaline serum, which is sterile. After the hands the face is usually more apt to be affected. Here the lesion begins symmetrically either at the outer canthi of the eye or at the angles of the mouth. It is common to have it symmetrically situated on the forehead in two patches, which have a narrow vertical strip of healthy skin between. Beneath the lower lids and at the back of the ueck are favorite places. In the latter situation the lesions extend anteriorly until they nearly meet in front, forming a collar which is higher behind. In our limited number of cases we have found the face and neck lesions much more commonly in females, and especially children. The next spot selected is the top of the feet. Our last case has the two varieties of lesions occurring simultaneously. Just below the external maleolus there is a bleb on both feet, which began as two round, red spots about the size of a fifty-cent piece. In ten days a bleb appeared which, after drying up, left a raw surface. In the same case, over the crest of the tibia, extending downward over the metatarsal region to the lower articulations of the toes, is a diffuse redness much resembling a lymphangitis.

This lesion will probably go on to exfoliation without bleb formation. In some cases the lesion may appear over the sternum, and in two of our cases the labia pudendi were affected by the typical lesion. The disease has been known to make its first appearance o some covered portion of the body, but this is exceptional. In nonof our cases did it appear there until long after its more usual appearance on the exposed parts. In the lesions with blebs there i left a raw snrface which either forms an ulcer or is covered by crusts, which often are gnite thick. The crusts and the weeping ulcerated areas, together with the odor, make a loathsome patient With the beginning of healing, the skin of the face contracts so that in one case there was a marked ectropion and also inability of the lips to cover the teeth. The photograph shows the condition well, but it became much worse as the disease progressed. Usually especially in the dry cases, exfoliation begins after three or four weeks, and as the dead skin comes away a pigmented area is left. This pigment varies from a slight yellowish tinge to a dirty brown or even a chocolate color. The depth of color depends upon the duration of the disease, that is, on the number of the attacks. In addition to the pigmentation, the skin is shining and atrophic. By fall the skin regains more or less of its normal tone, only to be ready for the next attack the following spring. With each attack the skin becomes more atrophic and more pigmented.

#### INTESTINAL TRACT.

With the appearance of the crythema, or soon after, the month becomes affected. The mncous membrane is red and swollen, the lips may be covered with hlisters, and later they become cracked and seared. The tongue is intensely red and the papillæ enlarged, with furrows between. The patient complains often of burning and salty taste in the mouth, often with an increased flow of saliva.

Dr. McKee says the mouth suggests to him stomatitis materna. Salivation is often intense, and in one of our cases we suspected ptyalism. After the skin lesion the month condition is the most constant, and in mone of our cases was it absent. In some cases it subsides after the first few weeks; in others it persists throughout.

In all of our cases the stomach was not affected. Pyrrhosis, eructations, vomiting, anorexia or bulimia, often with extreme thirst, are common symptoms. In some cases the gastric analysis shows an absence of hydrochloric acid, while in others it is normal.

Much more commonly present is obstinate bloody diarrhoa, often of a dysenteric type, usually attended with colic. This diarrhoa is considered by many to be a neurosis, but it is often difficult to believe, judging from the character of the stools.

#### NERVOUS SYSTEM.

Roussel considered the vertigo a very characteristic symptom, and described it as being much like a gastric vertigo. Diplopia and amblyopia are common, but were absent in all our cases. The pupils react acutely to both light and accommodation, and the ophthalmoscopic examination has revealed nothing to us. The patients usually complain of a sensation of heat or cold in various parts of the body. We have attempted to investigate the tactile sense, the sense of heat, cold and pain, but our observations are inaccurate because of the mental state of our patients. The complaint of pain, especially in the shoulders and epigastrinm, is quite common, and noted by us.

Convulsions are quite common and often close the scene. In one of our earlier cases this was so. Tetany is reported by some. We have found a coarse tremor present in a number of our cases. In one, just before death her whole body was in a constant tremor, but could not be accounted tetany.

The condition of the tenden reflexes is more variable. In many of our cases they remained normal. In a few they were absent, though there were no other symptoms of locomotor ataxia. In one case where the reflex had been absent there was a return before death in a rather exaggerated form. In one case it was much exaggerated, and ankle clonus was present. In one case it was present on one side and absent on the other. Usually, in the beginning of the disease it is normal or decreased, but later, when the lesion in the cord has extended, it is apt to be exaggerated. Station is usually good. The gait becomes unsteady, but not ataxic. slight spasticity has been observed. Among the vaso-motor and trophic disturbances is usually included the erythema itself. In addition, we often find paleness of the skin, sensations of cold, "gooseflesh," and muscle atrophy in the shoulder, girdle muscles of the hand, thorax and lower leg. This should not be confounded with emaciation, which is often extreme. The alterations in the tongue and the thickening of the nails may be included under this head.

In Europe "misery and poverty" are counted the chief predisposing causes of pellagra. Just those conditions occurring among the peasantry in Europe are almost unknown with us. Certainly the richest and the poorest buy the same grade of corn-meal. The chief difference here, as we all know, is that the poorer class have less variety and often the food is poorly prepared. We are disposed to think that pellagra with us is not so much a respecter of persons, affecting the well-conditioned as well as the victims of previous disease and poor hygienic surroundings.

It has been shown, especially in Sandeith's Egyptian cases, that the parasitic disease seems to form a very definite predisposing cause. Especially has it been noted that anchylostoma is often present. One the occurrence of malaria in eight of their twelve cases. We have had occasion to consider serionsly this possible relationship. My first ease, which was erroneously reported in the Journal of the American

Medical Association, had a latent malaria and the nunsual condition of a mixed infection with tertian and quartan organisms. Much attention has been paid to the occurrence of alcoholism and syphilis with pellagra. This is unimportant except in so far as these conditions lower the resistance.

The course of pellagra is very variable. In Italy it is no uncommon thing for the outbreak to occur each succeeding spring for twenty years. Each year the patient becomes more wrinkled, more atrophic and more melancholy until, finally, he dies from some intercurrent disease, as broncho-pneumonia or of cachexia.

There recently came under our care a typical case of chronic pellagra which is worthy of note.

Mrs. W.; age 34 years; Jones Connty. Family history negative, save for malaria and typhoid. No history of miscarriages. In the spring of 1906 she was affected with gastro-intestinal symptoms, one month after the appearance of which the erythema appeared on her hand and the lower third of her forearms. In the spring of 1907 the same condition recurred. In May, 1908, the condition made its third appearance, was diagnosed pellagra and reported to me by my colleagne, Dr. Thomas M. Green. Her condition was as follows:

A poorly nourished woman, much older in appearance than the age given. Symmetrically situated on her forehead were two patches of desquamating erythema. These patches are about equal to the size of two silver dollars. The same lesion surrounded both eyes. On the upper lid the lesion was more recent, with the presence of crusts and a weeping surface beneath. This lesion extended into the anterior nares. On the skin below the eyes the lesion was older and there is a slight brownish pigmentation. On the backs of both hands from the finger-nails to the middle of the forearms posteriorly is this same condition of the moist variety. The lesions were especially aggravated over the knuckles and tips of the nlna. The same condition was present on the anterior surface, save for the palms, where there was simple redness without exfoliation. Near the upper margins of the arm lesions was found considerable brownish pigmentation. On the back of the neck was a much older lesion, which had caused a tawny pigmentation. Posteriorly this lesion is about two inches in length, but as it extends anteriorly it becomes narrowed, almost meeting in front. The labia pudendi were affected with the moist lesion.

Heart and lungs were negative.

Spleen and liver negative to palpation and percussion.

Urine showed albumen and granular casts.

Blood showed a simple anemia of moderate degree.

No leucocytosis. Differential leucocyte counts showed no abnormal variations. Blood cultures were taken.

The patient's mental condition became rapidly worse; she refused nourishment, and a restraining sheet had to be used. In her mania she would rub off the crusts, from the arm lesions especially, and the picture that resulted was horrid, with the raw, bleeding snrface and the bedelothing covered with blood and pus.

She died of exhaustion.

Our knowledge of chronic pellagra is limited, fully 75 to 80 per cent of our cases being acnte. It seems remarkable that Lombroso should have had occasion to differentiate this acute or "typhoid" pellagra from typhoid fever. There is certainly no resemblance, except possibly in some of the late nervous symptoms of both diseases.

Our acute cases ran a course from a few weeks to a few months.

As an example of this is the following:
V. S. (colored); 12 years; Wilmington. Referred to us by Dr. W. J.

Bellamy. Family and previous medical histories negative as far as we could

ramily and previous medical histories negative as far as we could secure them, except that at this time she has a sister aged 6 years recovering from the first attack of pellagra. This child is in my care, and is strong and robust.

In Fehrnary she had various vague digestive symptoms before she noticed at the onter eanthi of the eyes a small red spot. This erythema increased in size rapidly, extending over the forehead. It next appeared beneath the angles of the jaw and extended around the neck, meeting behind. The gums were swollen and red and the whole mucous membrane of mouth inflamed. The eruption next appeared on the backs of the fingers and extended upward to the middle of the forearms. The face and both arms were covered, giving the appearance of a superficial burn. The contraction of the skin of the face has been described. From the beginning the bowels have been affected in the form of a persistent diarrhea. The only gastric symptoms have been anorexia and nausea. With the aid of two doses of santonin during the past week she has expelled from the bowels forty-six round worms and vomited one. When first seen a week ago the feet and ankles were cedematous, but this has disappeared and the erythema has taken its place.

Knee jerks were absent, but have reappeared. Skin sensations normal. Pnpillary reaction normal. She complains of cold sensations, weakness, and pain in right shoulder. She is now beginning to be quite delirious at times and falls out of the bed repeatedly.

June 13. The appearance of the face is distressing. The skin lesion seems really to have extended to the eyes. The cornea is dry and there is a marked conjunctivitis. Mucopurnlent material flows from each eye. Both of the lids are so contracted that the eyes have not been covered for over a week; this condition is certainly largely the cause of the terrible state of the eyes.

Belmondo and a number of other observers state that typhoid pellagra never occurs primarily, that it is always the exaggeration of a recurrence in chronic cases. We have seen five cases die in the first attack. The disease must be more malignant than in southern Europe. It is difficult to explain why this should be, except that we know when a disease appears in a new country the death rate at first is always higher. We have examples of that in some of the yellow-fever outbreaks, and better still in the outbreak of measles in some of the Pacific islands, where the mortality was 90 per cent.

The diagnosis of pellagra, after it is well established, is quite easy and does not require yearly recurrences to establish it. In no disease is an early diagnosis more important than in this, as our only hope of effecting a cure is in removing the cause early in the disease.

Ergotism was the first thing thought of in our cases; it was excluded because of an absence of the characteristic numbness, tingling, vascular stasis, and gaugrene of the fingers and toes.

I have had to watch for several days simple sunburn suspiciously in some cases because there is nothing more like it. The crythema of pellagra is described as resembling sunburn almost exactly. Usually, however, the diarrhosa and stomatthis precede.

Pellagra sine pellagra calls for our special attention. Right now we have a number of cases under this suspicion, but we must agree with the authority who rather questions the possibility of such a diagnosis. That such cases have occurred there can be no question, as the best authorities so state it.

The treatment of pellagra so far is not promising. Practically all acute cases die regardless of treatment. In chronic cases that are not far advanced the removal of all corn food, with tonic treatment, together with improved hygiene, often brings about recovery with or without mental deterioration, depending upon the stage of the disease when arrested. Babcock is using successfully atoxyl hypodermically in doses of one to one and a half grains every four to seven days. In much larger doses in the acute affliction it has failed in my hands. Babcock is also using Soamin (Burroughs, Wellcome & Co.) in one grain doses three times a day. In Wilmington we have exhausted the pharmacopæia without seeing any benefit derived by the sufferers.

Dr. Thomas: "Pellagrons Insanity" will be discussed by Dr. John McCampbell, Superintendent State Hospital for the Insane, Morganton, N. C.

SOME OBSERVATIONS OF PELLAGRA IN THIS COUNTRY, WITH SPECIAL REFERENCE TO PELLAGROUS INSANITY.

Pellagrous insanity, as the name implies, is so closely associated with and dependent upon the general systemic disease that its consideration separate and apart would be difficult and hardly profitable, it being in reality only one of the late manifestations of the malady known as pellagra, which has been comprehensively defined by Van Harlingen as a "complex disease characterized by a class of symptoms:

"1. A squamous erythema confined to those portions of the skin which are exposed to the action of heat and light.

"2. A chronic inflammatory condition of the digestive passages, shown chiefly by obstinate diarrhea.

"3. A more or less severe lesion of the nervous system, leading at times to mental alienations and paralysis.

"These various symptoms are at first insignificant and in a certain way periodic. They begin or recur in spring and diminish or disappear in winter. Later they become persistent, more and more marked, and finally terminate fatally."

Pellagra has been known to exist in Italy, Spain, and adjacent countries for more than a century and a half, and was scientifically investigated in Italy as far back as the year 1771; but until quite recently there has been very little said in this country on the subject. In fact, the existence of the disease has been denied by some of the most eminent medical writers of recent years, the subject being dismissed with brief mention and the statement that it is a disease confined to certain European countries. It is true that cases simulating pellagra were reported in the early sixties by Dr. Gray, of New York, and Dr. DeWolfe, of Nova Scotia; but the genuineness of these was questioned at the time and the disease either disappeared or was overlooked (the former, most likely) until attention was again called to it by the publication within the past year of the observations of Drs. Searcy, of Alabama; Babcock, of South Carolina; Wood, of this State, and possibly others, though some doubt apparently existed in the minds of some of these observers, as is evidenced by the fact that Dr. Babcock presents his able, and to my mind convincing paper, in the form of a query.

My own experience leads me to believe that we now have in this country, probably a recent development, a grave and usually fatal disease identical with the pellagra of southern Enrope, and which may, under favorable conditions, gain the proportions of an epidemic. During the past four years 1 have, from time to time, encountered mental cases presenting certain definite and rather uniform manifestations and associated with a peculiar skin cruption, which 1 was unable to fit into any recognized classification; yet 1 realized that I was dealing with a distinct entity, and it was not until the earlier of the last referred to papers came into my hands that 1 was convinced that the disease in question was pellagra and the mental disturbance present constituted pellagrous insanity pure and simple. In support of this belief I wish to recount the chief etiologic and symptomatic features as observed in twelve of these cases, with spe-

cial reference to their mental aspect, since all of them were so far advanced in the disease as to necessitate their commitment to a hospital for the insane.

The theory generally, if not universally, accepted is that pellagra is in some way associated with the ingestion of Indian corn which is diseased, harvested immature, or in some way damaged and consequently containing a toxic substance, the exact nature of which has never yet been very clearly defined. Ballardini considers it a parasitic growth on mouldy and musty maize, while Lombroso suggests that it is due to a fatty oil and an extractive substance, the product of decomposition or bacterial action which are never present in sound corn. At any rate, the disease is more in the nature of a ptomaine poisoning than a direct bacterial infection. This would naturally be supposed, since most of the corn and corn preparations which are used as food have been cooked, and thereby subjected to a sterilizing temperature. It is of interest to note in this connection that I have recently had an opportunity to interview several native Italians of the peasant class, who had some knowledge of the disease, and they invariably assigned as the cause the eating of polenta three times a day; and they attached considerable importance to the fact that it was eaten three times a day. I am unable to determine the exact character of diet previously used by any of my cases, but there is good reason to suppose that corn was extensively eaten, and it will be conceded that this prime etiologic factor was present.

Locality within the State seems to have no particular inflnence, as the twelve cases were distributed impartially over the territory extending from Robeson to Madison counties. All of these cases were women, which fact is at variance with the common teaching, since the two sexes are supposed to be equally susceptible. The negative bearing of this circumstance is eliminated by the fact that at the time these observations were made my service was confined to the wards for women. In the epidemic occurring at Mount Vernon, Alabama, and reported by Dr. Searcy, eighty out of eighty-eight affected were women. The average age was thirty-eight years. Nine out of the twelve cases ranged from thirty-eight to forty-five, which is of no special significance, unless it be that the nervous instability consequent upon the approach of the climacteric in some way predisposes to the disease. Eight, or two-thirds of the twelve cases, showed first mental symptoms in either April, May, or June, and two others in July and Angust. Allowing for the slight delay in the occurrence of mental disturbance in these two cases, we have ten out of twelve occurring in conformity with the usual seasonal incidence of the disease, it being understood that most cases develop or recur in the spring or early summer months. There was a total absence of heredity in all but two cases, and in these it was remote-an insane nncle in one and an insane niece in another. Neither was there any instance of parental consanguinity.

Absence of these factors, which are important in the cansation of most insanities, points to the exogenous character of the disease and renders it less likely that the ordinary insanities have been confounded with this series of cases. All, with two exceptions, were exceedingly poor, and most of them bore evidence of having undergone extreme privation. These conditions, no doubt, contributed to the development of the disease, both by the malnutrition consequent upon an insufficient diet and also by the fact that poverty of that degree usually necessitates the use of corn to a greater extent than is customary with people in better circumstances.

All the cases under consideration having, before coming under observation, reached a condition of extreme mental alienation, it naturally follows that we are dealing with latter stages of the disease, and data concerning the earlier symptoms are lacking. It appears from the histories given in the commitment papers that in a vast majority the mental symptoms were preceded by or associated with ill health, being in all probability nothing more than the lassitude, general debility and digestive disturbances common to the earlier stages of the disease. In fact, a rundown condition, debility, indigestion, general catarrhal condition of the intestinal tract and like troubles are specified in several cases.

The heginning of the psychic disturbance was usually marked by a period of anxiety and worry, undue importance was attached to trivial affairs and misfortunes were apprehended. Occasionally unnsnal religious interest was manifested. This was followed by a disturbance of perception and the development of hallucinations, usually anditory, though occasionally visual as well. Judgment was profoundly disturbed, giving rise to delnsions, which were characteristic in that they were, with only one exception, depressive and painful in nature, though they lacked the self-accusatory quality of the usual delusions of simple melancholia, being rather of fear and suspicion; or more specifically, one thought that she was to be burnt up; another, that she was burning in torment and her child, recently dead, was also in hell. Still others thought that poison was put in their food or that they were to be hurt or injured in some way.

At this stage threats and attempts at suicide were rather frequent, and occasionally homicidal tendencies were present. Two cases showed very decided emotional instability. As the disease progressed memory became grossly defective and orientations as to time, place, and persons was imperfect. Incoherence of speech was common and was usually of the most desultory variety. Neither distractibility nor true flight of ideas were observed at any time. There were instances of mntism, the patient appearing dazed and failing to respond to questions and orders of the simplest kind, due prohably to clouding of consciousness and a failure to comprehend.

Motor restlessness and insomnia were prominent, with a disposition, even when extreme weakness was present, to get out of bed, tangling and scattering the bedclothes about the room in the most aimless manner, and a kind of senseless resistance was made to efforts at examination. A total disregard for cleanliness soon appeared and all became extremely untidy in habits; this from mental hebetned and indifference rather than viciousness.

There was an early failure of appetite and frequently absolute refusal of food (often due to delusion), necessitating forced feeding with nasal tube.

These mental symptoms without remission steadily grew more and more pronounced until a condition of complete armentia ensued. and, coupled with the physical weakness present, was not nulike the so-called typhoid condition, and especially so when the delirium assnmed a muttering character. Coexistent with the mental condition described there was invariably present an eczematons involvement of the skin, varying all the way from thickened, roughened and pigmented condition, with a tendency to fissure, to a typical exfoliative These skin changes were distinctive in that they were limited to exposed areas, the backs of the hands escaping in no instance, and in this location the milder cases strongly suggested snn-The involved surfaces were uniform and ended abruptly. nsually at or inst above the wrists. The line of demarcation was very distinct and correspondingly close to the limit of protection afforded by the sleeve or arm covering. The eruption occasionally appeared on the face, especially at the angles of the mouth, and once upon the forehead, but was not observed on the feet.

There was a tendency toward pigmentation and scaliness over the bone prominences, even where protected by the clothing, and especially so where counter pressure was exerted. This was most marked at the point of the elbows, the front of the knees, though at these places it was never as severe as when exposed to the action of the sun's rays.

The nervous disturbances consisted in exaggeration of the dual reflex, coarse intention tremors, ataxic and chorcic movements of the extremities, especially the arms; and later this inco-ordination frequently involved speech, rendering it halting, slurring, and finally inarticulate.

The pupillary disturbance was slight, variable and inconsistent. As the end approached there was a general spastic condition of the muscles, with marked retraction of the neck and head, and a mere tap at almost any part of the body would excite a slight tetanic convulsive movement. Diarrhea was usually present, characterized by obstinacy and an exceedingly offensive and putrescent odor of the dejecta.

All twelve cases terminated fatally. The course of the disease was rather rapid. The average duration after the beginning of the mental symptoms was three and one-half mouths. The average duration after admission to the hospital was forty-four days.

The foregoing mental symptom-complex, although somewhat contradictory, or at least inharmonious, might be to some extent associated with auy of the toxic or exhaustion psychoses, since many of the symptoms mentioued are common to most of these conditions, without regard to the particular morbific influence in operation, and it was only by the somatic disturbance invariably present, chief among which were the skin lesions, that differentiation was possible. I am aware that the number of cases studied is rather small and the records from which the histories are taken too incomplete to altogether justify a dogmatic statement, yet I believe that sufficient has been said to show the similarity of these cases to the descriptions of pellagra given in the classic writings ou the subject.

And I would say, further, that this paper is not presented with a view to adding anything to the literature of the subject, but rather in the hope that I may, in some measure, at least, aid in directing the attention of the profession in general to a danger which possibly threatens us, since an early recognition is all-important, for it is only by prophylactic measures that we can hope to accomplish anything.

To show that this danger is not altogether imaginary, I will say that out of twenty deaths occurring among women in the State Hospital at Morganton during the past year, five, or 25 per cent, granting the correctness of diagnoses, were attributable to this disease—a number in excess of those assignable to any one cause, tuberculosis included.

#### DISCUSSION.

Dr. W. P. Whittington, of Asheville, N. C.: Mr. President, I just want to add a few words in the report of a case that I saw a few years ago. A young man in good physical condition went from Asheville to Pittsburg, Pa., and while in Pittsburg, after being there two or three months, he contracted what I now know to be pellagra. He went under the treatment of different physicians there for about two months, expecting to get well, but he got worse all the time. He stopped at Greenville, in East Tennessee, about a month, where he was under the care of a physician he knew, expecting to improve, but got worse all the time. He then returned to Asheville, having had the disease about four months after

he left Asheville. He called to see me after he got back, and I knew there was something the matter with the intestinal tract. He seemed to have gastro-enteritis. He had that characteristic erythematous condition on the hands, extending up to the wrist, as far as the hand was exposed to the sun. He was very much emaciated and I thought he would die, but I put him on treatment for the symptoms, not knowing what the true cause of the condition was.

I want to mention the treatment, not knowing whether his coming back to North Carolina, where we have better corn, cured him, or he got well from some other cause. I gave him nitrate of silver, bismuth and opium. After that I put him on arsenic, and in three or four months the man appeared to be perfectly well, and is well to-day, five years, and has had no recurrence whatever.

Another case mentioned by Dr. McCampbell, of Morganton. It was a lady attacked with similar symptoms, but soon after she was attacked her mind became involved and she was sent to the asylum and there died.

I merely mention these cases. I did not know what they were at the time, but afterwards learned that they were possibly pellagra.

One of these, I think, originated in Pittsburg, Pa., and the other had not been out of Buncombe County, and was due, perhaps, to the infection received there.

Dr. I. M. Taylor, Morganton, N. C.: I have seen in my practice, I believe, five cases which I can account for as pellagra. Of these, four have died; the other seems to have made a recovery. Three of these were men and two women. Three were intemperate people, and I accounted for their skin condition as the result of alcoholic abuse.

I confess that I have never made a diagnosis of the disease, and only since this discussion has opened in the journals and since reading the paper of Dr. Babcock have I recognized that I had been dealing with this condition.

I accounted for the general skin and nervous symptoms as nalnutrition, and, in the case of two men and one woman, lirectly due to alcoholic abuse.

Dr. Stiles: I have seen two cases, one in South Carolina and one in Alabama, both recorded by the physicians who had them in charge. In one of these eases my examination was made and coincident thereto parasitic infection was found.

The question is raised, Is not pellagra of parasitic infection? If it is, it is something new to me.

The two cases that I saw, in Alabama and South Carolina, one is totally different from any symptom I ever saw.

In connection with the alleged cause it is interesting to note that it is particularly in Antwerp, Bremen and Copenhagen that complaints have been made regarding spoiled corn; and yet in that part of the world pellagra is unknown.

I mention this as an interesting fact—that spoiled corn does not seem to cause the disease.

Dr. W. S. Rankin: I desire to report a case that is interesting in the light of this recent and valuable work on pellagra.

The patient, a young man twenty-five years of age, a student at Wake Forest College, has suffered every spring and summer for the last three years with a peculiar skin lesion.

The lesion, symmetrical in distribution, consists of an abnormally smooth, hairless, slightly red and sensitive skin, about the size of a dollar, on the dorsal surface of the hands just above the metacarpo-phalangeal articulation.

Knowing Dr. Wood's interest in the relation of malaria to Raynaud's disease, and believing this ease to bear some relation to some of the varieties of Raynaud's disease, I referred the ease to him.

At his suggestion the patient began a course of Fowler's solution, but was unable to note much change in his hands.

In April of this year the patient consulted my colleague, Dr. Gaines, whose attention had been attracted by recent literature to the relation of certain skin lesions to intestinal intoxication as evidenced by well-marked indicanuria, and the relief of the skin lesions by medication addressed to his intestinal trouble.

On examining the urine a well-marked indicanuria was evident.

The patient was given sodium phosphate enough to produce two motions a day, with salol 5 grs. every four hours. Within two weeks the skin lesions had almost disappeared.

Since Dr. Stiles has mentioned it, I am almost sure that two years ago I found this man with a very light uncinariasis.

Dr. Dalton: I would like to make an announcement. Over at Nissen Park we have a supper prepared for the Society which will be ready at 7:30, and as soon as you can adjourn you take the cars going south at once.

Dr. Thomas: Gentlemen, it is not necessary for me to repeat such a pleasant invitation as that. I am sure it will appeal to you.

If there is no more business before the conjoint session we will now adjourn.

The session is now adjourned.

# THE NORTH CAROLINA ASSOCIATION FOR THE PREVENTION OF TUBERCULOSIS.

# MINUTES OF THE SECOND ANNUAL MEETING, MOREHEAD CITY, JUNE 12, 1907.

The second annual meeting of the North Carolina Association for the Prevention of Tuberculosis was held at Morehead City on June 12, 1907. President M. L. Stevens was in the chair. There were present about twenty members. The minutes of the last meeting were read and approved.

The President read a report of the work accomplished during the past year. Upon motion, the report was accepted.

Dr. Templeton moved that the present officers of the Association be re-elected for the coming year. The motion was carried.

Dr. Benjamin K. Hays was elected delegate to the National and to the International Association, to be held in Washington City next year; Dr. I. M. Taylor, alternate.

A committee, composed of Drs. J. Howell Way, C. M. Poole and J. R. Williams, was appointed to solicit member-

ship.

A time for holding the meetings of the Association was discussed. Dr. Way suggested that the Secretary arrange with the Secretary of the State Medical Society for an hour (or more) of the time of that body. Upon motion, this was carried.

There being no further business, the Association adjourned.

Benjamin K. Hays,

Secretary.

# MINUTES OF THE THIRD ANNUAL MEETING, WINSTON-SALEM, JUNE 18, 1908.

At 12 o'clock Dr. C. A. Julian, Vice President, called the body to order in the lobby of the Hotel Zinzendorf, Winston-Salem, N. C.

Dr. W. L. Dunn, of Asheville, N. C., was elected President; Dr. John Roy Williams, of Greensboro, N. C., was elected Vice President; Dr. C. A. Julian, of Thomasville, N. C., was elected Secretary and Treasurer.

The following members of the Association were present at the meeting:

Drs. L. B. Morse, John L. Williams, W. C. Bronson, H. C. Weaver, W. L. Dunn, H. T. Bahnson, J. Howell Way, C. A. Julian, Richard H. Lewis, William M. Jones, Isaac M. Taylor, J. F. Highsmith, Hon. ClementManly, Drs. William Bolton, P. E. McFayden, E. M. Summerell, D. A. Dees, A. W. Knox, J. B. Smith, J. A. Turner, J. R. Reitzel, Charles R. Wharton, E. C. Laird, W. P. Whittington, J. C. Grady, H. H. Briggs, W. S. Rankin, A. B. Croom, J. L. Hanes, J. P. Turner, F. O. Rogers, C. F. Harper, H. H. Dodson, J. Allison Hodges, L. B. McBrayer, Philip Morris, A. L. Flanders, Francis Duffy, R. G. Buchner, J. W. Long, A. A. Kent, W. P. Beall, J. T. Burrus, G. E. Jordan, C. A. Andrews, W. P. Reeves, J. M. Reese, H. A. Barnes and D. A. Stanton.

The Association was organized May 30, 1906, by the committee appointed by the President of the North Carolina Society, under resolution offered at the 1905 session. The purpose of the Association, as stated in article 2 of the Constitution of the Association, is the prevention of tuberculosis:

(a) By the study of the disease in all of its forms and relations.

- (b) By the dissemination of knowledge concerning its cause, prevention and treatment, and by supplementing the work of the State Board of Health in this cause.
- (c) By such other means as may from time to time be deemed advisable.

This Association is bending all energies to stimulate a wide interest in this most important branch of preventive medicine.

A number of gentlemen spoke of the work that the Association should undertake, and plans were advanced for making the Association one of the most effective working bodies in the State.

On motion of Dr. Richard H. Lewis, of Raleigh, all members present were elected delegates to the International Congress on Tuberculosis at the meeting in Washington, D. C., September 21st to October 12th.

On motion of Dr. W. L. Dunn, Drs. Charles Minor, S. W. Battle, M. L. Stevens, Paul Ringer, of Asheville; Drs. Thomas A. Mann, of Durham; William R. Kirk, Hendersonville, and D. A. Dees, Bayboro, were elected delegates to the International Congress on Tuberculosis.

We have passed the stage of experiment, and each mecting in the future should show a respectable array of measures successfully carried out and the broadening of our sphere of influence for good.

The Association adjourned to meet upon call of the officers.

Charles A. Julian, M. D.,

Secretary.

### STATE LABORATORY OF HYGIENE.

REPORTS OF EXAMINATIONS, MADE IN THE STATE LABORATORY OF HYGIENE FROM MARCH 1, 1908, TO DECEMBER 31, 1908,*

116 Examinations of fæces.	Positive.	Negative.
Hookworm	62	32
Oxyuris vermicularis	1	
Ascaris lumbricoides	2	8
Amœba coli	1	1
Fly larvæ	3	
Tænia saginata		
Tubercle bacilli	2	4
Blood	4	2
Cancer cells		1
164 Examinations of sputum for	tubercle bacilli, 63	101
222 Examinations for diphtheria	152	70
28 Examinations for malaria	3	25
91 Examinations for Widal rea	etion 35	56
6 Examinations for gonococci	3	3
33 Examinations for rabies	20	13
2 Bacterial examinations of p	us.	
2 Differential leucocyte counts	s.	
80 Specimens of urine with a variety of bacterial and chem-		
ical determinations.		
40 Examinations of pathologics	d tissues, as follows:	
Carcinoma		8
Chronic inflammation		11
Benign hypertrophies		6
Sarcoma		4
Chondroma		
Colloid goitre		2
Tuberculosis		6
Trichinosis		1
Pyæmia		1
906 Examinations of water.		

#### 1,690

No report was made by the former Director for the period between May 1, 1907, and March, 1908, when the present Director took charge, and his report from January 1, 1907, to May, 1907, was included in a report for two years preceding the latter date, and could not be separated. Hence the partial report for this biennial period.

The Pasteur treatment was begun in July, and from that time to January 1st forty-two persons were given treatment. In thirty-three of these cases a positive diagnosis of rabies was made in the attacking animal. In the remaining nine the dogs' heads were not obtained, and a probable diagnosis was made from the clinical symptoms.

In addition to these, a number of persons sought the advice of the Laboratory regarding dog bites, and treatment was not advised.

C. A. SHORE, M. D., Director.

#### INSPECTION OF STATE INSTITUTIONS.

# THE CAPITOL AND THE BUILDINGS OF THE SUPREME COURT AND OF THE DEPARTMENT OF AGRICULTURE.

TO THE COUNCIL OF STATE,

Raleigh, N. C.

GENTLEMEN:—Commissioned by the President of the State Board of Health, we, on October 7, 1908, made a saultary inspection of the public buildings and institutions under your care, to wit: The Capitol Building, the huilding of the Agricultural Department, and the Supreme Court Building.

From a sanitary standpoint we are pleased to report that we found all keeping pace with up-to-date sanitation as to water supply, sewerage, and ventilation. We were much pleased to note the elegant water-closet, etc., with its tile floor and marhle walls, which has recently been installed on the first floor of the Capitol. The old ones are well kept for a building of this kind.

We would reiterate a former suggestion: That to contribute to the veutilation of the Senate Chamber and House of Representatives we think it important to keep open fires in all the fireplaces of the chambers.

Respectfully submitted.

THOMAS E. ANDERSON, M. D., EDWARD C. REGISTER, M. D., Committee.

#### STATE EDUCATIONAL INSTITUTIONS.

#### THE UNIVERSITY.

THE BOARD OF TRUSTEES,

University of North Carolina,

GENTLEMEN:—The undersigned, a committee of the State Board of Health, appointed for the purpose, made a sanitary inspection of the University on May 26th, and beg leave to report:

The plumbing in the Carr Building and in the Old East Building we found in bad condition, and would recommend that all closets in the former above the first floor be taken out and that the supply pipe to the sink in the latter, which was leaking at the time of our visit, he made good—as we have no doubt was promptly done. In making these criticisms we realize the practical difficulty in so small a village of obtaining the services of a satisfactory plumber.

With the exception of the above, we found nothing uusanitary.

Owing to the rapid growth of the University, the supply of heat, light, and water is inadequate. It is unnecessary to say that a deficiency in these three elements is inimical to health and should be made good as soon as possible. In the matter of the water supply, in addition to increasing the pumping capacity and the size of the standpipe, ample filters of the best character should be provided.

Very respectfully,

GEORGE G. THOMAS, M. D., RICHARD H. LEWIS, M. D., Committee.

#### NORMAL AND INDUSTRIAL COLLEGE.

THE BOARD OF DIRECTORS.

State Normal and Industrial College, Greensboro, N. C.

GENTLEMEN:—We, the undersigned, a committee appointed by the State Board of Health, visited and inspected the State Normal and Industrial College at Greensboro, N. C., on the 10th day of November, 1908, and we herewith beg to submit the following report:

In the kindest and most courteous manner we were shown over the buildings and grounds, which we found to be in a most satisfactory condition from a sanitary standpoint.

The water supply used is from the city water supply, the drinkingwater used being boiled before use, and thoroughly sterilized (the Forbes apparatus, with some recent additions, being used), thereby insuring a perfectly sterilized and pure water, free from all infectious hacteria.

The sewerage and plumbing have been recently inspected by expert plumbers and we find them in first-class condition.

Ventilation and eleanliness throughout testify as to the skill and thoughtfulness displayed from a sanitary standpoint.

We find very little sickness throughout the institution; the diet furnished being much more wholesome and abundant than it was two years ago—in fact, as good as could be served to this number of students.

The college has a fine herd of well selected, hearty cows, and much care is given to the milk used, though there are some improvements that could be made in the dairy equipments, with benefit.

There is, however, one condition that we call your attention to, and through you to the next Legislature, viz., the necessity of more dormitory rooms. The grand purpose for which this institution was built and intended is being curtailed by the want of dormitory room, as we are informed that over a hundred young women who applied for admission had to be turned away on this account. We do there-

fore recommend to you, and through you to the next Legislature, that this urgent need be provided for, and dormitory room for at least two hundred more students be provided for.

The new science huilding, just being completed, is unusually well equipped in every respect, especially from a sanitary standpoint.

Very respectfully submitted,

JAMES A. BURROUGHS, M. D., W. O. SPENCER, M. D.,

Committée.

THE COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

THE BOARD OF TRUSTEES.

N. C. College of Agriculture and Mechanic Arts, Raleigh, N. C.

GENTLEMEN:—Pursuant to appointment by the President of the State Board of Health as a committee to inspect the sanitary condition of the College of Agriculture and Mechanic Arts, we discharged that trust on October 7, 1908, and are pleased to report that from a sanitary viewpoint we found nothing out of harmouy with up-to-date requirements.

We were most courteously shown over the ample and beautiful grounds and buildings by the President, Dr. D. H. Hill. In location of buildings, in diversification of work, as well as in everything looking to the health, physical and mental training of the student body, this college is the pride and hope of our State.

City water is used now almost entirely, having been recently installed. A very deep well, whose water is carefully inspected, is reserved for any emergency that may arise from a deficient city water supply.

This property is being beautified every year and will become one of the most attractive in the State.

Very respectfully,

THOMAS E. ANDERSON, M. D., EDWARD C. REGISTER, M. D., Committee.

AGRICULTURAL AND MECHANICAL COLLEGE FOR THE COLORED BACE,
THE BOARD OF DIRECTORS.

A. and M. College for the Colored Race, Greensboro, N. C.

Gentlemen:—The undersigned, a committee appointed by the State Board of Health, visited and inspected the above-named institution on the 11th day of November, 1908, and we beg to submit the following report: This institution is a credit to the State; its management is kept well lu hand by its efficient President, Dr. Dudley, who is thoroughly enthused with his work, and entirely conversant with the demands of his race, in a proper training for them along useful lines of industrial pursuits, etc.

The grounds are well kept; the water supply is from the city water system, and we suggest that a system of sterilizing this water for drinking purposes would be a great safeguard against bacterial invasion, should the city water, in any way, become polluted at any time.

This institution has no sewerage, surface privies being in use, which, however, are kept as sanitary as conditions will permit. We suggest to the President that a preliminary survey be made and the cost of connecting this institution with sewerage he ascertained and submitted to you, and through you to the next Legislature; and we hereby recommend that the premises be connected with city sewerage, with an up-to-date sewerage system, connecting each apartment with the said sewerage.

This institution has a nice herd of cows, and much care is given to the milk supply of the students. Altogether, this institution is calculated to do much good for the colored race, and they should be justly proud of it.

Very respectfully submitted,

JAMES A. BURROUGHS, M. D., W. O. SPENCER, M. D.,

Committee.

SCHOOLS FOR THE DEAF AND BLIND, AT RALEIGH.

TO THE BOARD OF DIRECTORS,

Schools for the Deaf and Blind, Raleigh, N. C.

Gentlemen:—Having been designated a committee by the President of the State Board of Health to make a sanitary inspection of the two schools under your charge, on the 7th day of October, 1908, we visited your schools, and beg to say that after thoroughly going over these buildings we were favorably impressed by the excellent manner in the which they are kept, from a sanitary standpoint. The water-closets, the bathrooms, the floors, the bedding all show that close surveillance is exerted here. We found sick rooms provided and most modern fire escapes in both institutions. These schools both use the city water and have sanitary plumbing and sewcrage.

In the dormitories of the Colored School there is no provision for heating, which we think must impose much discomfort on the children in extremely cold weather, many of whom are, in addition to their defects, delicate. We would recommend that radiators be placed in these rooms at convenient distances, to supply proper heat and remedy this want. Very respectfully submitted.

> THOMAS E. ANDERSON, M. D., EDWARD C. REGISTER, M. D.,

Committee.

SCHOOL FOR THE DEAF AND DUMB, AT MORGANTON,

BOARD OF DIRECTORS.

School for the Deaf and Dumb. Morganton, N. C.

GENTLEMEN:-The undersigned, a committee of the State Board of Health appointed to make the regular sanitary inspection of the State institutions at Morganton, made such an inspection of your school on the 21st inst., and beg leave to report:

We made a careful and thorough inspection and are pleased to say that we found the school buildings in an excellent condition from a sanitary point of view. The rooms and halls were very clean and neat and the plumbing in good condition. A serious mistake was made in the original construction of the dormitory building in providing inside toilet-rooms. As arranged, they get very little daylight of any kind and never a ray of sunlight. This is contrary to the rules of sound sanitation, and, if it can be done, it should be remedied.

We calculated the air space allowed each pupil, and while not equal to the ideal requirement, the steam heating by the direct-indirect method, with the arrangement of the ventilating flues, makes the conditions practically satisfactory. But the limit has been reached, and before the number of inmates can be safely increased, additional room must be provided.

As deafuess in a very large majority of cases results from diseases of the nose and throat, as for example, enlarged tonsils, adenoids and deformities of the nasal passages, undue prevalence of such troubles is to be expected in a school for the deaf. They therefore require, to a greater extent than ordinary children, special treatment, and we recommend some arrangement by which, at proper intervals, the services of a competent aurist, who can also look after their eyes. can be secured.

In conclusion, we can say with sincerity that in our judgment the State is to be congratulated on the admirable condition of this school. Respectfully yours,

> George G. Thomas, M. D., RICHARD H. LEWIS, M. D., Committee.

#### ORPHAN ASYLUMS.

OXFORD ORPHAN ASYLUM.

BOARD OF DIRECTORS,

Oxford Orphan Asylum, Oxford, N. C.

GENTLEMEN:—Having been appointed by the President of the State Board of Health to make the usual saultary inspection of your institution, I beg leave to report:

I made the inspection on October 22, 1908. My visit was unannounced and wholly unexpected on the part of any of the officials or attendants, and I am fully satisfied that I found conditions, sauitarily speaking, as ordinarily existing at both institutions visited.

I spent several hours in inspecting numerous rooms in every department of the various buildings of the Oxford Orphan Asylum for white children, and it affords me pleasure to report that its sanitary management is excellent and to be most highly commended. At the time of my visit I found 23 mild eases of scarlatina, all of which were isolated in the little hospital apart from the other buildings of the asylum. The type of the disease was very mild, and apparently the epidemie was under complete control, so that I did not apprehend danger of its further spreading. In this connection I cannot forbear commending the excellent work done by Dr. T. L. Booth, the skillful physician to the Masonic Asylum, and the efficient matrou in segregating promptly each of the children who showed the slightest symptoms of the disease. To their prompt action in this respect is undoubtedly due the fact that the institution is spared a more general epidemie of scarlatina.

Everywhere throughout the numerous buildings inspected I was gratified to note the great attention paid to ventilation; in not a single room, or in one of the several basements visited, did I find the presence of foul or stagnant air.

Two suggestions for improvements are submitted:

 The windows of the hospital building should be more carefully screened. Most of the windows of the major portion of the building are at present screened, but in the rear parts I observed several unscreened windows.

2. Finds should be forthcoming to provide good eement or other substantial pavements or walks connecting the various buildings of the institution. At present it is necessary for more than 300 little children to frequently pass from the various dormitories to other buildings in attending school, chapel exercises, going to and from the dining and mess halls, etc., and as the walks as at present constructed are simply the natural clay graded to a rise in the center of the walk, it is inevitable that on rainy days the walks become quite

muddy. This necessitates either extra shoes or overshoes or the inevitable wet feet with resultant catarrhal difficulties among children.

I wish, in conclusion, to put on record my appreciation of the apparent effort manifest in the management to secure the greatest possible results from the financial means at hand.

Respectfully submitted,

J. HOWELL WAY, M. D., Committee.

#### ASYLUM FOR COLORED ORPHANS.

BOARD OF DIRECTORS,

Asylum for Colored Orphans, Oxford, N. C.

Gentlemen:—The Orphan Asylum for Colored Children was visited and carefully inspected. I was most favorably impressed with the very great cleanliness manifested in the various rooms, clothing and bedding used by the children, and I have but kindly words of encouragement and commeudation of the apparent effort to make a meager support care for a considerable number of orphaned children.

One suggestion I desire to offer relative to the water supply: At present it is derived from a shallow surface well. It is to be hoped funds will be available at an early date to afford a deep-well supply. The premises were neatly kept and clean, and I went away from the place wishing that its general method of keeping could be made a visible object-lesson to the other members of the colored race in impressing them with proper sanitary ideas.

In conclusion, 1 desire tb again express my appreciation of the apparent effort manifest in the management to yield the greatest possible results with the fluancial income at hand.

Respectfully submitted.

J. HOWELL WAY, M. D.,

Committee.

#### HOSPITALS FOR THE INSANE.

#### HOSPITAL AT RALEIGH.

THE BOARD OF DIRECTORS,

State Hospital for the Insane, Raleigh, N. C.

GENTLEMEN:—Appointed by the State Board of Health as a committee to inspect the sanitary condition of your justitution, we, the undersigued, performed that duty October 7, 1908.

It gives us pleasure to state that we were accorded marked courtesy by the polite and able faculty of that institution and shown the entire plant in toto—the buildings, barns, laundry, kitchen, cold storage and all. From a sanitary standpoint we saw nothing to condemn, but much commend. We noted with pleasure the nearness to completion of e extensive annex to the old building. It is almost ready for the ds to he placed in the rooms. This will at once relieve the eongested ate of the old building.

The milk supply here is ample, from a fine herd of cattle, and

reat care is given to its purity.

This hospital is fortunate in the recent regulation to exclude a patients from its wards and should exhibit a higher atio of cures. We hear also, with pleasure, of the purchase of eleven undred aeres of laud, lying adjacent to this property, which will ermit the carrying out of the more advanced methods for treating he insane.

Very respectfully submitted,

THOMAS E. ANDERSON, M. D., EDWARD C. REGISTER, M. D.,

Committee.

## STATE HOSPITAL, MORGANTON.

THE BOARD OF DIRECTORS,

State Hospital, Morganton, N. C.

GENTLEMEN:—The undersigned, representing the State Board of Health, at the request of your Superintendent, visited the Hospital on July 15th for the purpose of advising as to the location of the special quarters proposed for the tuberculous patients. In consultation with the medical staff of the institution, we reached the followlng conclusions:

1. That provision should be made for three classes of tuberculous insane: (a) For the hedridden, (b) for the ambulant quiet cases. (c) for the ambulant disturbed cases. This would necessitate at least three wards for each sex.

After a eareful consideration of the matter—the cost of maintenance being had in view as well as the safety of the patients free from the disease against infection—we are of the opinion that the best arrangement would be as follows: For the men, an annex, connected by a corridor, should be made to the proposed new men's building. This would insure all necessary isolation of the infected and at the same time would be more economical in administration than a detached building, located at some little distance from the others. For the women we would advise a similar annex to wards 9 and 10.

As we understand it to be the settled intention of your honorable Board to provide the safeguard against Infection by tuberculosis denauded not only by humanity, but also by a public opinion that has in the last few years become enlightened on this most important subject, we feel that it would be a work of supercrogation to argue its necessity. We beg, however, respectfully to suggest that when the

plans are drawn room enough shall be provided not only for the number of consumptives now in the hospital, but for the total number reasonably to be anticipated in the large population that in a few years will occupy the institution.

In conclusion we wish to express our gratification at your decision to seeme protection to the uninfected afflicted ones against this painful, lingering and, in such subjects, hopeless disease.

> George G. Thomas, M. D., Richard H. Lewis, M. D., Committee,

#### HOSPITAL AT MORGANTON.

BOARD OF DIRECTORS.

State Hospital, Morganton, N. C.

Gentlemen:—In compliance with the law, the undersigned, representing the State Board of Health, made, on December 29th and 30th, a sanitary inspection of the institution under your care, and beg leave to report:

The general sanitary condition we found excellent. The hospital was very clean and the plumbing in good shape and working order. We would, however, call your attention to the inadequacy of the kirchen, which, originally designed for 425 patients, can hardly be expected to provide comfortably and satisfactorily for more than one thousand at present, and for several hundred more in the near future, we hope. Fortunately, the conditions are such that the necessary enlargement can be made without changing the building in any way and at moderate expense, by simply taking out the bakeovens now in use and erecting new ones at some convenient place outside. We respectfully advise that this be done at an early day.

The colony we found in good condition, and cordially commend the system. We are pleased to know that the Hospital Commission has arranged for the establishment of another.

Having in more than one previous report mged special quarters for the tuberculosis patients, we were much gratified to find that this provision has been made for the women, and that the money was in hand for the erection of a similar ward for the men. We do not express ourselves too strongly when we say we were delighted with the pavilion. The general arrangement is admirable and the ideal for consumptives—multimited fresh air and sunshine—is fully met. The white color adds materially to the brightness and cheerfulness and completes a most pleasing general effect. We are mable to suggest an improvement on it and, therefore, cordially endorse your intention of making the second pavilion a replica of the first—similarly connected by corridor to the south side of I Ward, we would advice.

Having made these regular inspections for many years, we feel

that it would not be amiss for us to express to you our opinion that you showed great wisdom in selecting, as successor of the deeply lamented Dr. Murphy, one who, with excellent endowments of his own, as assistant physician enjoyed unusual advantages in preparing for this work in his long association with, and training by, that great executive and administrator. Truly, "his works do follow him."

Very respectfully,

GEORGE G. THOMAS, M. D., RICHARD H. LEWIS, M. D., Committee.

STATE HOSPITAL FOR THE COLORED INSANE, GOLDSBORO.

BOARD OF DIRECTORS,

State Hospital, Goldsboro, N. C.

GENTLEMEN:—In accordance with my appointment by the President of the Board of Health as a committee of one to inspect the State Hospital for the Colored Insane at Goldsboro, I beg leave to report as follows:

I went to Goldsboro on the 22d of December and spent the morning of the 23d at the State Hospital for the Colored Insane. Dr. Faison was clever enough to take me through the institution and showed me in detail everything I desired to inspect.

I found the institution in the very best sanitary condition. I have only to suggest the need of a new floor in the old building, which was put there twenty-eight years ago, and is now rough and hard to clean and the inmates frequently get splinters in their feet from walking over same.

The lavatories in certain portions of the building were made of iron and have been in use a long while, hence they are very rusty and hard to clean, and I would suggest they be replaced by porcelain.

There are 665 inmates now confined in this institution, 38 tuberculars and 44 epileptics. Of course they should be isolated, and they are, so far as can be in the same building; but I note the hospital committee has now in the course of construction four buildings for the male and female tuberculous and epileptics which will accommodate twenty patients each. They should have been at least large enough to accommodate forty each.

The water and sewerage seems to be all that could be desired, as Dr. Faison tells me there has not been a case of continued fever in the institution for years.

So far as I can see and judge, it is clean, neat and kept in every particular in as near a perfect sanitary condition as can be. In going through the building there is not even the slightest odor, and we all know the negro when insane is fifthy and dirty, and how he can keep the insane in such a cleanly and wholesome condition is really hard to understand, and can only be done by constant watching and working.

I commend Dr. Faison and his able staff to the North Carolina Board of Health as an example for every public institution.

I am, with much respect.

D. T. TAYLOE, M. D., Committee.

#### THE STATE'S PRISONS.

#### THE PENITENTIARY.

BOARD OF DIRECTORS.

State's Prison, Raleigh, N. C.

GENTLEMEN:—The undersigned, a committee appointed by the State Board of Health to make the regular biennial sanitary inspection of your institution, in the discharge of that duty visited the buildings and grounds of the State's Prison on October 7, 1908.

After as thorough an inspection as we thought demanded of both the prison department and the department for the criminal insane we feel warranted in saying that the sanitary condition of the entire institution is as good as can be made in any institution of this kind. An ideal state would include water-closets for each cell, but, of course, this is out of the question. In the absence of these, the cells are kept clean, free from smell and the bedding in good condition.

The water supply, now from a large and very deep well, should be regularly inspected and should at no distant day be supplanted by water from the city water system, which will respond to more complete sanitation.

Very respectfully,

THOMAS E. ANDERSON, M. D., EDWARD C. REGISTER, M. D.,

Committee.

#### CONVICT CAMP AT ELKIN.

BOARD OF DIRECTORS.

State's Prison, Raleigh, N. C.

GENTLEMEN:—The undersigned, appointed by the State Board of Health to make the regular sanitary inspection of the camp at Elkin, N. C., beg to submit the following report:

That duty was performed this day, November 24, 1908, and am pleased to state that the camp is well located on a branch in the hills, all the sewage being deposited in and carried off in said branch of run-

ning water; a very shallow well furnishes drinking-water; no sources of pollution visible; there has been but little sickness in this camp.

There is one boy, Joseph Alexander, colored, from Mecklenburg County, long term prisoner, sentenced for twenty (20) years (has served about three years), who is suspected of being infected with tuberculosis; has been off work about two weeks. I requested that a sample of sputum be sent to the State Biological Laboratory. Should that examination reveal the fact that he has tuberculosis, then he should be taken out of that camp and placed with the like cases at the prison; otherwise the camp is in as good sanitary condition as circumstances will permit.

Very respectfully submitted.

W. O. SPENCER, M. D.,

Committee.

STATE FARM.

BOARD OF DIRECTORS,

State's Prison, Raleigh, N. C.

GENTLEMEN:—As a committee of one appointed by the State Board of Health to inspect the State Farm in Halifax County, I beg to submit berewith the following report:

I visited the State Farm and with the two supervisors, Capt. C. J. Rhem, Capt. C. N. Christiau, and the State Physician. Dr. F. M. Register, I iuspected the premises in detail, Camps Nos. 1 and 2. There are at hoth places about 305 convicts. They seem to be cared for nicely, and made comfortable as possible.

The hygienic surroundings were as good as could be under the circumstances. The sewerage and water supply and means of bathing and washing are not what they should be. I would suggest a system of waterworks and sewerage and better facilities for having the prisoners bathe.

I would also, from a health standpoint, suggest that screens be put in the windows and doors in the buildings where the prisoners sleep and eat, as Dr. Register tells me that the old ones are worn out, and that he found that when the huildings were well screened there were fewer cases of fever. I would suggest that the old wooden floors in the buildings now in use be replaced by concrete floors, as they can be kept clean and in a more healthful condition. I would also suggest that iron heds should replace the old wooden ones in the hospital camp; they are certainly very much needed.

I find eight patients detained in the hospital camp suffering from slight ailments; but upon the whole I believe the officials at the State Farm are careful and painstaking in the discharge of their duties towards the convicts, and keep them in as near a sanitary condition as can be with their present environment.

Very truly yours,

D. T. TAYLOE, M. D.,

Committee.

#### CONVICT CAMP IN BEAUFORT COUNTY.

BOARD OF DIRECTORS.

State's Prison, Raleigh, N. C.

GENTLEMEN:—As a committee of one appointed by the North Carolina Board of Health to inspect the State convict camp in the lower part of Beaufort County, I herewith suhmit my report, as follows:

On my visit to the camp Mr. W. O. Cox, the steward in charge, very kindly showed me in detail the snrroundings and everything I wished to inspect.

The camps are located between Belhaven and Leechville. There are 65 convicts, none of them sick. They look well and healthy, showing that they are well cared for, and made to ohey, as near-as possible, all sanitary laws that are necessary for their health and welfare in the way of regular honrs, baths, food and so on.

That portion of the county is naturally flat and low, hence the camps are not in a desirable location; but the supervisors have arranged a number of small ditches or drains around the different camps, thereby making the sanitation very much better.

Their water is obtained from driven wells, a sufficient distance from the camps to insure against any pollution, and the surroundings generally show evidence of intelligence and careful management.

There had been an average of about 75 prisoners for the last 17 months confined to this camp, working through Hyde and the lower part of Beaufort counties, and only two deaths have occurred during that time, and both were sudden, prohably induced from heart disease.

There has been no continued fever or contagious or infectious diseases of any kind among them.

The old canvas from which the tents are made is about worn out, hut the supervisor told me they would have new canvas and pitch new tents immediately, which is very much needed, and will protect them from the hard winter.

. I think the convicts have all the care and attention necessary for their health, and I have no suggestions; everything seems in model order as far as the environment and circumstances will permit.

Respectfully yours.

D. T. TAYLOE, M. D., Committee.

### WATER SUPPLIES.

CLEANING STANDPIPE AT OXFORD.

R. C. A. SHORE,

Raleigh, N. C.

DEAR SIR:—In supplying small towns with water by means of mping periodically into tanks or standpipes of approximately 100,00 gallons capacity we understand that at times there is a slight cumulation on the upper surface of the water in the standpipe dnst and small particles, and while these can be excluded by operly covering the top of the standpipe, it occurs to us that by an tra precaution it would be well to flush off this upper surface of ater.

This could be done in either of the two ways, as follows: First, remptying all the water out of the standpipe, and, secondly, by ling the standpipe to overflowing so that the upper surface of water thrown away and flushed over the standpipe.

We would like to know which of the two methods you would aprore of. We are making this inquiry in the interest of the health f the communities which we serve with water and would greatly be breeight your opinion in the matter.

Yours very truly,

THE OXFORD WATER AND ELECTRIC COMPANY,

By R. F. CARBUTT.

Referred for reply to Col. J. L. Ludlow, Engineer of the Board.

Winston-Salem, N. C., August 1, 1908.

JR. R. F. CARBUTT.

Care Oxford Water and Electric Company, Oxford, N. C.

Dear Sie:—Referring to your letter to Dr. C. A. Shore, Raleigh, N. C., and regarding which you talked with me over the longlistance phone yesterday, beg to advise as follows:

As I understand your inquiry, it is predicated on the assumption that dust and small particles of matter are liable to accumulate on the surface of the water in uncovered standpipes and tanks, rendering it desirable or necessary that this water be removed at periodic and short intervals of time; and this condition and the necessity being admitted, the desired advice concerns the preferable method of accomplishing this as between the plan of skimming it off the top or by drawing it off through the bottom.

Without expressing any agreement with the hypothesis upon which the inquiry is predicated, I would state that if it could be admitted, then by far the preferable plan of remedying the condition is that of pumping into the standpipe and tank at the bottom and overflowing at the top, either through the overflow pipe or over the top edge, should the conditions surrounding it be such that the foundation would not be injured by discharging such a large quantity of water around it. This is very much to be preferred over the plan of emptying the standpipe and passing its contents into the pipe distribution system, even though the pipe distribution system itself may be emptide at the same time.

Unless the substances that may thus become accumulated in the standpipe or tank are such as to constitute offensive impurities, there would be no necessity for their removal, but if they do constitute offensive impurities, then they should never be deliberately introduced into the pipe distribution system, where it might or might not be impossible to clean out and get rid of them. It is very difficult to clean a pipe distribution system should it ever become seriously fouled.

I would add that it appears to me that the source of this inquiry is based entirely on a wrong conception of the conditions that are liable to obtain with standpipes and tanks that have no cover over them. What material might lodge and float on the surface of the water will be of little or practically no importance so far as relates to hygienic conditions.

The greater portion of the small amount of substances that could reach the top of the standpipe or tank, and that should be considered objectionable, would be heavier than the water and settle to the hottom. In the case of tanks with the outlet connection at the very bottom, all such material will be gradually discharged into the distrihution mains. With standpipes having outlets a short distance above the bottom, which is quite a common practice, it may be quite desirable that the matter that may thus accumulate in the bottom of the standpipe should be removed periodically by emptying through an outlet in the pipe system close to the site of the standpipe, and be supplemented by a thorough cleansing of the bottom by cleanly methods, at reasonable intervals. The frequency that this should be done will depend much on local conditions and the character of the water contained in the standpipe or tank, and the normal rate of water consumption and the relative location of the standpipe to the pipe distribution system. With an unfiltered surface water it would probably be desirable to empty and clean that standpipe at intervals of a few months, but with deep-well water or properly filtered surface water the proper interval would be years instead of months.

I trust the information contained herein will meet your requirements.

Very truly yours,

J. L. Ludlow.

#### SEWERAGE.

#### REIDSVILLE.

REIDSVILLE, N. C., July 2, 1907.

DR. R. H. LEWIS.

Raleigh, N. C.

DEAR SIR: -You may probably know that our town here has no public sewerage. Unfortnnately, when the water system was installed some years ago the mistake was made of not adding sewerage. In many instances private sewerage has been put in and the sewer pipes empty into cemented brick tanks about 4 feet x 4 feet x 4 feet deep. The water coming from these tanks is supposed to be odorless and colorless, and as a usual thing is allowed to run as the natural drainage may carry it. I am living in a honse that I rent and it has this sewer arrangement, and I know there is a considerable odor when it discharges. Complaint by people near these private sewers is constantly being made to the town authorities, and I as chairman of the sanitary committee, have to deal directly with the matter. I will therefore appreciate any information you can give me about thissuch as I can use as an officer of the town. I nnderstand there are some cases of fever in the town, and in most cases it is adjacent to some of these private sewers.

With apologies for such a lengthy letter and thanking you in advance, I am,

Very truly yours,

ROBT. HAIRSTON.

P. S.—I am earnestly advocating public sewerage, and from the standpoint of an unprofessional man believe this to be the only relief. Our population is about 6,000.

RALEIGH, N. C., July 3, 1907.

MR. ROBT. HAIRSTON.

Chairman Sanitary Committee, Reidsville, N. C.

My DEAR SIR:—Yours of the 2d inst., asking my advice in regard to the sewerage problem of your town, has been received.

I am repeatedly on record as heing unalterably opposed to the use of cesspools in any city, town or aggregation of people where any part of the water supply is derived from wells. As I understand it, the cesspool method is the one in vogue in Reldsville. I regard it as a constant menace to the health of the community, and in my judgment it should be abolished or all the wells closed up and the people required to use only the public supply. The better plan, unquestionably, and the only one that will prove satisfactory, is the instalment of an up-to-date public system of sewers, and the sooner the town makes up its mind to adopt this the better it will be from every point of view.

I am no lawyer, but I believe that a suit for damages on the part of a person having had fever who lived in the immediate vicinity of one of these overflowing cesspools might lie.

Of course, it is an established fact that the bacterial changes which take place in what is known as a septic tank destroy a great many of the disease germs, but the process is not complete unless it is combined with a contact bed, and therefore the effluent would be capable of contaminating a neighboring well, or on the feet of flies the germs might be transmitted to the food in the neighboring dining-room or kitchen.

There is no question whatever in my mind that this method ought to be abolished and a good sewerage system installed.

Wishing you much success in your endeavors on this line, and hoping that you will not hesitate to call upon me whenever you feel that I can be of assistance, I am,

Yours very truly,

RICHARD H. LEWIS, Secretary.

REIDSVILLE, N. C., July 19, 1907.

Dr. R. H. Lewis.

Raleigh, N. C.

DEAR SR:—Will you be kind enough, as State health officer, to answer the following questions:

Is it safe to have a sewer, used by a tobacco factory working 400 to 450 hands, empty in a branch that goes about dry in dry weather, uot more than two hundred yards from a number of dwellings?

How far would be a safe distance?

Is it safe to empty other sewers in same branch, higher up and about same distance, used by about 50 people for closets, baths, etc.?

Is it safe to dump from closets and baths used by 50 to 75 persons, besides kitchen waste from dwellings and boarding-houses, into a tank 6 feet square and 6 feet deep, and allow the water running from same to follow very small branch passing by several residences—the branch becoming very green and offensive in dry weather?

Do you not think that natural drainage, where the hills are very steep and the hollows very deep, helpful in carrying off the refuse, as the water that washes the filth into the hollows from hard raius ncreases in power as it gathers, and therefore washes filth on—this, mean, where no sewer is turned into said hollows, only the natural sathering from the land allowed to go into the branches?

If you will answer these questions to the best of your knowledge you will very much oblige. I think you have already been questioned on matters along this line, from this town, lately, but think your opinion has been withheld; at least conditions remain about the same. I want to know if the laws will not help some of us who are in constant fear on account of fever in our midst, as the town officers refuse to compel these troubles to be stopped, or at least put it off from time to time, so that should dry weather set in, when there is no heavy rains to wash the fifth away, we are uneasy, therefore want your opinion. The town health officer, Dr. McGehee, has already said the conditions were mnsafe; still nothing is done. In fact, the town has a sewer of its own from the jall, emptying right in town, in same branch as referred to, and runs around these dwellings. If you will kindly give this your attention you will greatly oblige.

Yours trnly,

D. L. BLACKBURN.

RALEIGH, N. C., July 20, 1907.

MR. D. L. BLACKBURN,

Reidsville, N. C.

MY DEAR SIE: -Yours of the 19th inst. to hand. I do not think accumulations of filth, near enough to dwellings for flies to travel from one to the other, safe, and I think the ontlet of the sewer should be further away than 200 feet.

It is a question, however, as to whether this arrangement is not just as safe as neglected surface privies, as in that case the filth is far more attractive to flies than when associated with water, and would be nearer to the people. If the tho and dry-earth system were used and the tubs regularly removed, that would probably be better than the system described. As a matter of fact, you rarely ever find surface privies regularly attended to, and I would not be surprised if the present arrangement would not be as good as anything excepting a properly designed sewerage system, which I would advise the town to put in at once.

Very truly yours.

RICHARD H. LEWIS, Secretary.

RALEIOH, N. C., July 23, 1907.

Mr. J. L. Ludlow, C. E.,

Winston-Salem, N. C.

MY DEAR SIR:—The town of Reidsville has at present a moderate epidemic of typhoid fever—15 cases. There seems to be much diversity of opinion among its people as to sewage disposal. Conditions ex-

isting there are regarded by many as a menace to the public health. I have been asked by the municipal authorities for advice on the part of the Board in regard to the situation. I notified them that I would get you to go as soon as possible, as, being the engineer of the Board, these questions came especially under your care. So please let me know as soon as you can the earliest date that you can visit Reidsville.

Sincerely yours.

RICHARD H. LEWIS.

Secretary.

WINSTON-SALEM, N. C., August 3, 1907.

DR. RICHARD H. LEWIS,

Secretary State Board of Health, Raleigh, N. C.

My dear Doctor:—In accordance with your request I visited Reidsville on Tuesday last, July 30th, for the purpose of advising the city authorities relative to the sanitary condition of the town, regarding which they appealed to the State Board of Health for advice, and further to investigate and advise them relative to the cause of the excessive number of typhoid cases which have recently occurred in that town.

I spent the entire day there Tuesday, examining the general sanitary conditions of the town, more particularly two points of sewage disposal of which complaint had been made, also made as careful investigation as my time would permit, to locate the source of typhoid fever infection.

I found the general sanitary conditions to be bad, both in respect to water supply and sewerage, which I inspected thoroughly and advised the Board of Aldermen relative thereto.

Regarding the typhoid situation, I received authentic information, from the health officer, Dr. McGehee, and two other physicians, of about thirty cases. The colored practicing physician I failed to see, but he probably has some cases, which would run the total number of cases up to thirty-five or forty.

Of these cases I personally visited eighteen, accompanied by the health officer, and endeavored to learn the source of infection. Of these I found seven cases among the users of city water, and could find no other apparent source possible in at least six of these seven cases, though I made careful inquiry as to other possible sources of infection by the use of fruits, vegetables, milk and other sources of drinking-water and personal contact with other cases. One of these seven cases may have been caused by direct contact from nursing previously a case in the same family, but the former case appeared to have been traceable to the public water supply.

In most of the remaining eleven cases visited, the source of infection appeared to be in well waters, though some of these had, to some extent, used city water. In most of the cases that I failed to sit, from my inquiries of the attending physiciau, the patients apeared to have been in most eases users of well water and were ifected from that source.

Relative to the public water supply, I should state that the large ug well, with the connecting pipes radiating therefrom, located in a ranch meadow somewhat distaut from the town, and apparently only lightly exposed to infection, has become inadequate to meet the ueeds f the town, and about a third or a half of the water supply has been rawn from the branch nearby and delivered unfiltered to the pipe listributing system. As nearly as I could learn, this brauch had een nsed more or less for some years, and the State Board of Health has repeatedly advised that this water be filtered, but it has never een done. This branch has a watershed area of about one square nile, and by iuquiry and a hasty personal inspection made of this vatershed on a former visit to Reidsville, the watershed appeared to have a population of about forty or fifty persons. The area of the vatershed being so small and the dwellings of these persons not very ar removed from the branch or even from the waterworks station, nfeetion of the public water supply appears almost certain and firect from any typhoid case that might obtain on the watershed. from my inquiry I could only learn of one case having occurred on he watershed, and that occurred about last November or December. 3nt it is very easy to conceive that there may have been other cases, before or since, which were not recognized and treated as typhoid ever.

With the evidence obtained I am thoroughly satisfied that the use of vater from this branch without effective filtration is very dangerous o the public health of the town, and I advised the health officer, he mayor and several members of the board of aldermen that it was heir imperative duty to at once warn the people of the danger and dvise the consumers that the water should not be used for drinking ourposes without first being thoroughly boiled. I did not receive positive answer and assurance that they would give such notice, so equested that they consider the matter at once, and advise you whether or not they propose to follow this advice and issue the noice to the public, further telling them that it was my duty to report o you my advice in the matter; also that it was your duty, under he rules regulating the State Board of Health, to issue this notice yourself, as Secretary of the Board of Health, in case they should fall to do it. Of course, you will understand that I was careful to nake this statement in such a manner as to give no offense, and feel ertain that no offense was taken.

Relative to the three particular sewage accumulations, one from a group of five or six residences collected in an improvised septic tank of fairly good efficiency, at a point quite remote from residences, discharging the effluent into a very small branch; another being the

raw sewage discharged from the Penn factory and others into ar other very small branch quite near to several residences; the thir the raw sewage discharged from the sanitarium in a very small ditel branch near the thickly settled portion of the town. In the first named case I advised that no particular injury to the public health was probable, and that it was a fairly good choice of necessary evil in the absence of a general sewerage system. In the other two case my advice was that both were very bad and should be removed to some point further from the town, unless a general system of sewerage is likely to be installed soon, in which case I thought the present condition might be endured rather than put the parties to the expense of carrying the sewage further away.

I further advised the city council that the installation of a filter plant was absolutely imperative should they continue to use this branch water as a public supply. Also advised the importance of establishing a general sewerage system for the town at the earliest possible date and to inaugurate other reforms of general sanitation including the closing of several wells the surroundings of which appear to be dangerous, all of which could be more effectively done after a sewerage system is installed, a safe water supply obtained, and the distributing pipes extended.

In connection with my investigation I sent to our Lahoratory of Hygiene six samples of water for analysis, one from the branch forming part of the public water supply and the other five from different wells which appeared to be the source of infection of several cases of typhoid fever. I have not yet received the report of the analyses of these waters, but feel quite certain that they will corroborate my conclusions reached from personal inspection; and whether or not the analyses should show positive infection, I shall still adhere to the opinion that the present water supply, unfiltered, is unsafe, and that many of the wells in the factory districts are likewise unsafe and dangerous to the health of the citizens of the town.

I am mailing a copy of this letter to Mayor Montgomery of Reldsville.

Very truly yours,

J. L. Ludlow,

Member and Sanitary Engineer, State Board of Health.

Winston-Salem, N. C., August 6, 1907.

MAYOR MONTGOMERY,

Reidsville, N. C.

Dear Sir:—Under date of August 2d. I sent you a copy of my report to Dr. Lewis, Secretary of the State Board of Health, relative to my recent visit to Redsville to investigate the sanitary conditions and the typhold fever situation. As stated therein, I had not at that time received the report of the analyses of the waters sent to the

state Laboratory of Hygiene, but this morning's mail brings these eports. I would advise relative to the results of these analyses as follows:

Well No. 1, situated near the Walker Mill and from which the typhoid fever cases, Tucker and Harrison, had used water, is reported by Dr. McCarthy, the Biologist of the Board of Health, to contain outrefactive bacteria, very high chlorine, and to be badly polluted water.

Well No. 2, situated in Manly's yard and from which typhoid fever patients Strickland and Turpin have heen using water, is found to contain putrefactive hacteria and high chlorine, though, apparently, free from fæeal germs.

Well No. 3, from which typhoid patients, the two Clayton children, had used water for drinking purposes, contains putrefactive bacteria, high chloriue, B. Colicommunis in 5 c. c. of water, and shows recent feeal pollution.

Well No. 4, from which typhoid patient Mrs. Mary Brice used drinking-water, is found to contain putrefactive bacteria, also high chlorine, and B. Colicommunis in 5 c. c. The analyst states: "This water is polluted and has been for some time."

Well No. 5, from which typhoid fever patient Mrs. Fisher used drinking-water, is found to contain putrefactive bacteria, high chlorine, and B. Colicommunis in 5 c. c.

The sample from the branch of the waterworks station is found to contain putrefactive bacteria and to be high in chlorine, B. Colicommunis found in 5 c. c. The aualyst states that the "Water is slightly contaminated; coutamination recent or current; dangerous for driuking-water unless filtered or boiled." From the above it appears that all these wells from which samples were taken are dangerons, with Well No. 2 the least, and that they are all dangerous to use for drinking-water unless the water is first thoroughly boiled. In reference to the branch water which you have becu using as a part of your public water supply, having a chlorine content of eleven parts per million, which is apparently excessive in your locality and would itself indicate fæcal pollution, and containing the usual putrefactive bacteria, as well as the B. Coli, which is always present with frecal pollution, the water is very suspicious, and such an analysis, considered together with the character aud exposure of the watershed supplying this stream, and the six or seven typhoid cases, which apparently are traceable directly to the use of this water for drinking and other purposes, this water must be condemned as unsafe for a public supply unless it is first thoroughly filtered; and until a filtration plant can be established the use of this water should preferably be discontinued; but if it must be used, the users should be warned of the danger and advised and urged to thoroughly boil the water before using it for drinking purposes. Very truly yours. J. L. LUDLOW.

RALEIGH, N. C., August 7, 1907.

Hon. R. S. Montgomery, Mayor, Reidsville, N. C.

My dear Sue:—I am in receipt of the report of Colonel Ludlow npon the sanitary condition of Reidsville, bearing upon your ontbreak of typhoid fever, after seeing the report of the analyses of

water sent by him to the State Laboratory of Hygiene.

With such facts before us there is nothing for us to do but to
endorse Colonel Ludlow's suggestion; that is, to install as soon as
possible a filtering plant for your public water supply, and in the
meantime urge upon the people the necessity of boiling all their
drinking-water. The objection to the boiled water is its flat taste,
but if it is poured from one vessel to another from a considerable
distance it soon becomes aerated and regains its life.

I would also urge upon you the importance of your city's installing as early as possible the proposed sewerage system. A public water supply without a sewerage system is, in my judgment, a curse instead of a blessing, so far as the health of the community is concerned. It is useful for manufacturing purposes and is a luxury to those who can afford it, but without sewers to take away the waste water, generally polluted with human excrement, it is against the public health.

Hoping that you may be able to carry ont at an early date both of these suggestions and that by taking extra precautions in the matter of boiling water, seeing that dry earth or lime is used in the surface privies after each evacuation and that they are thoroughly cleaned at least once a week—better twice—your typhoid fever may soon be checked, I am.

Yours very trnly.

RICHARD H. LEWIS, M. D.,

Secretary.

RALEIGH, N. C., August 28, 1907.

Hon. R. S. Montgomery, Mayor, Reidsville, N. C.

My DEAR SIR:—I have been informed that no steps have been taken by your town to carry out the suggestions made by Colonel Ludlow, with a view to the prevention of the spread of typhoid fever. I think it more than probable that some mistake has been made about this, and I therefore write for information.

I enclose a copy of an Act+ to Protect Water Supplies, and would refer you to section 9 of the same, and would add that I endorse the recommendations made by Colonel Ludlow in his report. You will please accept this letter as the notice required of me in section b. Of course it will take time to install a filter, but there is no reason why the people should not boil their drinking-water until the supply has been rendered safer.

Hoping to hear from you at your earliest convenience, I am,

Yours very truly,

RICHARD H. LEWIS, M. D., Secretary.

REIDSVILLE, N. C., September 18, 1907.

DR. R. H. LEWIS,

Secretary State Board of Health, Raleigh, N. C.

MY DEAR SIR:—Replying to yours of sometime ago in regard to the action taken here by the town authorities concerning the city water, beg to advise you that upon receipt of your letter I took the matter up with our health officer and requested that he write you at ouce, glying you the condition of affairs at that time.

giving you the condition of affairs at that time.

Upon the suggestion of yourself and Mr. Ludlow, we suggested to the people of the town that all water for drinking purposes should be boiled before using. We also had our health officer to have published in both our town papers the statement made by Mr. Ludlow in regard to the conditions here.

We have, I assure you, taken every precaution we could, under the circumstances, to overcome any trouble that should be caused by the use of impure water or the unsanitary condition of the town. It is true that we have not as yet installed a filter system here, as we have felt all the time that it was not absolutely needed, and while it is possible we may have this to do sooner or later, still we have been able to increase our water supply very materially, and we believe it to be good water, consequently it would hardly be advisable for us to go to the expense of the installation of a filter system just now. As to the matter of public sewerage, I judge that this question will be voted upon at some date in the near future. In the meantime we propose to take every precaution to keep down any disease arising from this cause.

As to the typhoid fever patients, I am glad to report to you that we now have a very few, if any, and out of all the cases reported to you by Mr. Ludlow upon authority of our physicians here, there has only been in the town, to my knowledge, one death caused by typuold fever.

Hoping that the action we have taken in this matter will meet with your approval, and assuring you of our appreciation of your kindness in the matter, I am,

Yours very truly,

R. S. MONTGOMERY,

Mayor.

Raleigh, N. C., September 26, 1907.

HON. R. S. MONTGOMERY, Mayor,

Reidsville, N. C.

My DEAR SIR:—Absence from home has prevented an earlier acknowledgment of your very courteous letter of the 18th inst.

I beg to say that you have earried out our suggestions as far as possible for the present. I would advise, however, that you do not let up on the filter question. I am satisfied that it would be to the interest of your town to install one. There is no question whatever about the importance of a sewerage system. A public water supply without a system of sewers is a menace rather than a protection to the public health. I would call your attention to an article bearing ou this subject which you will find in the forthcoming Monthly Bulletin, of which I suppose you receive a copy regularly.

Appreciating the spirit shown by you in your administration, I am, Yours very truly.

> RICHARD H. LEWIS, M. D., Secretary.

### BURLINGTON.

Burlington, N. C., September 3, 1907.

DR. R. H. LEWIS.

Raleigh, N. C.

Dear Sir:—Just now we are confronted with some questions of sanitation which we do not know how to handle properly. We feel that we greatly need some suggestion from you, and will thank you to try and arrange to meet with us on Friday night of this week; but if you find this impossible, perhaps you can write us, and if so, we will thank you to give us some information on the following matters:

- 1. Where a town has not a sewerage system, how ean sewage from water-closets and kitchen sinks be best disposed of?
- 2. What kind of cesspool or septic tank would you recommend? And is it possible to have one thoroughly sanitary?

We have a seaveuger who removes all matter from privies, lots and stables; but there are some residences in town in which water-closets, lavatories, and kitchen sinks are used. These families are using a cemented tank for eatching all matter from the pipes, and in this tank there is an overflow pipe, that is, when the tank fills to a given point it then runs out and into another that is perforated, and the matter that goes into this tank is allowed to seep into the ground and be thus disposed of. Others have those which are of hut one compartment, but with an overflow pipe. They claim that all solid matter collects in this tank and can be cleaned out when desired,

and that the liquid matter is constantly running out through this overflow pipe. In most all cases the water or liquid matter is emptied into the drain along the sidewalks of the city. There have been complaints about this, and the complainants may have grounds for it, but some of our physicians say they have not. So you see, Dr. Lewis, that we are really in a rather perplexing condition.

We shall be glad to have you with us; but if you can't come, please write us fully.

Very truly yours.

A. F. BARRETT, Mayor, Per J. L. Scott.

Raleigh, N. C., September 7, 1907.

Hon. A. F. BARRETT, Mayor,

Burlington, N. C.

My dear Sie:—Upon my return after a short absence I find yours of the 3d just, asking for information in regard to the proper disposal of sewage and kitchen waste in a town having no sewerage system, what kind of cesspool or septic tank would I recommend, and is it possible for one to be thoroughly sanitary.

In reply I beg to say that it was impossible for me to have been with you last uight aud it would be a great inconvenience for me to go at any time in the immediate future.

Matters of this kind really come under the jurisdiction of Colonel Ludlow, the engineer of the Board, who lives in Winston-Salem. He is a real expert in all matters relating to water supplies and sewerage systems. I would suggest, therefore, that you write to him, saying that you do so at my request, he being the proper member of the Board to advise in such cases, and that I would be glad to have him vlsit Burlington and talk to your Board on the subject, if it can be arranged.

My own position in regard to cesspools in cities and towns deriving their supply of drinking-water from wells is one of unalterable hostility. I am utterly opposed to the use of cesspools in communities using wells. If there is any objection to the infection of drinking-water by human excrement it seems to me to be entirely conclusive that ecsspools so arranged as to overflow and saturate the surrounding soil, through which water will percolate and find its way into the well of the proprietor, or into some neighbor's well, should not be allowed. On this account a public water supply without a system of sewers is, in my opinion, injurious rather than helpful to the public health. A large majority of the population cannot afford to utilize it, and, consequently, the health of the community as a whole is jeopardized by this comfort and luxury on the part of those who can afford it.

Colonel Ludlow may be more liberal in his views than I am, but I certainly do not think cesspools ought to be permitted. Septic

tauks, in order to be thoroughly effective, should have a contact bed, so that the effluent may be exposed to the oxygenating effect of the air, or, as we put it scientifically, to the action of the aerobic bacteria. Septic tanks with overflow pipes in the surrounding soil would not be objectionable but for wells furnishing drinking-water. I think the emptying of the overflow into the gutters of the town is much more objectionable than when turned into the soil, as in the first instance it would be within the reach of flies, which, as we know, are spreaders of disease.

Trusting that this may be helpful, and that Colonel Ludlow may be able to advise you further and more intelligently, I am,

Yours very truly,

RICHARD H. LEWIS, M. D., Secretary.

#### SUBURB OF WILMINGTON.

North Wilkesboro, N. C., September 9, 1908. Colonel J. L. Ludlow,

Winston-Salem, N. C.

DEAR SIR:-Miss Mary Bridgers, the owner of a new settlement on the exact confines of Wilmington, will either directly or through her architect, Mr. Stephens, submit a plan for a septic tauk for sewage disposal to serve her property, for your opinion, as the engineer of the Board of Health. This is made uccessary because she proposes to empty the overflow from this settlement into a creek which directly affects a public stream and one of the feeders of Smith's Creek, an afflueut of the North East River, which empties into the river just about three-quarters of a mile above the intake of the city waterworks. The county commissioners have, in accordance with the law, made this reference to you a condition precedent to their approval of this movement. I have written Miss Bridgers that her plans should juclude an exact plau of lots at present sold and those which her property will hereafter provide for, also a profile map of the property, with a certified plau of the sewers now ready for use to cover such property, fucluding size of maius and laterals and location of manholes, etc.

As I understand the situation, this work has been prepared by a Mr. Porter, under the instruction of Mr. Stephens, who is Miss Bridgers' architect. Mr. Porter is only a chemical engineer, whatever that may be. That was his statement to me, and I wrote Miss Bridgers that he should tell you to whom he has appealed for consultation in the preparation of his plans and specifications.

This settlement is just beyond Seventeenth Street and between that street and the Green's Creek, all east of Wilmington proper. There has been some work done on this matter already and was sent in to me, but it was so inexact that I refused to submit it. If there is anything else that I cau do in this matter, I will be glad to serve you. I will be in Linville for forty-eight hours beginning the 12th prox. and in Asheville at Swannanoa Hotel on the 18th and 19th.

With kindest regards, I am, sir,

Yours truly, George Gillette Thomas,

President North Carolina Board of Health.

Winston-Salem, N. C., September 19, 1908.

DR. GEORGE GILLETTE THOMAS.

President State Board of Health, Asheville, N. C.

DEAR SIR:—Yours of September 9th was duly received, and the plans covering the sewage-disposal plant for Carolina Heights reached me yesterday. I have given the matter attention and am writing the parties to-day relative to it, in which I gave my approval to the plans for the sewage-disposal plant, but have made some criticisms to the general layout of the sewers, and suggested some modifications.

Very truly yours,

J. L. LUDLOW.

Wilmington, N. C., September 11, 1908.

COLONEL J. L. LUDLOW.

Winston-Salem, N. C.

DEAR SIE:—The attached prints are of a sewage-disposal plan and lines for a plant we wish to install at Carolina Heights, Wilmington, N. C. The local sanitary board have referred it to the State Board, but owing to the absence of Dr. Thomas we are handing you the prints direct.

We have a letter from Dr. Thomas, dated North Wilkesboro, N. C., September 9th, stating that he was writing you on that date, and that addressing you direct would hasten the matter through.

We would much prefer to have more fall to our lines, but local conditions will not permit, as you will see by profile; but, although we do not think it absolutely necessary, we can install flush tanks, should you deem it advisable.

The following are some of the essentials which do not appear on the plans, but which aid in grasping the significance and applicability of the different dimensions and parts:

Plant designed for 81 houses.

Five hundred people, 100 gallons sewage per capita.

Settling time, 12 hours,

Settling tank capacity, 25,000 gallons.

Grit chamber to hold solids heavier than water.

Five scum boards to hold in the tank floating solids.

Both grit and scum, after becoming inoffensive, to be collected in sludge basin and removed.

Construction of settling tank in two parts to allow continuous treatment of sewinge while cleaning out one-half and to provide proper treatment of the small flows of sewage during the development of the Heights.

Sprinkling filter, one-twentieth of an acre.

Will oxidize a settling tank effluent to a non-putrescible, non-offensive liquid.

Giving a total purification in the plant of about 90 per cent, as judged by analysis showing bacteria, organic nitrogen and oxygen consumed.

The plant, constructed according to these plans and given a small amount of intelligent care while operating, will give no offense or cause for complaint from the people living near.

If you can consistently do so, would appreciate your giving your approval at earliest possible moment.

Yours respectfully,

B. H. STEPHENS.

Winston-Salem, N. C., September 19, 1908.

MR. B. H. STEPHENS.

Architect and Consulting Engineer, Wilmington, N. C.

Dear Sir:—Your letter in reference to sewage-disposal plant for Carolina Heights, a small suburb of Wilmington, N. C., under date of September 11th, together with blue prints of proposed installation, are found upon my return from several days absence.

Referring to the said plant, would advise that the disposal plant, as shown on the plans, when operated with a reasonable degree of intelligent supervision, should give very satisfactory results and render the sewage to a suitable degree of purification to permit its discharge into the stream proposed. Such a plant would meet my approval and in my judgment should be acceptable to the State Board of Health, to which body the matter has been referred by the county commissioners for approval.

With the plan of sewers as laid out, however, I think there would arise considerable difficulties in operation and in the delivery of the sewage to the disposal plant. The pipes have insufficient gradients and are so small that frequent stoppages would be quite probable.

I am not advised as to whether this feature of the installation has been referred for my approval or not, but if so, I would withhold approval, subject to certain modifications in the plans, viz.: Substitution of manholes where lampholes are shown on the plans at points of schange in alignment and grade; the placing of automatic flush tanks on the head of all sewer lines; the elimination of all 4-inch sewer lines except for individual house connections; the substitution of 8-inch pipe for 6-inch in the main sewer line, and the increase of gradients to not less than three-tenths of 1 per cent. The latter requirement, it appears, may be accomplished by decreasing the depth of the contact bed of filter with a corresponding increase in area, or by lowering the elevation of the septic tank, which would probably require a different plan of distribution on the filter contact bed.

Very truly yours,

J. L. LUDLOW,

Consulting Engineer and Member N. C. State Board of Health.

WILMINGTON, N. C., September 23, 1908.

MR. J. L. LUDLOW.

Engineer North Carolina State Board of Health, Winston-Salem, N. C.

DEAR SIR:-This will acknowledge receipt of your letter of the 19th, in which you advise that a plant constructed as shown on blue prints referred to you would meet with your approval, but that there would be some question in your mind as to the sewage lines. Referring to the latter, would say that to follow the several features referred to would work a hardship on us at this time inasmuch as the engineer who had the matter in charge before it came to our hands had had considerable of the mains installed, together with a great many of the manholes, and, in short, has left the entire situation in very bad shape, and it is our desire to make use of as much of the work already done as possible; we could, however, substitute an 8-inch line from the last mauhole to the tank in place of the 6-iuch and install flush tanks at the heads of each line, as well as substitute manholes at the point where lampholes are shown. We were of the opiniou that the 4-lnch lives would be sufficient to handle the sewage that would pass through them, for the reason that the houses that are being constructed to be cared for by these lines are small, averaging one bathroom and one kitchen to each house. We are also requesting those connecting with the line to put in grease traps.

Would say further that it will be a great many years before each lot will be occupied; at the present time there are only ten houses completed and at the rate we are going it would take eight or ten years to put the plant up to its full capacity, and at that time it would probably be necessary to install new pipe lines, which could be enlarged.

We trust that with the foregoing explanation you will see your way clear to approve the work as outlined and alterations hereiu mentioned.

Yours respectfully,

B. H. Stephens.

Winston-Salem, N. C., September 25, 1908.

Mr. B. H. STEPHENS,

Wilmington, N. C.

Dear Sir:—I have your favor of September 23d, in reply to my letter to you under date of the 19th, relative to the proposed sewerage system for Carolina Heights suburb. I note your statement that considerable of these sewer lines had been laid according to the plans submitted to me and from which I withheld my approval, and note your hope that in consideration of the alterations and changes that you find it feasible to make, as set forth in your letter, that I may modify my former advice in the matter and approve the work as outlined in your letter.

I have given this matter careful consideration and fully appreciate the position in which the owner of the property is placed by reason of having a portion of this work already constructed, and should be pleased if I could see my way clear to modify my former statements and recommendations, but am unable to do so, and cau only reaffirm the statements and recommendations contained in my letter referring to the matter under date of the 19th just.

Very truly yours, J. L. Ludlow, Engineer and Member of the State Board of Health.

## TYPHOID FEVER AT COUNCIL.

CLARKTON, N. C., June 2, 1907.

DR. R. H. LEWIS,

Secretary State Board of Health, Raleigh, N. C.

MY DEAR DOCTOR:—The epidemic of typhold fever that we had such a time with last year at Council has broken out again. Two eople, a man and a woman, have already died with it this year and several more have it. Eight or nine died last year, which was a retty big per cent of the population. If you can suggest anything to stop it, please let me know. We have "cleaned up" in a general way and limed and burnt, etc. They keep after me to do something more and I don't know anything more to do.

Please send cases for two or three samples of water to be examined. Thanking you in advance.

Yours very truly, Leslie B. Evans, Superintendent of Health, Bladen County.

RALEIGH, N. C., June 26, 1907.

Dr. Leslie B. Evans,

Clarkton, N. C.

MY DEAR DOCTOR:—I am sorry to learn that you have another epidemic of typhoid on your hands, and regret very much that, owing to the absence of Dr. McCarthy until the 15th of July, our Laboratory will be closed and the analyses desired cannot be made until after that date.

I would recommend that the drinking-water used in the community be boiled. That, of course, gives it a flat taste, but this trouble can be remedied by pouring it for a little distance from one vessel to another, especially through the rose of a watering pot, which, as you know, makes a number of fine streams, the object being to aerate the water.

You also know the opinion that has grown very much since our Spanish War and the printing of the report of the Commission of Army Surgeons on the outbreak of typhoid fever in our camps, that typhoid fever is transmitted very frequently by flies and by personal contact. The commission stated in their report that in the epidemic at Chickamauga, involving thousands of cases, there was no evidence whatever connecting the water supply with the fever, and they laid it chiefly to the flies.

. Now the task to be accomplished is to so arrange things that flies cannot come in contact with the bowel discharges of the typhoid-fever cases, for if they do they can fly directly to the dining-room or kitchen and infect the food. Now, as people often have bacilli before they are actually attacked, and as they persist certainly for several weeks after the patient has actually recovered, you can understand how all surface privies are liable to be inoculated and consequently become a source of dauger on the fly theory. I would, therefore, suggest that lime or ashes or, best, rich mould in the form of dust, be used to cover every evacuation, and that the privies be cleaned not less frequently than twice a week.

Another method that perhaps would be better would be to use carbolate of lime or fluid carbolic acid, as flies dislike very much the odor of carbolic. Another protection would be to have a flat or swinging door in the rear so as to shut out the light, as flies avoid darkness.

If the people in the community have respectable privies they ought not to have any trouble in carrying out these suggestions, but the difficulty is that in some communities they do not have any privies at all. In that case the danger is still greater; but, knowing what you want to accomplish, a man of your knowledge and common sense, I am satisfied, could give the proper instructions.

Very truly yours,

RICHARD H. LEWIS, M. D., Secretary.

Council, N. C., July 22, 1907.

DR. RICHARD H. LEWIS.

Secretary State Board of Health, Raleigh, N. C.

DEAR SIR:—We are now laboring under the second year of the typhoid-fever epidemic, which has been raging here since about April, 1906; and finding that we are losing ground in fighting it, beg to ask that you come to our assistance immediately.

We beg to refer you to the following physicians that are treating the cases, who have so far not been able to cope with the situation, and advise us to call you to our ald: Dr. D. W. Bullock, Wilmington, N. C.; Dr. L. B. Evans, Clarkton, N. C.; Dr. G. L. Clark, Clarkton, N. C.; Dr. B. T. Atkins, city.

Statistics show that we have lost within the last twelve months 33½ per cent of our population, and that it is more fatal than any smallpox epidemic that the county has suffered within our recollection.

We wish you to come and arrange to analyze the water supply, etc., and see if you cannot assist us in locating the cause. If you can, come prepared to do the work here. Will furnish and prepare a room for the work.

We have purchased some fifty barrels of lime for free distribution, and are using it freely and will continue to use all precautions possible.

Kindly advise when we may expect you.

Yours very truly,

J. A. MEEDER, Mayor, W. D. SHAW, B. J. SANDERLIN, W. C. VICK,

Commissioners.

RALEIGH, N. C., July 23, 1907.

HON. J. A. MEEDER, Mayor,

Council, N. C.

My dear Sir:—Yours of the 22d inst., in regard to the epidemic of typhoid fever prevailing in your town, has just been received.

In reply I beg to say that I am so situated, and will be for the next fortnight, that I cannot get away from home. I also regret to say that the equipment of our Lahoratory, in both men and apparatus, will not permit analyses being made on the spot. On June 26th I received a letter from Dr. L. B. Evans, Superintendent of Health of Bladen County, under whose jurisdiction this matter comes, in regard to this matter, and I enclose a copy of my reply, from which you will refresh your mind as to the management of typhold fever, which he, no doubt, has explained to you.

Dr. McCarthy having returned, I have had three sterilized bottles for samples of the water of your town sent to Dr. Evans, that we may ascertain the healthfuluess of your water supply, fluding out whether it is infected or not.

In addition to what I said in my letter to Dr. Evans, I think, as the fever seems to be so persistent, that it would be advisable to thoroughly disinfect the rooms occupied by persons sick of typhoid fever after their death or recovery. In order to carry out the proper sanitary rules strictly much attention and courage is required.

If you still think it necessary to have a member of the Board visit your town, the proper course to be pursued would be to apply to Dr. Evans, the County SuperIntendent of Health, and ask him to request the attendance of a member of the Board. I would suggest that the President of the Board, Dr. G. G. Thomas, who lives in Wilmington, could visit Council with comparatively little inconvenience and expense.

I would impress upon you the importance of everybody boiling their drinking-water until the analyses are made, but I am afraid you will find it an extremely difficult matter to get people to do this.

Hoping that you can soon control the outbreak, I am,

Yours very truly,

RICHARD H. LEWIS, M. D., Secretary.

RALEIGH, N. C., July 26, 1907.

Dr. George G. Thomas.

President North Carolina State Board of Health,

Wilmington, N. C.

My Dear Doctor :- I euclose a letter from Dr. Evans, Superintendent of Health of Bladen County, which explains itself. The Mayor of the town has also written to me in regard to it and set forth a very serious condition of affairs. This is the second year they have had an epidemic of large proportions for so small a community.

As you are so year that you could run up in the morning and return by dinner, I hope you can go. It would take me quite a considerable time to manage it; and another trouble is that my partner is away from home and will not return for ten days more, consequently it is more inconvenient than usual for me to get away. Of course, however, I am at your command. Please let me know as soon as you decide what is best to be done.

Very truly yours.

RICHARD H. LEWIS, M. D., Secretary.

WILMINGTON, N. C., July 3, 1907.

Dr. R. H. Lewis.

Secretary State Board of Health, Raleigh, N. C.

DEAR DOCTOR:-Pursuaut to your request, I have this day visited Council and have gone over the situation there with Dr. Evans, Superiutendent of Health of Bladen County, and beg leave to report the findings as follows:

Iu April, 1906, the wife of Mr. J. A. Meeder sickeued with typhoid fever. During the year 1906 there were four other cases in this house. In January, 1907, his sister-in-law, Mrs. Meeder, came from Norlina to live with Mr. J. A. Meeder. Three weeks after her arrival she developed typhoid fever and died. A negro boy, who was iu the employ of Mr. Meeder during the entire time of this fever, developed the disease about three weeks ago, and is now sick in the hospital in this eity. The uext ease was in the house of Mr. W. C. Vick, himself and wife. This honse is about fifty yards from Meeder's and the next house to it. During the time that Meeder had typhoid in his family, Mr. R. E. Vick, who lives just beyond Mr. W. C. Vick, the two brothers about the same distance apart, had two eases in his house-two daughters, small children, one of whom died. Next was the daughter of Mr. J. S. Grimsley, who worked in a store on the other side of the railroad immediately opposite Meeder's house, about seventy-five yards from this house, and the water she drank came from a well in an open space near the store. She died. Mr. W. D. Shaw, who lives back of Meeder's honse about one hundred yards, had one son and one daughter sick with typhoid fever some time during the snmmer of 1906, both of whom recovered. In 1907 his son-in-law, Mr. C. A. Edwards, who had been there about five months, sickened with typhoid fever, and died in Jnne, after six weeks' sickness. Mr. J. Q. Nye, who lived in a house well back in the woods from the village, but worked in a shop owned by the Councils near the point of the original outbreak, the Meeder's honse, died in October. His cook, a negro woman, sickened shortly after he did and died. A negro by the name of Graham, living on the other side of the railroad from the above reported cases, except the Grimsley case, had typhoid fever and died. This is a donbtful case, because he came home from Chadbonrn sick. In 1907, as I have already noted, Mrs. Meeder, sister-in-law of W. D. Shaw, died, in June last. In addition to these, there was a white section-hand by the name of Montgomery Benson, who had typhoid fever, as well as a small child. He died.

This makes 19 cases, with 8 deaths, which is about 42 per cent. This seems worse when you consider that within the corporation limits of the town, which is one mile square, there lived, according to the best estimates by persons with whom I talked, only about seventy people. So that you will see that this was a right serious condition of affairs; these cases occurring between April, 1906, and June, 1907. The town is built in a flat country, from which the drainage is very imperfect. The evidence of last night's rain and of the raiu of the previous day, as I saw it to-day, was apparent everywhere in mudholes in the roads and in the stagnant waters standing in the ditches.

All of the privies, as you would expect, are surface privies, to which very little care is apparently giveu.

Mr. Meeder claims that his household was carefully looked after, and that all of the discharges were disinfected under the care of a nurse. This is certified to also by Dr. Evans. Nevertheless, the fever developed in every member of his family, excepting himself, and the infection was evidently resident in the house after they recovered, because his sister-in-law developed it three weeks after her arrival, and the negro boy went down with it at a later date. It is probable that the two Vicks, who lived next to Mr. Meeder, visited the bouse, but of this I am not certain; but it is easily understood how flies might have carried the contagion from Meeder's house to either one of these houses. It is more difficult to account for the other cases, excepting the Grimsley girl, who might have been in some way infected by insect convection, as her father's store was immediately across the railroad from Meeder's, about seventy-five yards distant.

The water supply of the town usually is from driven wells, averaging about twenty-three feet in depth. This pipe goes down through a topsoil of sand between two and three feet in depth, then through

a loose yellow clay fourteen feet, and through a bluish clay and into sand again, which is the water-bearing point. The pumps of Meeder and Shaw are both driven immediately under the back porches, and you can understand that, if there was any infected liquid material turned ont anywhere near these pumps, the drip-water would naturally sink down through this loose soil to the source of supply. Mr. McCarthy has examined the water of the two wells, and says that both of them are pollnted, carrying intestinal bacteria and rather a large amount of chlorine, both of which indicate fæcal pollntion; but the origin of the fever in Mr. Meeder's family is a matter of grave doubt. There was no one sick in it up to the time his wife was taken down, nor had there ever been a case of typhoid fever in the neighborhood since the town was started, as far as any one knew. But Mr. Meeder keeps a house in which he offers hotel accommodation to traveling men and others, and it is possible that in this way infection may have been carried into the household. The conditions existing around the town, bad drainage, stagnant water, and small puddles in the roads, would all help ont, but, of course, not produce disease.

I regret to say that it seems to me that it is necessary for us to come to the conclusion that the directions for the care of premises and persons sick with typhold fever, so plainly set out in the Board's leaflet, have not been observed. I noted, with some surprise, the consolation which they gave themselves in showing me little scattered heaps of slaked lime under the houses, around the mudholes, and in the privies. No doubt, this lime was thoroughly slaked before distributed, and in which case it would be very unevenly distributed at any rate. I advised them in using lime to use only the milk of lime, and to always use it freshly prepared. My advice to Mr. Meeder, who is Mayor of the town, was to have his town drained thoroughly by sufficient ditches and to have the surface privies carefully looked after. They should have boxes in all of the privies and charcoal or lime and clay to dry the contents of the boxes, and proper provision made for their frequent emptying and cleaning.

Right now a good many in the neighborhood are immune from typhoid fever. Quite a number with whom I talked had had typhoid previously, and I am disposed to think that the stress of danger is over, as there is no sickness of any consequence in the community.

It is worth while to say that notwithstanding the amount of stagnant water in ditches and on the surface in and around the town, there is no malaria present, nor is there any history of outbreaks of malaria previously. Dr. Evans assured me of this fact.

It is also to be noted that there is no milk drank in the town. I believe only one person in the town owns a cow. The only other milk used is condensed milk. So that this common source of infection is cut out.

There is no doubt that the directions of the leaflet which had regard to the care of the hands of assistants in typhoid cases were often disregarded, as well as for the care of all of the belongings of the patients. I think, however, that now that the disease is stopped at this point that it will hardly reappear unless there is a fresh infection from the outside.

Yours very truly,

George Gillette Thomas,
President State Board of Health.

RALEIGH, N. C., August 3, 1907.

Dr. LESLIE B. EVANS,

Superintendent of Health, Clarkton, N. C.

My DEAR DR. Evans :-- I am in receipt of the report of Dr. Thomas in regard to the typhoid-fever situation at Council. I agree with him in his views, and would urge, therefore, upon the community the strict compliance with the instructious set forth in the leaflet, which has been distributed; the proper care of surface privies (such as described by Dr. Thomas), the drainage of the town and extra care in regard to drinking-water. The water from the pumps of Messrs. Meeder and Shaw, which was found by Dr. McCarthy to be infected with intestinal bacteria and a rather large amount of chlorine, both of which indicate fæcal contamination, should be invariably boiled before being drunk. A better plan would be to abandon these wells altogether and sink new pumps uot less than 75 feet from the present infected location. The drainage power of a pump is supposed to be represented by an area the radius of which is three times as great as the depth of the well, and, according to Dr. Thomas's report, the wells in the town average 23 feet in depth. While there will probably be no more typhoid fever among the present members of their families, visiting friends and relatives might at any time be infected.

Eternal vigilance is the price of health, as well as liberty, and the eradication of a poison that has obtained such a hold as the typhoid bacillus has upon Council will take time and the expenditure of some money. The population being so small and the number of cases in the past two years so many, it is to be hoped that the susceptible material has become exhausted and that there will be very little, if any, further trouble to the present residents. But it is for the stranger within their gates that I am now chiefly solicitous about. Besides giving the disease to their friends and kinsmen, they distribute it to different neighborhoods, or are liable to do so, unless the present conditions are remedied.

Yours very truly,

RICHARD H. LEWIS, M. D., Secretary.

## OPINIONS OF THE ATTORNEY-GENERAL.

#### WATER TAX OF LUMBERTON.

Lumberton, N. C., October 29, 1908.

DR. R. H. LEWIS.

Raleigh, N. C.

Dear Sir :- Your several letters addressed to the mayor and sheriff, relative to the amount of taxes due by the town on account of examination of water supplies, have been referred to me as town attorney for reply. I beg to say that I do not think the statute of 1905, as amended by the Acts of 1907, applies to the town of Lnmberton. The water snpply of the town is owned by the mnnicipal government, but it is not used for drinking purposes. The water is pumped from the river into the tank and is used exclusively for fire protection and bathing purposes. No person here thinks of drinking the town water. I do not presume that there is a person in Lumberton, either white or colored, who would think of drinking the water furnished by the town. It seems that the Acts of 1905 and 1907 contemplate the analysis only of drinking-waters. I can see no use of any examination of water which is used simply for fire and bathing purposes. It has been for this reason that the samples of this water have not been sent to your department herctofore. I will be glad if you will refer this letter to the attorney of your Board and let me know what he thinks about it. The town has no desire whatever to do anything except what is right in the premises, but at the same time you can very readily see that under the circumstances it seems to us that it is a hardship to require us to pay the amount of these taxes. Yours very truly, R. C. LAURENCE.

RALEIGH, N. C., November 2, 1908.

HON. HAYDEN CLEMENT.

Assistant Attorney-General, Raleigh, N. C.

My dear Sir:—As the legal representative of the State, I refer to you a letter just received from Mr. R. C. Laurence for an opinion as to whether the town of Lumberton should not pay the water tax imposed by chapter 884, Laws of 1907, a copy of which I enclose for your convenience.

The act says: "Each and every water company, municipal, corporate or private, selling water to the people," shall pay this tax.

There is, of conrse, something in Mr. Laurence's contention, as to the difference it makes whether people drink the water or not; but it must not be forgotten that disease may be contracted from an infected water supply that is used for bathing purposes and for the kitchen, as, for example, in washing raw vegetables.

While the main object, of conrse, of the statute was to protect the people from water-borne diseases, at the same time the tax is for the support of the Laboratory, not only for this purpose, but for other health interests.

Of course, I know nothing of the law, but it seems to me that Lumberton onght to pay the tax. It is the only town in North Carolina, large or small, having a water supply, that does not, though it did for a while in the beginning.

An early opinion will oblige,

Yours very trnly,

RICHARD H. LEWIS, M. D., Secretary.

Raleigh, N. C., December 17, 1908.

Dr. R. H. Lewis.

Secretary State Board of Health, Raleigh, N. C.

Dear Sir:—I have your favor requesting an opinion as to whether the town of Limberton should not pay the water tax imposed by chapter S84, Public Laws of 1907. The act says: "Each and every water company, municipal, corporate or private, selling water to the people," shall pay this tax.

I have carefully examined the letter of Mr. R. C. Lanrence, and admit that there is something in his contention that there is a difference where the people drink the water, but the statute does not make it a decided distinction, but imposes a tax on all persons selling water to the people; in addition to this, it must not be forgotten that disease may be contracted from an infected water supply, when used for kitchen and bath purposes, as, for example, washing raw vegetables, lettnee, and the like.

My opinion is, therefore, that while the intention of the statute is to prevent water-borne diseases, at the same time the tax is for the Laboratory, and not only for this, but for the health of the people. I think the town of Lumberton should be made to pay the tax, although it is not for drinking purposes.

Very truly yours, Hayden Clement,

Assistant Attorney-General.

#### ENFORCEMENT OF LAW AGAINST NUISANCES.

Raleigh, N. C., September 25, 1907.

HON. HAYDEN CLEMENT,

Assistant Attorney-General, Raleigh, N. C.

MY DEAR SIR:—In order to save you the trouble of looking it up, I enclose a copy of an act relating to the Board of Health, as amended by the Legislature of 1901, and would be glad to have some advice as to the proper method of carrying out section 21.

While a fee of one dollar a day for failure to abate a nuisance, after its declaration by the County Superintendent of Health, has been imposed, nothing has been said about the method of collecting the said fine. I would appreciate very much your opinion as to the proper method of procedure. Who should institute the suit, in what court, and who should bear the expense of the same?

Thanking you in advance for a reply, I am,

Yours very truly,

RICHARD H. LEWIS, M. D., Secretary.

RALEIGH, N. C., September 27, 1907.

DR. RICHARD H. LEWIS.

Secretary State Board of Health,

Raleigh, N. C.

Dear Sir:—Replying to your favor requesting a construction of section 21, chapter 214, Laws of 1893, I beg to state that the action should be brought in the name of the State, after giving twenty-four hours' written notice, and if the action is brought within fifty days after the notification of the nuisance, the same should be brought in a magistrate's court, or if it is within the municipal limits of a town or city, in either a magistrate's or a mayor's court. If, however, you delay bringing the action until after the penalties have accumulated to over fifty dollars fine, it should be brought in the Superior Court.

The penalty, of course, carries with it the cost, to be paid by the defendant to the prosecuting officer, who turns it over to the county treasurer.

Very truly yours,

Hayden Clement, Assistant Attorney-General.

# LEGISLATION BY THE GENERAL ASSEMBLY OF 1907.

AN ACT TO AMEND SECTION 3057 OF THE REVISAL OF 1905, IN RELATION TO THE STATE LABORATORY OF HYGIENE.

Section 1. That section 3057 of the Revisal of 1905 be amended by striking out in line eighteen the words "twelve hundred dollars" and inserting in lieu thereof the words "two thousand dollars annually," and by inserting after the words "sixty," in line ulueteen, the word "form."

[The effect of the above is to add two thousand dollars from the general treasury to the annual income of the laboratory, heretofore derived solely from the sixty-dollar tax on water companies. The \$1,200 stricken out was a single and not a continuing appropriation. The four dollars were added to cover expressage on samples, as some of the companies refused to pay it. The income of the laboratory now, while not large, will, we think, be sufficient to enable it to adequately fulfill its mission.]

## AN ACT TO AMEND SECTION 3052 OF THE REVISAL OF 1905, IN RELATION TO WATER SUPPLIES.

Section 1. That section 3052 of the Revisal of 1905 be amended by striking out all after the word "maintain," in line five, and inserting in lieu thereof the following: "A system for collecting and disposing of all accumulations of human excrement within their respective jurisdictions, or control, at least once each week, by burning, by burial, or by some other method approved by the State Board of Health."

[The original act to protect water supplies required the removal of human excrement from the watershed, which was impracticable and unnecessary.]

## AN ACT TO AMEND SECTION 3056 OF THE REVISAL OF 1905, IN RELATION TO WATER SUPPLIES.

Section 1. That section 3056 of the Revisal of 1905 be amended by adding at the end thereof the following: "And if at the end of ninety days more, or four months from the time of the first service of said notice of dangerous conditions and demand for their removal, the said removal has not been accomplished, the firm, individual or corporation selling water to the public shall be guilty of a misdemeanor, and shall

upon conviction thereof be fined in the sum of five hundred dollars; and a continuance of the said conditions dangerous to the public health for thirty days thereafter shall constitute a new offense and be punishable by a fine of the same amount: Provided, that the time limit above set may be extended by a committee of three members of the State Board of Health, of which committee the secretary and the engineer shall be two, to such extent as the facts and conditions in the case may in their judgment warrant."

AN ACT AUTHORIZING THE STATE BOARD OF HEALTH TO PROVIDE FOR THE PREVENTIVE TREATMENT OF HYDRO-PHOBIA.

Section 1. That the State Board of Health is hereby authorized and empowered to provide for and have conducted under its direction the preventive treatment of hydrophobia or rables, whenever in its judgment circumstances, financial and other, will justify it. To meet the expenses of this treatment the said board is hereby given authority to supplement the revenue derived from fees for the treatment by such sums from the treasury of the State Laboratory of Hygiene as may be necessary: Provided, that the usefulness and efficiency of the said laboratory is not thereby impaired.

SEC. 2. That the benefits of said treatment shall be given free of charge to all residents of the State who shall present to the Secretary of the State Board of Health, or its representative having in charge the management of this special work, an affidavit of inability to pay, duly sworn to and subscribed before a justice of the peace, or, if the case be a minor, such an affidavit by the parent or guardian. To meet as far as may be the expenses of this special work, the said State Board of Health is hereby authorized and directed to demand from those able to do so the payment in advance of a reasonable fee, not to exceed in any case the usual charge made by the reputable Pasteur institutes of this country.

## AN ACT TO ESTABLISH A SANATORIUM FOR THE TREAT-MENT OF TUBERCULOSIS.

Section 1. That there shall be appropriated the sum of fifteen thousand dollars from the general funds in the State Treasury for the establishment of a sanatorium for the treatment of persons afflicted with tuberculosis,

Sec. 2. That the control of the said sanatorium shall be vested in a board of directors composed of twelve members, to be elected by the General Assembly of North Carolina. Sec. 3. That the said board of directors shall be appointed in four lasses of three directors each: the first class to serve for a period of wo years; the second class for a period of four years; the third class or a period of six years, and the fourth class for a period of eight ears. The following members shall constitute the first board of lirectors, to wit: First class, I. E. Green, Y. T. Ormond and W. H. Whitehead, who shall serve for a period of two years from the date f their election and until their successors are elected and qualified; econd class, to be composed of John D. Dawes, W. E. Breese and Walter Murphy, who shall serve for a period of four years from the late of their election and until their successors are duly elected and malified; the third class shall be composed of N. A. McLean, M. Eugene Street and Dr. J. R. Gordon, who shall serve for a period of dx years from the date of their election and until their successors are duly elected and qualified; the fourth class shall be composed of Dr. J. E. Brooks, J. Reese Blair and L. S. Blades, who shall serve for a period of eight years from the date of their election and until their successors are duly elected and qualified. The Secretary of the North Carolina State Board of Health shall be ex officio a member of the board of directors.

Sec. 4. In case any vacancy or vacancies shall occur in either of the said classes by death or removal from the State of any member of the said board of directors as hereinbefore composed, or for any other reason, such vacancy or vacancies shall be filled by the board, the person or persons thus chosen to serve until the next succeeding session of the General Assembly of North Carolina, when a successor or successors shall be elected by the General Assembly to fill out the unexpired term of the class or classes in which said vacancy or vacancies occur.

Sec. 5. That said board of directors shall be and are hereby constituted a body politic and corporate, under the name and style of "North Carolina Sanatorium for the Treatment of Tuberculosis," and upon them, as such, are hereby couferred all the duties, powers, privileges and obligations incident to bodies corporate.

Sec. 6. That said board of directors are hereby given full power and authority to meet and organize themselves, from their own numbers to elect a chairman, to purchase sites, to erect buildings and to provide such apparatus and equipment as may be necessary to establish such a sanatorium and prepare it for the reception of patients: Provided, such expenditures do not exceed the amount appropriated by section one of this act; with power in the board to elect a superintendent, fix his compensation, and do every other act or thing reasonably necessary and incident to carrying out the provisions of this act.

Sec. 7. The board of directors shall prescribe the duties of the superintendent, who shall be a skilled physician of good character and

good business habits and otherwise qualified to discharge the duties of his office. He shall hold office for a period of two years from and after the date of his election, unless sooner removed therefrom by the board for incompetency or misconduct in office, and shall keep a record of his transactions and duly enter the same in a book or books for the purpose.

Sec. 8. That said superintendent shall employ such subordinate officers and employees of said sanatorium as may be necessary and fix their compensation, subject to the approval of the board, and said superintendent shall have the power to discharge the same for incompetency or misconduct in office, and the proceedings in regard to such shall be reported to the said board of directors.

Sec. 9. The superintendent shall make monthly reports to the chairman of the board of directors, clearly setting forth the conditions and workings of the institution, and upon the receipt of such report said chairman shall have authority to convene said board, if in his discretion it is necessary to do so. Said superintendent shall make a detailed report of the conditions and workings of the institution every three (3) months to the board of directors, and he shall also make a detailed report to the Governor and the General Assembly. The directors shall be required to hold meetings of their board every three (3) months, or oftener, if the chairman of said board shall call them together, and said board shall be required to make annual reports of the conditions and workings of the hospital herein provided for to the Governor and General Assembly.

Sec. 10. The board of directors shall at their first meeting select from their number an executive committee, composed of the chairman of said board and two of their members, who, in the absence of the board of directors, shall have the direction of the affairs of the said hospital.

Sec. 11. The board of directors shall make all such by-laws aud regulations for the government of the hospital as shall be necessary, among which shall be such as shall make the said sanatorium as nearly self-supporting as shall be consistent with the purpose of its creation.

SEC. 12. The Treasurer of the State of North Carolina shall be the treasurer of the said corporation. The said treasurer shall keep all accounts of the said sanatorium and pay out all moneys, upon a warrant of the superintendent of said sanatorium, countersigned by two members of the board of directors, under such rules and regulations as said board may establish.

Sec. 13. For the purpose of maintaining and defraying the running expenses of said sanatorium there shall be appropriated annually the sum of five thousand dollars (\$5,000) from the general funds of the State Treasury in addition to the appropriation provided for in section one of this act, which shall be deposited with the treasurer of the corporation and shall be subject to the orders of the said board.

SEC. 14. Said board of directors shall be empowered to receive or accept gifts or donations for the henefit of the said sanatorium, and said board shall, in their discretion, use the same for carrying out the purposes for which the said sanatorium is established.

Sec. 15. Each member of the board of directors shall be entitled to receive as compensation the sum of two dollars (\$2) per day while exclusively engaged in conducting the affairs of the said sanatorium, in addition to his necessary traveling expenses and hotel bills.

AN ACT PROVIDING FOR THE SEPARATION OF PRISONERS SUFFERING WITH TUBERCULOSIS FROM OTHER PRISONERS.

Section 1. That the hoard of county commissioners of the respective counties of North Carolina shall provide in the jail-house or in any camp or place where prisoners are committed for keeping or sentenced to a term of imprisonment in any county in the State of North Carolina, separate cells or rooms or a place in which shall be confined any prisoner or prisoners who may be committed for keeping or sentenced to said prison or place of confinement for a term of imprisonment, who has been examined by the county superintendent of health and pronounced by the said county superintendent of health as being affected with tuberculosis.

Sec. 2. That it shall be the duty of any sheriff of any county when a prisoner is placed in his custody for the purpose of heing committed to jail or any place of confinement mentioned in this act, who said sheriff has been informed or has any reason to believe or suspect is suffering with tuberculosis, to have any such prisoner examined by the county superintendent of health, and if said prisoner shall he pronounced by said county superintendent of health as a tuberculous prisoner, then said prisoner shall be separated from the other prisoners and confined in a separate ceil or place provided for by this act.

SEC. 3. That it shall be the duty of the Board of Directors of the State's Prison to provide separate cells or apartments in the said State's Prison in which shall he kept any prisoner or prisoners who may be sentenced to that institution for a term of imprisonment, who after being examined and pronounced by the physician in charge as being affected with tuberculosis.

SEC. 4. That the cells and places of confinement provided for in this act for prisoners affected with tuberculosis shall be kept exclusively for said tuberculous prisoners, and under no circumstances or conditions shall any other prisoner be committed or sentenced to the institutions and places of imprisonment mentioned in this act, who is well and not affected with tuberculosis, be confined in the cells or places of confinement therein provided for tuberculous prisoners: Provided fur-

ther, that when said cells or places of confinement provided for in this act, either in the county jail or camps or the State's Prison, have been used and occupied by any prisoners affected with tuberculosis, the said cells or places of confinement shall not be used for any other prisoners until the county superintendent of health or the physician in charge and health authorities of the State's Prison have been notified, and the said cells or places of confinement have been thoroughly funigated and disinfected under the supervision of the said county superintendent of health or the physician in charge and the health authorities of said State's Prison, in the manner prescribed and required by the State Board of Health.

Sec. 5. Whenever any prisoner or prisoners shall be committed to any of the prisons or places of confinement designated in this act, it shall be the duty of the sheriff of the county or the warden of the State's Prison, as the case may be, in the event any such prisoner or prisoners he known or suspected by said authorities to he suffering with tuberculosis, to have any such prisoner or prisoners examined by the county superintendent of health or the physician in charge within five days after they have been committed or sentenced to said prison.

Sec. 6. That uothing contained in this act shall be construed as to interfere with or prevent the county or State authorities from working together all prisoners on public works as now provided for by law.

Sec. 7. That any person or persons violating any of the terms or provisions of this act shall be guilty of a misdemeanor and upon conviction shall be punished in the discretion of the court.

Sec. 8. This act shall be in force from and after August first, one thousand nine hundred and seven.

In the General Assembly read three times, and ratified this the 4th day of March, A. D. 1907.

## AN ACT REQUIRING RAILROAD COMPANIES TO KEEP THEIR PASSENGER-CARS AND TOILET-ROOMS CLEAN AND DE-CENT.

Section 1. That every person or railroad company, whether incorporated or not, engaging in the regular business of carrying passengers on its railroad cars in this State, shall have the passenger-cars on their roads cleaned, hrushed and dusted and the windows washed, if needed, at least once each day, and have in each car, in which male and female passengers are carried therein, a toilet-room for each sex, and have the same kept clean.

Sec. 2. Any person or corporation engaged in the husiness described in section one of this act, who shall willfully or negligently fail or refuse to give orders to their agent or agents in charge of such ears and comply with the requirements of this act shall forfeit twenty dollars (\$20) for each day that it refuses, to be recovered by any person suing for said penalty.

SEC. 3. That the willful or negligent refusal or the failure on the part of the conductor or manager of any such passenger-car as named in section one to comply with said section one shall be received as evidence of such failure or refusal of such person or railroad company to give such orders, and, moreover, such conductor or manager shall be guilty of a misdemeanor if he fails or refuses to carry out said orders of the person or company mentioned in section one of this act.

Sec. 4. That this act shall take effect from and after the first day

of May, one thousand nine hundred and seven.

AN ACT TO AMEND SECTION 4498 OF THE REVISAL OF 1905, BY ADDING A SUBSECTION MARKED (A) THERETO FOR ENLARGING THE POWERS OF THE BOARD OF MEDICAL EXAMINERS IN GRANTING A LICENSE TO APPLICANTS TO PRACTICE MEDICINE.

Section 1. That section four thousand four hundred and ninety-eight of the Revisal of one thousand nine hundred and five be ameuded by adding a subsection marked (a) "That the Board of Medical Examiners shall in their discretion issue a license to any applicant to practice medicine and surgery in this State without examination, if said applicant exhibits a diploma or satisfactory proof of graduating from a medical college in good standing, requiring an attendance of not less than three years and a license issued to him to practice medicine and surgery by the Board of Medical Examiners of another State."

[The saving feature in the above is that it is left to the discretion of the Board of Examiners as to what States they shall reciprocate with. We can trust them to see to it that our standard is not lowered.]

## SMALLPOX.

In the biennial period covered by this report the number of cases of smallpox reported was: White, 1,788; colored, 2,191; total, 3,979. The number of deaths: White, 8; colored, 6; total, 14.

In the preceding two years the number of cases was: White, 6,441; colored, 6,985; total, 13,426; and the number of deaths: White, 14; colored, 29; total, 43.

From the above figures it appears that the disease is becoming decidedly less prevalent, the number of cases being less than one-third that of the two years before, and the number of deaths also a trifle less than one-third that of the same period.

## COMPULSORY VACCINATION—DECISION OF THE SUPREME COURT.

Without the power to order and enforce compulsory vaccination it would be impossible to secure the vaccination of all the people—the only really effective preventive of smallpox. We are very glad, therefore, to chronicle another decision by our Supreme Court sustaining the right of the proper authorities to initiate and carry out such regulations. A decision of similar effect was State v. Hay, from Alamance, in 1900. We take much pleasure in giving below the able opinion of Justice Hoke. We are specially glad that Superintendent of Health Stewart was sustained, for he showed an earnest devotion to duty that deserves the highest praise:

#### MORGAN V. STEWART.

(Supreme Court of North Carolina, April 24, 1907.)

 $\begin{tabular}{lll} {\it Malicious Prosecution-Want of Probable Cause-Criminal \\ {\it Prosecution.} \end{tabular}$ 

Revisal 1905, sec. 4451, provides that on the appearance of smallpox in a neighborhood, the sanitary committee of any county can make such regulations for the vaccination of its inhabitants and impose such penalties as they may deem necessary to protect the public health. Section 3455 provides that if any person shall violate any of the regulations of the sanitary authorities of any county as to vaccination he shall be guilty of a misdemeanor. Smallpox having become prevalent in a county, and an epidemic being threatened, the sanitary committee passed a resolution that any person within a radins of three miles of any schoolhouse who willfully refused to be vaccinated or to allow any one in his charge to be vaccinated should be guilty of a misdemeauor, and the county superintendent of health was directed to enforce compulsory vaccination as uccessary. Smallpox having developed within three miles of the plaintiff's schoolhouse, the county superintendent requested that he be allowed to vaccinate plaintiff and his scholars, which request was refused, and the county superintendent instituted a prosecution against plaintiff which resulted in his acquittal: Held, in an action for malicious prosecution by plaintiff against the county superintendent, that there was probable cause for the prosecution of plaintiff by the county superintendent.

Appeal from Superior Court, Anson County. Justice, Judge.

Action by C. H. Morgan against Heury D. Stewart. From a judgment for plaintiff, defendant appeals. Reversed.

There was evidence to the effect that in February, 1906, the present defendant, who was at that time superintendent of health for Union County, had caused the arrest and trial before two justices of the peace of said county of the present plaintiff, who was then teaching a public school in Union, on a charge of wrongfully refusing to be vaccinated and to permit the vaccination of the pupils of his school, pursuant to regulations of the sanitary committee of that county. That on trial, had on March 10, 1906, the present plaintiff was acquitted, and thereupon instituted the action against defendant for malicions prosecution. At the close of the plaintiff's testimony, aud again at the close of the entire testimony, there was motion on the part of the defendant to dismiss the action as ou judgment of nonsuit, in that there was no testimony to sustain or justify a finding for the plaintiff on the issue as to want of probable cause for the prosecution complained of. The motion was denied, and defendant excepted. Verdict and judgment for plaintiff, and defendant excepted and appealed.

R. B. Redwine for appellant.

Hoke, J. It is accepted doctrine with us that on facts admitted and established the question of probable cause is one of law for the Court. Jones v. Railroad, 125 N. C., 229, 34 S. E., 398; Bradley v. Morris, 44 N. C., 395; Swain v. Stafford, 26 N. C., 392. And it is further held that the acquittal by a court which has jurisdiction to try and determine the question does not make out a prima facie

case of want of probable cause. *Bell v. Pearcy*, 33 N. C., 233. Applying these principles, a careful examination of the record leads us to the conclusion that in no aspect of the testimony has the plaintiff made out his allegation of a want of probable cause for the prosecution, and there was error in refusing the defendant's motion to nonsuit.

There is no substantial divergence in the testimony presented, and it tends to show that for eighteen months prior to the occurrence smallpox had been prevalent in Union County, there having been as many as 572 cases in the year previous and 200 cases already developed in the current year; that one case existed one-half mile from the schoolhouse in question and several others at a distance not much greater, and that at Waxhaw, within three miles, there were quite a number of cases. In the presence of these conditions, the sanitary committee of Union Connty met at Monroe, N. C., and, having been called to order by the chairman, passed a resolution looking to compulsory vaccination, as follows: "Any person or persons within a radius of three miles of any schoolhouse who willfully refuses to be vaccinated or to allow any one in his charge to be vaccinated shall be guilty of a misdemeanor." The committee, having fixed a fee for vaccination, allowed the superintendent of health to call in any doctor of the county to help him; and it was further ordered that the county superintendent of health proceed to enforce compulsory vaccination to such an extent as he might consider necessary. The substance of these proceedings was duly published in the county paper, and the plaintiff testified that he had been made aware of some such proceedings, but was not informed of their precise nature. The defendant, who was then superintendent of health in Union County, having heard that there were several cases of smallpox near the plaintiff's school, one within a half mile, and in sight, calls at the schoolhouse, explains the conditions and the law, as he understands it, and requests that he be allowed to vaccinate the plaintiff and his scholars, and the request is refused. The plaintiff and defendant differ somewhat as to the precise terms; but, taking either version to be trne, there was a refusal both as to the plaintiff and the scholars, or certainly as to some of them. Having referred the matter to the Secretary of the State Medical Board at Raleigh, and having been advised that the teacher was indictable and should be proceeded against, and, furthermore, having been shown a letter from the Attorney-General of the State to the Superintendent of Public Instruction, in which the Attorney-General advised that regulations similar to those of Union County could be lawfully enforced, the superintendent instituted the prosecution complained of and on which the present plaintiff was tried and acquitted.

Our statute law provides, in substance (Rev. 1905, sec. 4451), that on the appearance of smallpox in a neighborhood the authorities of any city or town or the sanitary committee of any county may make such regulations and provisions for the vaccination of its inhabitants, and impose such fines, as they may deem necessary to protect the public health. And section 3455 provides that "if any person shall violate any of the rules and regulations of the sanitary authorities of any county in regard to vaccination he shall be guilty of a misdemeanor, and fined, not exceeding fifty dollars, or imprisoned, not exceeding thirty days." We find no precise form in which the resolutions of the county sanitary board should be couched, nor any specified or stated order of proceedings where such matters are to be considered or determined, and we see no reason why the order of the sanitary committee should not be upheld as a valid exercise of the authority conferred upon them by the statute. They could not declare the prohibited act a misdemeanor, because its status had already been so fixed by public law, but their resolution could still be received and construed as a regulation requiring parties within the prescribed territory to submit to vaccination; and the statute makes the refusal a misdemeanor within the jurisdiction of the justice of tbe peace. Legislation of this character has been upheld by wellconsidered decisions in this and other jurisdictious. Hutchins v. Durham, 137 N. C., 68, 49 S. E., 46; State v. Hay, 126 N. C., 999. 35 S. E., 459, 49 L. R. A., 588, 78 Am. St. Rep., 691; Morris v. Columbus, 102 Ga., 792, 30 S. E., 850, 42 L. R. A., 175, 66 Am. St. Rep., 243. And it is also well established that the Legislature can confer on local boards, certainly those clothed with governmental functions, the power to make reasonable regulations to protect the public health and to fix and establish facts or conditions on which a statute makes its own action depend. State v. Railroad, 141 N. C., 852, 54 S. E., 294, 8 Cyc., 830; Freund on Police Power, sec. 34. And while the local regulations are required to be reasonable, and are, to some extent, subject to judicial control, both as to the existence of an apprehended danger and the reasonableness of the relief (Freund on Police Powers, supra), we have held that "where a statute of this kind has been passed and the conditions established which call it into operation, it thus becomes a law binding on each and all alike, and it is optional to no one's private judgment whether to render compliance or not. If there are exceptional cases, where, owing to the peculiar state of the health or system, vaccination would be dangerous, that would be a matter of defense the burden of which would be on the defendant." State v. Hay, supra. In holding that there was probable cause for prosecuting the plaintiff, we intend to make no comment, certainly no adverse comment, either on the justices who tried and acquitted the plaintiff or on the plaintiff himself. Both, no doubt, acted according to their best judgment and sense of duty, and there is much to be said in justification of the plaintiff's conduct. But the plaintiff's conduct here is not the important or controlling question. We are considering chiefly the conduct of the defendant and how the matter reasonably appeared to him. He was at that time superintendent of health of Union County, whose sworn duty it was to see that laws addressed to the subject involved were enforced, and to carry out, as far as possible, the work as directed by the sanitary committee of his county and by the State Board of Health. Revisal 1905, sec. 4451. He notes that the county is threatened with an epidemic of smallpox, and the sanitary board has passed a resolution requesting each and every one within a radius of three miles of any case of smallpox to be vaccinated, and on the statute books is a law which makes it a misdemeanor to refuse to comply with this regulation; that this school is within such a radius and is in great danger of exposure, and under such conditions he applies to the plaintiff for permission to vaccinate both plaintiff and his scholars, and the application is refused.

There is also evidence tending to show that there was a disposition in many localities to obstruct the enforcement of these regulations, and, nuder such circumstances, the defendant consults with the Secretary of the State Board of Health as to the proper course to be pursued. That officer, who deservedly holds the confidence of every well-informed and patriotic citizen of the State by reason of his faithful and intelligent devotion to his duties and to the State's best interest, advises, upon all the facts, that the law has been broken, and that the public good requires that the prosecution should be instituted. The defendant then swears ont the warrant and causes the plaintiff to be put on trial. Probable cause, in cases of this kind, has been properly defined as the existence of such facts and circumstances, known to him at the time, as would induce a reasonable man to commence a prosecution. Cabiness v. Martin, 14 N. C., 454; Bell v. Pearcy, supra.

It seems clear to ns that in no aspect of the testimony, as the same is presented in this record, has there been a want of probable cause shown, and the Conrt below should have decided the case as on judgment of nonsuit.

Reversed.

## VITAL STATISTICS.

For lack of a general law compelling the collection of vital statistics by a proper and uniform method, our mortuary statistics—limited as they are to a comparatively few cities and towns—are not in every instance as accurate as they should be. Comparing them with those of previous years, the various causes of death are quite uniform; so that if there are errors they seem to be more or less constant.

We append the tables.

TABLE I—SHOWING THE COMPARATIVE PREVALENCE OF CERTAIN DIS-EASES IN THE THREE PHYSICAL DIVISIONS OF THE STATE DURING 1907 and 1908.

Eastern Division (E)—Alluvial Plain. Central Division (C)—Hilly. Western Division (W)—Mountainous. The figures under the various diseases represent in percentage the proportion of the counties reporting the presence of the disease in question to the whole number of counties sending reports for the month.

### APPENDIX.

[EXTRACTS FROM THE MONTHLY BULLETIN.]

#### THE DEATH OF DR. MURPHY.

In the passing away of Dr. P. L. Murphy, Snperintendent of the State Hospital for the Insane at Morganton, on September 11th, the State lost one of its foremost men and most useful citizens. the magnificent institution over which he presided from its beginning, twenty-four years ago, continuously enlarged and perfected under his inspiration and direction, he has left a monument worthy of his ability and single-hearted devotion to its interests. He was endowed with a vigorous intellect, characterized by the genius of common sense and the special gift of rare executive power. many years we, as one of a committee from the Board of Health, have made the official inspections under the law, and it rarely ever happened that we found anything to criticise, and when we did it was almost invariably called to our attention by him, whose watchful eye nothing escaped, with the request that we aid him in securing its correction by the Board of Directors or by the Legislature. We never visited the Hospital that we were not filled with admiration, not only of the magnificent buildings and beautiful grounds, but chiefly of its administration-so extensive, so complex, and yet running so smoothly and noiselessly under the master hand that controlled it. Moreover and above all, he had a heart of gold, and his interest in and devotion to his afflicted wards were tonching. And they repaid it with a respect and affection seldom seen.

We give below a rarely discriminating, just and beautiful tribute from the pen of the distinguished editor of the *Charlotte Observer*, for many years a member and president of the Board of Directors of the Hospital;

#### PATRICK LIVINGSTON MURPHY.

The State is prepared, so far as there can ever be preparation for tidings of the death of one so widely known, so beloved and so useful to his generation, for the announcement of the passing of Dr. P. L. Murpby, late Superintendent of the State Hospital at Morganton. For more than a year an inexorable enemy had been sapping his vitality, and yesterday completed its fatal work. The time and circumstances are not auspicious to the writing of those things which should be now written, and yet no time would suffice for putting on record a fit memorial of this man. It is best writ in the magnificent institution over which he presided from the day of its opening until his incapacity, and in the hearts of the thousands of North Carolinians who,

146 APPENDIX,

in themselves or through family or friends, were beneficiaries of his skill. It is not too much to say that he was the foremost alienist of the South, or that the State Hospital at Morganton is at the head of institutions of its class in the section. It was his very life. From a red and barren hill he had seen the place transformed into one of surpassing beauty, and had witnessed the growth of the institution from a modest beginning into one which now shelters and cares for more than eleven hundred patients. A multitude has entered its doors with minds diseased and emerged with reason restored and themselves restored to their families and to their usefulness to society.

Of his skill in his specialty all North Carolina knows, and his executive ability, his tact in management, are scarcely less known. A Scotchman of Scotchmen, he was endowed with all the strength of mind and body, all the conviction and pertinacity of purpose, of the peculiarly strong and forceful race. The antipodal elements of rugged power and of tenderness which, when we see united, make a product which we remark upon and wonder at, were perfectly blended in him, forming a character which compelled both admiration and affection. To him all men and women were as one. There were none too humble to enlist his sympathy or challenge his best skill, and to the lowliest people of the State the news of his death will carry as keen a pang as will be felt in the hearts of the highest. It is his glory that in his exalted professional life he knew no distinction between classes.

To undertake to recite Dr. Mnrphy's qualifications for his life-work, how fully he met and surpassed every expectation, how grandly he lived up to his great opportunities and fulfilled his mission to humanity, would be only to repeat to North Carolina what is familiar history; and it is not certain that one who so much loved him as a friend and sorrows so greatly on account of his death could write in moderation of him at his open grave. To thousands this event is a personal bereavement—greatest to those who knew the subject best. There was never a man more lovable in his close personal relations. The public admired him for his ability, and all have gratitude toward him for what he has done for North Carolina. His familiars loved him for his golden heart, which was ever ready to melt in sympathy or at the call for charity; for the loyalty of his friendship, for his high honor and his unswerving fidelity to any cause which he espoused.

Engaging in every way, Dr. Murphy added varied scholarship to his qualities of charm. There was no conversation to which he could not contribute; there was no company in which he did not shine. The pale messenger, in beckoning him, has called one of the front rank of North Carolinians.

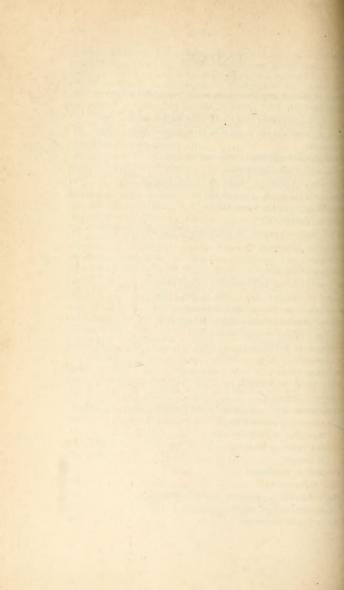

On the sloping, velvet-like lawn on which his eye has so often dwelt with delight, in the shadow of the great buildings which are his best monument, they will lay him away to-day to await the call for the accounting, to which he will answer, unafraid, for the deeds done in the body.

APPENDIX. 147

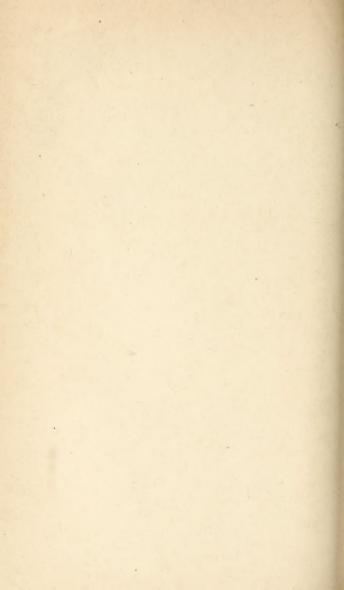

### THARLES WARDELL STILES-BENEFACTOR OF THE SOUTH.

"The blood is the life." It is an elementary truth that the very essence of lusty and vigorons life is an abundant supply of pure and rich blood. It is the power that runs the vital machinery, and when deficient in quality and quantity the machine slows down and its functions are imperfectly performed. In its weakened state obstacles that to a machine running under a full bead of steam would scarcely make an impression, stop it altogether. Those peculiar principles which constitute the basis of immunity or protection against disease, whatsoever they may be, all are agreed, exist in the blood. When deficient, diseases of various kinds gain a footbold in the body and in too many cases overcome it. Every one knows that the best preventive of disease is vigorous health, the bed-rock foundation of which is the blood. Anæmia, which does not meau infected or contaminated blood, but simply insufficiency in quantity and inferiority in quality, is, therefore, responsible for many of our most serious ills. Sapping the vitality it dulls the mind, weakens the spirit or energy, largely destroys the incentive to action and thereby prevents the proper and full performance of the manual labor necessary to the provision of a comfortable and sufficient support, and by this lack exaggerates the original cause. Moreover, if occurring in childhood, it prevents the normal growth and development, and by dimiuishing the vital resistance shortens the natural length of life, renders its subjects more susceptible to and more easily overcome by the many diseases to which man is liable, and thus increases the death rate. But it is unnecessary to say more about the evils and dangers of anemia; they are already known to every jutelligent and wellinformed man, whether physician or laymau,

That anaemia, more or less pronounced, is widely prevalent among the "poor whites" of the South no observant man who has come in frequent contact with that element of our population can successfully deny. Prior to the discovery in 1902, by Stiles, of a species of hookworm, indigenous to the warmer sections of the United States, as well as to other subtropical or tropical regions of America, his working out of its life history, in which he showed it to be a blood-sucking parasite, and his demonstration of its widespread distribution, we attributed the anemia to other causes. In the sandy coastal plain, where malaria is abundant, we ascribed it to that poison, while in the hill country and in the mountains, we charged it up to fried meat and soda biscuit. Malaria and a bad dietary, no doubt, play an important part in causing anaemia, but in the light thrown upon the subject by Stiles there is no doubt in our mind that the hookworm is at the bottom of a large majority of cases. It should

## THE NORTH CAROLINA HISTORICAL COMMISSION

J. BRYAN GRIMES, CHAIRMAN.

W. J. PEELE, THOMAS W. BLOUNT, D. H. HILL, M. C. S. NOBLE.

R. D. W. CONNOR, SECRETARY, RALEIGH.

# REPORT OF THE NORTH CAROLINA HISTORICAL COMMISSION.

To His Excellency, GOVERNOR ROBERT B. GLENN:

For the information of your Excellency and of the General Assembly, we beg to submit a brief report of the creation, organization and work of the North Carolina Historical Commission during the past two years.

#### CREATION AND ORGANIZATION.

The North Carolina Historical Commission was created by act of the General Assembly of 1903 (chapter 767 of the Public Laws of 1903). Under the provisions of this act the Governor was to appoint a commission of five, who were to serve for a term of two years, without salary, per diem or mileage. The act declared it to be their duty "to have collected from the files of old newspapers, from conrt records, church records and elsewhere" valuable documents pertaining to the history of North Carolina, "to have such documents edited and published by the State Printer as other public printing, and distributed by the State Librarian under the direction of the commission." The commission was anthorized "to expend a sum not exceeding \$500 annually in the collection and transcription of documents." Under this act Governor Aycock appointed W. J. Peele, of Raleigh; J. D. Hufham, of Henderson; F. A. Sondley, of Asheville; Richard Dillard, of Edenton, and R. D. W. Connor, of Wilmington. The fact that the members of the commission lived in widely separated parts of the State, and the fact that the law expressly forbade the payment of their expenses, made it difficult for them to attend properly to their duties. Efficient work was, accordingly, impossible, and your Excellency, realizing this fact, thought it wise, in 1905, to appoint on the commission persons residing nearer to each other. Accordingly, the following were appointed: W. J. Peelc, of Raleigh; J. Bryan Grimes, of Raleigh; Thomas W. Blount, of Roper; Charles L. Raper, of Chapel Hill, and R. D. W. Connor, of Raleigh. More and better work was accomplished than before. It soon became evident, however, that if the commission was to do the work expected of it, a different and more effective organization was necessary. In 1907, therefore, the General Assembly amended the act of 1903, enlarged the powers and increased the duties of the commission. (Chapter 714 of the Public Laws of 1907.) By the provisions of this act the members of the commission are appointed for terms of two, four and six years, their successors to serve for six years. They receive no salary or per diem, but are "allowed their actual expenses when attending to their official duties." The appropriation was increased to \$5,000 annually, and the commission was authorized to employ a

secretary and to equip offices for the filing and preservation of historical documents. Under the provisions of this act your Excellency appointed the following persons, who compose the commission as now constituted: J. Bryan Grimes, of Raleigh; W. J. Peele, of Raleigh; Thomas W. Blount, of Roper; M. C. S. Noble, of Chapel Hill, and D. H. Hill, of Raleigh. The commission, thus constituted, met in the office of the Secretary of State, at Raleigh, May 20, 1907, and organized by the election of J. Bryan Grimes, chairman, and R. D. W. Connor, secretary. Offices in the State Capitol were assigned to the commission, and the secretary was instructed to secure the necessary equipment. The commission, thus constituted and thus cquipped, has been at work but little more than one year, but we believe that the following report will justify the creation of this agency for the preservation of the history of our State.

#### POWERS AND DUTIES.

The duties of the commission are as follows:

- (1) To have collected from the files of old newspapers, court records, church records, private collections and elsewhere, historical data pertaining to the history of North Carolina and the territory jucluded therein from the earliest times.
- (2) To have such material properly edited, published by the State Printer as other State printing, and distributed under the direction of the commission.
- (3) To care for the proper marking and preservation of hattlefields, houses and other places celebrated in the history of the State.
- (4) To diffuse knowledge in reference to the history and resources of North Carolina.
- (5) To encourage the study of the history of North Carolina in the schools of the State, and to stimulate and encourage historical investigation and research among the people of the State.
- (6) To make a biennial report of its receipts and disbursements, its work and needs to the Governor, to be by him transmitted to the General Assembly.

The powers of the commission are as follows:

- (1) To adopt a scal for use in official business,
- (2) To adopt rules for its own government not inconsistent with the provisions of the law.
- (3) To fix a reasonable price for its publications and to devote the revenue arising from such sales to extending the work of the commission.
  - (4) To employ a secretary.
- (5) To control the expenditure of such funds as may be appropriated for its maintenance.

How these duties have been executed and these powers used it is the purpose of this report to show.

# COLLECTION AND PRESERVATION OF HISTORICAL SOURCES.

#### PUBLIC ARCHIVES.

The first and most important duty imposed on the commission is "to have collected from the files of old newspapers, court records, church records, private collections and elsewhere, historical data pertaining to the history of North Carolina and the territory included therein from the earliest times."

The most important, as it is the largest, collection of such documents in existence is to be found in the public archives of the State, in the Capitol and elsewhere in Raleigh. Few people realize the richness of these archives in historical material. This material dates from the close of the seventeenth century to the present day, covers more than two hundred years of our history and includes an immense collection of documents and manuscripts absolutely essential to the elucidation of the history of the State and of great importance in the elucidation of the history of the nation. The manner, however, in which they have been kept is anything but creditable to our intelligence and patriotism. Thousands of manuscripts, records and other documents are stuffed away in dark pigeonholes, in boxes and corners, without order or system, are tossed about from place to place with an utter indifference to their value, or are thrown helter-skelter here and there, in leaky attics in various parts of the city.

The creation of the North Carolina Historical Commission will put an end, partially, to this condition. The first care of the commission has been to collect these records and documents, to file them systematically and to preserve them from destruction. Much time has been devoted to this work during the past year, and, though it does not show for much in a report, it has required no little attention, labor and thought, and is by far the most important work yet done by the commission. We cannot say that we have made more than a beginning, for the task is large; it requires time and patience, and even years must elapse before it is completed. We say that the creation of the commission will put an end, partially, to the condition above described. The room at the disposal of the commission is much too small for the work to be done. Like all the other departments of the State Government, the commission needs room for its expanding activities, and until this room is provided in some way the work of the commission will be much too restricted for the field to be covered.

For the present the commission has equipped a room on the third floor of the east wing of the Capitol. Steel roller shelves for large bound volumes and steel filing cases for loose manuscripts have been placed there. The bound volumes fill 669 roller shelves, and there are many others for which there is no room. They include all journals of hoth houses of the General Assembly since 1777 and some prior to that date, the journals of conventions, the journals of the Board of Internal Improvements, the journals of the Conneil of State, the letter books of the Governors, the records of our troops in the War Between the States, the reports of the Land Frands Commission, numerous volumes of wills and numerous volumes of miscellaneous documents. The loose manuscripts include the correspondence of the Executive Department from the administration of Governor Caswell, in 1777, and numerous files of miscellaneous mannscripts which it would be too tedious to enumerate here.

# NEWSPAPER FILES.

The commission has also made some valuable collections from other sources than the public archives. Newspaper files of the Colonial and Revolutionary periods in libraries in Charleston (S. C.), Wilmington, Richmond and Boston have been searched for North Carolina data. These files include The Boston Evening Post, 1769-1770; The Virginia Gazette, 1776; The South Carolina Gazette, 1732-1775; The South Carolina Gazette and Country Journal, 1765-1775, and The South Carolina and American General Gazette, 1766-1775. In the absence of North Carolina newspapers of the Colonial period, these papers throw interesting light on our history.

# THE "HAYES" COLLECTION.

At Edenton, through the courtesy of Mr. John G. Wood, the commission has been permitted to have eopied valuable letters and documents in the Samuel Johnston collection in the library at "Hayes," formerly the residence of Governor Samuel Johnston, now owned by Mr. Wood. This collection includes letters of Hooper, Hewes, Johnston, Iredell and other leaders of the Revolution in North Carolina, which have never been published.

#### THE DARTMOUTH COLLECTION.

Through the agency of the well-known firm of B. F. Stevens and Brown, of London, the commission has secured permission from the present Lord Dartmouth to have copied such of the private papers of Lord Dartmouth, Secretary of State for the Colonies, in 1772, as relate to North Carolina. Through this means a few interesting documents throwing light on our Colonial history have been secured.

# THE SWAIN COLLECTION.

The North Carolina Historical Society at the University of North Carolina has placed at the disposal of the commission, for copying, the large and valuable collection made by Governor David L. Swain and preserved in the archives of the society.

#### PRIVATE COLLECTIONS.

Three private collections of no little interest and value have been secured and placed among the collections of the commission. These are the letters and papers of John H. Bryan, member of Congress from North Carolina, 1825 to 1829; the letters and papers of Calvin H. Wiley, first superintendent of common schools in North Carolina, 1852 to 1865, and the correspondence of Jonathan Worth, State Treasurer of North Carolina, 1863 to 1865, and Governor of North Carolina, 1865 to 1868.

#### COPIES OF PUBLIC DOCUMENTS.

The journals of the Board of Internal Improvements and the letter books of the following governors have been copied, preparatory to publication:

Richard Dobhs Speight	1792-1795
Samuel Ashe	1795-1798
William R. Davie	1798-1799
Benjamin Williams	1807-1808
James Turner	1802-1805
Nathaniel Alexander	1805-1807
David Stone	1808-1810
William Hawkins	1811-1814
William Miller	1814-1817
William A. Graham	1845-1849

# PUBLICATIONS.

The law requires the commission "to have such material properly edited, published by the State Printer as other State printing, and distributed under the direction of the commission." Before this work can be done intelligently, the work above outlined must be done. The policy of the commission, therefore, is to collect, to file and to preserve before printing. Nevertheless, some printing has been done.

#### THE BEGINNINGS OF ENGLISH-AMERICA.

Section 2 of chapter 714 of the Public Laws of 1907 especially charges the commission "with the duty of co-operating with the commission appointed by the Governor to make an exhibit at the Jamestown Exposition in making at said exposition an historical exhibit illustrating the history of North Carolina from the earliest times." In accordance with this provision, the commission instructed the secretary to prepare a pamphlet giving an account of the first English settlements in America, at Roanoke Island, North Carolina, which should be a part of the State's exhibit. A pamphlet was accordingly prepared, entitled "The Beginnings of English-America: Sir Walter Raleigh's Settlements on Roanoke Island, 1584-1587," 39 pages, illustrated with cuts of the DeBry engravings of John White's paintings of Indian life.

#### BULLETIN No. 1.

Bulletin No. 1 of the publications of the North Carolina Historical Commission is "The North Carolina Historical Commission: Creation and Organization, Duties and Powers, Plans and Purposes." It is a pamphlet of 18 pages, explanatory of the work and the plans of the commission.

#### BULLETIN No. 2.

Bulletin No. 2 of the publications of the North Carolina Historical Commission is "The North Carolina Historical Exhibit at the Jamestown Exposition," a history and description of this exhibit, prepared by one of the custodians, Miss Mary Hilliard Hinton.

# LITERARY AND HISTORICAL ACTIVITIES IN NORTH CAROLINA, 1900-1905.

The publications of the North Carolina Historical Commission, Vol. I, is entitled "Literary and Historical Activities in North Carolina, 1900-1905." It is a volume of 623 pages, including some of the most notable addresses and papers produced in the State within the period specified, together with reviews of the literary and historical activities during that period. Of especial interest and value is the report of the committee appointed by the State Literary and Historical Association to reply to the statements of Judge George L. Christian, of Virginia, questioning the claim of North Carolina as to her record in the War Between the States. The volume was compiled and edited by W. J. Peele, assisted by E. P. Moses and Clarence H. Poe. Though issued within the past year, it was projected at the first meeting of the commission, November 20, 1903, before the reorganization under the present plan, and should have been issued three years ago. Properly, it does not form part of the work of the commission for the period covered by this report.

# PRESERVATION OF HISTORICAL LOCALITIES.

The third duty with which the commission is charged is "to care for the proper marking and preservation of battlefields, houses and other places celebrated in the history of North Carolina." The commission believes quite as much in the brush and chisel as in the pen as implements of history writing.

#### PAINTINGS OF BOANOKE ISLAND.

In fulfilling the duty imposed by this clause the commission has enabled Mr. Jacques Bushee, one of our native artists of well-earned reputation, to spend some months on the banks of eastern North Carolina studying the scenes of the first English Colony in America. His studies have resulted in a series of paintings showing these historic spots as they appear to-day. These paintings formed part of the North Carolina history exhibit at the Jamestown Expositiou, and are now on exhibition in the Hall of History. The commission ex-

pects that this preliminary work will result ultimately in a painting of the landing of the first English settlers in America, of the first Christian baptism by Englishmen within the present boundaries of the United States, or of some other scene connected with that important episode in American history.

#### BUST OF WILLIAM A. GRAHAM.

In the rotunda of the State Capitol are eight niches, designed to hold the busts of eight of the eminent sons of the State whose services entitle them to such recognition. These niches were completed nearly three-quarters of a century ago, yet they are as empty to-day as they were on the day they were finished. The North Carolina Historical Commission believes that the State has produced eminent sons whose services in peace and in war entitle them to be thus honored, and the commission, therefore, will make it an especial object to fill these niches with handsome busts of distinguished North Carolinians, A contract has accordingly been placed with Frederick W. Ruckstuhl, a distinguished sculptor of New York City, for a marble bust of William A. Graham, eminent as legislator, Governor, Secretary of the Navy, Senator, statesman and patriot. The artist has completed his model and is now in Paris, where the bast is to be carved. After being exhibited in the Paris Salon in the spring of 1909, it will be delivered to the Historical Commission in October and will be set up in the State Capitol with suitable ceremonies.

#### TO DIFFUSE INFORMATION ABOUT NORTH CAROLINA.

It is made the duty of the commission to "diffuse knowledge in reference to the history and resources of North Carolina." It would prove too tedious to undertake to give in detail an account of how the commission has performed this duty. We beg to say only that the creation of such an agency has been welcomed throughout the United States by students of our history and resources. Many requests for such information have come from all parts of the country, which the commission has answered as fully, completely and accurately as possible. This phase of the work will, of course, grow in quantity and importance with time.

# TO ENCOURAGE THE STUDY OF NORTH CAROLINA HISTORY.

The commission is "to encourage the study of North Carolina history in the schools of the State and to stimulate and encourage historical investigation and research among the people of the State."

## HISTORY IN THE PUBLIC SCHOOLS.

The school law requires that the history of North Carolina shall be taught in the public schools of the State. The recent publication and adoption of a suitable text-book makes this possible. The more advanced pupils, however, and especially those in the high schools, should be led to extend their studies beyond the covers of the text10

books. The commission expects to co-operate with the teachers of the State in this work by furnishing such material as may be necessary for it to be done intelligently. Leaflets giving contemporary accounts of great events, the reprints of important historical documents, such as may be used in the class rooms, will be issued from time to time and distributed to those teachers who apply for them.

A copy of the "Beginnings of English-America" and a copy of "The Literary and Historical Activities in North Carolina, 1900-1905," have been placed in every rural library in the State. These libraries now number about 2,000.

# NORTH CAROLINA DAY.

The secretary of the commission, at the request of the State Superintendent of Public Instruction, prepared the "Program of Exercises for North Carolina Day," which the schools of the State will celebrate December 18. The program is devoted to a study of the German settlements in North Carolina.

#### HISTORICAL AND PATRIOTIC SOCIETIES.

In discharging the duty imposed npon the commission to stimulate and encourage historical investigation and research among the people of the State, the commission has endeavored to secure reports from the various historical and patriotic societies of the State of their activities during the past year. All of these societies did not respond, but many of them did, and their reports are here summarized, because they show that a fine spirit pervades our people, that they are becoming alive to their duty toward the past, and that they are really accomplishing much to preserve and popularize our history.

#### COLONIAL DAMES.

The North Carolina Society of the Colonial Dames of America during the past year has made an extensive investigation to locate places of historic interest in North Carolina which are unmarked in any way, and therefore are slowly but surely passing into oblivion. The result of the society's investigation has been embodied in a report by the president to the national council of the society. Although this report is confined to the Colonial period of our history, and makes no claim to being complete, it shows that there are seventy-eight spots, famed for historic events of the Colonial period, which are not marked in any way. They are thus subdivided: nine localities famed for incidents connected with the earliest explorations and settlements in North Carolina; ten sites of Colonial forts; three Colonial battlegrounds; ten sites of Colonial schools and churches; four localities famed for incidents connected with the Regulators; twenty-five sites of famous Colonial houses, and seventeen burial places of eminent Colonial characters. The Colonial Dames call attention to these unmarked spots in order that they may be preserved from neglect and oblivion.

# SONS OF THE REVOLUTION.

The Sons of the Revolution have entered upon an important phase of historical activities in the collection of portraits of historic persons. Already the society has presented to the Supreme Court Library oil portraits of James Iredell and Alfred Moore, Associate Justices of the Supreme Court of the United States, and to the executive office a portrait of Samuel Johnston, three times elected Governor of North Carolina and our first Senator in the Senate of the United States. During the past year the society secured a portrait of Alexander Martiu, distinguished as a soldier of the Revolution and five times elected Governor of the State. This portrait was presented to the executive office on November 16th.

# DAUGHTERS OF THE REVOLUTION.

The Daughters of the Revolutiou have placed a case in the Hall of History, in which they are placing relies of the Revolutiouary period. They have endeavored to stimulate interest in the history of North Carolina in the schools of the State by offering medals in certain schools for the best essays dealing with phases of our history. The most notable service rendered by the society is the continued publication of The North Carolina Booklet. This is the only periodical in North Carolina devoted exclusively to the history of the State and it is gratifying to know that it has met with success, not only as affording a medium for the development of historical talent in the State, but also finaucially. Euongh has been realized from the publication to enable the Daughters of the Revolution to carry into execution the purpose for which The Booklet was established; that is, the erection of a memorial to the women of the Edenton Tea Party. This memorial was unveiled with suitable ceremonials in the State Capitol on the 24th of October.

# GUILFORD BATTLEGROUND COMPANY.

The work of the Guilford Battleground Company in converting that historic battleground from an old field into a beautiful historic park is too well known to need comment. From the president, whose unselfish labors deserve the applause of every patriotic Americau, from New England to the Gulf of Mexico, comes the following report of the past year's work:

"Our annual celebration of July 4th was held, as usual, most successfully, but the speeches delivered by Bishop Rondthaler and others have not yet been published in pamphlet form because of failure to receive copies of the same. I regret this much. An unusual amount of plowing, some seeding to grass and manuring, as the patriotic and liberal have enabled us to do, and the general necessary care of the ground have been made. Our purpose is to spend all the money possible in permanent improvements on the grounds, especially in the erection of memorials to Revolutionary characters. We have secured octagon granite blocks sufficient to complete a monument begun to the cavalry arm of the service about thirty feet in helght. As the preservation of our Revolutionary hattlefields and perhaps other historic spots have proven not only "means," but also sources whence interest in our beloved State's history has gone out, it was deemed appropriate that a neat memorial to Clio, the Muse of History, as she sits and repeats to the populace, should head the North Carolina row at the hattleground. This memorial is as durable as the hills and, as competent judges think, and I certainly think, an honor to the State and very beautiful.

"This report is written with my own hand, as I have no stenographer and never had one and am unable, or at least unwilling, to employ one, as I think the money can be applied more profitably from our limited means. God bless the North Carolina Historical Commission and all other like associations and individuals historically disposed."

This report was signed by Joseph M. Morehead.

#### HISTORY EXHIBIT AT THE JAMESTOWN EXPOSITION.

Three patriotic organizations to whose joint efforts the State owes the history exhibit made at the Jamestown Exposition are the Daughters of the Revolution, the Daughters of the American Revolution and the Wachovia Historical Society. It would be impossible in this brief report to convey an idea of the extent and character of that exhibit. We may say, without exaggeration, that of all the various exhibits made by the State or by individuals none reflected more credit on North Carolina or received more attention from visitors than the history exhibit. A full report of the exhibit has been prepared by Miss Hinton, one of the custodians, which the Historical Commission printed as one of its hulletins. We heg to quote one or two paragraphs from that report:

"Nothing has shown so forcibly this historical awakening in the Old North State as the exhibits she placed in the History Building at Jamestown. This was made with the people's money, by the people and for the people. It is, indeed, gratifying to know that she was creditably represented at this most interesting exposition, * * * * where history was given a place never before accorded in the annals of America. * * * Too much praise cannot be given Mrs. Lindsay Patterson, vice-president general of the Baughters of the American Revolution, who first planned and arranged this exhibit. The James-town Commission for North Carolina appropriated as much money as could be spared for this object, which was not a large sum. This was supplemented by a small amount from the State Historical Commission. Mrs. Patterson was assisted by Miss Rebecca Schenck, of Greensboro, and Miss Mary Hilliard Hinton, of Raleigh, who gave months of ardnous toil to this patriotic cause.

"The Wachovia Historical Society deserves special recognition, for it was this remarkable organization that responded primarily to the appeal for aid from patriotic Carolinians. It is the oldest society of the kind in the State, and has set an example worthy of emulation. Wachovia's exhibit revealed the life of the people, their industries, household utensils, implements of war and peace, accomplishments, comforts and literature. * * * The entire history of these thrifty, religious, peace-abiding citizens, that have ever remained a distinct colony, affords unusual opportunity to the student. * * * From the headquarters of the society have gone forth to previous expositions a few treasures, but never before has so large a collection been allowed to leave Salem. * * *

"What has been the result of all these months of wearing toil, ceaseless responsibility, personal discomforts from extreme heat and cold, the risk of losing precious heirlooms which could never be replaced, and the expenditure of money? Did it pay?

"The compensation was more than adequate. Here are some of the rewards of a year's labor: When the awards of merit were bestowed, North Carolina won the silver medal, together with New York and the church exhibits. Surely we were in goodly and pious company. More visitors sought the North Carolina exhibit than any other in the History Building, while numbers came just for a glimpse of that alone. Great pains were taken by the custodiaus in charge to show and explain all things. During those strenuous days of installation, when admission was restricted to cards, the duties of the Powhatan Guard, stationed at the entrance, the courteous custodian and superintendent were increased daily, announcing and admitting North Carolina's guests. We were just across the border, and our people in general were deeply interested. The unfolding of the State's noble past has been a revelation to many. * * * One historiau of national reputation, since having his attention drawn to our exhibit, has visited the State, making a systematic study of her unpublished archives and gathering material therefrom for a prospective volume. Another one has had many photographs taken of the chief relics to appear in a work on the historic South. * * * From various sections of the Union came persons who found there information of value to them personally. As an educational factor the success was complete, and it is believed that this engrossing work will greatly aid in developing the historical awakening already begun in our mldst."

#### UNITED DAUGHTERS OF THE CONFEDERACY.

The history exhibit at Jamestown was confined to the periods in the history of the State prior to the War of 1812. Coming now to more recent times, we find that the North Carolina Division of the United Daughters of the Confederacy has been actively engaged in preserving the history of the War Between the States. This organization has in North Carolina 3,500 members. Its work is historical and charitable. The society has erected in North Carolina fonrteen monnments to the memory of Confederate soldiers, while others are now in process of construction. A persistent effort has been made to have the various chapters obtain historical narratives from surviving veterans, but unfortunately few only have responded. These that have been gathered have been deposited in the office of the Secretary of State until the Legislature can be made to see the wisdom of erecting a fireproof library building. Scholarships have been established at the State Normal College and at the Salem Female College, open only to daughters and granddaughters of Confederate soldiers. At the next session of the General Convention of the Danghters of the Confederacy the North Carolina Division will present to the Confederate Museum in Richmond portraits of General Robert Ransom and Captain Randolph Shotwell. They have already presented portraits of General Bryan Grimes, Major Thomas Sparrow, Colonel Zebulon B. Vance, Colonel Charles F. Fisher, General Matthew W. Ransom and General L. O'B. Branch.

## HALL OF HISTORY.

The director of the Hall of History reports that during the year he has made special trips in the interest of his work to the Albemarle region, to the Croatan settlements and to the country of the Cherokees. During the year he has added more than one thousand objects to the collection, so that the total number of objects now in the Hall of History is 6,200. In his report the director adds the following:

"Everything is being done to collect while there is time, for so much has been lost by fires at private houses that it is felt some steps should be taken to place objects here where they can be better cared for. * * * * If the Legislature will erect an absolutely fireproof building and provide ample room, since the present Hall of History, large as it is, is nearly filled already, wonderful work can be done. * * * What has been done in this State at a cost entirely nominal has cost other Commonwealths large sums, in cases where they are doing anything in this line, but it may be said of North Carolina's historical collection, as it can be said of all the other departments of her State Museum, that no State south of Washington approaches it."

#### COLLEGE HISTORICAL SOCIETIES.

We regret that we have not been able to secure reports from all the historical societies at the colleges of the State. From the North Carolina Historical Society at the University and from the Trinity College Historical Society come reports of continued activity. Both have concerned themselves largely with the production of papers and addresses, many of which are valuable and permanent contributions to the historical literature of the State. The Trinity College Historical Society has published several of the most valuable papers read at its meetings. This society has also catalogued a large collection of books, pamphlets and manuscripts, and has installed in the college museum a case of rare first editions.

#### REPORT TO THE GOVERNOR.

Finally, the commission is required "to make a biennial report of its receipts and disbursements, its work and needs, to the Governor, to be by him transmitted to the General Assembly." To this report, which is a review of our work, is appended a statement of the coumission's receipts and disbursements.

As to its needs, the commission needs but one thing—room—a larger and safer depository for its collections. The present quarters of the commission are crowded. Besides, they are needed for the work of the General Assembly. They are out of the way and inaccessible. The work of the commission could be greatly extended, its collections largely increased, its usefulness expanded tenfold if it had ample and accessible quarters in a safe building. Many valuable collections could be secured if the owners were only assured that they would be deposited in a safe, fireproof building and would be properly cared for. Two such collections, worth many thousands of dollars, have been practically promised as soon as the State erects an adequately protected building for the preservation of its property.

The Historical Commission therefore endorses the memorial to the General Assembly adopted by the State Literary and Historical Association, urging the erection of a fireproof State Library building for the preservation of the State Library, the Hall of History, the State Museum and the collections of the State Historical Commission. The reasons for the erection of such a building are so fully set forth in that memorial that they need not be repeated here. The commission therefore hopes that your Excellency will think proper to approve the measure and urge it upon the attention of the next General Assembly.

## SUMMARY.

During the period covered by the foregoing report the commission has added to its collections 3,135 original manuscripts and transcripts, as follows:

The John H. Bryan Collection	703
The Calvin H. Wiley Collection	885
The Jonathan Worth Collection	1,307
The L. O'B. Branch Collection	48

The Hayes Collection (transcripts)	82
The Dartmouth Collection (transcripts)	63
Items from The Virginia Gazette	38
Miscellaneous transcripts	9
Annex .	
Total 3	,135

As soon as practicable a calendar of these papers will be prepared and published.

# INDEX TO EARLY NEWSPAPERS OF SOUTH CAROLINA.

The North Carolina Historical Commission has secured an index to the North Carolina items in the Colonial and Revolutionary newspapers of South Carolina, which, in the absence of North Carolina newspapers of the periods, forms a valuable source of historical information. The index embraces the following papers published at Charleston:

The South Carolina Gazette and Country Journal, 1732 to 1775, inclusive.

The South Carolina and American General Gazette, 1766 to 1772, inclusive; 1774 to 1780, inclusive.

The Royal Gazette, 1781, 1782.

The City Gazette, or Daily Advertiser, 1789, 1790.

The State Gazette of South Carolina, 1786, 1788.

The Gazette of the State of South Carolina, 1777, 1783, 1784, 1785. The Charleston Morning Post, 1787.

## HISTORICAL PICTURES.

The commission has had placed in the Hall of History, under the direction of Col. Fred A. Olds, director, the following pictures illustrating the history of North Carolina:

Three pictures of treaty with Tuscarora Indians.

Ten pictures illustrating colonial Edenton.

Three pictures illustrating colonial Wilmington.

Two pictures illustrating colonial Bath.

Two pictures of Haves.

Seven pictures illustrating War of the Regulators.

One picture of General Robert F. Hoke.

One picture of Andrew Johnson's birth-place.

One picture of *The New Bern Gazette*, containing the Mecklenburg Resolves of May 31, 1775.

One picture of Richard Cogdell's letter relating to the above copy of The New Bern Gazette.

Twenty-six pictures illustrating Indian life in North Carolina. Painted by John White in 1586 and photographed from the engravings of Theodore DeBry, 1590. Seven pictures of the site of Sir Walter Raleigh's Roanoke Colonies as they appear to-day, painted by Mr. Jacques Busbee. These pictures were exhibited at the Jamestown Exposition, and are now on exhibition in the Hall of History.

Respectfully submitted,

J. Bryan Grimes,

Chairman.
W. J. Peele,
M. C. S. Noble,
Thomas W. Blount,
D. H. Hill.

R. D. W. Connor, Raleigh, N. C., Secreary.

# LETTER OF TRANSMITTAL.

WINSTON-SALEM, N. C., January 1, 1908.

To His Excellency, ROBERT B. GLENN,

Governor of North Carolina.

DEAR SIR:—We have the honor to submit herewith the Annual Report of this Board for the year ending December 31, 1907.

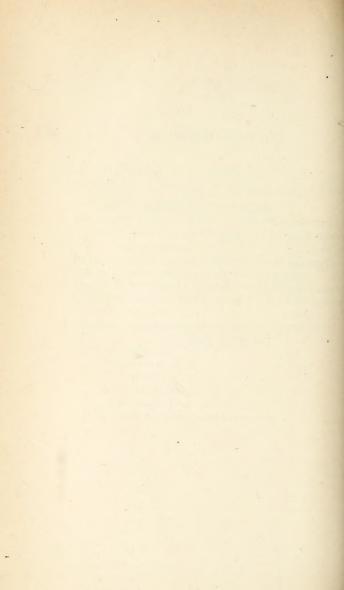

We are glad to report the improvement along humanitarian lines, and congratulate the State upon the awakened interest. So much more could be accomplished by our work if we were provided with funds for the required visitation and inspection.

We invite your careful attention to the reports herein contained.

Most respectfully,

W. A. Blair, Chairman.
E. L. Haughton,
W. F. Craig,
Carey J. Hunter,
A. C. McAlister.

Commissioners of Public Charities of North Carolina.

OF THE

# BOARD OF PUBLIC CHARITIES

FOR THE YEAR 1907.

THE CAPITOL,
RALEIGH, N. C., December 31, 1907.

Mr. W. A. Blair, Chairman, and Messrs. E. L. Haughton, W. F. Craig, Carey J. Hunter and A. C. McAlister, Commissioners of Public Charities.

Gentlemen:—I have the honor to present the following report of the condition and management of the several State institutions under your general supervision, the private hospitals licensed by the Board, and of the county charitable and penal institutions. In addition will be found the voluntary reports of the private orphanages, hospitals and various benevolent societies, made by courtesy of the officers in charge of these important factors in the development of a Christian State.

The year 1907 has witnessed a remarkable awakening of the public conscience in the nation. The probing of corrupt business methods, the sweeping temperance wave, manifest a strong sentiment in favor of a higher plane of living. The feature of the present trend of sociologic investigation and philanthropic endeavor is the seeking to find and the striking at the causes of evil. The temperance movement, the tuberculosis warfare, the noble aspirations for international accord, as embodied in the Peace Conference, are efforts to remove the fruitful causes of unnumbered sufferings, wrongs, sin. Intemperance is the cause, directly or indirectly, of most of the crime, much of the insanity and idiocy. Saddest of all, its blighting influence descends to the innocent offspring of the

debauched and drunken parent. It fills our institutions—charitable and penal—and brings a tremendous economic loss to the State in the destruction of her young men; so that the removal of this destroying agent is a direct gain to our charities and corrections.

North Carolina, aroused to the needs of her unfortunates, is, through her legislative and executive branches, formulating and enforcing measures of prevention, and preparing to care adequately for the classes dependent upon her for succor. The Legislature of 1907 reached high-water mark in philanthropic legislation. The Committee on Reports of the States to the National Conference of Charities and Corrections, held at Minneapolis, Minn., in its published proceedings, says: "From a few States, notably Illinois, Indiana, Massachusetts and North Carolina, where there has been more than ordinary interest aroused in charities and corrections during the past year, the reports are longer than usual. In each case the interest appears to justify the length of the report."

## HOSPITAL COMMISSION.

Most notable of these acts passed by the last General Assembly was the creation of the Hospital Commission, composed of five business men, to whom are entrusted very broad powers to provide proper and adequate accommodation for "all mental defectives, including epileptics, dangerous, violent and indigent idiots and all incurable as well as curable insane, all insane and imbecile Croatan Indians and all other mental defectives whose condition is such that, in the opinion of the hospital authorities, they require hospital treatment and can be advantageously treated in such a colony." making these additional provisions \$125,000 is annually appropriated for a term of four years. This appropriation passed without a dissenting vote in either house. Governor R. B. Glenn appointed on this Commission Messrs. Charles A. Webb, Dr. J. W. McNeill, J. H. Weddington, E. F. Aydlett and W. A. Erwin. This Commission has thoroughly

investigated the condition and needs of the three hospitals for the insane. As required by the act, necessary additional land has been purchased at each hospital. The contract for a wing which will accommodate 100 male patients at the Raleigh Hospital has been awarded, and other improvements at each, which are given in the institution reports.

A committee has visited Craig Colony for Epileptics, the best in this country, and plans for the care of this class are in preparation.

# STONEWALL JACKSON MANUAL TRAINING AND INDUSTRIAL SCHOOL.

After a struggle of nearly twenty years, an act to establish a reform school was passed. The widow of our illustrious Confederate general was the first named director, with other women who have worked untiringly for the school. According to the act, a meeting was held with the Governor, and the remaining directors were elected. Mr. J. P. Cook, of Concord, is chairman, and Dr. Hubert A. Royster, of Raleigh, secretary. Mr. Walter Thompson, of Salisbury, was chosen as superintendent. The town of Concord gave 227 acres of land and \$1,000, which were accepted, and the school will be located three miles from that place. The chairman has visited some model institutions and has a very complete plan for the development of such a school as our State may be proud of. The appropriation is only \$5,000 per annum, and will have to be supplemented by private contributions.

To place women on the board of directors is following an old precedent in the majority of the States, especially upon such boards as care for the welfare of women and children. In this connection it is interesting to note the following from the minutes of the Board of Public Charities:

"August 28, 1891, Commissioner W. N. Jones brought to the attention of the Board the need of considering some plan for the reelamation of juvenile offenders throughout the State." From August, 1891, to June 14, 1892, the Secretary, Capt. C. B. Denson, was busily engaged in securing statistics and data in regard to reform schools and juvenile delinquents. On that day (June 14, 1892) the following resolution was passed:

Resolved, That a special committee be appointed to formulate a plan for a reform school, or industrial school, for juvenile offenders, to the end that they may be removed from the Penitentiary or county jails and subjected to direct reforming influences; also, to prepare a statute and memorialize the General Assembly in behalf of such an institution.

The chairman, Dr. Charles F. Duffy, appointed Messrs. W. N. Jones, W. A. Blair, L. J. Haughton and C. B. Denson to constitute such committee.

Each successive year the Board repeated its recommendation, and public sentiment was aroused to the need. Finally the women of the State labored arduously for its accomplishment, and their work has been crowned with success. The establishment of the school is directly due to their zealous perseverance.

# TUBERCULOSIS SANATORIUM.

An act was passed creating the North Carolina Sanatorium for the Treatment of Tuberculosis, and appropriating \$15,000 for its establishment and \$5,000 per annum for support. Fifteen directors were named in the bill. Dr. J. E. Brooks, of Greensboro, was elected superintendent. A tract of 948 acres has been purchased in Cumberland County, in the piney sand-hill section, with fine water power and drinking water. A portion of the land is very fertile and will be converted into dairy and poultry farms, milk and eggs being the chief diet of consumptives. The Sanatorium will be on the cottage plan—an administration building and cottages to accommodate four patients each.

#### TUBERCULOUS PRISONERS.

A law was passed requiring the separation of tuberculous prisoners in camps, jails and Penitentiary from other prisoners when confined in their cells. It does not prevent the working together of the prisoners when in the open air.

#### COMPULSORY SCHOOL LAW FOR THE DEAF.

This was passed, requiring the attendance of white deaf children of school age and limiting the institution to residents of North Carolina, except when there is room beyond the needs of the State, when pay pupils may be received.

# BOARD OF AUDIT FOR THE COLORED ORPHANAGE.

This institution is a private one, which has been receiving annual appropriations from the State, and until recently the State had no representation on the board of directors. Directors have been appointed also.

## ELHANAN INSTITUTE.

While appreciating the great liberality of the Legislature to the charities, it is to be regretted that the policy of the State in regard to appropriations to strictly private institutions was departed from in the appropriation made to the Elhanan Institute, Marion. It has been the wise precedent to give State aid only where the State is represented and where the institution is open to the inspection of the proper authorities. The amount was small, and it is merely as a question of policy that this is adverted to. In some States appropriations to private institutions have exceeded those to public institutions, and have been the source of mismanagement and corruption.

Measures which affect more or less directly our charities and corrections are the strengthening of the vagrancy law, child-labor law, temperance and other measures conducive to good morals; also the compulsory school law. A number of additional counties were given permission to establish camps, and some to build or remodel their Homes and jails.

The Legislature of 1907 has given a wonderful impetus to the charities and corrections, and the brightest page in their history was written by it.

## MORGANTON HOSPITAL,

This hospital has sustained a heavy loss in the death of Dr. P. L. Murphy, who had been its superintendent from its beginning, and had developed it to its present noble proportions and efficiency.

A special appropriation of \$5,000 for two years was made for the erection of cottages for tuberculous patients. The Hospital Commission has purchased 115 acres of additional land and erected eight cottages for employees. The appropriation for support is \$145,000, which does not meet the need. The institution has outstanding indebtedness to the amount of \$10,000. Its needs are increased accommodation and increased maintenance fund. Ninety-five per cent, of the patients in charge are chronic cases; refused for want of room, 103.

# RALEIGH HOSPITAL.

The Hospital Commission has purchased 1,1401/3 acres of land adjacent to the present grounds. This land is to be used also for the epileptics. A carpenter shop and storeroom have been added. An annex for the accommodation of 100 male patients will soon be built. Refused, 30. Ninety per cent. of the cases are chronic. No outstanding indebtedness.

#### GOLDSBORO HOSPITAL.

The number of patients has increased since the new building was opened, the latter part of 1906. The present appropriation of \$65,000 is not enough to keep the institution full or to meet the demands upon it. Now in charge, 629; six-

teen refused, but none for want of room. The Hospital Commission has purchased additional land, new boilers, engine, electric generator, filter and pump, and bath tubs and fittings, and increased the fire protection. Eighty-seven per cent. chronic cases. Nearly all applicants for admission who were confined in jails throughout the State have been admitted, and many from the County Homes.

# SCHOOL FOR THE BLIND AND DEAF.

A special appropriation of \$25,000—\$13,000 in 1907 and \$10,000 in 1908—was made for improvements at the white blind and the colored blind and deaf departments. This will furnish fire escapes, laundry and machinery, renew the roof of the colored department, provide four additional rooms, fireproof library and other improvements.

The superintendent earnestly recommends that the compulsory attendance law for the white deaf be extended to the white blind and to the colored defectives of both classes.

The exhibits of the Blind School, both of the white and the colored, at the Jamestown Exposition were very attractive, and gold medals were won by both departments.

No ontstanding indebtedness.

There should be some means for isolating contagious and infectious diseases in the colored department.

# SCHOOL FOR THE DEAF AND DUMB.

A special appropriation was made for putting in ducts, electric-light plant, repairs, and cement floors—\$4,250 annually for two years. None who were eligible have been refused. The compulsory attendance law has greatly increased the number, and the enforcement of the act will necessitate increased capacity and maintenance fund. Outstanding indebtedness, \$4,949.66.

This is one of the best schools of its kind in the country, and we have reason to be prond of its record.

# SOLDIERS' HOME.

A special sum of \$5,000 was given the Home for additional wings to the hospital, heating apparatus for the same, water supply for fire protection, and steam laundry. The percentage of mortality is 20; the average age of the veterans, 70. So feeble and old are they that it has been found necessary to have a trained nurse and two assistants in the care of the hospital. The veterans are very comfortable, and the Home is well managed.

## OXFORD ORPHANAGE FOR WHITE CHILDREN.

This institution is under the control of the Masons, and is well managed and efficient. It has in charge 317 children. Its able superintendent is ever mindful of the need of developing individuality in the children.

# OXFORD COLORED ORPHANAGE,

The Legislature made a special appropriation of \$1,250 per year for the liquidation of outstanding indebtedness. A board of audit was appointed. Recently the superintendent has resigned, and John Cheatham was elected to fill the vacancy.

#### DANGEROUS INSANE DEPARTMENT.

No changes have occurred in the status of this institution. In charge, 56, with room for 49. The additional patients must occupy cells in the prison, for want of room. It is to be hoped that some means may be devised for more humane care of these unfortunates.

# STATE'S PRISON.

A new drinking-water supply has been added to the State's Prison. Number in charge, 680, a small increase over the last report. The Constitution, Article XI, says that "No convict shall be farmed out who has been sentenced on a charge of murder, manslaughter, rape, attempt to commit rape, or arson."

Attention is called to the fact that prisoners who have been sentenced as above are sent to work on railroads, turnpikes, etc., and are likewise in the county camps, working on the public roads.

The population of the institutions was distributed during the year ending November 30, 1907, as follows:

	Total Inmates.
Hospital at Morganton	1,193
Hospital at Raleigh	650
Hospital at Goldshoro	799
Dangerous Insane Department	62
School for the White Blind	197
School for the Colored Blind and Deaf	201
School for the White Deaf and Dumb	278
Soldiers' Home	188
Oxford Orphanage for White Children	373
Oxford Orphanage for Colored Children	124
Total	4,065
Whole number of insane in charge during the year	2,704
Present in the institutions November 30, 1907:	
	- 000

		,000.00
		,800.00
		00.000,0
		,000.00
10	b llqnidate indebtedness	,138.62
	Grand Total\$1,233	928 62
	Annual appropriations for charitable institutions, \$606,969.3:	L.

The pension fund to Confederate veterans was increased \$125,000, amounting at present to \$400,000 annually. Number of pensioners, 15,000.

The institutions are without indebtedness, except in the ease of the State Hospital at Morganton and the School for the Deaf and Dumb. They are well protected against fire. The per capita cost has been slightly increased at Morganton, Goldsboro and the schools, owing to increased cost of living, and having been low previously at these hospitals. The schools are more expensive than any other institutions, because of the necessary expense in securing competent instructors for defectives. The per capita of the Raleigh Hospital is higher than either of the other hospitals, but has been decreased \$3 since last year.

The per capita cost at the Soldiers' Home and the Dangerous Insane Department remains about the same. The latter has the benefit of the State's Prison financial management.

#### THE COUNTY HOMES.

The reports of the County Commissioners have been tabulated, and those of the Visitors abstracted and included in the annual report. Haywood and Duplin are building new Homes; Chowan, Davidson and Wake have had additional improvements. Those of Rockingham, Caldwell, Dare and Lincoln and others need betterment. Number of inmates in the Homes at time of report—90 Boards of Commissioners reporting and six counties without Homes, making 96 counties—as follows:

Cared for in the Homes, 1,429 inmates, at a cost of.......\$100,344.02

Outdoor relief to 4,158 persons, at a cost of............... 85,375.21

Grand Total .......\$185,719.23

Total number cared for by counties, 5,587. (This includes only the number cared for at time of report).

This does not include farm products used for the benefit of the Homes.

Children in the Homes, 37 whites, 24 blacks, 3 color not given; total, 64. Most of these are infants, with their mothers, or defective, physically or mentally; a few in normal condition, and should be removed to more suitable environment.

Deaths in the Homes during the year, 304.

All the jails and all Homes, except Madison, report the insane and other mental defectives.

# In County Homes:

nsane—white, 94; black, 51; ten color not given; total	155
'eeble-minded	330
Epileptic	116
	601
nsane and epileptic in jails—white, 24; black, 4	28
Grand Total	629

Of the above number there are in close confinement 82. Doubtless the same inmates have been in some cases counted twice, as they may be insane epilepties or demented feebleminds.

# COUNTY JAILS.

Unusual activity has been shown in jail building and improvement, growing partly out of the requirement of the tubereulosis law for the separation of prisoners and the necessary additional eells. Likewise there have never been so many complaints as to the need of new buildings and better sanitary arrangements. These complaints do not indicate a worse condition, but the natural criticism when a community demands a higher standard of efficiency, which in the matter of jail buildings is a sore need, and the awakened interest is welcomed.

New buildings have been completed in Rowan and Harnett; Buncombe, Craven, Caswell and Duplin are building; New Hanover and Wake have been improved; Stanly is considering an enlarged jail; Forsyth has given a contract for an addition to the jail; but Burke, Beaufort, Clay, Davie, Dare, Surry, Tyrrell and Perquimans need either new and larger buildings or improved conditions. Some of these have already

prepared plans for needed improvement. Active correspondence has been going on between the Secretary and the Commissioners of the counties, and in some eases Solicitors have been appealed to to see that the necessary improvements are made, and that they are in accordance with the law for jail building, which plainly states that the structure of the jails must secure the "comfort and health" of the prisoner as well as his detention.

Section 1336, chapter 24, Revisal of 1905 (Vol. I), reads: "Five Apartments.—The common jails of the several counties shall be provided with at least five separate and suitable apartments—one for the confinement of white male criminals, one for white female criminals, one for colored female eriminals, and one for other prisoners."

The Assistant Attorney-General has construed this to mean that the five apartments mentioned in the law should be absolutely separated by a solid partition, "as the intention of the law is to not allow any communication of any kind whatever" between the occupants of these divisions. He also states that, in his opinion, the convict eamps should be divided somewhat in like manner, viz., to prevent communication between the races. Copies of this law and of the opinion quoted have been mailed to all counties proposing to erect new jails, and the Solicitors and Commissioners requested to see that the buildings conform to legal requirements.

Confined in the jails at the time of report, 144 white males, 8 white females, 321 colored males, 38 colored females; total, 511. Of these, 12 were under sixteen years of age. Deaths in jail, 12 during the year.

#### COUNTY CAMPS.

There are forty-two camps in operation in thirty-two counties, and the Assembly of 1907 granted the right to nincteen additional counties to establish camps or send their prisoners to the neighboring counties; so that about two-thirds of the

1909.7

counties can so dispose of their prisoners when they choose. Thirty-eight have reported, but only twenty-nine give the number confined. In these there were at the time of the reports:

White males	 				 										116
Colored males	 				 						 				752
Colored females															
					•									-	
Total	 										 				874

The six females are not worked on the roads, but serve as cooks for the prisoners.

Judging from former reports, it is estimated that there are at least 1,200 prisoners in the camps. Six counties report whites and blacks confined in the same room. They have been notified that this is illegal and must be corrected. Deaths, 18—six from consumption, and five of these in a New Hanover camp. Letters were written the Commissioners and County Physician of New Hanover in regard to the matter, and it was found that the site of the eamp has since been changed.

The same recommendation as to a general supervising board is made. With such a large number of prisoners distributed in the counties, and the present system growing in use, there should be centralization of their government, under a responsible board.

It would facilitate the management of the camps if there could be a uniform road law, or such portions of these laws as relate to the working of convicts be similar and universal in application.

Likewise the recommendation for chaplains for the camps and the State's Prison eamps is reiterated. These prisoners should certainly have the comfort and help of religious instruction.

#### PRIVATE LICENSED HOSPITALS.

Upon the Board rests the important responsibility to lieense, visit and supervise all institutions established by pri-

vate individuals or corporations for the care and treatment of the insane, feeble-minded, idiots and inebriates (the latter term legally including drug habitues). Broadoaks Sanatorium, Morganton, and Dr. Carroll's Sanatoria, Asheville. have been licensed to care for the insane and inebriates. The McKanna Liquor Cure Company, Reidsville: Perfected Liquor Cure Company, Greensboro, and Telfair Institute. Asheville, have been licensed to care for inebriates only. Of these, Broadoaks, Dr. Carroll's Sanatoria and Telfair Institute were inspected by the Board in August. The other two have recently been licensed. Special investigations are made. references and compliance with printed rules and regulations required before these private institutions are licensed. Board satisfies itself as to the high character of the gentlemen in charge and the physical conditions. As to the medical treatment of incbriates, it does not attempt to judge, as the formulæ are not made known to it. Copies of form of application for license and of rules are included in this report. Dr. Carroll's Sanatorium, Charlotte, has been discontinued.

Attention is called to the fact that, while the Board has the only supervision of the licensed private hospitals, there is no provision for the expense of visitation of these institutions, and in order to inspect them a meeting of the Board was held in Asheville, adjourning to Morganton. It is quite important that they should be visited by a member or members of the Board at least once a year.

# PRIVATE MOSPITALS FOR SICK AND INJURED.

Questions were mailed to thirty-eight hospitals. Replies have been received from twenty, and from two others notifying the Board of their discontinuance—the Asheville Hospital and Graham Hospital for Negrocs, in Greensboro—larger hospitals, recently erected, meeting the needs. Those reporting give the whole number of patients treated as 6,374, one-third of whom were charity patients.

The new Watts Hospital, Dnrham, to be erected during the coming year, will be the largest and most eastly in the South.

# PRIVATE ORPHANAGES.

The reports show increased accommodation and enlarged opportunity for good in nearly all the private orphanages and homes for destitute and neglected children. Nineteen such organizations have reported. Number present at the end of the fiscal year, 1,496; whole number during the year, 1,579; the Roman Catholic Orphanage for Boys, Raleigh, and the Buncombe County Children's Home not reporting. The number cared for in all the orphanages is about 1,700. The Home at Moutreat and Friends' Orphanage at High Point have been closed.

The Western Conference of the Methodist Church will establish an orphanage in the western section of the State during 1908.

#### HOMES FOR THE AGED,

Three homes for old ladies have made reports—those at Wilmington, Winston-Salem and Raleigh. There are also five Resene Homes.

#### ASSOCIATED CHARITIES,

These organizations are meeting the needs of the communities in Raleigh, Durham, Goldsboro, High Point and Wilmington. Street begging has been almost eliminated, and more systematic and adequate relief given to the poor.

# MEETINGS AND INSPECTIONS.

Three meetings of the Board have been held—at Raleigh, Greensboro, Asheville, adjourning to Morganton. The private sanatoria, Broadoaks, Telfair Institute, Dr. Carroll's and Highland Home, have been thoroughly inspected; also the State Hospital, Morganton; Deaf and Dumb School; the jails of Buncombe, Burke, Wake; Homes of Guilford and Wake, and the County Reformatory of Guilford. Inspec-

tions are at the time of the meetings, as there are no available funds for the Board to appoint committees for these visitations. This is a heavy handieap to the work, as the institutions should be inspected twice a year, and there should be a special inspector for all county institutions, employed for this purpose. This need is plainly shown when recommending improvements in the counties. It is difficult to know the exact status of the institutions, and such recommendations should be followed by stronger measures when no attention is paid to the letters asking for changes.

# GENERAL WORK OF THE OFFICE.

In addition to the routine work, many papers have been written, by request, about various sociological questions for inquirers from other States. These have been mentioned in the quarterly reports.

A number of applications have come directly to the Board for assistance in getting admission for insane persons, orphans, etc., to the institutions. No stone is left unturned in these matters, but the Secretary finds that the directors of the hospitals earnestly try in every possible way to receive these afflicted ones, and can assure the public when patients are refused admission it is for good and sufficient reasons and with reluctance on their part.

The usual number of books and reports from other States have been added to the library, the Census Bureau contributing valuable data.

The Secretary visited Richmond and Washington in June, going through the office of the City Charities, City Home and Emergency Hospital and Confederate Soldiers' Home in Richmond; the offices of the Associated Charities and the Board of Public Charities of the District of Columbia; Juvenile Court, Detention House and the Government Asylum at Washington; also the Social Economy building at Jamestown and the Children's Gardens, etc. At the Government Asylum the latest kind of model buildings have been erected and

hydrotherapeutic treatment is used. These baths have proven very helpful in controlling the insane. They induce natural sleep, eliminate effete matter from the body, change respiration, circulation, etc., without the use of drugs. The apparatus for installing the baths costs about \$1,500 for each sex. A trained person is required to give them. The continuous bath is another form which is recommended by alienists. The patient is kept in the tub, resting in a canvas hammock for hours or several days at a time, with a trained nurse in attendance. These baths are in use in New York and other States.

NATIONAL CONFERENCE OF CHARITIES AND CORRECTION.

The National Conference of Charities meets in Richmond, Va., from May 6th to 13th. A goodly attendance of North Carolinians is urged. Such a meeting is an impetus for good to the charities and corrections of all surrounding States.

# BOARDS OF COUNTY VISITORS.

The importance of these boards cannot be overestimated. Twenty-five new Visitors have been appointed during the year. Some of the Visitors have failed to respond to letters, and in some counties the list has been thinned by death and removal. In others much enthusiasm prevails, and systematic visiting has resulted in changes for the better.

The Secretary wishes to acknowledge the able assistance of

these boards in the relief of the unfortunate.

Acknowledgments are made to Dr. R. H. Lewis, Secretary of the Board of Health, for the preparation of rules for the care of the tuberculous in the prisons, etc., and for other help.

Thanks are due to the Governor and officials for aid and sympathy in the work; to the Chairman, upon whom falls the decision of important matters in the *interim* of meetings, and to the members of the Board for their unfailing help and kindness.

Respectfully,

Daisy Denson, Secretary.

# STATE INSTITUTIONS.

#### STATE HOSPITAL AT MORGANTON.

(Inspected by the Board August 8, 1907, and found in excellent eondition).

JOHN McCampbell, M. D. Superintendent. Morganton.

The annual appropriation for maintenance is \$145,000. A special appropriation of \$5,000 per year for two years was made for the erection of cottages for tuberculous patients. Plans are now being developed for these buildings. The Hospital Commission has bought 115 acres of land and erected eight eottages for employees. Fifteen patients suffering with tuberculosis.

The following is the table of the movement of population:

Number of patients remaining Novem-	Men.	Women.	Total.
ber 30, 1906	405	580	985
vember 30, 1907		119	208
whole number treated during the year,	494	699	1,191
Diseharged as recovered			63
Discharged as improved			37
Discharged not improved			12
Died			47
Whole number removed during the year,	59	100	159
Remaining November 30, 1907	416	607	1,023

Percentage of mortality upon the whole number treated, 3.6. Percentage of cures upon admissions, 30.28. Number of patients from the Eastern Distriet, 30. Refused for want of room, 103. About 95 per cent. of the cases are chronic. Daily employed, 500. No serious accident or epidemic. General health of the patients is good. Number of attendants, 31 men and 52 women. There is a training school for nurses in connection with the hospital work, with 30 students. Twenty-five epileptics now in charge.

Appropriat	ion for support\$145,000	
Disbursed		

\$27

Outstanding indebtedness, about \$10,000. Per capita eost of maintenance, \$155. Estimated value of farm and dairy products, \$27,063.46.

JOHN MCCAMPBELL, M. D.,

Superintendent.

#### STATE HOSPITAL AT RALEIGH.

James McKee, M. D., Superintendent. Raleigh.

The annual appropriation for maintenance is \$95,000, and the further sum of \$800 per year for the contingent repair fund during the present biennial period. The Hospital Commission has purchased a plantation of 1,140½ acres of land adjoining the Hospital farm, at a cost of \$53,500. It has appropriated \$3,800 for carpenter shop and equipment and \$4,200 for storeroom. The Commission has authorized an annex to buildings for males to accommodate 100 additional natients.

Table of the movement of population for the year ending November 30, 1907:

1001.			
	Men.	Women.	Total.
Number of patients remaining Novem-			
ber 30, 1906	191	251	442
Admitted during the year ending No-			
vember 30, 1907	94	114	208

Discharged not improved	1	3	4
Died	23	22	45
Whole number removed during the year,	42	33	. 75
Remaining November 30, 1907			575
Daily average attendance during the			
year			514

Percentage of mortality upon the whole number treated, 6. Percentage of cures upon admissions, 5. From the Western District, 9 patients. Seventeen pay patients during the year. Number refused admission, ineligibility, 30. About 90 per cent. of the cases are chronic; 286 patients are daily employed. There has been no serious accident or epidemic, and the general health is good. Average number of employees, 192. There are 23 female and 17 male attendants. There is a training school for the nurses in connection with the hospital work. Twenty-one epideptics now in charge.

Cash receipts from pay patients, etc	
Disbursements	\$100,581.52 100,552.41
	\$ 29.11

There is no outstanding indebtedness. The estimated gross value of farm and dairy products is \$19,641.22. Per capita cost of maintenance, \$184.82. There are five patients suffering with tuberculosis. No provision has been made for the separation of this class from other patients. The water treatment (continuous bath, etc.) has not been introduced.

Remarks.—Five per cent. of cures is the smallest this Hospital has ever had. We had on probation 80 patients, and had we discharged them our percentage would be larger, but when they left the Hospital they were not cured, and I am not yet positive that they are cured. Some of them had cases of recurrent mania, and will undoubtedly be returned to the Hospital.

JAMES MCKEE, M. D.,

Superintendent.

#### STATE HOSPITAL AT GOLDSBORO.

W. W. Faison, M. D., Superintendent. Goldsboro.

Aunual appropriation for support, \$65,000. This sum is not enough to keep the institution full or meet the demands upon it. The Hospital Commission has purchased additional land, at a cost of \$6,000, and made improvements as follows: A new boiler, engine, electric generator and settings, outside and inside closets, pipe line, filter and pump, bath tubs and fittings, and fire protection. Cost of improvements, \$11,997.95.

Table of movement of population for the year ending November 30, 1907:

)( ;			
	Males.	Females.	Total.
Number of patients remaining Novem-			
ber 30, 1906	223	333	556

Daily average attendance during the			
year			613

Percentage of mortality upon the whole number treated, 11.764. Percentage of cures upon admissions, 29.22. One pay patient. Sixteen have been refused, but none for want of room. About 87 percent, are chronic cases. One-half of the patients are daily employed. No epidemie. One woman badly scalded. Health of the inmates has been very good, except for tuberculosis and the debility of the aged.

1909.7

Average number of employees, 85. There are 23 female and 19 male attendants. No training school for nurses. Thirty-seven epileptics now in charge, more or less demented.

Receipts (appropriation)	.\$65,0	00.55
Disbursements	. 65,0	00.12
	\$	.43

No ontstanding indebtedness. The estimated value of farm and dairy products is \$11,048.60. Per capita cost of maintenance, \$111.11. Thirty-five patients suffering from tuberculosis. There is a detached building for six females; others in separate wards. Water treatment, or continuous bath, has not been introduced.

Remarks.—We have taken in more patients this year than have ever been admitted in any previous year. All applicants for admission who were confined in the jails throughout the State have been admitted, and also many from the County Homes. Since the meeting of the last Legislature this is no longer a hospital solely for the insane, but is an asylum for the epileptic, idiot, dement and dotard and all other mental defectives. As yet, the Hospital Commission has not given us separate buildings for the tubercular and the epileptic patients. I feel sure that they will as soon as the money is available. As many of the above classes have been received, the percentage of cures here will be smaller and the mortality greater.

> W. W. FAISON, M. D., Superintendent.

#### HOSPITAL FOR THE DANGEROUS INSANE.

Dr. James R. Rogers, Medical Superintendent.

There have been no alterations or improvements in this department during the year.

The following is the table of the movement of population for the year 1907:

1001.			
	Men.	Women.	Total.
Number of inmates present November			
30, 1906	35	14	49
Number received during the year ending			
November 30, 1907	13	0	13
Whole number treated during the year.	48	14	62
Discharged as recovered			3
Discharged as improved			16
Discharged not improved			0
Whole number removed during the year,			6
Daily average attendance during the			
year	40	14	54
Remaining November 30, 1907			56

Percentage of mortality upon whole number treated, 3. None have been refused for want of room, but 7 have been received beyond the capacity of the wards. It has been uccessary to place these in prison cells at night, which is to be deplored. Fifteen are fairly employed. No serious accident or epidemic, and the general health has been good. Average number of employees, 6.

Receipts	 \$5,096.57
Disbursements	 5,028.21
	\$ 68,36

The appropriation of \$5,000 for support was, by act of the Legislature, paid out of the funds on hand to the credit of the State's Prison. There is no outstanding indebtedness. *Per capita* cost of maintenance was \$93.11. The needs of the institution are the same as recommended in former reports. The situation is the same.

James R. Rogers, M. D., Medical Director.

### NORTH CAROLINA SCHOOL FOR THE BLIND AND DEAF.

JOHN E. RAY, Principal.

RALEIGH.

#### WHITE DEPARTMENT FOR THE BLIND.

The appropriation for support is \$60,000 for both white and colored departments. Annual appropriation of \$100 for purchasing books for the blind, and a special sum of \$13,000 for the year 1907 and of \$10,000 for the year 1908. This is to be expended for fire escapes, laundry and machinery, renewing the roof of the colored schools and providing four additional rooms therein, fireproof library and other improvements and repairs. The spiral fire escapes have been installed and found satisfactory.

The following is the table of the movement of population for the year 1907:

Number on the roll November 30, 1906	Boys. 97	Girls. 72	Total.
Admitted during the fiscal year ending			
November 30, 1907	15	13	28
Whole number during the year	112	85	197
Discharged during the year	_ 23	10	33
Died	2	0	2
Daily average attendance	85	73	158
Number on the roll November 30, 1907	87	75	162

When the new library is built, and the lady teachers board outside the school, there will be room for 250. No children have been refused for waut of room. There has been no serious accident or epidemic. The general health of the children is good. Disbursements and receipts have been \$60,000, with no ontstanding indebtedness. Per capita cost of maintenance is not far from \$200. No changes or additions in the literary or industrial courses. Industrial work embraces sewing, fancy work, basket making, broom and mattress making, cane seating, and typewriting. For recreation there are gymnasinms, swings and walks. There are daily chapel exercises, and the pupils attend the churches in the city on Sunday. Weekly fire drills. Fire extinguishers, iron stairways and spiral fire escapes.

Of the 28 new pnpils 14 are congenitally blind; others became blind as follows: one at 23 years, one at 18, one at 11½, one at 10, one at 9, one at 4, one at 2½, one at 6 months, one at 5 weeks, one at 2 weeks, one at 2 days. Canses: 18 nnknown; sore eyes, 3; nasal affection, 1; grannlated lids, 1; neuralgia, 1; a fall, 1; spinal affection, 1; cataract, 1.

#### COLORED DEPARTMENT.

The General Assembly anthorized improvements in the Colored Department, which are now nuder way. Fire escapes have been installed, laundry room is nearly finished, and machinery ordered.

The movement of population for the year 1907 was as follows:

Colorea Buna.			
	Boys.	Girls.	Total.
Number of children on the roll Novem-			
ber 30, 1906	29	51	80
Admitted during the fiscal year	10	9	19
Whole number during the year	39	60	99
Discharged during the year	10	18	28
Died	0	0	0
Daily average attendance	30	50	80
Number on the roll November 30, 1907	29	42	71
· Colored Deaf.			
	Boys.	Girls.	Total.
Number of deaf children on the roll			
November 30, 1906	58	37	90
Admitted during the fiscal year	3	9	12
Whole number during the year	56	46	102
Discharged during the year	4	7	11
Died	0	0	0
Daily average attendance	51	38	89
Number on the roll November 30, 1907.	52	39	91

The institution can accommodate 200. None have been refused for want of room. No serious accident or epidemic. General health of the children has been good. No separate fund for the support of this department, but included in the appropriation of \$60,000 to the white blind. No ontstanding indebtedness. Per capita cost of maintenance,

\$175. No changes in the literary or industrial courses. We have 35 acres of farm land and a dairy. Most of the vegetables and of the milk needed are thus supplied. We have no means of isolating contagions and infections diseases in the Colored Department. Most assuredly we should have a compulsory attendance law for the blind, including the colored blind.

Remarks.—Our School for the Blind made an attractive exhibit at Jamestown, and received a gold medal and unstituted praise from the Committee on Awards. The exhibit consisted of articles from the kindergarten, fancy work, sloyd, and broom and mattress departments. During the week's stay of the Blind Boys' Band they were an attractive feature, and were engaged to play in the Anditorium, the grandstand and npon several official occasions. The classes in plano music, fancy work, etc., proved attractive.

The exhibit made by the Colored Department of our school proved to be the attractive feature in the Negro Building. The exhibit consisted of sewing, faney work, shoemaking, dressmaking, cabinet-making and exhibits from the broom and mattress departments. It received a gold medal.

JOHN E. RAY,

Principal.

## NORTH CAROLINA SCHOOL FOR DEAF AND DUMB.

(Inspected by Commissioners A. C. MeAlister, Carey J. Hunter and the Secretary, on August 8, 1907. It was vacation and no pupils preent, but the school buildings were seen and the new eement basement floors, which will add to the comfort and sanitary condition. Although during his time for rest, we found the Superintendent busy having repairs and work done on the plant, preparing in good time for the opening of the session).

Prof. E. McK. Goodwin, Principal.

MORGANTON.

The appropriation for snpport is \$46,000, and a special appropriation of \$4,250 per annum for two years for putting in duets, eement floors, electric-light plant, repairs on boiler house, and grading and building roads. The duets, cement floors and electric-light plant have been completed.

The movement of population for the year was as follows:

Boys.	Girls.	Total.
Number on the roll November 30, 1906 118	101	219
Admitted during the fiscal year 33	26	59
Whole number during the year 151	127	278
Discharged (completed the eonrse) 4	4	8
Died		0
Daily average attendance		220
Number on the roll November 30, 1907 124	107	231

None who were eligible have been refused. The compulsory attendnce law has materially increased the number, and the enforcement of the act will necessitate increased room and maintenance fund. We can now accommodate 240. There has been no serious accident or spidemic. The present health of the children is excellent.

Receipts for the fiscal year were\$	57,883.27
Disbursements	62,832.93

Outstanding indebtedness, \$4,949.66. Per capita cost of maintenance was \$190. No changes in the literary or industrial corrses. Carpentry, shoemaking, printing, farming and gardening for the boys; sewing, dressmaking, cooking and general housework for the girls. For recreation, ontdoor games for the boys, and numerons indoor games for the boys and girls. Sanday School International Lessons and lecture every Sunday by the Saperintendent and gentlemen teachers. Ministers preach occasionally. The school is well protected gainst fire.

of the 59 new pupils admitted, congenitally deaf, 17; others became deaf as follows: one at 2 months, one at 6 months, one at 9 months, one at 10 months, two at 1 year, two at 1½ years, three at 2 years, two at 3 years, one at 4 years. Causes: 1 unknown; scarlet lever, 2; typhoid fever, 1; measles, 1; scrofnla, 1; carbuncle in the neck, 1; cold in the head, 1; meningitis, 1; fever and rising in the need, 1; catarrh, 1; abscess, 2; whooping-cough, 1.

E. McK. Goodwin,

Principal.

#### OXFORD ORPHANAGE.

Col. W. J. Hicks, Superintendent.

OXFORD.

The Oxford Orphan Asylum is controlled by the Masons. The State makes an appropriation of \$10,000 per annum towards its support. The following is a table of the movement of population for the

iscal year ending October 31, 1907:

	Boys.	Girls.	Total.
Children on the roll November 1, 1906	136	144	280
Admitted during the year ending Octo-			
ber 31, 1907	50	43	93
Placed in families	5	5	10
Become self-snpporting	S	7	15
Ran away	3	0	3
Died	0	2	2
Remaining October 31, 1907	154	163	317

The capacity of the institution is 320.

Conditions for admission for the white children of the State are that they be really destitute and homeless, sound in body and mind, not under six years of age, seldom over twelve. Physician's certifi-

cate of vaccination is required before reception of child. It is also required that mothers or others who place children in our institution assent to the agreement to surrender control and disposition of the child sent here. The regular ages of discharge are eighteen for girls and sixteen for boys. The Executive Committee passes upon the applications for admission, except in the case of illegitimate children, when the Board of Directors acts. Both sexes are received, and d judge that foreign-born would be received, though we do not know that application has been made for admission of foreign-born chil-

No serious epidemic or accident has occurred during the year. Whooping-cough has prevailed a part of the year. The present health of the children is good, except that a few are afflicted with whooping-cough, not at all in a serious manner,

Chief improvements were additional dining room and storage, etc., with minor improvements to plant.

Industrial training is given in the cottages, the kitchen, dining rooms, shoe shop, printing office, woodworking shop, the Oxford Furniture Factory, the dairy and the farm. Manual training is taught to some extent by the Lady Supervisor, who has made a specialty of this work.

We have eight grades in school, about on a par with the curriculum of the graded schools of our larger North Carolina towns. Three boys and one girl went directly from the institution to enter higher schools last year. Others of the older children who went to their relatives have also entered school. One girl is in the Oxford Semlnary as a day pupil, still residing in the institution.

We are grateful to say that we are well supported at present in keeping the children clad, fed and instructed.

Receipts which may be classed as ordinary or reg-	
ular\$	29,862.03.
Other receipts:	
Woodworking shop and printing office	16,714.52

	(Not including charges of woodworking shop and	
	other departments against this account).	
	Purchase Davidson College half interest in Minne-	
	apolis property	5
	Expense sale this property 10.20	)

Amount invested, \$7.040. Balance on hand November 1, 1907; 5,891,06.

Average number of employees during the year, not including the coodworking shop and printing office workers was about 24.

We have a system of investigation of homes offered children which e desire and are striving to make more thorough. Supervision of ne children after they leave us is exercised through the Masonic dges, the orphan asylum committees of the lodges, on the singing lass tours and at times by a worker from the institution. We hope lso to improve this supervision.

A chief concern and effort throughout our institution is to develop right individuality, to inculcate a spirit of self-help, and, more, of elpfulness to others. Perseveringly and constantly in the cottages, the various industrial departments, in the school, we are mindful f the development of the individuality of the children. We strive to earn their strong and weak tendencies, to encourage the good and orrect the evil, so far as, under God, we are able. As children grow hore efficient and trustworthy they are given more responsibility and reater opportunity for the exercise of their increased power, that hey may be useful here and be better prepared for their lives in the vorld outside.

We desire that this be a more and more efficient institution, aud hat greater and greater care be exercised in reserving its benefits or children who are really destitute and homeless, and for whom ther probably better provision cannot be made. We want it to be a nore nearly ideal institution for homeless children.

In the performance of its distinctive mission I believe that it will ontinue to be maintained and strengthened. W. J. HICKS,

Superintendent.

#### THE OXFORD COLORED ORPHANAGE.

R. Shepard, Superintendent.

OXFORD.

(This orphanage receives from the State \$5,000 per annum and a special appropriation of \$1,250 per year for two years to liquidate ndebtedness. It is under the control of the colored Baptists, with lirectors on the part of the State; also a board of audit appointed by the last As

last Assembly).	Boys.	Girls.	Total.
Children on the roll November 30, 1906.	41	62	103
Admitted during the year ending No-			
vember 30, 1907			31
Placed in families			3
Become self-supporting			9
Whole number discharged			19
Died			0
Remaining November 30, 1907			105

Admitted to high schools, 5.

Children are received from three to twelve years old. They must be healthy and sound in mind. Both sexes are received. Discharged when they are able to look after themselves. Present capacity of the institution, 130.

There have been no improvements or alterations during the year. One fire extinguisher, and the buildings are insured. No sewerage system. There has been no accident or epidemic. The general health of the children is very good. The children are taught a common-school course and general housework and sewing.

Receipts for the fiscal year\$10,50	00.74
Disbursements 10,5	16.50

\$ 54.24

There is no system of oversight of children after leaving the institution. We endeavor to make each child responsible for some special work, giving him credit when it is done well, and older children are allowed a small sum of money for extra work.

Remarks.—The Orphanage is greatly in need of better buildings and equipment for industrial training. I tendered my resignation to serve as financial agent. ROBERT SHEEARD.

Former Superintendent.

#### SOLDIERS' HOME.

Capt. R. H. Brooks, Superintendent.

RALEIGH.

The annual appropriation for maintenance is \$15,000. A special sum of \$5,000 (83,000 of which was to be paid in 1907 and \$2,000 in 1908) was given for supplying water for fire protection, additional wings to the hospital, and heating apparatus for the same and steam laundry. Also \$250 per annum for the special purpose of caring for the Confederate Soldiers' Cemetery, where the veteraus who die at the Home are generally buried; this amount to be paid to the Wake County Memorial Association, which has the care of the cemetery.

The following is the table of the movement of population for 1907:

Number on the roll November 30, 1906	137
Admitted during the fiscal year	51
Whole number in charge during the year	188
Number discharged during the year	12
Died	32
Abseut on furlough	14
Remaining November 30, 1907	144

Percentage of mortality upon the whole number cared for, 20. Average age of the veterans, 70. General health, fair, considering their age. Three in the cottage for the tuberculous. Number now present in the hospital, 33; average uumber, 27. A trained uurse and two white women as assistauts have charge of the hospital. This change is a great improvement, and adds to the comfort of the sick, while relieving Mrs. Brooks, upon whom this has been a heavy though loving charge.

Receipts and dishursements for support, \$15,000. Per capita cost of maintenance, \$104. None have been refused for want of room.

The increased water supply for the protection of the Home against fire has been effected, and the annex to the hospital is nearly completed. The old soldiers are comfortable and well cared for. There is a garden, which supplies fresh vegetables, and the hogs raised on the place will furnish 3,750 pounds of meat.

B. F. Dixon,

Secretary Executive Board.

#### STATE'S PRISON.

# J. S. MANN, Superintendeut.

RALEIGH.

A new drinking-water supply has been added to the Prison. At the farm some new buildings have been added and others repaired. Convicts are employed in railroad building, turupike work and brick-making. Corporal punishment is administered under strict regulation; number of times administered during the year, 136. Other forms of discipline—dark cell, deprivation of time allowance and loss of commutation money. As reward for good conduct the prisoner is given five days per month off his sentence and 50 cents per month in cash paid upon completion of seutence. There is no regular chaplain. Ministers of various denominations hold service ou Sundays at the State's Prison. No religious services at the railroad camps. There is no night school or any provision for teaching the illiterates—nothing but Sunday schools. There is no library. The children are employed upon the farm in the same manner as the older inmates.

The new prisoners are examined physically upon admission to the Prison. During the year there were 21 deaths—8 from tuberculosis. Percentage of deaths from this disease, 38. Special wards for the care of this class. No serious accident or epidemic. Twenty-one escapes; of these, 11 were recaptured and two killed.

In one camp at the farm the black and white prisoners are in separate sleeping apartments; at the other, in different sections of the same large apartment. In the railroad camps and other camps they are not in separate sleeping apartments, but in separate sections of the same apartment.

The following is the table of the movement of population for eleven months (the Prisou year dating from January 1 to December 31, and other State institutions from December 1 to November 30):

	Men.	Women.	Total.
Number of prisoners at the beginning of	f		
fiscal year	623	39	662
Number received during the year	143	11	154
Number discharged or died dnring the			
year	128	8	136
Number at end of fiscal year	638	42	680
Daily average attendance	624	40	664
Average number of officers and em-			
ployees	151	2	153

During the eleven months, January 1 to December 1, 1907, number of prisoners received, 154; of these, 88 could read and write, 66 were tiliterate; 143 males and 11 females. Ages as follows;

Under sixteen	4	
Between sixteen and twenty-one	48	
Between twenty-one and thirty	61	
Between thirty and forty	19	
Between forty and fifty	13	
Between fifty and sixty	7	
Between sixty and seventy	2	
		154
Prisoners are distributed as follows:		
At the Central Prison	83	
At the farm	284	
On railroad work	313	
		680

The prisoners are at the State's Prison, two camps at the farms, five railroad camps (Lumberton, Elkin, Mattamuskeet and two at Washington).

Amount on hand to credit of the Prison and receipts
for the eleven months, January 1 to December 1,
1907\$343,371.43
Dishusements 223 859 78

Of the disbursements, by act of the Legislature \$175,000 was turned over to the Treasurer; also, by act of the Legislature the fund for support of the dangerous insane is paid from the Prison fund, so far \$3,000. Amount now to the credit of the institution, \$23,890.09.

Much of the corn and cotton being still in the fields, and the peanuts not having been threshed, we have been unable as yet to make an estimate of our resources for the present-year.

Yes, prisoners who have committed "mnrder, arson, burglary, rape or attempt to commit rape" are sent to work ontside the State's Prison or State farms. Replying to inquiry, the approval of the Governor being required before convicts are granted the rallroads (referring to roads mentioned in special act of the Assembly), we do not

anticipate embarrassment to the Prison work. The farm could not be cultivated if all the roads were given the maximum number named in their charters.

Replying to question, I certainly think that the road laws of the varions counties should be uniform, and I fully endorse the recommendation of the Governor to the last General Assembly as to road sentences.

J. S. Mann,

Superintendent.

(Governor R. B. Glenn recommended that the maximum sentence of prisoners sent to the chain gangs be four years; convicts with terms exceeding four years to be assigned to the State's Prison).

## STATISTICAL FORM FOR STATE INSTITUTIONS.

(Prepared by the National Conference of Charities and Corrections and adopted by the States).

#### NOTES ON CURRENT EXPENSES.

- 1. Salaries and wages should include salaries of trustees or directors, if any.
- 2. Clothing includes shoes, also material for clothing and shoes if manufactured in the institution.
- 4. Ordinary repairs include all of those which simply maintain the buildings in condition without adding to them. Any repairs which are of the nature of additions should be classed with permanent improvements.
- 5. This item includes everything not otherwise provided for, e. g., furniture, bedding, laundry supplies, medicines, engineer's supplies, postage, freight, library, etc.

#### BROADOAKS SANATORIUM.

(Licensed by State Board of Public Charities).

(Inspected August 8, 1907, by Commissioners A. C. McAlister, Carey J. Huuter and the Secretary, and found satisfactory).

Dr. Isaac M. Taylor, Proprietor.

MOROANTON.

The following table gives the movement of population for the six months ending July 1, 1907:

	Men.	Women.	Total.	
Number of patients remaining	11	13	24	
Admitted	27	16	43	
Whole number treated	38	29	67	
Discharged recovered	7	2	9	
Discharged improved	13	9	22	
Discharged unimproved	7	2	9	
Died	1	2	3	
Whole number removed	28	15	43	
Daily average	13	14	27	
Remaining July 1, 1907	10	15	25	

Of this number, insane, 47; drug habitues, 7; other nervous patients, 13.

Residences by States—North Carolina, 40; South Carolina, 13; Virginia, 5; Tennessee, 3; Florida, 2; and one each from District of Columbia, West Virginia, Georgia and New York.

We have room for 35 patients, and are on the point of building additions to accommodate six more.

Present officers are: Isaac M. Taylor, Resident Physician in charge; Dr. Lewis G. Beall, Resident Assistant; Mrs. Isaac M. Taylor, Acting Matron and Housekeeper.

The departments for men and women are entirely separate. There are four attendants for each sex. A night attendant for each sex is constantly employed.

We have been free from any diseases prevailing. One serious accident, the suicide of a woman in May. The coroner was informed, and deemed it unnecessary to have an inquest.

A refrigerator room has been added to the house, and general improvements going on. Plans for enlargement of the institution have been prepared.

ISAAC M. TAYLOR, M. D.

#### Report December 31, 1907.

This institution was opened September 16, 1901. Dr. Isaac M. Taylor is superintendent, and associated with him as partner and resident assistant physician is Dr. Louis G. Beall.

The following is a table of the movement of population for the six months ending December 31, 1907:

	Men.	Women.	Total.
Number of patients present July 1, 1907,	10	14	24
Number received in six months	26	22	48
Discharged improved	-16	8	24
Discharged not improved	9	4	13
Discharged cured	1	5	6
Died	2_	4	6
Number remaining December 31, 1907	14	15	29
Daily average attendance			26
Average number of officers and em-			
ployees	8	8	16

Capacity of the institution, 35. A night nurse of each sex is on duty every night.

Patients from the following States: North Carolina, 38; South Carolina, 19; Virginia, 4; Tennessee, 3; Georgia, 2; Missouri, 1; New York, 1; Illinois, 1; District of Columbia, 1; West Virginia, 1.

Insane, 54; drug and alcohol cases, 9; other conditions, 9.

No accident or epidemic. The Sanatorium is connected with the town sewerage system. Well protected against fire. We have sufficient hose to reach any part of the building, and two lines to any part which would be probable to catch fire. Fire extinguishers are distributed through the house.

Our minimum rate is \$15 per week, though we have a few permanent patients at \$50 per month. For alcoholic and drug cases the charge is \$25 per week and upward.

There has been a general improvement of the property. No changes are yet complete. We are adding a wing with twelve rooms, a biliard room, and a bath house, which will be ready for use in early spring. It is our purpose immediately to install a complete system of baths for hydrotherapy. The new wing will give especial advantage for the care of disturbed patients. The recent purchase of a cottage on the opposite side of the street will make it possible to receive a class of nervons patients and give them apartments remote from the disturbed classes.

Isaac M. Taylor,

Supt. and Resident Physician.

#### DR. CARROLL'S SANITARIUM.

(Licensed by the Board of Public Charities).

(Inspected by Commissioners Carey J. Hnnter, A. C. McAlister and the Secretary, and found satisfactory).

Dr. Robert S. Carroll, Superintendent.

ASHEVILLE.

Table of the movement of population:

	Men.	Women.	Total.
Number of patients remaining January			
1, 1907	3	5	8
Admitted to July 1, 1907	14	11	25
Whole number treated	17	16	33
Discharged recovered	9		
Discharged improved	11		
Discharged nnimproved	2		
Died	0		
Whole number removed	21		
Daily average	10.5		
Remaining July 1, 1907	12		

Of the number in charge, 11 were insane, 16 drug habitnes. Of the patients in charge, 16 were from North Carolina; others from Georgia, Alabama, Kentucky, New York, District of Columbia, Illinois, Indiana, South Carolina, Pennsylvania, Virginia, Tennessee. Sixteen can be comfortably cared for at a time.

Officers in charge are: Dr. Robert S. Carroll, President; William L. Dunn, Vice-President; L. P. Carroll, Secretary and Treasurer.

Departments for men and women are wholly separated at the Highland Home, but not at the Sanitarinm. Chief attendants are trained marses. There are three male and eight female attendants. Eight applications have been refused for lack of room. No death; no epidemic or serions accident. No changes in the domestic arrangements. Average weekly charge is \$42. Shrubs and ornamental trees have been planted.

The training school for nurses has now eight student nurses. Highschool gradnates only are accepted, and excellent training is being given in the general work of nursing, while special instruction is offered in massage, hydrotherapy and the nursing of mental and nervous cases.

The plant is soon to be enlarged, with plans firmished by a New York architect. The Sanitarium and Home are to be on the same grounds at the Highland Home, and to be up to date in every particular.

ROBERT S. CARROLL, M. D.,

Superintendent.

## Report December 31, 1907.

The institution was opened August 23, 1904. Dr. Robert S. Carroll is president and Miss R. Pettns superintendent. Capacity of the institution, 18.

The following is a table of the movement of population:

	Men.	Women.	Total.
Number present July 1, 1907	3	9	12
Number received during six months	$22_{-}$	9	31
Discharged improved	12	8	20
Discharged not improved	1	2	3
Discharged cured	4	- 2	6
Died	0	1	1
Number remaining at end of six months,	7	6	13
Daily average attendance			10
Average number of employees			16

The chief attendant is a graduate nurse of the Government Hospital at Washington, D. C. There are four male and ten female attendants. No accident or epidemic.

Patients have been received from the following States: North Carolina, 16; Georgia, 6; Sonth Carolina, 4; Kentneky, 4; Tennessee, 3; Virginia, 2; Louisiana, 1; Indiana, 1; Massachusetts, 1; Florida, 1. Of these, 18 were insane and 19 drug cases.

There is good fire protection; private hose and extinguishers and the city fire department. City sewerage. Rates of charges, \$20 to \$75 per week.

Miss Pettus has for a number of years been superintendent of nnrses at Bayview Hospital, Baltimore, and is a woman of excellent preparation and full experience. There is a system of baths at the Sanitarium.

ROBERT S. CARROLL, M. D.,

Superintendent.

#### TELFAIR SANITARIUM.

# (Licensed by State Board of Public Charities).

(Inspected August 7, 1907, by Commissioners Carey J. Hunter, A. C. McAlister and the Secretary, and found satisfactory).

W. C. Ashworth, M. D., President. Asheville.

This institution, for the treatment of inebriates, was opened on April 20, 1907.

From April to July 1st:

	Men.	Women.	Total.
Admitted	 4	0	4
Improved	 4		4

Those present were from North Carolina, South Carolina and Virginia.

Can care comfortably for 100 patients. Departments for men and women are entirely separate. Two attendants—one for each department. Rates are \$100 for whiskey treatment and \$125 for drug habit; in addition, \$7 per week for board. W. C. Ashworth,

President.

President and Medical Director.

# THE McKANNA THREE-DAY LIQUOR CURE HOSPITAL.

(Licensed by the Board of Public Charities).

Dr. J. J. McKanna applied for and was granted license to maintain a sanatorium for the treatment of inebriates at Reidsville. It is a three-story frame building, with steam heat, electric light and call bells. Will accommodate 50. The physician in charge is Dr. B. B. Williams.

Report December 31, 1907.

Dr. B. B. Williams, Sperintendent. Reidsville.

This institution has in charge men only. Capacity, 50. Six attendants. Patients from North Carolina, Virginia and Tennessee. Charges for treatment, \$100.

Number present July 1, 1907	10
Number received during six months 1	81
Cnred 1	S1
Died	0
Daily average attendance 1 to	2
Average number of officers and employees	8

Private sewerage. City fire department protects against fire.

# PRIVATE BENEVOLENT INSTITUTIONS.

#### THE PRESBYTERIAN ORPHANS' HOME.

REV. R. W. BOYD, Superintendent. Barium Springs, Iredell Co.

The Presbyterian Orphans' Home is located at Barium Springs, Iredell County, and is under the control of the Presbyterian Synod of North Carolina.

	Boys.	Girls.	Total.
Number of children remaining October			
31, 1906	60	84	144
Admitted during the year ending Octo-			
ber 31, 1907	7	9	16
Placed in families	0	0	0
Become self-snpporting	3	2	5
Died	1	0	1
Whole number discharged	11	3	14
Remaining October 31, 1907			146

Children of both sexes and of foreign birth or parentage are received, provided parents were residents of the State at the time of their death. Illegitimate children not received if the mother is living. Fatherless children from 6 to 18 years old are taken.

The capacity of the institution is 150. Hand-bnekets as protection against fire. No sewerage; excreta is removed by cart to farm. There has been no serious accident or epidemic. Present health good. Children select their own employment. We do not place them in homes. The literary course comprises ten grades; industrial includes farming, dairying, shop work, printing, sewing, cooking, etc. We are well supported in keeping the children clad, fed and instructed. The institution is growing. Many applicants cannot be received.

Receipts, \$21,602.73; disbursements, \$20,906.34.

R. W. Boyd, Superintendent,

#### BAPTIST ORPHANAGE.

M. L. Kesler, Superintendent.

THOMASVILLE.

The Baptist Orphanage is supported and controlled by the Baptist denomination.

Boys.	Girls.	Total.
Number of children at the beginning of		
fiscal year 166	147	313
Admitted during the year		56

	Boys.	Girls.	Total.
Whole number now present	170	173	343
Died			1
Placed with relatives			18
Become self-supporting			2
Whole number discharged			29

Admitted to college, 1. Capacity of the institution, 370. Both sexes and foreign-born admitted.

Water-works and sewerage. No epidemic or accident. Health of children fine. Children are taught both literary and industrial courses. Oversight of children when they leave the Orphanage.

Total receipts for the year, \$54,023.42; disbursements the same. Net profit on the farm, \$1,173.46. Loss on the machine shop, and a net profit on the shoe shop.

The teaching of vocal music along with the regular work in the school has been the most pleasing success of the year. It has brought new life, and a finer spirit is felt throughout the institution. We have received instruments for a brass band. The Watson and Aydlett buildings have been completed. A laundry has been installed. Bricks are being put on the ground for the Noah Richardson Library. About \$3,000 is on hand for the new infirmary. A number of minor improvements have been added.

M. L. Kesler,

General Manager.

#### THOMPSON ORPHANAGE AND TRAINING INSTITUTION.

REV. WALTER J. SMITH, Superintendent. CHARLOTTE.

This institution is under the control of the Protestant Episcopal Church of North Carolina. Present buildings will accommodate 72.

	Boys.	Girls.	Total.
Admitted during the year ending Octo-			
ber 31, 1907	15	14	29
Placed in families or returned to their			
people	11	8	19
Become self-supporting			
Discharged			
Died			
Remaining October 31, 1907	29	40	69

Yes, illegitimate children are received; must be residents of the State and not under three years old. Boys leave the institution at 14 or 15 and girls at 15 or 16. Both sexes and foreign-born are admitted. No serions accident or cpidemic has occurred during the year. None admitted to colleges or high schools. Two teachers in the literary school, and training on the farm and in domestic service. Sewerage, but not in absolute use. Two hose and three fire extin-

guishers; city fire department. No fixed system of oversight after leaving the Orphanage. We keep out of debt and have a good balance at the end of each year. Receipts, \$8,065.31; disbursements, \$7,636.

WALTER J. SMITH,

Superintendent.

#### METHODIST ORPHANAGE.

REV. JOHN N. COLE, Superinteudent.

RALEIGH.

This Orphauage is maintained and controlled by the North Carolina Conference of the Methodist Episcopal Church, South.

Number of children in charge, 49 boys, 75 girls; total, 124. Both sexes of indigent orphans are received, from 6 to 12 years of age; discharged at 18. Present capacity of the institution, 150. No serious stekness; present health good. A barn has been built and electric lights put in. A system of sewerage and a home for the superintendent are in course of construction. Literary course taught, and sewing, etc. Receipts and disbursements about \$12,000. No system of placing in homes.

REV. JOHN N. COLE,

Superintendent.

# THE CHRISTIAN ORPHANAGE.

REV. JAMES L. FOSTER, Superintendent.

ELON COLLEGE.

This institution has been erected and is controlled by the Sonthern Christian Convention. It was opened the beginning of the present year, and has now in charge 9 boys and 9 girls; total, 18. Both sexes and foreign-born admitted. The authorities must have full control of the children. Received from 5 to 14 years, and discharged at 18. Present capacity of the building, 45. No epidemic or serious sickness; health fine. No system of sewerage or special fire protection as yet. The school arrangements have not been systematized. Children are now taught in the building; they are beginners. We are well supported in the care of the children.

REV. James L. Foster,

Superintendent.

## FRIENDS' ORPHANAGE.

HIGH POINT.

The Orphanage here has been closed.

LIZZIE HENDRICKS.

# ODD FELLOWS' ORPHAN HOME.

# J. F. Brinson, Superintendent.

GOLDSBORO

This Orphanage is located at Goldsboro and is supported and controlled by the members of the Order. It only receives the orphans of the former members

Children of both sexes are admitted between the ages of 6 and 16, and boys depart at 17 and girls at 18. The present capacity is 120. The institution has sewerage. No epidemic or serious accident; general health good. Protection against fire. Some improvements have been made. Printing, farming and housekeeping are taught. Children attend the Goldsboro Graded School. Five are at high schools. Receipts, in round numbers, \$14,000; disbursements, \$0,000.

We think we have the best, the happiest orphanage in the State.

J. F. Brinson,

Superintendent.

#### SACRED HEART ORPHANAGE.

Dr. Dry	r I ro	III	Suporintendent	1	Deragoam

The Roman Catholic Orphanage for girls is located at Belmont, Gaston County. It is under the control of St. Mary's Catholic Church, with Mother Mary Teresa as directress.

Number remaining October 31, 1906 2	3
Admitted during the year ending October 31, 1907	2
Placed in families	1
Died	1
Remaining October 31, 1907 2	4

It is open to Catholic girls, and there is no age limit as to admission and departure. Capacity, 40. The institution has sewerage; no special fire protection. No accident or epidemic during the year. There are industrial as well as literary courses. The amount of receipts and disbursements for the fiscal year was \$363.25. The Sisters of Mercy supply deficiencies from personal funds.

MOTHER MARY TERESA, Directress.

## NORTH CAROLINA CHILDREN'S HOME SOCIETY.

W.	В.	STREETER,	State	Superintendent.	GREEN SEORO.
----	----	-----------	-------	-----------------	--------------

This Society receives children of both sexes under 15 years of age, and places them in families. It is supported by private benevolence.

Number of children on hand May, 1906 11
Received during the year ending May 31, 1907 65
For replacement
Placed in family homes
Adopted 1
Died 3
Become self-supporting 1

We are fairly well supported in caring for the children. The Society has no home or orphanage for temporary care. There are two receiving homes, in Asheville and Raleigh, where children are boarded until placed.

Superintendent and four employees. Receipts, \$7,505.57; disbursements, \$7,450.72.

All children placed in homes since the organization of the Society are visited at least twice a year. Number of requests that we take children, 112; applications for children, 207; applications investigated, 182; visits to children, 286. W. B. STREETER,

Superintendent.

### ELHANAN TRAINING INSTITUTE.

MISS MATTIE PERRY, Superintendent.

MARION.

The Elhanan Training Institute was founded and is owned by Miss Mattie Perry, a follower of the "Holiness" faith. It was opened about eight years ago for the reception of children, also students, young men and women. Miss Perry, upon request, has made the following report of the institution:

No church or organization controls the institution. It is undenominational.

Table of the movement of population:

able of the movement of population.			
	Boys.	Girls.	Total.
Number of children remaining October			
31, 1906	37	58	95
Admitted during the year ending Octo-			
ber 31, 1907, about 40 or 50.			
Placed in families			0
Become self-supporting			6
Died			3
Whole number discharged			47
Remaining October 31, 1907			93

Children under 12 admitted. They are apprenticed. We take any who are homeless. Both sexes received. We have so far had only one foreign-born, a Mexican girl. The capacity of the institution is 200 to 250. No special fire protection. There is no sewerage; excreta thrown off away from the building. No special epidemic or serious accident. Some few have whooping-congh and one is recovering from pnenmonia. Industrial and literary courses are taught.

The teachers give their time. We trust God for support. We have not the exact amount of receipts and disbursements. All we receive is put into the needs of the institution. No system of obtaining homes after training, and no system of oversight after leaving the institution.

Remarks.—We, for lack of means and workers, are not able to keep a record as we should, but trust that the enclosed pamphlet will better enable you to know of the work. All our teachers work and teach without a salary.

MATTLE PERRY.

(The pamphlet states that expenses are about \$15,000 per year. It further states that "There have been few weeks during this time that we have failed to have one or more professions of salvation, sanctification or healing in the institution").

#### ORPHAN HOME AND SCHOOL.

IRA E. COWLING, Superintendent. Dewdrop, Madison Co.

This institution has been incorporated. The sect controlling it is the Church of Christ. We are just beginning the care of children; have not fully completed or furnished the Home yet. Two children in charge. Capacity of present building, 8. Health of children is good. Expect to give the children industrial and literary training, as our best judgment directs. We are not very well supported, but we have well cared for those in charge. Receipts, \$572.80; disbursements, \$630.

Superintendent.

#### NAZARETH ORPHANS' HOME.

J. M. L. Lyerly, Pres. Board of Managers. Crescent.

This Orphanage has been in operation for one year. It is under the control of the Reformed Church of the United States. Children admitted at the age of 4 and discharged at 18. Both sexes and foreign-born received. Now in charge, 5 boys and 7 girls; total, 12. Capacity, 25. The health of the children is good. It is situated in the country. No special fire protection or sewerage. The children are taught farmling. We are well supported in the care of the children.

J. M. L. Lyerly, President Board of Managers.

#### ALEXANDER HOME.

Mrs. C. M. Carson, President.

CHARLOTTE.

This is a private institution, controlled by a board of managers and supported by voluntary contributions. It was established in 1895 and was then designed as a home for foundlings, and an adjoining cottage for old women. During the twelve years of its existence it has cared for 350 children; some kept a short while, until their relatives were in position to care for them; some placed in good Christian homes; several older girls of promise put in boarding schools, and four others sent to the George Junior Republic.

The health record has been remarkable; very little sickness and not a single death among the children. During the year ending April 1, 1907, placed in the Home 50 children; homes secured for 20 of these; two girls sent to a boarding school; two to a reformatory; three convalescents from the hospital received, and other charitable work. The Jennie-Hazelline memorial scholarship established.

				\$146.58
			Mrs. C. M.	Carson,

Mrs. C. M. Carson,
President.

# CHARLOTTE DAY NURSERY.

CHARLOTTE.

This institution was opened in 1902. It is under a board of managers and is controlled by the churches and supported by voluntary contributions. The children of working mothers are cared for from 6 A. M. to 6 P. M., the small fee of 25 cents per week being charged the mother. Children from infants to 10 years of age are received and given a good, nutritious meal at midday. The Nursery is open all the year round and is in the mill section. A matron and one servant in charge. Average monthly expense, \$75. Value of the plant, about \$2,000.

### COLORED ORPHAN HOME OF WESTERN NORTH CAROLINA.

REV. J. PERRY, Superintendent.

WINSTON-SALEM.

The Colored Orphan Home of Western North Carolina is located near Winston-Salem. It is under the control of trustees appointed by the churches.

	Boys.	Girls.	Total.
Number of children remaining October			
31, 1906	4	3	7
Admitted during the year ending Octo-			
ber 31, 1907			
Remaining October 31, 1907	11	4	15

Children who are orphans, both sexes, are received. Capacity of the institution, 20. The orphanage is not quite two years old. It has neither fire protection nor sewerage; excreta removed in carts. No accident during the year; general health good. No system for obtaining homes or oversight of children after leaving the institution. Boys are taught farming; the girls housekeeping and cooking, sewing, laundering. They are well fed, not so well clothed, and poor arrangements as yet for school. Children are received from infancy to 12 years of age; discharged from 10 upward. Total amount raised since the orphanage was opened, \$1,305.08, of which \$565.29 was sent in as contributions. Since it was opened, August, 1906, we have sheltered 17 children. Died, 1; returned to relatives, 2; ran away, 1. Indebtedness, \$2,500.

Superintendent.

# SOUTHERN ORPHANAGE AND INDUSTRIAL TRAINING SCHOOL FOR COLORED YOUTH.

W. H. Quick, Superintendent.

SANFORD.

This institution has been chartered. W. H. Quick, Superintendent. It is nonsectarian; has been in operation about eighteen months. Placed in families, 21 children; become self-supporting, 2; discharged, 2. Children will be received from 5 to 12 years. Both sexes admitted. We do not own the house used, but are renting hall for teaching, and giving our residence, etc., for sleeping. We are trying to build a dormitory. Received April 22, 1905, to the present time, \$80; disbursed during same time, \$290.

Superintendent.

#### CRITTENTON HOME.

MISS ELIZABETH A. NIEMANN, R. N., Supt.

CHARLOTTE.

This rescue home was opened June 27, 1905, at 513 North McDowell Street, Charlotte. It is under the management of a board composed of members from each Protestant Church. Girls who have left the right path and truly want to return to it received. No slum cases are taken.

	Women.	Children.

Leading reformed lives and become self-support	t-	
ing	. 12	

Two of these are married. Mothers retain supervision of their children. There is a system of oversight after they leave the institution. The institution has good fire protection, water supply and sewerage. It is supported by the churches and private charity. The plant is valued at 80,000. Expenses for one month, \$150.

ELIZABETH A. NIEMANN, R. N.

### LINDLEY TRAINING SCHOOL.

#### ISABELLA R. WHALLON, Matron.

ASHEVILLE.

This institution is a rescne home for girls. It was opened about twelve years ago, is interdenominational and is supported by voluntary contributions. It is five miles from the city. The buildings cost about \$8,000 and the land (28 acres) \$2,000. A farmer and his family occupy a cottage on the place and cultivate the farm and do the outside work. A matron and assistant have control of the institution. When it is possible the girl seeking admission pays something for board—from \$5 to \$10 or more per month. In addition, they must assist in the cooking, cleaning, washing, etc. Every girl received must make voluntary application and agree to obey the rules. We prefer that girls should remain two years to become well established. When they have no friends to care for them we place them in service in good homes. We sometimes find homes for the children, but as a rule we find it best not to part a child from its mother.

The current expenses amount to \$2,000 per annum, aside from the products of the farm, which are considerable. We keep a horse and two cows. No special fire protection and no sewerage. Water from good well.

	Girls.	Children.

Of the whole number received since the opening of the institution (200), one-half have been reclaimed.

Mrs. M. E. Hilliard,

Acting President,

### REST COTTAGE.

### MISS WINIFRED COX, Matron.

GREENSBORO.

This Cottage is a rescue home and is under the control of the Apostolic Holiness Church of Greensboro. It is managed by a board of trustees. Friendless girls and their children are received.

The work was begun in 1903, in a rented building. In 1906 the present home, a 16-room house, was opened.

		V	Vomen.	Children.
Number in charge October 31, 1906			5	3
Number admitted during the year			30	15
Died			2	

The greater number have become self-supporting and are leading good lives. A partial oversight is kept of immates leaving the Cottage. No special fire protection. Well water. No sewerage. Supported by contributions. The plant is valued at \$3,300.

WINIFRED COX,

Matron.

### FAITH COTTAGE AND ELIADA ORPHANAGE.

LUCIUS B. COMPTON, Superintendent.

ASHEVILLE.

Faith Cottage is a resene home, located at 53 Atkinson Street, Asheville. Under the same management is Eliada Orphanage, for homeless and destitute children, and especially children rescued from the slums. Faith Cottage is a two-story building of seventeen rooms, situated on a beautiful little hill, surrounded by two acres of land. The Orphanage is a three-story building, with twenty-four rooms; nine acres. The two plants are valued at \$10,000. The home was opened June 2, 1903; the Orphanage, June, 1906. It is not controlled by any church or organization. It is supported by freewill offerings, a faith work. Condition for admission is a willingness to forsake former life. Discharged when fit to take position or return to friends, or when unwilling to comply with rules.

	Women.	Children.	Total.

#### ASSOCIATED CHARITIES.

Dry D C	Comparation	Superintendent	

RALEIGH.

The following is a report of the Associated Charities for its fiscal year—subscriptions received during the year, \$2,210.45; disbursements, \$2,015.03; balance in bank, \$711.28;

Times help has been extended	1.598
Times applicants have been refused	
Number of visits	1,212
Fnnerals	7
Persons sent to their homes	30
Employment found for	67
Baskets of food distributed on Thanksgiving Day	342
Homes found for helpless children	14
Second-hand clothing given out from the office	1,050

A sewing room is run in connection with the Charities to teach unskilled women.

There is a governing board of twelve influential men, and a general committee of twenty-eight ladies, representing the various churches and directly working among the poor and unfortunate.

The superintendent and his assistant have an office, which is open from 9 to 12 daily to receive applications for aid.

Street begging has been almost eliminated.

R. S. Stephenson, Superintendent.

### ASSOCIATED CHARITIES.

MISS ANNIE GROGAN, Secretary.

WINSTON-SALEM.

This organization is to uplift and assist the poor of the city. Mrs. J. K. Norfleet, President.

Receipts for the year, \$1,136.14; disbursements, \$1,443.60. There was a balance of \$400 from the previous year. We have a small sum set aside for the employment of a nurse when needed. Street begging has decreased. No constructive work, such as sewing school or classes, yet introduced.

Annie Grogan,

Secretary.

#### ASSOCIATED CHARITIES.

MISS CARRIE L. PRICE, Secretary.

WILMINGTON.

This organization was effected in October, 1893. Number of families aided during the year, 127. Receipts, \$2,445.62, and expenditures,

\$2,356.55. There is a district nurse, but not supported by the organization. The churches give outings to the poor during the hot weather. There is no special constructive work in connection with the association. Street begging has been almost abolished. We are fairly well supported. The public is informed through the newspapers of the progress of the work.

CARRIE L. PRICE,

Secretary.

### ASSOCIATED CHARITIES.

### H. E. LANCE, Secretary.

DURHAM.

The Associated Charities office was established in October, 1903. For this year the churches pledge \$395, and the city \$300 per annum. Applications for aid are made at the office. We visit the poor, encourage them to send their children to school, etc. The city has forbidden street begging. Not very well supported as yet. The public luformed of the progress of the work through the papers.

H. E. Lance, Secretary.

#### ASSOCIATED CHARITIES.

D. E. Bowers, Superintendent.

High Point. -

The association was organized in December, 1903. The pastor and one member of his congregation from each church constitute the board of directors. There are ward superintendents, who report cases to the general superintendent, and all orders are given by him. No money is given. The work is supported by popular subscription, secured at a union meeting of all the churches. At this general meeting we have a sermon suitable to the occasion.

Helped during the year, 138 individuals, 37 families. No record kept of those refused assistance. Receipts for the year, \$350; expenditures, \$200. No outings and no special means for constructive work. Street begging has been decreased. Reports of the work are made to the public at the annual meeting, and then published in the papers.

D. E. Bowers,

Superintendent.

#### LADIES' BENEVOLENT SOCIETY.

Mrs. S. Weil, President.

Goldsboro.

The Benevolent Society is more than twenty years old. It is non-sectarian and tries to give adequate relief after investigation. There are relief and visiting committees. A ward was furnished in the hospital as a memorial to Miss Mary Carrow, the founder of this society.

Assistance is given a day narsery in the mill section. The home environments are being improved. There are regular members, who pay fees, and the general public generously gives subscriptions. It has almost stopped street begging. Number of families aided during the year, 51. Receipts, \$750; expenditures, \$488.21. We try to meet the more argent needs and to teach the poor to help themselves. Mothers' meetings once a month. The progress of the work is shown by the annual published report of the Society and through the newspapers.

Mrs. S. Well,

President.

#### THE CATHERINE KENNEDY HOME.

WILMINGTON.

The Benevolent Society, which was chartered over fifty years ago, has established this Home for old ladies who are nnable to make a living and who have had advantages in times past. An annex has recently been added to the building, and we now have twenty rooms. Four of these are rented, to help with expenses. It is maintained by interest on investments mainly; \$100 is charged for admission fee. It is insured. Has good sewerage and water supply. Number in charge, 9, and another will soon be admitted. Average annual expenses, about \$1,100. It is undenominational.

Mrs. Roger Moore,

President L. B. Society.

#### ST. LUKE'S HOME.

Mrs. B. F. Dixon, Leader.

RALEIGH.

St. Luke's Home for old ladies was established in 1895 by St. Luke's Circle of King's Danghters. It is maintained by the efforts of the Circle and assistance of friends. It is a comfortable refinge for old ladies who have been reduced in circumstances. No fees for admission.

Number in the Home on October 31, 1906	
Admitted during the year ending October 31, 1907 3	3
Died 4	t
Discharged 1	
Number remaining October 31, 1907	

City fire department. Good sewerage and water supply. Average annual expenditure, \$1,200.

Mrs. B. F. Dixon,
Leader St. Luke's Circle.

### THE SALEM HOME.

Mrs. M. E. Vogler, President.

WINSTON-SALEM.

This institution was founded in 1887. It is located on South Main Street, Salem, and is a comfortable home for old ladies.

Admitted to October 31, 1907 5	,
Died 1	
Discharged (to other homes) 5	
Remaining October 31, 1907 7	

Expenditures and receipts, between six and seven hundred dollars. Much help in gifts of food and clothing. Modern plumbing has been added during the year. No condition for admission; any needy womau or child who has no one to help her.

Mrs. M. E. Vogler,

President.

# HOSPITALS.

### JAMES WALKER MEMORIAL HOSPITAL.

Dr. Robert B. Slocum, Superintendent. Wilmington.

This hospital was established in 1902 and is under control of a board of managers. It does not admit chronic, incurable or contagious diseases.

Number of patients remaining October 31, 1906	35
Admitted during the year ending October 31, 1907 8	79
Whole number treated 9	14
Died	96
Discharged 7	69
Remaining October 31, 1907	49

Percentage of mortality upon whole number treated, 10. Available beds, 90. Nurses, 19. Schedule of charges for pay patients, \$7 to \$25 per week. Charity patients, 690. Two city hydrants on the place. There is a small endowment fund. One floor of the main building was remodeled. X-ray outfit and fire escapes added during the year. The hospital receives \$400 from the city and \$600 from the county each month for charity patients. Receipts for the year, \$27,685.46; disbursements, \$25,885.46. No insane or inebriates treated.

Superintendent.

#### ASHEVILLE MISSION HOSPITAL.

MISS CAROLINE MARQUES, Superintendent. ASHEVILLE.

This hospital was organized in 1885. It is located on Charlotte and Woodfin streets. It is under a board of twelve managers.

Superintendent.

### REX HOSPITAL.

MISS ELINOR S. PHILLIPS, Superintendent.

Raleigh.

This hospital is nuder a board of trustees appointed through provisions of the will of John Rex, who left a sum for its establishment. This money became of little value through the changes caused by the late war, but increased sufficiently, after a number of years, to establish the present hospital. The city gives \$2,000 per annum for the care of the poor.

Number of patients remaining February 28, 1907	15
Admitted to November 1	358
Died	31
Remaining October 31, 1907	17

Nurses, 8. Charity patients during the year, 122. Schedule of charges—for pay patients, 87 per week in the ward and \$15 per week for private room. No special protection against fire, except city department. Amount of receipts, \$7,517.87, and expenditures, \$6,935. No inebriates or insane treated. No additions or alterations. Some endowment given by John Rex. We need a new hospital building and furnishings.

ELINOR Š. PHILLIPS,

Superintendent.

#### ST. PETER'S HOSPITAL.

Miss S. F. Cowling, Superintendent. Charle	TTE.
It is under the control of a board of lady managers.	
Number of patients remaining October 31, 1906	23
Admitted during the year ending October 31, 1907	517
Whole number treated	540
Died	17
Disabagged	401

Remaining October 31, 1907.....

There are 10 free beds and 30 pay beds; 18 nurses. Charity patients, 115. Schedule of charges, from \$7 to \$25 a week. City fire department for protection against fire. Disbursements and receipts, \$12,500. Insane and inebriates not treated, except temporary care. A \$15,000 addition to the hospital was opened in March—three stories and twenty rooms. There is no endowment.

Mrs. John Wilkes, President.

#### THE THERMAL BELT SANITARIUM.

Dr. W. R. Engel, Physician in Charge. Tryon

This is a private hospital for the treatment of medical and snrgical tubercular diseases. In addition, we have one brilding reserved for the treatment of surgical cases of other nature than tubercular. The institution has been open since the middle of March last, and receipts and expenditures up to date have been about the same. However, we have added a number of instruments necessary for the success of the work. There is no place about here where we can take colored people for operation, and there is much need for such a place. And there are many poor people who need treatment and are unable to pay for it. While it is our wish to do all we can for them, we are not able to take care of and treat them in our institution free of

charge. An endowed ward for the treatment of the poor is one of the needs of the hospital.

This institution is owned by private individuals. No insane or inebriates treated. Since March 1st the movement of population has been as follows:

Whole number treated	26
Died	- 8
Discharged	16
Remaining October 31, 1907	7

Available beds, 20. Two or three trained nnrses, as demands require. Charges, \$25 to \$35 per week. One charity patient. Waterworks as protection against fire. E. McQueen Salley, M. D., President.

WILSON SANATORIUM.

MISS CLEONE HOBBS, Superintendent. WILSON.

This hospital is a private enterprise, controlled by Drs. C. E. Moore and E. T. Dickenson.

The following is the table of movement of population for the fiscal year:

Number of patients remaining October 31, 1906	12
Admitted during the year ending October 31, 1907	420
Whole number treated	432
Died	9
Discharged	423
Remaining October 31, 1907	10

Percentage of mortality upon whole number treated, 2 per cent. Available beds, 25. Nurses, 12. Schedule of charges, \$2 and \$3 per day. For protection against fire, two-inch hose on every floor, and extinguishers. No changes or additions to the plant. No inebriates or insane treated. No charity patients. The hospital needs an endowment of ten beds for charity patients.

DRS. C. E. MOORE and E. T. DICKENSON.

#### ST. LUKE'S HOSPITAL.

MISS FANNIE D. SMITH, Superintendent. FAYETTEVILLE.

This institution is a private hospital, under control of Dr. J. H. Marsh.

Number of patients remaining	g October 31, 1906	14
Admitted during the year end	ing October 31, 1907	220

Whole number treated	234
Died	6
Discharged	216
Remaining October 31 1907	19

Available beds, 20. Nurses, 7. Schedule of charges for rooms, \$12.50 to \$18 per week. There are hydrants and hose, also city fire department, as protection against fire.

J. H. Marsh, M. D.

### RUTHERFORD HOSPITAL

 Drs. Norris and Biggs.
 Rutherfordon.

 This is a private hospital, opened October 9, 1906.
 143

 Admitted during the year ending October 31, 1907.
 168

 Out patients
 373

 Died
 11

 Discharged
 143

 Remaining October 31, 1907.
 14

Available beds, 30. Nurses, 4. Charity patients, 12 or 15. Charges for pay patients, \$10 to \$20 per week. No insane or inepriates treated. A nurses' home has been added during the year.

HENRY NORRIS, M. D.

# INSTITUTIONS EXCLUSIVELY FOR THE COLORED.

### ST. AGNES' HOSPITAL AND TRAINING SCHOOL FOR NURSES.

Mrs. A. B. Hunter, Superintendent.

RALEIGH.

St. Agnes' Hospital and Training School was organized in October, 1896. Mrs. A. B. Hunter, Superintendent; Dr. H. A. Royster, Surgeon in Charge; Dr. Catharine P. Hayden, Resident Physician. This institution is maintained in connection with St. Augustine's School for the Colored Race, under the charge of the Protestant Episcopal Church and controlled by a board of trustees. It receives no aid from county or city, though doing much charity work among the colored population of the town.

Number of patients remaining October 31, 1906	16
Admitted during the year ending October 31, 1907 1'	72
Born	12
Died	17
Discharged 1	62
Remaining October 31, 1907	21

Number of available beds, 23. Number of nurses, 9; probationers, 8. Schedule of charges, 83 a week in the wards, 85 for private room. There are a large water tank and hose on the school grounds as protection against fire. No insane or inchriates treated. There is no endowment fund. A new stone building is being erected at a cost of over \$15,000. This will have all modern equipment. We greatly need the interest and practical help of the citizens of Raleigh and the State. We take a number of patients from both. We need cash for the new building, and also gifts in kind to assist in defraying current expenses, which are heavy.

Mrs. A. B. Hunter,

Superintendent.

#### LEONARD MEDICAL SCHOOL HOSPITAL, SHAW UNIVERSITY.

M. D. Bowen, Superintendent.

RALEIGH.

This institution was erected in 1885. It is open only during the session of the school, from October to April 15th.

	Men.	Women.	Total.
Admitted during the hospital year	61	31	92
Died	- 6	5	11
Discharged	55	30	85

Available beds, 23. One head nurse; two attendants. Schedule of charges, \$1.50 per week. Practically all charity patients, as they are

rarely able to pay. Receipts, \$133; disbursements, \$4,365. No insane or inebriates treated. City fire department, and water on each floor, finrish protection. It has no endowment. The convalescent wards for surgical cases are in the Leonard medical building, on Wilmington Street. In these wards three additional rooms have been fitted up during the year—one for the eye patients, one for women and one for the nurses' sleeping room. The walls have been tinted a light gray. Through the kindness of friends, the reception room of the hospital has been papered, painted and refurnished, making a very attractive room.

DR. CHARLES F. MESERVE,

President of Shaw University.

### GRAHAM HOSPITAL.

This hospital, for the care of the colored sick, has been discontinued since the erection of St. Leo's Hospital by the Roman Catholics. A fine ward has been set apart for the use of my race in the latter.

REV. S. S. SEVIER.

#### SLATER HOSPITAL.

A. J. Brown, Superintendent.

WINSTON-SALEM.

This institution is for the care of the colored sick. The cities of Winston and Salem give, respectively, \$200 and \$50.

	Men.	Women.	Total.
Number in charge October 31, 1906	5	10	15
Admitted during the year	22	15	37
Died			3
Discharged			49
Remaining October 31, 1907	1	2	3

Available beds, 24. Nurses, 5. Charity patients during the year, 19. Schedule of charges, \$3 in the general ward, \$4 in private ward. Protection against fire, small garden hose, city fire departments. Receipts, \$778.11; expenditures, \$998.15. No insane or inebriates treated. No changes or improvements. We need bed clothing and a nurse.

A. J. Brown,

Superintendent.

### PICKFORD SANITARIUM.

Dr. L. A. Scruggs, Superintendent.

SOUTHERN PINES.

This is a sanitarium for colored consumptives and is open from November to May. It is maintained by contributions chiefly.

Remaining October 31, 1906	8
Admitted during the year	9
Died	1
Discharged	16

Available beds, 24. One nurse. Charity patients, 12. Charges, \$15 per month. No special means of protection against fire. Amount of receipts and expenditures, \$350.

L. A. Scruggs, M. D.,

Superint endent.

(This institution was organized and chartered in May, 1896, prominent gentlemen giving it their endorsement and acting on the board of directors. It is probably the only institution exclusively for the care of the tuberculous negro in the country. It deserves the encouragement and the assistance of our philanthropists).

#### LINCOLN HOSPITAL

### C. H. SHEPARD, M. D., Superintendent,

DUBHAM.

This hospital is for the colored race and is managed by a board of trustees. It receives \$125 per month from the city. The trustees make a monthly report to the city of expenditures.

	Men.	Women.	Total.
Number remaining October 31, 1906	8	10	18
Admitted during the year			160
Whole number treated			171
Died			S
Discharged			151
Remaining October 31, 1907			18

Available beds, 21. Nurses, 7. Charity patients, 80. Special fire protection; city fire department. Receipts, \$2,000; expenditures, \$2,400. No insane or inebriates treated. An additional ward room is needed.

C. H. Sheffard, M. D.,

Superintendent.

#### GOOD SAMARITAN HOSPITAL.

Mrs. Ann Buchanan, Matron.

CHARLOTTE.

The hospital is under the management of a board of managers appointed by the Bishop of the Episcopal Church of North Carolina Diocese. No funds from the city. City, county, railroads, etc., pay \$1 per day for employees sent to the hospital. Other negroes pay what they can.

Number of patients remaining October 31, 1906	3
Number admitted during the fiscal year	202
Whole number treated	205
Died	22
Remaining October 31, 1907	8

Available beds, 14. Nnrses, 3. More than half of the total number were charity patients. City fire department protects against fire. Expenditures and receipts, about \$2,400 per year. No insane or inebriates treated. No changes during the year. No endowment. It needs an endowment—some gifts which will insure its permanent existence.

Mrs. John Wilkes.

President Board of Managers.

# COUNTY HOMES.

### ALAMANCE.

The Home is as heretofore reported. Now in charge, 17. Several feeble-minded; one colored male confined; one epileptic. J. H. Tarpley, Superintendent, Bnrlington; salary, \$25 per month and board of self and family. Physician, Dr. George W. Long, Graham; salary, \$150 per annum. Number in charge September 1, 1906, 18; since admitted to March 1, 1907, 4; died, 3—one bnrnt, consumption, old age. The sick are as well cared for as can be without traited nurses. One can be employed in light work. Condition of kitchen, fairly good. Occasional religious services; no regular arrangement. One white child, five years old. One inmate confined at times in order to control. Outdoor relief to 69 persons, at a monthly per capita of \$1.46. Other items as previously reported. General impression of the management, favorable.

Remarks.—We find a good record book, and well kept, at the Home.

REV. JEREMIAH W. HOLT.

P. H. FLEMING.

Received April 12, 1907. J. A. Turrentine.

### SECOND REPORT.

The Home is as heretofore. Now in charge, 20. Iusane, one idiotic colored girl and a colored man. Confined, 1. Epileptic, 2. Physician is Dr. Maurice Montgomery. Died during six months, 5—two from consumption. Premises and kitchen in good condition. Occasional confinement for unruly conduct. One colored girl not normal. Receiving ontdoor relief, 63. General impression is favorable. Other items as previously reported.

REV. JEREMIAH W. HOLT,

P. H. FLEMING, J. A. TURRENTINE.

Received September 10, 1907.

### BEAUFORT.

The buildings are as heretofore reported. Now confiued, 14—two insane, one confined. Superintendent is satisfactory. The physician is Dr. D. T. Tayloe; receives \$200 per year. Admitted in six mouths, 2; died, 3. Premises neat and in good condition. Kitchen good. Eight or ten acres in cultivation; crops are oats, coru, etc. Religious services nearly every Sunday. Two small colored children. Outdoor relief to S5, at an average per eapita of \$2 per month. General impression is favorable.

Received October 14, 1907.

J. M. GALLAGHER, M. D.

### BRUNSWICK.

The Home has two frame buildings; twelve rooms for whites and ten for colored; ventilated by windows and doors. No fire protection except buckets. Cistern and well. Stoves. Can accommodate 30; now in charge, 7. Bedridden, 2; insane, none; epileptics, 3. Wilson Wescott, Southport, is Superintendent; salary, \$30 per month and board. He is satisfactory. Dr. J. Arthur Dosher is physician in charge; \$125 per annum. Number in charge September 1, 1906, 7; since admitted to March 1, 1907, 1; died, 1—apoplexy. Sick well cared for. Two can do light work. It is an ideal Home, with new buildings; above the average County Home. Condition of kitchen, very good. One hundred acres of very good land; eight in cultivation; potatoes and vegetables raised. Shaded. No provision for regular religious services. No children. No punishment. Some outdoor relief. General impression is favorable.

Received March 5, 1907. Dr. J. Arthur Dosher.

### BURKE.

The County Home is as heretofore reported. Can accommodate 30; now in charge, 26. One helpless; four able to do light work. One negro girl idiot; one white female insane at times; two epileptics. Monthly per capita cost, \$4.50, and proceeds of farm. C. E. Tate, Morganton, is Superintendent, and is satisfactory. Dr. J. L. Laxton, Morganton, is physician, at \$3 per visit. Number in charge September 1, 1906, 24; since admitted to March 1, 1907, 4; died, one epileptic. The sick are well cared for, and are attended by the keeper's family. Condition of premises, very good. Kitchen neat and clean. One hundred acres rather poor land; 22 in cultivation; wheat and vegetables raised. Shaded. Religions services. One white and two negro children idiots. Some ontdoor relief. General impression is favorable.

Remarks.—The Home is in fine shape and well kept.

Received April 6, 1907.

ROBERT T. CLAYWELL.

### SECOND REPORT.

The Home bnilding is a new structure and is as heretofore reported. It can accommodate 30; now in charge, 21 whites and 5 colored. No insane; three idiotic children. C. E. Tate, Superintendent. He is a very satisfactory officer. Physician in charge, J. L. Laxton, Morganton; salary, \$500. Admitted in six months, 15; died, 6; discharged, 6. The sick are well cared for and have good attention. Kitchen neat and clean. One hundred and one acres; 25 in cultivation. Religious services.

Remarks.—It is as well-kept a County Home as there is in North Carolina.

Received November 14, 1907.

ROBERT T. CLAYWELL.

#### CALDWELL.

The Home is as previously reported as to buildings. Now in charge, 7. Granville Sherrill, Lenoir, is the Superintendent. He receives \$5 per month for each inmate and farm rent free. He is satisfactory. Dr. C. L. Wilson, Lenoir, is the physician; paid by the visit. No deaths. Three able to assist in the farm work. Kitchen in good condition. No children. About 45 persons are kept in private families. General impression of the management of the Home is favorable.

Remarks.—Onr county onght to have a better equipped Home for the Aged and Infirm. Our keeper does as well as can be expected, and the inmates are comfortable, but the county should soon provide a more beautiful, attractive and pleasant place.

J. V. McCall, Received March 16, 1907.

Chairman.

SECOND REPORT

The Home is unchanged since the last report. Received September 20, 1907.

J. V. McCall.

#### CAMDEN.

The Home is as heretofore reported as to buildings. No insane. In charge, 2; died in six months, 1; admitted, 1. Buildings comparatively new. No outdoor relief at this time.

Remarks.—Prospects are fairly good this year for the crop and for good prices, the result of which always means a relief for the poor who can work, and at the same time places those who are in good circumstances in a better condition to contribute more liberally to objects of charity, thereby entting off the demand that is usually made upon the Board of County Commissioners for relief.

Received September 27, 1907.

George H. Riggs.

### CARTERET.

This county has no Home.

#### CASWELL.

The Home is as heretofore reported. Now in charge, 23; one white female insane; no epileptics; one death—anenrism. The sick are well cared for. Kitchen in good condition. Shaded grounds. No religious services. No children. Outdoor relief to 80, at \$1 per month. General impression of the management is favorable.

Received March 6, 1907.

S. A. MALLOY, M. D.

#### SECOND REPORT.

• The Home is as heretofore reported. Now in charge, 18; admitted during six months, 4; deaths, 3. Kitchen good. No children. Religions services. Outdoor relief to 80, at 75 cents per month. General impression is favorable.

Received September 13, 1907.

S. A. Malloy, M. D.

### CATAWBA.

The Home is six miles from the county seat. Six buildings for inmates, one for the keeper—all frame; two to three rooms celled and painted, with porches in front; very comfortable; ventilated by windows and doors. Well and two buckets to a chain. Open fires. Can accommodate from 25 to 30. Now in charge, 20; five or six able to do light work; three helpless. Insane, two white females, two colored males. Confined, one white girl 14 years old—epileptic. Robert Hoke, Conover, is Snperintendent; salary, \$325 per annum. He is satisfactory. Dr. J. H. West is physician. Number in charge September 1, 18; admitted, 3; discharged, 1; no death. The houses are arranged in a square in the center of the yard and are in good repair. Kitchen nice and clean. Two hundred acres, about one-half in cultivation. Crops are wheat, corn, oats, cotton and vegetables; some fruit trees. Not well shaded. Religious services monthly. One negro (diot boy. General impression of the management is favorable.

Remarks.—Our farm, with the present keeper and his management, makes the Home nearly self-supporting.

Received March 5, 1907.

REV. M. A. ABERNETHY.

### CHATHAM.

The Home is four miles from the county seat. Twelve frame buildings, 18 x 38; ventilated by windows and doors; open fires. Well and spring. Now in charge, 35; three insane—one white woman and a negro man and woman; epileptic, 7. Good, plain food, at cost of \$1.50 per month. W. H. Ward is Superintendent; salary, \$300 per year and board for self and family. The physician is Dr. J. N. Taylor, Bynum. One hundred and twenty dollars per year for Home and Jail. No deaths. Premises fairly good. A steam-heated building is needed. Kitchen good. Six hundred acres of fair land; 150 in cultivation; corn, peas, potatoes and vegetables raised and used on the place. There is a chapel, and services by the different denominations. There are two young boys sentenced to the Home (cases for a reformatory). Inmates sometimes locked up for using bad language and breaking the rules. Ontdoor relief to 100 persons, at \$20 per annum. General impression is favorable.

Received December 26, 1907.

Mrs. H. A. London.

### CHOWAN.

The Snperintendent's dwelling has been replaced by a better one, and a new building has been erected for the white inmates. Pnmp, with very good water. Now in charge, 5; insane, two colored women; no epileptics. Miles M. Harrell, Cisco, is the Superintendent. He receives \$20 per month and farming privileges. Physician is H. M. S. Cason, Edenton; receives \$300 per year. No children. Nine persons receive ontdoor relief, at \$2.38 per month. The one white male is consumptive. General impression is favorable.

Received September 30, 1907.

ROBERT B. DRANE.

# CLAY

The Home is a frame building. No fire protection. Ventilated by windows. One in charge. No insane; no children. Asker Scroggs, Hayesville, is Saperintendent. Dr. R. B. Killian, physician. Kitchen in good condition. Other items as previously reported. General impression of the management is favorable.

Remarks.—Some small buildings have been re-covered. The Home is in better condition than it was at the last report.

Received March 23, 1907.

L. F. SHUFORD.

#### SECOND REPORT.

The Home is two miles from the connty seat; three frame buildings. Now in charge, 1. High altitude; very well arranged. Kitchen good. Twenty-five acres in cultivation. Other items as previously reported.

Remarks.—I consider the County Home in good condition and in good hands.

L. F. SHUFORD.

#### DARE.

The Home is two miles from the connty seat. Two frame bnildings, 14 x 24 and 12 x 16, three rooms each; ventilated by windows and doors. Pump. Stoves. Can care for six; now in charge, one; he is a colored man—insane, not confined. Cost of maintenance, about \$90 per annum. Snperintendent receives \$50 and 20-acre farm. Physician's salary, \$30 per year. None admitted and no deaths in six months. Premises fairly good. General impression unfavorable.

Received September 8, 1907.

Received November 18, 1907.

C. L. MANN.

#### DAVIDSON.

The Home is as heretofore reported as to buildings. Now in charge, 27. The Superintendent receives \$4.50 per inmate, monthly, and produce of the farm. He is satisfactory. Physicians are Drs. Hill and Hill, Lexington. Admitted during six months, 3; died, 3. Occasional religious services. Outdoor relief to 60, at \$2.25 per month. General impression is favorable.

Received May 13, 1907.

JAMES SMITH.

SECOND REPORT.

The buildings are the same, with the addition of a small dairy. Now in charge, 23; two insane, one epileptic. Admitted during six months, 1; died, 2. No children. General impression is favorable. Mr. Crotts, Superintendent, has recently died, and successor has not been appointed.

Received October 5, 1907.

JAMES SMITH.

### DAVIE.

The Home is three miles from Mocksville; fonr buildings, one of brick; ventilated by doors and windows. Well water. Open fires. Now in charge, 5; one white man. None bedridden. All colored except one man. One child, 2 years old. None insane. Dr. M. D. Kimbrongh, physician. Fine old oaks give shade. Other items as previously reported.

Remarks.—The Home is not so neatly kept as formerly; still the inmates say they are kindly treated, and that is a good deal, you know. None of the paupers are able to assist in the work at all.

Received March 25, 1907.

IDA G. NAIL.

# DUPLIN.

The Connty Home is to be located within a mile and a half of the county seat, instead of six miles, as at present. A new brick building is to be erected at once.

Received November 11, 1907.

A. P. FARRIOR.

# EDGECOMBE.

The Home is pleasantly situated in a large oak grove. Can accommodate 50. Now in charge, 24. All the food necessary, at \$1.50 per week. Superintendent is satisfactory. Dr. W. J. Thigpen is physician; pay, \$50 per month. Number in charge September 1, 30; since admitted, \$; died, 3—two of these epileptics; discharged, 7. Premises well arranged and in good repair. Kitchen in good condition. Four hundred and fifty-five acres. Horses, cattle and hogs. Corn, peas and peanuts chief crops. Houses shaded. No children. Ontdoor relief to 130, at \$1.50 per month. General impression favorable.

Remarks.—Mr. Gorham, the manager, is a most excellent man, and is kind and attentive to these poor, afflicted people.

Received May 27, 1907,

JAMES R. GASKILL.

### GASTON.

The Home is as heretofore reported as to buildings. Now in charge, 16; five bedridden; one white male insane and confined; one epileptic. All the food they want; bread, meat, vegetables, rice, milk, butter, coffee, molasses, eggs and chickens. Cost, about \$2 per week each. Admitted during six months, 5; deaths, 7—three from old age; two, consumption; one, fits; one from grip. There is no one regularly employed to care for the sick. The keeper looks after them and sees that none suffer. Kitchen neat and clean. Forty acres in cultivation; crops are cotton, corn and vegetables, sold and for the use of the Home. Shaded. Religious services several times a month. One child, 18 months old, with its mother. Outdoor relief to 61, at \$20 per year.

Received July 22, 1907.

J. P. REID.

### SECOND REPORT.

Home is unchanged. In charge, 12—one white man insane, confined. As much food as they want, at \$\$ per month. Three deaths. One hundred and fourteen acres; 45 cultivated. No children. Religious services twice a month. Other items as heretofore reported.

Received October 28, 1907.

J. P. REID.

### GATES.

The Home is half a mile from the county seat; four frame buildings; ventilated by windows. Well water. Stoves. Can accommodate 20; now in charge of the institution, 7—insane, 2; helpless, 4. Plain, wholesome food, at \$1 per week. The Superintendent is Mrs. M. E. Riddick, Gatesville. She receives \$2.50 for each immate; expenses paid by the county. Dr. George D. Williams, Gatesville, is the physician; paid by the visit. In charge September 1, 1906, 6; since admitted, 1. No deaths. The sick are well cared for. The buildings are neat, new honses, recently erected. Kitchen good. Fifteen acres of fair land in cultivation. Shaded. No provision for religious services. No children. General impression is favorable.

MARTIN KELLOGG.

### SECOND REPORT.

The Home is as heretofore. Now in charge, 5. No insane. No children. Died, 1. The buildings are new, comfortable and well situated. General impression is favorable.

Received September 5, 1907.

Received Jnne 18, 1907.

MARTIN KELLOGG.

# HAYWOOD.

The Commissioners have bought a farm and will soon erect modern buildings for the poor at the Home. Present buildings frame; ventilated by windows and doors. Open fires. Good drinking water. Three white females insane; one epileptic. Superintendent is James Moody, Waynesville. He receives \$7 per month for each inmate. Physician is J. F. Abel, Waynesville. Now in charge, 11; died, 2. Present farm and Home are owned by the keeper. One child. Some outdoor relief. General impression is favorable.

Remarks.—I am glad to state that the County Commissioners are taking steps to build a County Home nearer the county seat, which will give Christian women an opportunity to visit the inmates and take more interest in them. Two have died during the last year; one was 108 years old.

Received October 1, 1907.

Mrs. M. J. Branner.

# HENDERSON.

The Home is as heretofore reported. Now in charge, 5; none insane or epileptic. Sufficient food, at cost of \$2 per week. Superintendent is satisfactory. Number in charge September 1, 5. No changes since. They can do quiltmaking or plain sewing. Premises in good condition, neat and clean. No children. Outdoor relief to 40, at an average rate of \$3.

Remarks.—The condition of immates and premises is good, and the immates all say that they are comfortably cared for.

Received March 19, 1907.

Mrs. L. R. Barnwell,

#### SECOND REPORT.

The Home is nnchanged. None insane; no children; no deaths. Premises in good condition and comfortable. Good food, at a monthly per capita of \$6.75. Outdoor relief to 40, at \$2 per month.

Remarks.—I find things in good order. The keeper and his wife seem to be kind, clean and industrious.

Received September 16, 1907.

LILA RIPLEY BARNWELL.

### HYDE.

The Home is situated a mile and a quarter from the county seat. Three frame buildings—one for the keeper and one for each color; four rooms in two, and three in the other; ventilated by doors and windows. Cistern water. Stoves. In charge, 4; no insane or epileptics. Good food, at \$5 per month. J. T. Sawyer, Swan Quarter, is the Superintendent; receives \$150 per year. Physician is R. E. Hindley, Lake Landing, eighteen miles away. Admitted during six

months, 4; died, 2. Premises in fine condition. Kitchen first-class. Six acres in enlitivation; crops are cotton and corn. Shaded. All can attend church except one. No children. Ontdoor relief to 25, at \$2 per month.

Remarks.—Our people are taking better care of the poor than ever before.

Received September 16, 1907.

GREELY BRUIN.

# LENOIR.

The Home is as heretofore reported. Received September 20, 1907.

J. V. McCall.

# LINCOLN.

The Home is as heretofore reported as to buildings. Now in charge, 18; nearly all imbecile; none confined. Cost, about \$1 per week. The Superintendent is satisfactory; receives \$3.50 per month each and use of farm. Dr. R. W. Petrie is physician; receives \$15 per month. In charge September 1, 17; since admitted, 1. Occasional religious services. Outdoor relief to 33, at an average of \$1.56 per month.

Remarks.—Comforts for sick, aged and infirm cannot be afforded at \$3.50 per month. A visit to the Home makes a sad impression. It is located too far from the county center, and anthorities do not see the way yet to change location and make better provision.

April 1, 1907.

REV. R. Z. JOHNSTON.

### SECOND REPORT.

The Home is nnchanged as to buildings. Now in charge, 18—three or four almost insane; one epileptic; confined, one. The Superintendent is W. L. Heavnor, Lincolnton. Physician is J. W. Saine, Lincolnton; salary, \$150 per year. Admitted during six months, 1; discharged, 1, to the Hospital for Insane; died, 1. Occasional religious services. No children. Outdoor relief to 35, at \$1.72 per month.

Received October 3, 1907. REV. R. Z. JOHNSTON.

### MACON.

The Home is as heretofore reported. Now in charge, 6; one epileptic; no insane. As much food as they want. Cost, \$1.75 per week. Superintendent is John F. McConnell, Franklin. He receives \$6 per capita and use of farm. He is satisfactory. F. S. Siler, Franklin, is physician; \$100 per month as pay. No admissions or deaths in six months. Four can do light work. Kitchen good. Thirty acres in

calitivation. Stock owned by the keeper. Occasional religious services. No children. Ontdoor relief to 16; average amount, \$3 per month. General impression is good.

Received March 15, 1907.

W. H. Higgins.

SECOND REPORT.

The Home is unchanged as to buildings. Now in charge, 8; one epileptic cripple. The Superintendent receives \$6 per month for each inmate, and the use of the farm. He is satisfactory. The physician is Dr. S. H. Lyle; salary, \$100 per annum. Some of the women could do knitting. No children. Outdoor relief to 20, at \$2.50 per month. Management is good.

Remarks.—The present Superintendent is good to the inmates and takes good care of them. We think that the present system of a per capita pay for the inmates should be changed to a moderate salary for the keeper, and the farm should belong to the Home and be kept in good condition.

REV. J. A. DEAL.

Received September 28, 1907.

W. H. HIGGINS,
R. F. JARRETT.

# MARTIN.

The Home is two miles from the connty seat. Five frame buildings, 40-foot front; seven rooms in one, and two in each of the others; ventilated by windows, and open fires. Pump and well. Can accommodate 25. Now in charge, S. No insane; one epileptic. Sufficient quantity of good, wholesome diet. Superintendent is J. D. Bowen. He receives \$300 per year in money. He is satisfactory. Physician is William E. Warren; salary, \$10 per month as Superintendent of Health. Admitted during six months, 1; died, 1. Premises well arranged and in good condition. Kitchen is sanitary. One hundred and eighty acres poor land; 20 cleared. Crops: corn, peannts, sweet potatoes, for the use of the Home. Shaded. Occasional religious services. No children. General impression is favorable.

Remarks.—I recommend that the county buildings be of brick and covered with tin, especially for certain classes of inmates.

Received April 10, 1907.

WILLIAM E. WARREN, M. D.

### SECOND REPORT.

The Home is as heretofore reported. Now in charge, 7—all helpless, all idiotic; two epileptic; none confined. During the six months three admitted and three deaths. No provision for religious services. No children. Outdoor relief given to 25 or 30 persons, at an average of \$2.50 per month. General impression is favorable.

Received February 4, 1908.

WILLIAM E. WARREN, M. D.

### McDOWELL.

The Home is four miles from the county seat, on a creek. Four frame buildings, 16 x 34, and one building for the Superintendeut; two rooms and porch to each; ventilated by windows, and open fires. Can accommodate 16. Now in charge, 8—one white female insane, one epileptic. Cost of maintenance, about \$1.50 per week each. Superintendent is J. A. Poteet, Marion; salary, \$20 per month and board for self and family. Dr. B. L. Ashworth, physician; pay, \$100 per annum. Admitted during six months, 1; discharged, 1. Kitchen in good condition. Five hundred acres good land; 80 in cultivation. Crops are corn, wheat, peas and vegetables. Shaded. Regular religious services. Outdoor relief to 11, at \$1.90 per month. General impression is favorable.

Received March 15, 1907.

W. F. CRAIG, JOHN M. HONCK, B. L. ASHWORTH.

#### SECOND REPORT.

The buildings are nnchanged. Now in charge, 9—one insane, one imbecile. No death. The new Home is on a farm five miles from county seat. The inmates have what they need for their support, and the surplus is sold. It is a fine farm, in a healthy locality, and a pleasant home for anybody.

John M. Honck,

Chairman.
Mrs. E. A. Thomas,
Mrs. E. I. Dysart.

Received October 22, 1907.

### MONTGOMERY.

Practically no change since the last report. Received March 11, 1907.

R. T. POOLE.

### MOORE.

The Home is two and a half miles from the county seat. Six one-story frame buildings, 16 x 36. Each building will accommodate four persons. Each room has open fireplace, three windows with glass, and doors. Buildings are 80 feet apart, to protect in case of fire. Well and spring. Can accommodate 24. Now in charge, 8—two bedridden; one deaf and dumb idiotic colored girl confined. As much as they want of good, wholesome food. Cost, \$1.75 per week. Superintendent has the use of the farm; S. D. Stuart, Carthage. He receives \$7.50 per month each and use of farm. He is a satisfactory officer. Physician is Gilbert McLeod, M. D.; paid \$2 per visit. During six months two deaths from epilepsy; one, old age; one discharged, cured, able to work. The premises are fairly neat and in good condition;

buildings need painting. Kitchen neat and clean. One hundred and sixty acres of ordinary farm land. Crops are grain and vegetables. Not as much shade as should be. No provision for religious services. No children. Some ontdoor relief. General impression is favorable. Received July 6, 1907. JOHN M. CAMPBELL.

### SECOND REPORT.

Buildings nuchanged since the last report. None insane; no deaths. Premises and kitchen in good condition. No children. Some outdoor relief. General impression is favorable.

Received October 2, 1907.

JOHN M. CAMPBELL.

# NEW HANOVER

The Home is as heretofore as to buildings. Sixteen rooms for whites and sixteen rooms for colored; ventilated by doors and windows. Extingnishers in case of fire. Good cistern and spring water. Steam heat. Now in charge, 16; insane, 1 white male, 8 colored males, 1 colored female. Confined, 1. Epileptics, 2. Bread, meat, fresh vegetables, as much as they want. Cost, about \$1.25 per week each. J. R. Hardee, Wilmington, paid \$100 per month; no perquisites. He is a satisfactory Spperintendent. Physician is Dr. W. D. McMillan. In charge September 1, 1906, 16; since admitted, 4; died, 1; discharged, 3. The sick are well cared for. Kitchen in good condition. Four hundred and fifty acres of land; 80 in cultivation. Crops are corn, peannts, sweet potatoes, oats, melons and vegetables. Shaded. Occasional religious services. No children. Some outdoor relief. General impression is favorable.

Remarks.—The present keeper has been in charge only six months. He has cleared and prepared for cultivation 24 acres of new land and reclaimed several acres of the old. The land now under cultivation is in good condition, and there is a fair prospect of a good crop. He is raising a good stock of hogs. A. G. HANKINS.

Received June 1, 1907.

#### SECOND REPORT.

The Home is nuchanged as to buildings. Now in charge, 15; nearly all weak-minded; four epileptics. Sufficient amount of bread, meat and vegetables. W. D. McMillan is Superintendent. No deaths; no discharges; eleven admitted. Buildings in good repair; kitchen clean. Crops are peanuts, potatoes, corn and market vegetables. Religious services. No children.

Remarks.—The Home and farm present a comfortable and prosperous appearance. A good supply of peanuts, potatoes, corn and hay on hand. Poultry and several thousand pounds of fat hogs. The Commissioners were wise in their selection of a superintendent. I am glad to be able to commend him. A. G. HANKINS.

Received November 30, 1907.

### ONSLOW.

This county has no Home.

## PASQUOTANK.

The Home is as heretofore as to huildings. Now in charge, 19; one colored female insane; three epileptics. Sufficient amount of food, at \$1.75. Superintendent is W. P. Newhold, Elizaheth City. Five deaths—one from bowel consumption. Premises in fairly good repair; kitchen good. One acre in cultivation. Vegetables raised for inmates. A few shade trees, some recently planted. Religious services by the colored for their race. No children. Outdoor relief to 43, at \$2 per month. General impression very favorable.

Received July 17, 1907.

S. L. SHEEP.

# PERQUIMANS.

The Home is four miles from the county seat. Four huildings—one for keeper, three for lumates; six rooms to each of three buildings; ventilated by windows and doors. Stoves. In charge, 11; one in epileptic mania about one-half of the time; three other epileptics. Sufficient amount of good food. Superintendent is Simon Stallings, Winfall; pay, \$250 and use of the farm. Physician is Dr. T. S. McMullan, Hertford. He receives \$200 per year. Admitted during six months, 1; died, 3—one of tuberculosis. Premises and kitchen good. One hundred acres of land, 60 in cultivation. Crops are corn, cotton and peanuts. Church near. No children. Outside relief to 20, at \$4.50 per quarter. General impression is favorable.

Received September 8, 1907.

T. S. McMullan.

### ROBESON

The Home is as heretofore as to buildings. Now in charge, 10; two white insane. Good food, at cost of \$6.50 per month. Superintendent is I. J. Flowers, Lumberton. He is a satisfactory officer, Physician is Dr. H. T. Pope. Admitted during six months, 1; died, 1. The sick are well cared for. Forty acres, six in cultivation. No provision for religious services. No children. General impression of the management is favorable.

J. P. McNell.

Received March 18, 1907.

# ROCKINGHAM.

The Home is one mile and a half from the connty seat. Nine one-story brick buildings; also hospital for the insane, six rooms; two rooms, with hall, in each building; ventilated by windows and doors. Well water. Open fires. Can accommodate from 35 to 40. Now in charge, 35. Ten can do light work. No insane or epileptics. None confined. Cost of maintenance, \$7 per month. Superintendent is William Williams, Wentworth. He is satisfactory. Physician is Dr. Sam Ellington, Wentworth; pay, \$7 per day. Admitted in six months, 5; died, 3; discharged, 2. Some of the women knit socks for sale. The Home is in a nice location, and neat, but premises not very well arranged. Kitchen good. About 400 acres in the farm; 100 in cultivation. Crops are wheat, corn and vegetables. Shaded. Occasional religious services. Several children. Outdoor relief to 10, at \$2.50 to \$3 per month. General impression is favorable.

Remarks.—The buildings are not up to date, but, taking that into consideration, it is conducted to the best possible advantage.

IRA D. HUMPHRIES, WILLIAM CUMMINGS.

Received March 5, 1907.

# ROWAN.

The Home is as heretofore reported as to buildings. Can accommodate 32. Now in charge, 10 white and 4 colored; total, 14. No \$\text{nsane}\$; no epileptics. As much food as they want; cost, from \$\text{6}\$ to \$\text{8}\$ per month, including produce of the farm. Superintendent is Mrs. J. S. Patterson, Salisbury. She is satisfactory. Dr. I. H. Foust, physician. Admitted in six months, 11 whites, 6 colored; died, 3—one of typhoid fever and one of consumption. No regular provision for religious services. All other items as previously reported. General impression of the management is very favorable.

Received April 8, 1907.

REV. F. J. MURDOCH.

### SECOND REPORT.

The Home is as previously reported as to buildings. Now in charge, 10. Have all the food they want, at a cost of \$5 to \$6 per month. Admitted during six months, 7; died, 5. No children. Ontdoor relief to 29, costing \$99 for three months. the management is very good.

Rev. F. J. Murddoorn.

Received September 16, 1907.

# RUTHERFORD.

The Home is as heretofore as to buildings. Now in charge, 23; insane, 4; confined, 3. Superintendent receives \$250 per year. He is

satisfactory. The physician receives \$1.50 per visit. Admitted during six months, 5; died, 2. Condition of kitchen, good. Occasional religions services. No children. No ontdoor relief. General impression is favorable. Other items previously reported.

E. B. HARRIS, M. D., T. B. TWITTY, M. D., W. A. THOMPSON, M. D.

Received March 25, 1907

## SAMPSON.

The Home is two miles from the county seat. Main building has six rooms and kitchen. Eight buildings, 16 x 40 feet, two rooms each; also cook room and two dining rooms; door and window to each room. No protection against fire. Open fireplaces.' Wells. Can accommodate 30. Now in charge, 22; no insane; two idiots and several weak-minded; one confined; two epileptic. Good fare, at an average of \$1.25 per week. Superintendent is L. J. Anders; pay, \$12.50 per mouth and board of self and family. He is satisfactory. Dr. F. H. Holmes is the physician; paid for actual services. Admitted in six months, 2; died, 1. Five can do light work. The Home is a plantation of \$5 acres, and a two-horse crop is cultivated, mostly in garden vegetables, corn, potatoes and peas; used for the Home. There is a Baptist church in sight of the Home. One infant, a year old. Some outdoor relief. General impression is favorable.

REV. T. M. LEE, F. B. JOHNSON, MRS. T. B. HUBBARD.

Received February 7, 1908.

# SCOTLAND.

The Home is as heretofore reported as to buildings. Now in charge, 2; confined, one white woman, insane; one epileptic Superintendent is Charles Bowen, Laurinburg. He is satisfactory. The woman works some on the farm; the man is weak-minded. Kitchen is fairly good; always neat when the keeper's wife is well. No religious service. No children. Some ontdoor relief. General impression is favorable.

Remarks.—The case of the white woman is very pitiable. She has a husband who must be weak-minded also, because he married the woman jnst as she is now, an epileptic and very weak-minded. She left her home with another man, who soon abandoned her. She goes back home, but will not stay—runs away at night. At the Home they have her windows barred and keep her locked up at night. She is harmless, though not responsible, but by no means an idiot. I hope that there will be a place for her soon, as the asylmns will not admit

her. She has been in jail for safe-keeping on several occasions, so the keeper said. She is about 25 years old.

Received July 22, 1907.

MRS. WALTER MCEACHIN.

#### SECOND REPORT.

The Home is unchanged since the last report. Confined part of the time, 1 insane epileptic; died, 1. General impression is favorable.

MRS. WALTER McEACHIN,

Received October 18, 1907.

MISS EFFIE MCRAE.

# STANLY.

The Home is as heretofore reported as to buildings. Now in charge, 12; one white male and one white female insane; one of these also epileptic. Substantial food, at cost of \$4 per capita. W. J. Underwood, Albemarle, is the Superintendent. He receives \$19 per month and board of self and family. Physician is J. N. Anderson; pay, \$1.50 per visit. Admitted during six months, 2; died, 1. Premises in good condition and fairly well arranged. Kitchen good. Religious services monthly. No childreu. Outdoor relief to 38, at \$2 per month. General impression is favorable.

Remarks.—Our County Home is improving each year, and is now in very good shape. The keeper and his family seem to be good to the inmates, and all of them appear to be well satisfied. New baru and granary have been added. Hope to see the Home self-sustaining.

S. H. Milton.

# STOKES.

The Home is as heretofore reported. Now in the institution, 13; confined, one white male, iusane. One epileptic. Inmates have as much as they desire to eat—meat, vegetables, coffee, molasses, sometimes milk and butter and sometimes chicken. Admitted during six months, 1; died, 3; discharged, 1. Kitchen in very good condition. Two hundred and thirty acres of medium soil. No children.

Remarks.—One person who is subject to epilepsy fell in the fire on the 4th of March and was right much burned before he could be gotten out. He is better to-day (March 8th) and is able to be going about.

N. O. Petreee.

Received March 19, 1907.

### SECOND REPORT.

The Home is as heretofore reported as to buildings. Now in charge, 15; two insane, but not confined—one white female and one colored male. Good food. Admitted during six months, 5; died, 4. Kitchen

In good condition. Thirty acres in cultivation; crops are corn, wheat, tobacco and vegetables. Occasional religious services. One infant, a few days old, with its mother. General impression is favorable. The keeper informs me that he does not know of any consumptive in the Home.

N. O. Petree.

Received September 11, 1907.

### SURRY.

The Home is half a mile from the county seat. From two to four rooms in each building; ventilated by windows. Spring near. Open fires. Can accommodate 30; now in charge, 20. One white male insane; none confined. Inmates are well cared for. Physician is J. R. Woltz, Dobson. Admitted in six months, 1; no deaths. The place is a desirable one and fairly neat. Buildings are getting old. Kitchen in good condition. Two hundred acres, 75 in cultivation. Crops are grains and vegetables. Occasional volunteer religious services. No children. Some outdoor relief. General impression is favorable.

Remarks.—The former Superintendent drank and was unsatisfactory. By help of Judge Ferguson he was removed. It is now in good hands.

J. R. Lewellyn,

Received March 21, 1907.

#### TYRRELL.

The Home is half a mile from the county seat. Two ordinary frame buildings; six rooms in one and four in the other; no fire protection; ventilated by windows and doors. Open fires and heaters. None now in charge. William Roads is keeper and receives a per capita amount. Building is old and dilapidated. Ten acres poor land; four in cultivation. Crops: corn, peas and potatoes. Outdoor relief to four persons, at \$3 per month. General impression is not favorable.

Remarks.—My opinion is that there should be a trusty man, of good character and other proper qualifications, put in charge of the Home, and that he should receive a fair compensation for his services, and that all persons worthy of help should be put under his care at the Home.

J. C. Merkins, Sr.

Received March 7, 1907.

#### SECOND REPORT.

The Home is unchanged. In charge, one young white woman, insane. Other items as previously reported.

Received September 5, 1907.

J. C. MEEKINS, SR.

# VANCE.

The Home is as heretofore as to buildings; in fair condition now; will need re-covering soon. Now in charge, 10; helpless, 7; insane, one white male. None confined. Per capita cost of maintenance, \$3 to \$4 per week. John Wesley Oakley, Superintendent; \$300 and board of self and family. Physician is Dr. John Hill Tucker, Hendersou. Admitted during six months, 1; discharged, 1; died, 1. Two handred aeres good land, 40 in cultivation. Three horses, three cows, twenty-four hogs and 100 chickens. Crops are corn, wheat, oats; used on the place. A church house, but no service. No children. No system of outdoor relief except through private agencies. General impression is favorable.

Dr. F. R. Harris.

Received December 9, 1907.

# WAKE.

Since the last report the Commissioners have added a neat and comfortable chapel for religions services, and dining room for each race; room for the whites, 28 x 14 feet; for the colored, 20 x 12. Now iu charge at the Home, 70 inmates and 11 county prisoners; insane or mentally defective, 33; confined, 4 white insane; epileptic, 12. Cost of Home, \$8,500 per annum. A. A. Rowland, Raleigh, is the Sperintendent. He is a satisfactory officer. Physician is Dr. J. W. McGee; salary, \$41.67 per month. Admitted during six months, 8; died, 5. Bnildings and grounds in good condition; kitchen quite neat. Seven handred acres good land, 200 in cultivation; corn, cotton, peas, wheat, potatoes and all kinds of vegetables, used for benefit of the Home. Religious services every Sunday by the pastors of the Raleigh churches. Five children, there only temporarily. No punishment has been inflicted. Outdoor relief to 134, at \$1 per capita per month. General impression is favorable. The new Superintendent has been in charge only a short while.

Remarks.—The cooking is now done in the kitchen, and all who are able go to the general dining room for their meals. This has added much to the tidiness of the rooms, and the immates, without exception, like the change. When an immate dies the body is nicely robed and placed in a neat casket and is given a Christian burial.

1. C. BLAIR,

Received January 1, 1908.

County Board of Charities.

### WARREN.

The Home is as heretofore reported. Can accommodate 32; now in charge, 21; insane and confined, 3 colored males and 2 epileptics. Average weekly per eapita cost of maintenance, \$2.50. Superintend-

ent is John S. Dayis, Warrenton; \$7 each per month and use of farm. He is satisfactory. Physician is P. J. Macon, M. D., Warrenton. He receives \$25 per month. Admitted during six months, 3; died, 1; discharged, 1. The sick are well cared for. Premises in good condition; kitchen good. One hundred and eighty acres of fair land. Partly shaded. No regular provision for religious services. One child, with its mother. Outdoor relief to 72, at an average of \$1.43 per month. General impression is favorable. P. H. ALLEN. Received March 21, 1907.

#### SECOND REPORT.

The Home is unchanged as to buildings. Now in charge, 20; insane, 4—two whites and two blacks. Physician is Dr. M. P. Perry; salary, \$25 per month. Admitted in six months, 3; discharged, 20 sent to the hospital. Premises and kitchen in good condition. One hundred and eighty acres of fair land, 30 in cultivation. Crops are cotton and vegetables. One colored man (deaf and dnmb) sometimes punished because nuruly. Ontdoor relief to 62, at \$1.45. General impression is favorable.

Remarks.—We learn, by inquiry of the immates, that the Superintendent is held in the highest esteem by them, and we think a better superintendent cannot be found in the State.

P. H. Allen,

Received October 3, 1907.

J. A. HUDGINS.

# WAYNE.

There has been no material change in the County Home since the last report. The grand jnry made a very favorable report of its condition.

M. L. Lee,

Received November 25, 1907.

REV. F. W. FARRIES.

# WILSON.

No change in the Home since the last report.

Received June 2, 1907.

REV. T. A. CHEATHAM.

# COUNTY PRISONS.

## ALAMANCE.

The county prison is as heretofore reported. No punishment inflicted. No intoxicating liquors allowed. Occasional religious services. Now confined, 6 colored males, 1 colored female; total, 7. During six months, 9 white males, 1 white female, 23 colored males, 4 colored females; total, 37. Hanged, 1. Bibles and religions books provided. A record is kept. General impression favorable. Other items previously reported. REV. JEREMIAH W. HOLT.

P. H. FLEMING.

Received April 12, 1907.

J. A. TURRENTINE.

### SECOND REPORT

The prison, as to building, is as heretofore reported, the new prison not being completed. Now confined, 5 white and 6 colored; total, 11. During six months, 15 whites, 37 colored; total, 52.

Remarks.—Jailer keeps a good record book.

REV. JEREMIAH W. HOLT.

Received September 10, 1907.

P. H. FLEMING.

J. A. TURRENTINE.

# BEAUFORT.

The prison is brick, fireproof; size, 40 x 40 feet; windows grated; ventilated by windows. Stoves. Sufficient bedding. Sexes separated. Water in cells. Good food; no coffee or warm drink. Bath tub, and required to bathe. Sewerage. Jail cleansed by use of soap and disinfectants. No vermin. Intoxicating liquors not allowed. Religions services often; also, prisoners pray and sing every day and night. No deaths. Now confined, 3 whites, 27 colored. The general impression unfavorable, because not enough cells.

Remarks.—We have now 30 prisoners, 27 of whom are negroes, and the colored apartment has only four cells and a hall between them, in which prisoners can be securely kept. We are in need of more cells. Prisoners are kept as comfortably as can be done under the circumstances. George E. Ricks.

Received October 14, 1907.

Sheriff.

### BRUNSWICK.

The prison is built of brick; fireproof; no means for extinguishing fire; two stories and six rooms; ventilation by windows. Coal stoves. Sufficient amount of bedding. Sexes separated. Sufficient amount of food; coffee. Basin in each room and plenty of water. Required to wash. Sewerage. Free of vermin. Clothes are changed and boiled on being taken in. No intoxicating liquors allowed. Occasional religious services. Now confined, 1 white male, 1 colored male. One death, 80 years old and insane. General impression is favorable.

Remarks.—The jail is very nicely kept and prisoners well cared for. Received March 5, 1907.

J. ARTHUR DOSHER, M. D.

# BURKE.

The building of the prison is in bad shape and will soon be rebuilt or an entirely new one erected. The present building is brick, 30 x 40 feet, three stories and four cells. Open fires. Sexes separated. Excreta removed in buckets.

Remarks.—The old jailer went out of office in December and lost all of his records. New jailer is keeping a record. The jail is kept as well as it can be with present building.

Received November 14, 1907.

ROBERT T. CLAYWELL.

### CALDWELL.

The prison is built of brick, and the part for the confinement of prisoners is fireproof. Occasional religious services. None now confined. During six months were imprisoned 11 whites, 5 colored (two of these women); total, 16. No deaths.

Remarks.—We have a splendid new jail, and we are unable to hear of any complaint of the management. We believe that it is very well cared for and the inmates well treated.

J. V. McCall,

Received March 16, 1907.

Chairman.

#### SECOND REPORT.

The jail is a new building, two stories, eight cells, 8 x 10. Stoves.

Three or four blankets to each. Pleuty of food, and coffee for breakfast. Bath tubs and sewerage. No deaths. No prisoners now confined.

J. V. McCall.

Received September 20, 1907.

### CAMDEN.

The prison is as heretofore reported as to building. No prisoners now confined; none confined from September 1, 1906, to March 1, 1907; only four since, for a few days and for petty offenses.

Received September 27, 1907.

George H. Riggs.

# CARTERET.

The prison is built of brick; it is fireproof. City fire department. Building is 30 x 40 feet, two stories, four rooms; ventilated by windows. Stoves. Sufficient amount of bedding. Sexes separated. Not allowanced at meals; all they want; coffee. Required to wash. Jail is scrubbed. No vermin. Religious services. Now confined, 1 colored male; during six mouths, 2 white males. No deaths. General impression is very good.

C. P. Dey.

Received March 8, 1907.

# SECOND REPORT.

The prison is as heretofore reported. Now confined, 5 colored males. No deaths. General impression is favorable. C. P. Dey. Received September 9, 1907.

### CASWELL.

The prison is frame. No means for extinguishing fire. Other items as previously reported. Now confined, 1 white male. No deaths. Received March 6, 1907.

S. A. Malloy, M. D.

### SECOND REPORT.

The prison is as heretofore reported. Now confined, 2 whites and 3 colored. No deaths. General impression of the management is favorable.

Remarks.—We are building a modern fireproof jail now.

Received September 13, 1907.

S. A. MALLOY, M. D.

### CATAWBA.

The prison is built of brick, with metal roof. Pump and hose, in case of fire. Building is 20 x 40 feet, two stories, six rooms and cells; ventilated by windows. Stoves and heaters. Sexes separated. Water all the time. Sewerage. Occasional religious services. Confined, 1 white man. No deaths. Never overcrowded. General impression is favorable.

Received March 5, 1907.

### CHOWAN.

The prison is unchanged since the last report. It is in good condition. Now confined, 9 colored males, 1 colored female; total, 10. During six months, 31. General impression is favorable.

Received September 30, 1907.

REV. ROBERT B. DRANE.

### CLAY

The prison is a frame building. No means of extinguishing fire. Small stove. No special allowance of food; what they want. Not required to bathe. None confined; in six months, 1. No deaths. So far as food is concerned, the management is good. See report of 1905. No change in conditions.

Remarks.—No improvement. I have spoken to some parties about improving the jail, but nothing has been done but a little lime on the outside.

L. F. Shurord.

Received March 23, 1907.

### SECOND REPORT.

The prison is a log building, two stories, but for prisoners only one room used. No ventilation, except by window. Small stove. Yes, suffering from cold, if there is not a good fire. Very good bed. No other room for use of females. Drinking water as needed and as much food as they want. Prisoners are not required to bathe. Excreta emptied out at corner into a ditch. No restriction as to intoxicating liquors. No religious services. No prisoners; no deaths. General impression of management, as far as the jail is concerned, is favorable.

Remarks.—No change or improvements have been made in the building, except it has been whitewashed on the outside.

Received November 5, 1907.

L. F. SHUFORD.

# DARE.

The prison is frame,  $12 \times 20$  feet; four cells; windows barred. Suffering from cold in the winter. Sexes separated. Drinking water twice a day; plenty to eat. No prisoners, and seldom have any; none in six months. General impression is unfavorable.

Received September 8, 1907.

C. L. MANN.

### DAVIDSON.

The prison is of brick; it is not fireproof, and no insurance; one story and one cell; windows barred and screened; not enough ventilation. Coal stove. Males and females divided by partition. Sufficient bedding and food; coffee. Pans for bathing; required to wash. No intoxicating liquors. No religious services. Now confined, 13 colored males. No deaths. General impression is favorable.

Received May 13, 1907.

JAMES SMITH.

### SECOND REPORT.

The prison is as heretofore reported; veutilated by windows and one five-inch pipe which runs through the roof. Heated by stove. Straw tick and two blankets each. Two meals and coffee. City water. No intoxicating drinks. No religious services. Now in charge, 6 colored and 1 white. No deaths. Other items as heretofore reported.

James Smith.

Received October 5, 1907.

# DAVIE.

The jail is built of brick; fireproof; two stories, four cells; windows barred, but large. Heated by stove. Good straw beds and heavy blankets. Water four times a day. Sufficient amount of food; coffee for breakfast. Excreta removed in buckets. Free of vermin. Now confined, 1 black male.

Remarks.—I found the prison in splendid condition. The cells were freshly whitewashed, the beds clean, and only one prisoner. The fail is considered insecure for desperate men, and there are three prisoners in the Mecklenburg jail for security.

IDA M. NAIL.

Received March 25, 1907.

### SECOND REPORT.

The jail is as previously reported as to the building. Now confined, 1 white male idiot, who will probably be removed to the Home. Remarks.—The jail is in a dilapidated condition, but I find no fault with the manner in which it is kept, except that the excreta is uot buried, but thrown ou the back lot. The jail is not safe, and a desperate criminal was removed to the Mecklenburg jail for safe-keeping. Received December 18, 1907.

# DUPLIN.

The prison is now being decidedly improved and enlarged, adding another story.

A. P. Farrior.

Received November 11, 1907.

### EDGECOMBE.

The jail is built of brick and is fireproof. The town fire department. Building is 75 x 75 feet; two cells for whites and four for colored; flue in the top. Stoves. Sufficient amount of bedding, Sexes separated. Water twice a day; two meals. Bath tub and waterworks; required to bathe. Sewerage. No religious services. Now

coufined, 8 colored males, 1 white male and 1 colored insane woman; confined during six mouths, 57; of these, three insane. No deaths.

Remarks.—Our Sheriff is one of the best in the State, and performs his duties well and keeps everything in perfect order.

Received May 27, 1907.

JAMES R. GASKILL.

# GASTON.

The prison is built of brick, 50 x 30, two stories, three rooms, four cells; ventilated by windows. Stoves. All necessary bedding. Males in cells; females in rooms. Drinking water three times daily. All the food they want, and coffee for breakfast. Scoured and disinfected. Sewerage in the cells. Free of vermin. No intoxicating liquors allowed. Religious services when desired; Bibles provided. No deaths. Now confined, 4 white males, 3 colored males; of the four white confined, three are insane. General impression of the management is favorable.

J. P. Rein.

Received October 28, 1907.

# GATES.

The prison is built of brick, 24 x 30 feet, one story, four cells. Stoves. Sufficient bedding. Sexes separated. Drinking water once a day. Sufficient food; no warm drink. Buckets for excreta. No provision for bathing. No prisoners. No deaths. General impression is favorable.

Remarks.—Only one prisoner has been confined in the county jail in twelve months, and he for only thirty days.

Received June 18, 1907.

MARTIN KELLOGG.

### SECOND REPORT.

No change in the prison since the last report. No prisoners confined; in six months, 2. No deaths. General impression of the management is favorable.

MARTIN KELLOGG.

Received September 5, 1907.

### HAYWOOD

The prison building is as heretofore. Scrubbing and disinfectants used to cleanse the jail. Plenty of food and coffee. Bath tub. Sewerage. During six months, 115 whites, 12 colored. No deaths.

Remarks.—The prisoners are treated kindly and humanely. Sanitary conditions fairly good; not so good as formerly, but the Judge now holding court has given the grand jury a strenuous talk upon

keeping the jail in better sanitary condition. There have been four insane persons in jail; three still confined. Religious services almost every Sunday. Four prisoners who have been charged with murder now confined; crimes directly or indirectly the result of whiskey.

Received October 1, 1907.

MRS. M. J. BRANNER.

# HENDERSON.

The jail is as heretofore reported. Water at all hours; ample amount of food; coffee. Prison is whitewashed four times a year. No iutoxicating liquors allowed. Now confined, 1 white male. No deaths. General impression is entirely favorable.

Remarks.—Everything is conducted in as cleanly and humaue a manuer as possible.

Mrs. L. R. Barnwell.

Received March 19, 1907.

# SECOND REPORT.

The prison is as heretofore reported. Now confined, 4 whites aud 4 blacks. General impression is favorable.

Remarks.—No tuberculosis in the jail; do not find that there ever has been. Jail and premises in good condition.

Received September 16, 1907.

LILA RIPLEY BARNWELL.

#### HYDE

The prisou is built of brick, 35 x 40 feet; is not fireproof, and no means of extinguishing fire; ventilated by windows. Stoves. As much bedding as they want. Sexes separated, but we have never had many women. Drinking water once a day; all the food they want. The jail is swept, whitewashed and scrubbed. No provisiou for bathing. Free of vermin. Excreta removed to a pond. No intoxicating liquors allowed. No religious services. One colored male, for costs. No deaths.

Remarks.—The jail is very well kept.

GREELY BRUIN.

Received September 16, 1907.

# LENOIR.

The prison is built of brick, two stories, eight cells; wire screens at the wiudows; ventilated by windows. Stove. Sufficient bedding. Sexes separated. Drinking water as needed; sufficient amount of food; coffee for breakfast. Bath tubs. Sewerage. No intoxicating liquors. Occasional religious services. No deaths. The jail is empty; no prisoners.

J. V. McCall.

Received September 20, 1907.

### LINCOLN.

The jail is unchanged. No prisoners now confined, except occasional town prisoners overnight. No deaths. General impression, fairly good.

Remarks.—New fence encloses the jail. Prison is empty most of the time, Rev. R. Z. Johnston.

Received April 1, 1907.

SECOND REPORT.

The jail is unchanged. No prisoners now confined; during six months, 5. Impression of management is favorable.

Received October 3, 1907.

REV. R. Z. JOHNSTON.

# MACON.

The jail is as heretofore reported. Water at all times; sufficient food; coffee twice a day. Tubs. Required to bathe. Sewerage. No vermin. Occasional religious services. Confined during six months, 1, drunkenness; 1, manslaughter. No deaths. General impression, good.

Remarks.—None now in charge. Number of prisoners so small and irregular that no provision is made for regular religious services.

REV. J. A. DEAL,

R. FURMAN JARRETT, W. H. HIGGINS.

Received March 15, 1907.

# SECOND REPORT.

The prison is as heretofore reported as to building. Drinking water as needed; sufficient amount of food. Required to wash. No intoxicating liquors allowed. No religious services. Now confined, I white male; confined during six months, 13 white males. General impression of management is favorable.

Rev. J. A. Deal.

W. H. HIGGINS,

Received September 28, 1907.

R. F. JARRETT.

### MARTIN.

The jail is of brick, 30 x 40, two stories, four cells. Water and hose for protection against fire. Cells 9 x 9 and accommodate four persons; ventilated by windows. Stove. All necessary bedding. Sexes separated. Fresh water three times daily; good, wholesome food. Prisoners required to bathe. Sewerage. Free of vermin. No intoxicating liquors allowed. Occasional religious services. None now confined. No deaths. General impression is favorable.

Received April 10, 1907.

WILLIAM E. WARREN, M. D.

# McDOWELL.

The jail is brick, 30 x 50 feet, two stories. Fire department and city water. Cells are 10 x 10; two prisoners to a cell. Gratings over windows; ventilator in the roof; heated by stoves. Mattresses and four blankets. One separate cell for females; the remainder for males. Artesian city water in cells. Sufficient amount of food and coffee. Bath tub and soap, etc., provided. Sewerage. No vermin. No intoxicating liquors allowed. Occasional religions services. Two white and two colored males awaiting trial. The jail is used as a lock-up for the town. Number of prisoners during six months, 166. One insane person. No deaths. Religions books and reading matter provided, but they are torn up soon. General impression is favorable. No odors or ill smells were noticeable, and buildings seem to be kept very clean.

Remarks.—Many of these prisoners are drunks, for one night, and many others found not guilty. There are about two thousand foreigners and negroes from other States employed on the railway work. Most of the cases came from these workmen; few natives on this list.

W. F. Cralie,

John M. Houck, B. L. Ashworth.

Received March 15, 1907.

#### SECOND REPORT.

Prison is as heretofore reported. Management very good. Many prisoners for a night only, as the jail is used as a lock-up, and many foreigners are employed on railroad work near Marion. No religious services. Testaments bought by Visitors. Mrs. E. A. Thomas,

JOHN M. HOUCK, MRS. E. I. DYSART.

### MECKLENBURG.

The prison is as heretofore reported as to building. Unlimited supply of nncooled city water in reach of all; as much bread and meat as can be eaten; no warm drink. Tubs and basins in all wards, but bathing not required. Sewerage. Not free of vermin. No intoxicating liquors allowed. Regular volunteer religious services. In one instance an officer was attacked by a prisoner and the latter was whipped into submission. For insubordination rations are cut short. Now confined, 29 colored males, 6 colored females, 4 white males, 3 white females; total, 42; during six months, confined, 364. No deaths. General impression is favorable, but certain details referred to in remarks should be corrected.

Remarks.—Blankets should be kept clean. If the inside of the cells were white instead of black, conditions would be improved. No warm drinks provided. Change of diet needed; no vegetables for some time past. Disinfectants and better care of the proper cleansing of the jail needed.

REV. Francis M. Osborne,

Received June 7, 1907.

JOHN McDowell.

### MONTGOMERY.

The jail is as heretofore reported. Received July 6, 1907. R. T. POOLE.

# MOORE.

The prison is built of brick,  $28 \times 30$  feet, three stories, six cells; residence part in front; cells  $10 \times 10$  feet, will hold six persons; no obstruction to windows. Ventilated by windows and foul-air shafts through the roof. Steam heated. A cot and three blankets to each. Sexes separated. Fresh water three times a day; bread, meat, peas, and occasionally coffee. Bath tub in connection with each cell; required to bathe. Sewerage. No intoxicating liquors allowed. No regular religions services. Now confined, 4 blacks and 1 white; one of these insane; during six months, 16. No deaths.

Received July 6, 1907.

JOHN CAMPBELL.

### SECOND REPORT.

The prison is unchanged. Now confined, 2 whites, 4 blacks; of these, two women; during six months were confined 32, three of whom were insane. Other items as previously reported.

Received October 2, 1907.

JOHN CAMPBELL,

### NEW HANOVER.

Though the building itself has not been changed, many minor improvements have been made. It has been replastered and repainted inside; a new heating arrangement for steam, improved method of sewerage, floors arranged with drainage, so they can be easily cleaned. A large cooking range has been added and the variety of prison fare increased, so there should be no complaint on that score. A hammock and two blankets each. Better water and at all times. Hominy, beans, vegetables every day and beef stew on Sunday. Hot and cold shower bath; required to bathe. Sewerage and floor drains. Free of vermin. The worst punishment is forcing prisoners to bathe and wash their clothes. No intoxicating liquors allowed. Regular religious services. Now confined, 5 colored males, 1 colored female,

2 white males; total, 8; during six months, 282. Two deaths from September 1, 1906, from alcoholism. General impression is very favorable.

Remarks.—I am glad to report the great improvement in the jail. Besides the general repairs and cleaning mentioned, the Commissioners contemplate adding several new steel cells, to prevent the crowding of prisoners and to have a suitable place for the insane until they can be disposed of. The entire appearance of the prison and the prisoners is very gratifying. It would be a great advantage as to cleanliness if the authorities could provide clothing for them while in prison, thus obviating the necessity of their having to wear the dirty raiment in which so many are clad when sent to jail.

Received June 1, 1907.

A. G. HANKINS.

#### SECOND REPORT.

We found the jail and premises in very good condition. The prisoners are well fed and cared for, but there is still need of cell room. We have been expecting an addition made to meet demands, but this has been postponed. It is greatly improved by the addition of a new steam heater and new sewerage arrangements. Number confined, 19; during six months, 128. General impression of management, very favorable.

A. G. HANKINS.

Received November 30, 1907.

J. T. KERR.

## ONSLOW.

The prison is as heretofore reported. Confined during six months, 17. No deaths. No prisoners now in charge. General impression is favorable.

G. H. Stamons.

Received Jnne 14, 1907.

# PASQUOTANK.

The prison is built of brick. Stoves. All bedding necessary for comfort. Sexes separated. Water all the time; sufficient amount of food; coffee. Scrubbing and water-works for cleanliness of the jail. Prisoners required to bathe. Sewerage. Occasional religious services. None now confined; during six months, 12. No deaths. General impression is very favorable.

S. L. Sheep.

Received July 17, 1907.

# PERQUIMANS.

The prison is built of brick and wood, 20 x 30 feet; is not fireproof. No special means for extinguishing fire. It is one story high, with two rooms and two cells, with corridor; cells 8 x 10 and 6 x 10. Ven-

tilated by windows. Stoves. Suffering in cold weather. No special reservation for sexes, but adjusted at the time of incarceration. Drinking water once daily; snfficient amount of food and warm drink. Occasionally scribbed. There is no provision for bathing, and prisoners are not required to bathe. The arrangement for disposition of excreta is most unsanitary. No intoxicating liquors allowed. No religious services. Now confined, 4 prisoners. No deaths. The management is as good as is practicable.

Remarks.—The jail is a nuisance to the town and a stigma to the county. It should be rebuilt. At its present situation and in its present shape it is impossible to make it sanitary or respectable.

# ROBESON.

The jail is unchanged. Free of vermin. No intoxicating liquors allowed. No regular religious services. Three colored, three male and one female Croatan Indians. No deaths. General impression is favorable. The management has recently been changed.

Received March 18, 1907.

JOHN M. MCNEILL.

### ROCKINGHAM.

The prison is as heretofore reported. Prisoners are only kept in jail to await trial. None now confined. No deaths. General impression is favorable. The building is not modern and needs improvement in many ways.

IRA D. HUMPHRIES,

Received March 5, 1907.

WILLIAM CUMMINGS.

### ROWAN.

The old jail building is still in use, and items are as previously reported.

Remarks.—We inspected the jail this April 4th and found four prisoners—three white and one colored—all confined in the same room, to-wit: one woman in one cell, one man and a boy in another cell, and the colored man in another. We found the cells and the corridors not cleanly swept. We call attention of the Board to the fact that the Commissioners are erecting a new jail, which has only three apartments for prisoners, instead of the five called for by section 1336 of the Revisal.

F. J. Murdoch,

Received April 8, 1907.

H. T. TRANTHAM, JAMES D. HEILIG.

### SECOND REPORT.

The prison is as heretofore reported. The new building is not yet occupied. Now confined, 3. General impression of the management is fair.

REV. F. J. MURBOCH.

Received September 16, 1907.

# RUTHERFORD.

The jail is as heretofore reported. No suffering in cold weather. Sufficient amount of bedding. Sexes separated. Free of vermin. No intoxicating liquors allowed. Occasional religious services. Now confined, 2 colored males. No deaths. Other items previously reported. General impression is favorable.

E. B. HARRIS,

T. B. TWITTY, M. D.,

Received March 25, 1907.

W. A. THOMPSON, M. D.

### SAMPSON.

The prison is built of brick, is practically fireproof, and there is a fire department in the town; 50 x 80 feet, one story. There is a room 12 x 12 and four cells 8 x 10; windows barred; no other ventilation. Stoves. Drinking water three times daily; sufficient amount of food; no warm drink. No provision for bathing and not required to wash. Water-works, but incomplete. Occasional religious services. Hanged, 1. Bible and religious papers sent by friends. General impression is favorable, except for water supply.

Remarks.—Jail is too small. Blacks and whites not in separate apartments. Rev. T. M. Lee,

F. B. Johnson,

Received February 7, 1908.

Mrs. T. L. Hubbard.

### SCOTLAND.

The prison is as heretofore reported. Now confined, 9 colored males. The county has had the same Sheriff for eight years—a good officer—and the management is just the same each year.

MRS. WALTER McEACHIN,

Received October 18, 1907.

MISS EFFIE MCRAE.

# STANLY.

The jail has not been changed since the last report. Sufficient amount of food and fresh water supplied three times daily. Free of

vermin. Sewerage. Now confined, 1 white and 1 colored male; during six months, 36. No deaths. General impression of the management is favorable.

R. E. Austin.

Received September 16, 1907.

### STOKES

The jail is as heretofore reported. As much bedding as they want. Water as desired; sufficient amount of food. Lime, soap and scrubbing for cleansing the jail. Free of vermin. No intoxicating liquor, except when prescribed by physician. Occasional religious services. Now confined, 1 white male, 2 colored and 1 white female insane. Confined during six months, 10. No death. Other items as previously reported. General impression, favorable. N.O. Peterse.

Received March 19, 1907.

### SECOND REPORT.

The prison is as heretofore reported. Now confined, 1 colored male, 1 white male and 1 white female, the latter insane. She has been in jail since December 27th. Confined during six months, 4 whites and 4 colored. One white male sent to the Dangerous Insane Department. General impression of the management is favorable.

Received September 11, 1907.

N. O. PETREE.

#### SURRY.

The jail is brick, 30 x 50 feet, two stories. No special fire protection. Windows barred. Steam heat. Sufficient amount of bedding. Four rooms for males, two for females; rarely have a woman in prison. Fresh water twice to three times daily; as much food as they want. Bath tubs; not required to bathe. Sewerage. Free of vermin. No intoxicating liquors allowed. Occasional religious services. Now confined, 1 black male. No deaths. For some time the number of prisoners has been smaller than ever in the history of the county. General impression is fairly good.

J. R. Lewellyn.

Received March 21, 1907.

### TYRRELL.

The prison is as heretofore reported. None now confined; during six months, 2 colored males. No deaths. The general management is all right, except not sufficient care exercised for safe-keeping of prisoners. Two prisoners escaped through the open door.

Received March 7, 1907.

J. C. MEEKINS, SR.

### SECOND REPORT.

The prison remains nuchanged. No prisoner has been confined from March to September, except for a few hours while arranging bond. No arrangements have yet been made for the separation of tuberculous prisoners from others.

J. C. Meerins, Sr.

Received September 5, 1907.

# VANCE.

The prison is as heretofore reported. Protected against fire by city fire department. Windows. Stoves. Two double blankets to each person. Sexes separated. Unlimited supply of town water; good food; coffee. Soap, water and disinfectants used in cleansing the jail. Sewerage. Basin for bathing; not required. No intoxicating liquors allowed. Religious services occasionally. Now confined, 4 white and 2 colored majes; died, 1, from old age. It is never overcrowded. General impression of the management is favorable.

Received December 9, 1907.

DR. F. R. HARRIS.

### WAKE.

The prison was enlarged last year, with new steam heating and sanitary plumbing added. The addition is  $28\frac{1}{2} \times 17\frac{1}{2}$  feet, and 35 feet high. The building is two stories high and has nineteen cells and rooms. As much bedding as needed. Sexes separated by brick walls. Sufficient amount of food; two meals a day; no coffee. Jail is sconred and washed after each court. Bath tubs in each department, and prisoners are required to bathe. Sewerage. No complaint of vermin; insecticide is used. No intoxicating liquors are allowed. Religions services on Sundays and other days. Now confined, 5 white males, 2 white females, 16 colored males, 5 colored females; total, 28; confined during six months, 384. No deaths. The jail has not been crowded since the enlargement of the building. A careful record is kept. General impression of the management is favorable.

Remarks.—We find the jail in as good condition as present circumstances admit. We recommend that all the window glass be cleaned (of paint) or new glass be substituted; that lattice doors be provided in the apartments for females, both white and colored; that the entire building be whitewashed—this for the health and comfort of prisoners. As a precaution against disaster from fire, we recommend that the ventilating fines from the cells be extended so as to project above the root, instead of terminating in the garret or between the celling and the roof.

I. C. Blair,

Received October 9, 1907.

JOHN A. MILLS.

#### SECOND REPORT.

Federal Court brings many prisoners to the jail during term time, and last court there were 63 prisoners at one time. During the six months, 59 white males, 3 white females, 256 colored males and 15 colored females; total, 333. After each term the jail has to undergo a thorough cleaning and disinfecting to get rid of vermin brought in on the persons and clothes of prisoners.

Remarks.—Owing to the large number of Federal prisoners here during the term, and many of whom are awaiting the next term, two weeks off, the jail is in a foul condition in the colored department. As soon as prisoners can be removed, a thorough cleaning will be made. A new porch has been built the length of the cook room, and adds to its comfort and appearance. The improvements recommended in the last report have been made.

I. C. Blair,

J. A. MILLS.

Received January 1, 1908.

County Board of Charities.

# WARREN.

The jail is as heretofore reported. No suffering in cold weather. Sufficient amount of bedding. Separate cells. Drinking water as often as necessary. Good food; coffee. Bath tubs; required to bathe. Free of vermin. No intoxicating liquors allowed. No religious services. Now confined, 2 colored and 1 white; during six months, 12. No deaths. General impression is favorable.

Received March 21, 1907.

P. H. ALLEN.

### SECOND REPORT.

The prison is as heretofore reported. No prisoners now confined; during six months, 19, one of whom was insane. No deaths. General impression is favorable.

Received October 3, 1907.

J. A. Huddings.

# WAYNE.

The prison is brick; fireproof. City fire department convenient. Windows have wire netting below, bars above. Has hot-air furnace. Sexes separated. Water in the jail. Food invariably meat, peas, corn bread and biscuit; ample quantity. Prisoners not required to bathe; provision for bathing. Sewerage. No intoxicating liquors allowed. Occasional religious services. Now confined, 6 colored males, 2 colored females; during six months, 39—two white and 37 colored. No deaths. General impression of management is favorable.

Remarks.—We should like to see a change of diet for the prisoners, and that they be furnished coffee when desired. At prevailing prices, the Sheriff probably furnishes all he can.

M. L. LEE,

Received November 25, 1907.

REV. F. W. FARRIES.

# WILSON.

The prison is unchanged since the last report.

Received June 2, 1907. Rev. T. A. Cheatham.

# COUNTY CONVICT CAMPS.

# ALAMANCE

The camp is constructed of wood, 30 x 16 feet, one story; two rooms, about 13 x 16. White and colored prisoners are not confined in the same room. No means for extinguishing fire. Ventilation by window; heated by stove. Enough bedding for comfort. All the food they want. Three meals a day; drinking water as needed. female prisoners. Required to bathe once a week in summer. Blankets washed as needed; straw changed in ticks when necessary. Sewerage. Free of vermin. No punishment since present officer has been in charge. No deaths. No prisoners known to have inberchlosis. Prisoners suffering with this disease are not confined in the same room at night with others. Connty physician makes monthly inspection. Work all day in good weather. Two employees. Salary of supervisor, \$50; gnard, \$30. Present officer in charge will try to have regnlar religions services. In the stockade on Sunday; chained at night. No boys at present. Now in charge, 3 white males, 6 colored males; total, 9.

Remarks.—The convicts being out on the roads, this blank was sent to the officer in charge, with request that he fill it out. Data above given by him.

REV. JEREMIAH W. HOLT,

P. H. FLEMING,

Received April 12, 1907.

J. A. TURRENTINE.

#### SECOND REPORT.

The camp is as heretofore reported. One prisoner whipped. One case of tuberculosis and prisoner removed by pardon. No religious services. Now in charge, 1 white and 6 colored. No boys. Terms, from thirty days to three years.

REV. JEREMIAH W. HOLT,

P. H. Fleming.

Received September 10, 1907.

J. A. TURRENTINE.

# DAVIDSON.

The camp is a frame building, 18 x 36 feet, one story and two rooms. White and colored prisoners are separated at night. Buckets for extingnishing fire. Ventilated by windows and doors. Heaters. No suffering from cold; three blankets each. No female prisoners. All the food they want; no coffee or other warm drink; as much cool water as wanted. Prisoners required to bathe once a week. Blankets washed monthly. Scalding, etc., used in cleansing the camp.

Excreta hauled off. Free of vermin. Straw in the mattresses changed once a month. Punishment inflicted upon one—whipped with strap, for not obeying, by the Superintendent. Sick are well cared for by physicians. No deaths; none known to have tuberculosis. County physician makes monthly inspection of sanitary condition. Hours of work, ten. Three employees; salaries amount to \$100 per month. Prisoners have religious literature. In camp on Sundays; chained' together at night. No boys at present. Now in charge, 11 colored males.

Received May 13, 1907.

### SECOND REPORT.

The camp is as previously reported. Frame building of one story and three rooms. Three meals per day; no coffee. One whipped for disobedience. No deaths. Prisoners chained together at night. Nine colored and two white males. Other items unchanged.

Received October 5, 1907.

JAMES SMITH.

## EDGECOMBE.

The camp has tents, 21 x 49 feet. White and colored prisoners separated. Wood heaters for the winter. Sufficient covering. As much food as they want three times a day; no warm drink. No female prisoners. Required to bathe. Camp cleaned daily by prisoners, and excreta buried. Free of vermin. No punishment. Sick are sent to hospital. No deaths. County physiciau makes a monthly inspection of the camp. Hours of work, 6 to 6 o'clock. Five employees. Amount paid supervisor and guards, \$175. No religious services. Prisoners chained together at night. Boys in a separate teut. Now confined, 31 colored and 3 whites.

J. B. Boddie.

Received May 27, 1907.

# HAYWOOD.

The camp is frame, one story high; ventilated by windows. No suffering in cold weather; sufficient quantity of bedding. Three meals a day and coffee. Drinking water as wanted. Seldom have religious services—occasionally. In camp on Sundays. Boys confined with the men.

Mrs. M. J. Branner.

Received October 1, 1907.

#### HENDERSON.

The camp is a frame building, one story; one large dormitory; two other rooms and kitchen outside. White and colored prisoners are confined in the same room. It is on the bank of a large stream. No suffering in cold weather. Stoves. Ample amount of bedding. All the food they want; three meals a day and coffee twice; drinking water as needed. Required to bathe. Blankets washed frequently. Camp is clean and well kept. Free of vermin. Mattresses new. No panishment has been inflicted. Sick well cared for; separated from the other convicts. No deaths. Dr. A. B. Drafts is the physician. Work ten hours per day. Two employees. Religions services. Prisoners in camp on Sundays; chained together at night.

Remarks.—One colored boy was sent yesterday to the chain gang for shooting another. Camps and convicts in good condition. It is my belief that many of them are more comfortable than they would be in their own homes.

LILA RIPLEY BARNWELL.

Received March 19, 1907.

#### SECOND REPORT.

The camp is nnchanged since the last report. No deaths. No boys. Remarks.—Most of the prisoners are in for short terms—petty offenses. They have frequeutly told me that they preferred the camp life to confinement in jail. The management is good, and they are kindly treated.

LILA RIPLEY BARNWELL.

Received September 16, 1907.

### McDOWELL.

The camp is a frame building, 16 x 30 feet, one room. Whites and blacks in the same room—white on one side and colored on the other. Buckets in case of fire. Stoves. Two to four blankets each. No females. All they want to eat; three meals and coffee twice a day; water as wanted. Required to bathe. Blankets washed every two weeks. Camp sconred and scalded every two weeks. Free of vermin. No pnnishment. No sickness since the establishment of the camp. Physician makes a monthly iuspection. Men work ten hours per day. Superintendent and four guards. Salary of Superintendent is \$65 per month, and \$20 for guards. Religious services. In the stockade and yard on Sunday. Prisoners are chained to one long chain which runs through the center of the building. Boys confined with other prisoners. Now confined: white males, 9; colored males, 14. Seutences, twenty days to three years.

W. F. Craio,

B. L. ASHWORTH, JOHN M. HOUCK.

Received March 15, 1907.

# SECOND REPORT.

Tents are nsed at present at the camp. No suffering from cold. Sufficient food; three meals; coffee; drinking water as needed. Attended by Connty Physician when sick. No religious services. Prisoners are chained together at night. No boys in the gang. I only saw the prisoners while at work. They are well clad and look well; nearly all negroes.

JOHN M. HOUCK.

Received October 23, 1907.

### MOORE.

The camp is a one-story frame bnilding. In winter the convicts are housed in the jail. Sufficient bedding. Plenty of food and drinking water. Required to bathe. Punishment is whipping. No deaths. County Physician makes monthly reports. Worked ten hours a day. Three employees. In camp, chained at night. Boys with others.

Received October 2, 1907. John Campbell.

### PASQUOTANK.

Use canvas tents when on the road, and the jail bnilding in the winter. Whites and blacks are separated at night. Stoves. No suffering from cold. No women. All the food they want; coffee; drinking water as needed. Required to bathe. Blankets washed. Antiseptic spray nsed. Excreta carried away. Yes, punished by whipping. The sick are well cared for. No deaths. Physician makes monthly inspection. Work ten hours per day. Five employees. Superintendent receives \$70; guards, \$30. Religious services. Sundays spent in camp. Prisoners chained at night. Boys with the others.

Received July 17, 1907.

S. L. SHEEP.

### ROCKINGHAM.

Movable canvas tents; three of these, 30 x 50, 12 x 16 and 12 x 12 feet. White and colored are confined in the same tent. No means for extingnishing fire. Stoves and heaters. No, I think that the prisoners are fairly comfortable in cold weather. No women. All the food they want; three meals, with coffee; drinking water at all times. Required to bathe. Blankets washed once in two weeks. Free of vermin. Straw in mattresses changed twice a year. Whipping the prisoners has been abolished. The sick are well cared for, considering the equipment. Physician does not make a monthly inspection of the sanitary condition of the camp. Work nine hours per day. Six to eight employees; \$40 per month for Superintendent and \$15 for gnards. No religious services. In camp on Sunday; chained together at night. Boys with the men. Now confined, 7 whites and 11 colored; total, 18.

Received March 5, 1907.

### ROWAN.

The camp is as heretofore reported. Enough bedding. As much food as they want; three meals daily, except Sunday, when they have two meals; coffee once a day; drinking water as needed. Bathe every Saturday. Blankets washed once in three months. Some vermin in Camp No. 1; none in Camp No. 2. Punished by whipping, about a dozen; fighting, not working. Sick are fairly well cared for; if very sick, sent to the County Home. No monthly inspection by the physician. Men are worked eleven hours at both camps. Four employees at each; salaries, \$50, \$35 to two, and \$40. Religious services at one camp several times a month; none at the second. Prisoners are in the tents or in the shade on Sunday; chained together at night. Boys with the men. Present at Camp No. 1: white males, 6; colored males, 29; at Camp No. 2, 1 white, 31 colored; total, 67.

Remarks.—Some of the negroes claim to be nnder sixteen. Camps are cleaner and prisoners look better than ever before. Fifteen prisoners have escaped from the camps during six months. It costs the county much money to convict and send them to the gang, and they should be kept securely.

REV. F. J. MURDOCH.

Received April 8, 1907.

#### SECOND REPORT.

Two camps in this county. At Camp No. 1 one white prisoner, prefers to sleep next to the guard in the colored department. Camp No. 2, whites and blacks separated. Convicts receive each five pounds of meat a week, bread, peas, Irish potatoes, bread and molasses, all they want; coffee for breakfast. Some vermin. Prisoners have been whipped for disobedlence—fighting. Six employees at one camp and five at the other. Supervisors, \$65, \$60 and \$50; gnards, \$35 to \$45. Prisoners are chalmed together at night. Boys in with the men. Number prisoners at Camp No. 1, 1 white and 25 colored, one under sixteen; at Camp No. 2, 12 white and 33 colored, one under sixteen; total, 71.

REV. F. J. MURDOCH.

Received September 6, 1907.

# RULES AND REGULATIONS FOR THE CONDUCT OF PRI-VATE INSTITUTIONS FOR THE CARE AND TREATMENT OF INSANE PERSONS, IDIOTS, FEEBLE-MINDED PER-SONS AND INFBRIATES.

The following rules for the conduct of private institutions under the supervision of the Board, and form of application for license, have been adopted by the Board of Public Charities:

No. 1. All persons desiring to open or maintain an institution for the treatment and care of insane persons, idiots, feeble-minded persons or inebriates must apply for license as per form prescribed, which will be sent to them, upon request, by the Secretary of the Board of Public Charities, Raleigh, North Carolina.

No. 2. License will be granted upon such application, no objection appearing, and will be issued in the form approved by the Board and attached to these regulations.

No. 3. Said license shall be good for the period therein named, but may be vacated and annulled at any time, by action in the Snperior Court of Wake County, by the Board of Public Charities, when it shall appear to the satisfaction of said Board that the managers of said institution for insane persons, idlots, feeble-minded persons or inebriates have been guilty of gross neglect or of cruelty or immorality.

No. 4. Said license shall be exposed to public view in the office of the superintendent of said institution.

No. 5. The superintendent of said institution for the care and treatment of insane persons, idiots, feeble-minded persons or inebriates shall file with the Board of Public Charities a copy of its by-laws, rules and regulations for its daily governance, and a statement of its rates of charges.

No.6. The said institution shall be open to the inspection of the Board of Public Charities or any representative thereof, which inspection shall be performed when and as often as the Board may see fit.

No.7. The superintendent of said institution shall report to the Board of Public Charities on the first days of January and July, respectively, of each year, in reply to inquiries duly sent from the office of the Board; and said inquiries shall always include in their number the names of the officers of the institution, the number and residence of all patients in the institution, and of those admitted and discharged during the preceding six months, and such other matters as may be necessary for the full information of the inspecting or reporting representative of the Board.

No. 8. The books of the institution shall at all times be open to the inspection of the Board of Public Charities or any member thereof.

No. 9. The superintendent of the institution for the care and treatment of insane persons or inebriates, or its active medical officer, shall be a physician in good standing, holding license from the State Medical Board of North Carolina.

No. 10. The female department, if any, shall be wholly separated from the male department.

No. 11. The chief attendants in both departments shall be trained nurses.

No. 12. In the event of a death in the institution, if no resident consulting physician has been in attendance, the coroner shall be notified to take action.

No. 13. Such additions to these regulations will be made as experience may require.

### FORM OF APPLICATION FOR LICENSE.

In compliance with Chapter 1 of the Public Acts of 1899, being an

Subscribed and sworn to before me, this .... day of ....., 19...

# RULES FOR THE MANAGEMENT OF PRISONERS HAVING CONSUMPTION.

These rules were formulated by Dr. R. H. Lewis, Secretary of the Board of Health, by request of the Board of Charities, and have been mailed to all the counties and to various officials of county justitutions:

- 1. They should be confined in a special cell, or compartment, with a sunny exposure, if possible.
  - 2. They should have their own special driuking cups and tableware.
- 3. They should be provided with spit-cups with handles, so that they can be held near the mouth. Some antiseptic solution, or at least water, to prevent the drying of the spit before it is destroyed, should be put in the cup. The cups should be scalded out every day.
- 4. They should be absolutely forbidden to spit on the floor or walls and made to use the spit-cups always.
- 5. They should be supplied with the most untritious food that circumstances will permit.
- 6. They should be allowed as much fresh air as possible—day and night.
- 7. They should not be required to do any work that will tire them, as fatigue is harmful.
- 8. The cell or room, when vacated by a consumptive, should be immediately disinfected, by washing the entire interior of an iron cell, and the woodwork in case of a room, with a 1-1000 solution of bichloride of mercury. Plastered walls should be whitewashed.

RICHARD H. LEWIS, Secretary State Board of Health.

# FROM PROCEEDINGS OF THE THIRTY-FOURTH NA-TIONAL CONFERENCE OF CHARITIES AND CORREC-TIONS, MINNEAPOLIS, MINN., JUNE, 1907.

* * * "From a few States, notably Illinois, Indiana, Massachusetts and North Carolina, where there has been more than ordinary interest aroused in charities and correction during the past year, the reports are longer than usual. In each case the interest appears to justify the length of the reports."—Committee on Reports from States.

### NORTH CAROLINA.

Miss Daisy Denson, Secretary Board of Public Charities, Corresponding Secretary.

### NEW DEVELOPMENTS.

The new buildings for insane have been completed and opened for occupancy at Raleigh and Goldsboro, admitting 220 additional patients. At Morganton Hospital an amusement hall has been erected. Several private hospitals with charity wards have been opened. During the year there will be much activity along this line. One hospital alone is to cost between two and three hundred thousand dollars.

#### LEGISLATION.

The acts of the General Assembly of 1907 relating to the defective, destitute and delinquent classes will make the brightest page in the development of our charities and corrections. In addition to laws giving actual relief, the State has declared a policy in favor of State care for all indigent mental defectives.

### THE INSANE.

A hospital commission of five business men was created for the special purpose of expending an appropriation of \$500,000 in improvements and enlargement of the present hospitals for the insane, and, in its discretion, to establish a distinct institution, if deemed necessary. This law passed unanimously in both houses. It is very broad in construction and reads as follows: "To make provision for the care and accommodation of all mental defectives, including epileptics, dangerous, violent and indigent idiots and all incurable as well as curable insane, all insane and imbecile Croatan Indians and all other mental defectives whose condition is such that, in the opinion of the hospital authorities, they require hospital treatment and can be advantageously treated in such a colony."

### TUBERCULOSIS.

An act creating the North Carolina Tuberculosis Sanatorium for Consumptives; \$15,000 for its establishment and \$5,000 per annum for support. Fifteen directors were named by the Législature. They have held their initial meeting, appointed an executive committee and are preparing to select the site.

Five thousand dollars annually was appropriated for the erection of cottages for the tubercular insane at the Morganton Hospital.

A law was enacted requiring the separation of tubercular prisoners from other prisoners, and that they be confined in cells or rooms kept exclusively for their use. If there is any suspicion of the disease, the officer in charge is required to have the prisoner examined. This applies to all jails, camps and State prisons. It does not prevent the working together of the prisoners when in the open air.

#### THE REFORM SCHOOL.

An act was passed establishing a reform school, under the title of "The Stonewall Jackson Manual Training and Industrial School," with the widow of the illustrious Confederate general as the first-named director in the bill. There are to be fifteen directors, a number of them women. A committee

of five members of the Legislature was appointed to investigate reform schools and report its recommendations to the Governor by September 1st, when a meeting will be held and the other directors, officers, etc., will be chosen. The appropriation of \$5,000 per annum merely insures a beginning.

### COMPULSORY SCHOOL LAW FOR THE DEAF.

A compulsory school law was passed, requiring the attendance of white deaf children, also limiting the institution to residents of North Carolina, except when there is room beyond the needs of the State, when pay pupils may be received.

A tentative compulsory school law for the State. This allows districts or counties to vote upon the question when public sentiment favors it; also, a system of high schools was established, the appropriations to State colleges largely increased, and several educational institutions established.

#### PENSIONS.

Pensions to Confederate veterans were increased to \$400,-000 per annum.

### CHILD LABOR.

The present law was strengthened, the age limit advanced for illiterate children, and night work prohibited. It met with no opposition from the manufacturers, but was passed with their approbation.

### BOARD OF AUDIT FOR COLORED ORPHANAGE.

This institution is a private one, which has been receiving annual appropriations from the State, and until recently the State had no representation on the board. It is the policy of the State to have directors on all boards of institutions where State money is given. Directors have been appointed also.

### COUNTY INSTITUTIONS.

Several additional counties were given permission to establish eamps, and a number to build or remodel jails and Homes.

### PRIVATE SOCIETIES.

A law was passed "to permit benevolent societies to purchase, receive, hold and sell personal and real property."

The vagrancy law, temperance and other measures conducive to good morals were strengthened.

Increased appropriations and additional improvements were made for most of the institutions.

#### NEEDS.

Our needs are as last reported, but I am happy to say that we shall soon meet them by establishing several new institutions and enlarging others, namely, more room for the insane, care of epileptics and the feeble-minded, and a reform school for youthful delinquents.

We will still need much, especially classification, etc., of prisoners, but feel very hopeful of the development of our institutions along desirable lines.

### REMARKS.

There is a lively interest felt in our institutions, and the tendency is to "state care" for the indigent sufferers of all defective classes.

# SPECIAL SESSION OF THE ASSEMBLY OF 1908.

The Assembly passed the following laws in regard to the Charities:

A compulsory school attendance law for the blind, similar to the one enacted affecting the deaf.

A law requiring the counties to pay the traveling expenses of the indigent blind and deaf children from their homes to the schools and return, in addition to the \$20 per year now paid for clothing.

Counties to furnish \$20 for burial expenses of indigent Confederate pensioners, when approved by the Chairman of the Pension Board of the county.

Rents and profits from real estate used exclusively for charitable, religious or educational purposes to be exempt from taxation.

In the line of prevention of crime and other social evils was passed a law which will make North Carolina a prohibition State; the same to be voted on by the people on the 26th of May, 1908, and to go into effect January 1, 1909.

## LIST OF STATE INSTITUTIONS, PRIVATE HOSPITALS. ORPHANAGES AND OTHER BENEVOLENT ASSOCIA-TIONS.

#### STATE INSTITUTIONS.

Name, Superintendent and Location.

Dangerons Insane Department—James R. Rogers, M. D., Raleigh,

North Carolina Soldiers' Home-R. H. Brooks, Raleigh.

Oxford Orphanage for Colored Children-John Cheatham, Oxford.

Oxford Orphanage for White Children-W. J. Hicks, Oxford. School for the Blind and Deaf-John E. Ray, Raleigh.

School for the Deaf and Dumb-E. McK. Goodwin, Morganton.

State Hospital at Goldsboro-W. W. Faison, M. D., Goldsboro,

State Hospital at Morganton-John McCampbell, M. D., Morganton.

State Hospital at Raleigh-James McKee, M. D., Raleigh,

State's Prison-J. S. Mann, Raleigh,

Stonewall Jackson Manual Training and Industrial School-Walter Thompson, Concord.

Tuberculosis Sanatorium-J. E. Brooks, M. D., Cumberland County.

#### HOSPITALS.

Asheville Mission Hospital-Miss Caroline Marques, Asheville,

Atlantic Coast Line-Rocky Mount.

Central Carolina Hospital-Dr. J. P. Monroe, Sanford.

Clarence Barker Memorial-Biltmore.

Davidson Hospital-Davidson.

Goldsboro Hospital-735 North John Street, Goldsboro.

Good Samaritan (colored)-Charlotte.

Harrison Monntain Air Sanitarium-Dr. Isaac J. Archer, Black Mountain.

Highsmith Hospital Company-Dr. J. F. Highsmith, Fayetteville.

James Walker Memorial Hospital-Dr. Robert B. Slocnm, Wilming-

Leonard Medical School Hospital (colored)—Shaw University, Raleigh.

Lincoln Hospital (colored)-Dr. C. H. Shepard, Durham.

Lumberton Sanatorium—Lumberton,

Mercy General Hospital-Dr. John H. Crowley, Charlotte.

Monroe Hospital-Monroe.

Pickford Sanitarium-Dr. L. A. Scruggs, Southern Pines.

Pittman Hospital-C, M. Parkes, Tarboro.

Presbyterian Hospital-Charlotte.

Rex Hospital-Miss Elinor Phillips, Raleigh.

Rutherford Hospital—Dr. Henry Norris, Rutherfordton.

St. Agnes' (colored)-Mrs. A. B. Hunter, Raleigh.

St. Leo's Hospital-Greensboro.

St. Lnke's Hospital Company-Fayetteville.

St. Peter's Hospital-Mrs. John Wilkes, President, Charlotte.

Salisbury Hospital-Salisbury.

Sanitarium-Kinston.

Scotland-M. D. Prince, Laurinburg.

Slater Hospital (colored)-A. J. Brown, Winston-Salem.

S. R. Fowle Memorial Hospital-Miss Violet L. Kirke, Washington.

Stewart Sanatorium—Miss Maybelle Covington, New Bern. Thermal Belt Sanitarium—Dr. E. McQ. Salley, Tryon.

Twin-City Hospital—Mrs. W. D. Taylor, Winston-Salem.

Watts Hospital—Miss Mary Wyche, Durham.

Wilson Sanatorinm-Wilson.

Winyah Sanatorium-Asheville,

#### LICENSED HOSPITALS FOR INSANE AND INEBRIATES.

Broadoaks Sanatorinm-Dr. Isaac M. Taylor, Morganton.

Dr. Carroll's Sanitarium and Highland Home—Dr. Robert S. Carroll, Asheville.

Dr. McKanna's Sanitarinm (inebriates only)—Dr. J. J. McKanna, Reidsville.

Perfected Liquor Cnre (inebriates only)—Dr. J. B. Gunter, Greensboro.

Telfair Institute (inebriates only)—Dr. W. C. Ashworth, Asheville.

#### ORPHANAGES AND CHILD-CARING ORGANIZATIONS.

Alexander Home-Mrs. C. M. Carson, Charlotte.

Allen Industrial Home and School-Asheville.

Baptist Orphanage—M. L. Kesler, Thomasville.

Charlotte Day Nursery-Charlotte.

Christian Orphanage-Rev. J. L. Foster, Elon College.

Christian Orphan's Home and School-Dewdrop.

Colored Orphan's Home Company-J. Perry, Winston-Salem.

Crittenton Home-Miss Elizabeth A. Neimann, Charlotte.

Elhanan Institute-Miss Mattie Perry, Marion.

Eliada Orphanage and Rescue Home-Asheville.

Faith Cottage-Asheville.

Lindley Training School-Mrs. M. E. Hilliard, Asheville.

Methodist Orphanage-Rev. J. N. Cole, Raleigh.

Nazareth Orphan's Home-J. M. L. Lyerly, Crescent.

North Carolina Children's Home Society—W. B. Streeter, Greensoro.

Odd Fellows' Orphan Home-J. F. Brinson, Goldsboro.

Presbyteriau Orphan's Home-Mr. Packford, Barium Springs.

Rest Cottage-Mrs. W. R. Cox, Greensboro.

Roman Catholic Orphanage for Boys—Father Price, Raleigh. Southern Orphanage and Industrial Home for Colored Youth—Sanford

The Thompson Orphanage and Training School—Rev. Walter Smith, Charlotte.

#### PERMANENT HOMES FOR THE OLD.

Catherine Kennedy Home—Mrs. Roger Moore, President, Wilmington.

Home for Disabled and Aged Railroad Men—R. E. Davis, Greensboro.

Salem Home-Winston-Salem.

St. Luke's Home-Mrs. B. F. Dixon, President, Raleigh.

# ORGANIZATIONS FOR THE RELIEF OF THE POOR IN THEIR HOMES

Associated Charities-W. V. McRae, Secretary, Durham.

Associated Charities-Mrs. Dalton, Greensboro.

Associated Charities-W. E. Bowers, Secretary, High Point.

Associated Charities—Rev. R. S. Stephenson, Superintendent, Raleigh.

Associated Charities—Miss Carrie L. Price, Secretary, Wilmington.
Associated Charities—Miss Annie Grogan, Sec., Winston-Salem.
Ladies' Benevolent Society—Mrs. Weil, President, Goldsboro.

# LETTER OF TRANSMITTAL.

RALEIGH, N. C., January 5, 1909.

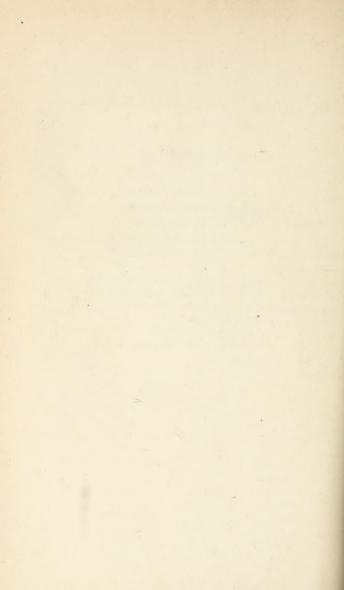

To His Excellency, R. B. Glenn, Governor of North Carolina.

Sir:—We have the honor to submit herewith the Annual Report of the Board of Public Charities for the year ending December 31, 1908.

Your special attention is called to the several recommendaions therein, which, in our opinion, require the action of the General Assembly, to whom we earnestly ask that you transnit the same, with your approval.

Respectfully submitted,

WILLIAM A. BLAIR,
Chairman.

Commissioners.

# REPORT

OF THE

# BOARD OF PUBLIC CHARITIES

FOR THE YEAR 1908.

THE CAPITOL,
RALEIGH, N. C., December 31, 1908.

Mr. W. A. Blair, Chairman, and Messrs. Carey J. Hunter, A. C. McAlister, H. C. Dockery and Joseph G. Brown, Commissioners of Public Charities.

Gentlemen:—I have the honor to present the following report of the condition and management of the charitable and penal institutions of the State for the fiscal year ending November 30, 1908:

In addition will be found the reports of orphanages, hospitals and other charitable institutions maintained by private benevolence and municipal aid. These are voluntary reports, made by request of the Board of Charities, and included in this public report for the information of our people and to show in a comprehensive way the entire field of charitable endeavor.

The great number of defective and degenerate persons who burden the State and whose defective organizations can be traced to hereditary causes makes us ask ourselves whether we may not more effectually expend our energies upon preventive measures than upon cure or alleviation. Certainly we should not be satisfied with merely the latter.

Social workers are emphasizing the necessity of seeking the sources whence flow these streams of fettered souls into our institutions, and there to check the torrent. Prevention is to be the new keynote of philanthropy. That charity is the most perfect charity which does most to eliminate itself, which meets the needs so well as to become unnecessary.

Segregation of the imbecile and epileptic, stricter marriage laws for them, are preventive measures in use in this and other countries. The congenital deaf should be included in these restrictive marriage laws. The epileptic and the imbecile should receive custodial care for life in an epileptic village, where they may live happily and yet entail suffering upon no succeeding generation.

Again, in the case of the blind, important preventive treatment will save a long lifetime of blindness to the new-born babe. The New York State commission to investigate the condition of the blind in that State found that 26 per cent., or 600, of the blind children of that State were the victims of "opthalmia neonatorum," "almost none of whom would have lost his sight had simple prophylactic measures been employed." The commission emphasized these two points: "(1) That it is the duty of the State to protect its infant citizen, as a minor, from the danger of blindness with which he is threatened; and (2) that it is the duty of the State to protect itself from the burden of caring for the unnecessarily blind."

Prof. John E. Ray, of the State School, calls attention to this matter in his biennial report, and says that "at least 15 to 25 per cent. (forty to sixty boys and girls) of the students of this school should never have been blind, and would not have been if the proper medical skill and intelligence had been exercised."

Then there are the cases of border-line or incipient insanity. If they could be taken in time and early diagnosis and care given, what a saving to the taxpayers! It is injurious to the insane person to be cared for by one and then by another set of officials, spending several months in jail before receiving treatment, and losing perhaps the chance of recovery.

As soon as our State is able, we should have established in connection with one of our great hospitals a psychopathic institute, where there may be research looking into the causes of insanity, where all the physicians connected with the various institutions can spend some time in turn. Dr. Adolph

Meyer is in charge of such an institute on Ward's Island, New York, and every one of the sixty doctors in the State institutions have studied and conferred with him and together. Dr. Billings, of the Board of Charities of Illinois, says that "It means better nomenclature of the disease, properly written records, something of prognosis based upon the diagnosis. It means looking into everything connected with psychiatry. A satisfactory clinic would not only teach the doctors in the State service, but those in general practice, who, as a rule, know little about insanity. It means that medical students can gain a knowledge of insanity, and the pupils going out into the State would recognize the disease and its causes. For, as much as we talk about insanity and its causes, we do not know as much about it as we should, and such pupils going out everywhere might be able to stem the tide, for, as you know, insanity is increasing."

Hydrotherapeutic treatment for the insane is used in many large institutions with great success. Its greatest value is upon its quick use in the early stages of the disease.

North Carolina has already entered upon the preventive phase of charity. To-night, when the old year dies, every saloon in the State closes its doors and the cause of temperance triumphs. The moral battle which has been waged within our borders means uplift for not only the man who has conquered himself for the sake of the weaker brother, but the ennobling of future generations, and is pertinent to this question of prevention, intemperance being the direct or indirect cause of much of the imbecility, insanity, crime and poverty. If we could see into the future, we doubt not that, this scourge removed, much of the burden of caring for the defective and helpless will be relieved.

Again, the State, in preparing a training school for delinquent boys, is using a preventive. A countless saving in manhood and priceless souls will result, a lessening of crime and a monetary return, in that possible criminals will become of economic value, constructive instead of destructive, building up the waste places and adding to the strength and beauty of the Commonwealth. In her wise laws for the care of consumptives and the separation of this class from other prisoners and from other inmates in her several institutions she again is keeping in the van with other States. The establishment of the Tuberculosis Sanatorium near Aberdeen was a great preventive step. This disease kills more of mankind probably than any other. It is one of the most pauperizing of all diseases. And yet it is preventable. We have known this since Dr. Koch discovered the tubercle bacillus, in 1882.

Dr. Theodore Sachs, of Chicago, says that "The life of a tuberculous patient in the incipient stage can be saved at the expense of \$150 to \$200, and this means not only the return of a breadwinner to a family and prevention of infection in others, but also the gradual creation of an army of cured consumptives, who, by their example of orderly life, cleanly habits and love of pure air, are always great factors in an effective campaign against tuberculosis in any community."

And Pasteur has said that "It is in the power of man to cause all parasitic (germ) diseases to disappear from the world."

What an energizing ray of hope penetrates the seeming darkness of the vast problem of the care of our defective, dependent, delinquent classes! And this hope lies in *prevention*.

Archbishop Ireland said in his conference sermon that "We must take advantage of all the discoveries in sociology and in industry. Those are two gifts of the Almighty to humanity, and we are serving the Almighty when we make use of those gifts; hence preventive charity is far more valuable than that charity which only relieves. We must relieve, but let us be active in that charity which will prevent evil passion and suffering and which will put humanity on a higher stage."

POPULATION OF INSTITUTIONS, APPROPRIATIONS OF 1907-1908 AND APPROPRIATIONS NEEDED FOR THE BIENNIAL PERIOD 1909-1910.

The population of the institutions was distributed during the year ending November 30, 1908, as follows:

	nmates.
Hospital at Morganton	1,335
Hospital at Raleigh	711
Hospital at Goldsboro	857
Dangerous Insane Department	75
School for the White Blind	182
School for the Colored Blind and Deaf	196
School for the White Deaf and Dumb	284
Soldiers' Home	192
Oxford Orphanage for White Children	369
Oxford Orphanage for Colored Children	148
Stonewall Jackson Manual Training and Industrial School	0
North Carolina Tuberculosis Sanatorium	10
Total	4.359
Whole number of insane in charge during the year	2,978
Present in the institutions November 30, 1908:	
Hospital at Morganton	1,142
Hospital at Raleigh	502
Hospital at Goldsboro	654
Dangerous Insane Department	61
School for the White Blind	165
School for the Colored Blind and Deaf	- 99
School for the White Deaf and Dumb	249
Soldiers' Home	134
Oxford Orphanage for White Children	325
Oxford Orphanage for Colored Children	142
Stonewall Jackson Manual Training and Industrial School	0
North Carolina Tuberculosis Sanatorium	5
Total	3,478
Insane present in the hospitals November 30, 1908	2.298
	-1-00
Per capita cost per annum for maintenance during the	year
1908:	
State Hospital at Morganton\$	152.55
State Hospital at Raleigh	167.25
State Hospital at Goldsboro	122.14
Dangerous Iusaue Department	93.04
	200.00

Sschool for the Colored Blind and Deaf, approximately\$	175.00
School for the White Deaf and Dumb	185.00
Stonewall Jackson Manual Training and Industrial School	
North Carolina Tuberculosis Sanatorium	
Soldiers' Home	108.00

Annual appropriation for pensions, \$400,000, and \$12,000 paid out for totally blind veterans. Number of pensioners, 15,000.

The appropriations for maintenance made for the brennial period of 1907-1908 were, for each year, as follows:

period of 100, 1000 mere, 101 chen jour, at tollows.	
State Hospital at Morganton	\$145,000
State Hospital at Raleigh	95,000
State Hospital at Goldsboro	65,000
Dangerous Insane Department	5,000
Schools for White Blind and for Colored Blind and Deaf	60,000
School for White Deaf and Dnmb, Morganton	46,000
North Carolina Soldiers' Home	15,000
Oxford Orphanage	10,000
Oxford Orphanage for the Colored	5,000
State Tuberculosis Sanatorium	5,000
Stonewall Jackson Manual Training School	5,000
Elhanan Orphanage	500

Total .......\$456,500

Increase in maintenance appropriation, \$20,500 per annum above previous biennial period.

Total appropriations for biennial period of 1907-1908 for charitable institutions, including Training School and Tuberculosis Sanatorium:

Maintenance\$	913,000.00
Improvements, repairs, additions and equipment	48,800.00
Special for mental defectives	250,000.00
Establishment of Tuberculosis Sanatorium	15,000.00
To liquidate indebtedness	25,138.62

# Maintenance for the biennial period 1909-1910:

An	nual Amount Needed.
State Hospital at Morganton, annually	8175,000.00
State Hospital at Raleigh, for the number now present;	
more if the epileptics are received	118,250.00
State Hospital at Goldsboro, for 1909\$83,750	
State Hospital at Goldsboro, for 1910 90,000	86,875.00
Dangerous Insane Department	7,500.00
School for the Deaf and Dumb at Morganton	55,000.00
Schools for the White Blind and Colored Blind and Deaf	65,000.00
Soldiers' Home	17,000.00
Oxford Orphanage for White Children	10,000.00
Oxford Orphanage for the Colored	5,000.00
Stonewall Jackson Training School	5,000.00
Tuberculosis Sanatorium	5,000.00
Total	\$549,625.00

The amount asked for exceeds the appropriations of the last period by \$93,125 annually. The appropriations to the Stonewall Jackson Training School and to the Tuberculosis Sanatorium should be materially increased above the present appropriations of \$5,000 per annum.

Special app	ropriation disbursed by	Hospital	Commission	\$125,000.00
Annual for	maintenance			549,625.00

Grand total\$674,625.0	Grand	total			\$674,625.00
------------------------	-------	-------	--	--	--------------

#### INDEBTEDNESS OF INSTITUTIONS.

The State Hospital at Morganton	\$20,000.00
The State Hospital at Goldsboro	11,000.00
The State Hospital at Raleigh	89.52
School for the Deaf and Dumb, Morganton	2,292.10
School for the Blind	2,500.00

Total	 	 \$35,881.62

The Dangerous Insane Department cost \$768.36 more than the appropriation of \$5,000, but the expenses of this department are now defrayed out of the prison earnings.

This general overlapping of maintenance funds seems to show that the causes are similar, namely, the demand for admission and the attempt to meet the demand, and the rise in prices from which the whole country has suffered.

A comparison of per capitas appears to confirm a part of this conclusion, as there was an increase over the per capita of two years ago, except in the case of the hospital at Raleigh, which has decreased each year for two years, due to the increase in facilities and the purchasing of land previously rented, as well as to the increase of population. The Soldiers' Home and the Dangerous Insane Department show about the same per capitas—very low at each.

The per capitas of our institutions compare well with those of other States, being lower than many. But with higher per capitas institutions can become more efficient, and we should keep in mind that the lowest per capita, unless accompanied with the desired results, would not be meeting the real needs.

Quoting from the report of the Committee on Insane of the National Conference, Dr. Owen Copp, chairman, says:

In the formative period of a community the insane, the defective, the poor, the physically ill and the criminal are likely to be found in the same establishment or in close association under the same management. But the growth of a State leads naturally to their separatiou in institutions under appropriate boards of administration and of supervision. * * * The complete evolution should be the General Board of Prison Commissioners, the State Board of Health, the State Board of Charity and the State Board of Insanity, with their respective local boards of managers. The relation of the general to the local hoards should be grounded on two principles; (1) local executive responsibility; (2) general supervisory review of executive acts, with power of investigation, recommendation and criticism, but no arbitrary authority of control in local matters. The absolute powers of the supervisory hoard should be limited to general interests and interrelations of multiple local nnits. The theory of operation presents these supervisory and administrative bodies distinct in function and independent in action, viewing problems of common concern from their different standpoints, but arriving at harmonions conclusions through conference and discussion, or, failing to agree, referring their differences to the final arhiter, the Governor or legislative assembly, representatives of the public. Such supervisory relation preserves individuality and independence, encourages free expression of opinion and

comparison of methods and results, stimulates to wholesome rivalry for leadership, and insures protest against pernicious policies potent to recast or defeat them.

The insane and mentally defective naturally group together under the supervision of the board of insanity, but have divers characteristics requiring subdivision into the feeble-minded, the epileptic, the insane criminal and other insane, each presenting sufficient dissimilarity to warrant a special environment.

Each institution should have its exclusive district. * * * * The extent of such district should be proportionate to its capacity for patients, expanding with its growth to a maximum by readjustment from time to time through the State Board.

The limit of extension of a hospital is a matter of vital importance, which will elicit a great diversity of opinion. All would desire its limitation within the compass of the individual study and treatment of its patients and within the capacity of a single executive head to conserve efficiency and unity in all departments, both medical and administrative. Such conditions would restrict expansion beyond six to eight hundred. Unfortnnately, however, the insistent demands of highest economy far transcend such bounds. The lower maintenance charge of the large institution is evident to the many, whereas the compensations of the small hospital in promoting better treatment of patients and higher medical and scientific attainment are recognized by only a minority.

There should be a certain policy for the care of the annual increase of the insane. We should have in mind the maximum limit of our hospitals, and when that has been reached a new one should be established. The maximum, so the best authorities say, should not exceed 1,500, and others say that the number should be less to attain the best results.

The hospital districts should not be immovable, but should be changed from time to time to meet the needs of our rapidly growing population—a growth which is necessarily not uniform in all sections at the same period. The real question is the care of the insane of the whole State in the most economical manner consistent with the best medical results.

The State Hospital Commission having thoroughly taken up the needs of the hospitals as to adequate room and equipment, we will simply call attention to the general need of increased maintenance funds to meet the increased number now in charge and those to be admitted upon completion of the buildings in course of construction,

### DANGEROUS INSANE DEPARTMENT.

This department, which occupies the western wing of the State's Prison, has outgrown its capacity. Thirteen are now in charge who must occupy prison cells at night. It was but a makeshift to meet urgent need of separating this class from the more tractable insane—a forward step for North Carolina-but the attention of the Legislature is respectfully called to the necessity of soon providing other quarters for this class. The wards are comfortable, but there are no facilities or space for outdoor life or occupation, those active factors in the proper treatment of the insane. The statistics show eight cures out of seventy-five patients during the year, with all the attendant drawbacks. We would recommend that this department and its needs be included in the general appropriation for the adequate provision for our insane, and that the Hospital Commission be requested to take up the question.

# MENTAL DEFECTIVES IN HOMES AND JAILS.

Reports have been received during the year from all jails except three and all County Homes except two, in regard to the mental defectives. The reports not eoming promptly gives less value to these statistics, as some of the insane in the jails have doubtless since been transferred to the hospitals and a few from the County Homes. However, it shows about the average number passing through the prisons, those in such condition as to necessitate confinement at the Homes (and who should most emphatically not be there) and a large number who are harmlessly insane or feeble in mind and perhaps can with security be left where they are at present, though there is more or less danger, and our policy should be State care for all the insane.

# Present at time of report:

Insane in jails	26
Insane in County Homes	162
Epileptic	. 97
Feeble-minded (idiotic, imbecile, senile, etc.)	270
	-
Total	554

Of these, 26 were confined in jails and 47 in Homes; total, 73.

EPILEPTIC VILLAGE.

There are ninety-seven epileptics reported in the County Homes. A number of those classed as insane in the jails are insane epileptics. The time will come—perhaps is here when we should provide for the "care and treatment of epileptics"—not the epileptic who has lost all his opportunity in life for want of this care, and is already a dement and incurable, but for the class who are living in the community handicapped on every side and daily losing ground. The young especially—and this disease begins in early life—should be received and cared for in such a village. There are cures, though it is a disease which is not so well diagnosed and in the study of which many men are spending their lives, still the attacks are arrested and further brain deterioration reduced to the minimum. But to the State it will mean not alone the possible cures, but the cutting off of a large number of this class eventually by segregating such as should not return to the community.

Such a village should be entirely separated from the hospitals for the insane. In preparing for these classes we must look to future needs. It should be removed from any large city, though accessible to transportation facilities. It should have room to grow and should be developed under its own corps of officers, like such villages as Craig Colony, New York, Epileptic Village of New Jersey and many others.

The insane epileptic, the unfortunate for whom there is no hope of real improvement, would not properly come under this care; he can be cared for in a colony at the Hospital for the

Insane. To so care for him will be a great relief to the institutions which have had to provide for some of this class to the detriment of other patients; so, also, many who are in the County Homes; but this is only custodial. It should be only for the classes who are not susceptible of much improvement, and the State village should give community life to epileptics, but so guarded as to protect them from injury—to alleviate, to teach, to cure, to make happier during their lives, and in so doing to protect the State.

#### CHILD-CARING INSTITUTIONS.

There are twenty institutions caring for about 1,700 children. Most of these are in flourishing condition, and the children are properly fed, clothed and educated. The majority are under the control and subject to the inspection of their respective boards of trustees, and they in turn represent churches or fraternal orders, but several are under the sole management of an individual.

Every institution caring for helpless humanity, whether from defect or from unbalanced mind or from tender years, should be under the supervision of capable boards of trustees or other organizations, and in addition the State should have the right of inspection and visitation. It is a mistake to permit the existence of an institution caring for helpless children to depend upon the life of one person. No such institution should be chartered or allowed to open its doors for the reception of irresponsible waifs, homeless children, except it has satisfied the Board of Public Charities that conditions are fit, and when it has received a certificate from this board granting permission to receive children. Such is the law in New York and elsewhere.

We are of the opinion that the Legislature should not make appropriations to private institutions, except, perhaps, for some special reasons which might arise, and in no case unless the State has representation on the boards of management and unless the institution is subject to visitation and inspection of the State boards.

Dependent children from other States should not be brought into this State to perhaps become a charge upon North Carolina.

## THE SCHOOL FOR THE DEAF AND DUMB.

The compulsory attendance law has not been enforced, for the lack of room. Sufficient room for 100 additional deaf children is needed

#### THE SCHOOL FOR THE BLIND AND DEAF.

The special session of the Legislature of 1908 passed a compulsory attendance law for the blind, similar to the one enacted affecting the deaf. This has not been enforced. If it should be, there would be sufficient room, but \$10,000 additional for maintenance would be necessary. The attention of the General Assembly is called to the overgrown condition of the plant. There is not room for the outdoor life which should be required of the blind children, who are more or less physically weakened by the disinclination to active exertion, superinduced by their affliction. Attention is called by the superintendent to the fact that few are congenitally blind, but have lost their sight from neglect and accident; therefore the weakened physical condition is one that can be much improved.

The history of institutions that are established near the center of growing cities has been the same, namely, they outgrow the original plans and eventually must be removed to where they can have space for the development of newer ideals. This School was the first charitable institution that the State opened to her afflicted, about the year 1845. The time must soon come when we must follow the story of other States and remove this School to the more open suburb, but near enough to give the pupils the inestimable advantage of the religious and educational opportunities of the city to which they are now much indebted.

## COLORED DEPARTMENT OF THE BLIND AND DEAF.

Sick wards for the isolation of eontagious and infectious diseases are needed at this institution.

## SOLDIERS' HOME.

The veterans are comfortably cared for at the Home. The improvements authorized by the last General Assembly have added much to the comfort of the siek, who form about one-third of the men. The average age is near seventy-five. The line of gray is fast thinning. North Carolina should gladly, will gladly, give them the increased maintenance fund asked for, \$17,000 per annum, and \$2,000 per year for special improvements.

#### THE STONEWALL JACKSON TRAINING SCHOOL.

This institution opens its doors on January 12th next for the reception of boys. Plans for the completed plant are already made, and the school will be developed on these lines symmetrically until it will become one of the best and most useful. The board of directors wisely sent the new superintendent to Glen Mills, Pennsylvania, where is located the model institution of its kind in America, to spend some weeks and thoroughly examine their work. The need now is maintenance sufficient to support the sixty boys who can be received (and many applications are on hand) and funds to quickly erect other cottages. The Board of Charities is constantly receiving applications from parents and friends asking for information as to some place where they may send boys. A number are boarded in other States by their relatives.

## THE TUBERCULOSIS SANATORIUM.

This newly opened institution deserves the support necessary to enlarge and equip it, so that the many patients who are seeking it may be received, and that it may serve not only to cure the sick, but as an educational factor in our warfare against the great white plague.

## OXFORD ORPHANAGE FOR WHITE CHILDREN.

This institution is under the control of the Masons and is well managed and efficient. There are directors appointed on the board of trustees to represent the State. There was an epidemic of scarlet fever in a light form, but no deaths, the children making good recoveries. The present general condition of health is very good. Colonel Hicks says that "the normal Christian home ought to be the best place in the world for the rearing of children." He discourages the breaking-up of homes and the removal of children to institutions unless this course, "after thorough investigation and consideration, seems to be the very best possible solution of the ease."

# COLORED ORPHANAGE AT OXFORD,

This institution has been placed under the management of Henry P. Cheatham during the last biennial period. He calls attention to the fact that it is dependent upon the State appropriation for its chief support. It now cares for 142 children. The industrial workshops opened there are worthy of note as the best means of training this class to self-support. The State is represented by three directors on the board of management.

STATE'S PRISON.

The financial and physical condition of the Prison arc excellent. The death rate during the year was low, being 2½ per cent. upon the whole number in charge. Only two deaths from tuberculosis demonstrating the wisdom of outdoor life and the isolation of such prisoners as have contracted the disease.

According to the present law, the terms of all the directors end simultaneously every four years. The entire Prison régime, from superintendent to guards, is subject to arbitrary change. We therefore recommend that the directors of the State's Prison be appointed in like manner and for similar terms as the directors of the charitable and educational institutions, namely, by appointment of the Governor, by and with the consent and advice of the Senate.

The Constitution, Art. XI, says that "No convict shall be farmed out who has been sentenced on a charge of murder, manslaughter, rape, attempt to commit rape, or arson."

Again, in section 1357, chapter 24, Vol. I, of the Revisal of 1905 (chapter on county prisons and convicts on public roads), there is the following proviso: "That no person who has been convicted and sentenced on a charge of murder, manslaughter, rape, attempt to commit rape, or arson, shall be assigned to county roads under this chapter."

As we found that these classes which seemingly are prohibited by the Constitution and the statute are so worked, we deemed it proper to call the attention of the authorities to the matter and to ask for an opinion from the Attorney-General. The directors cheerfully forwarded desired information and signified their intention to abide by the ruling. They reported that at the four railroad camps there were 298 convicts, of whom 192 had been sentenced on these charges.

There were forty-two escapes during the year, many of which were from the camps and were life prisoners and long-term men. This class of convicts is a desperate one, ready to take desperate chances and tempted to do so by the apparent freedom. Being worked with short-term men, the latter must of necessity be subjected to greater restrictions. Their escape is a menace to the community. It is contrary to the spirit of the law and probably illegal. As this question affects radically present conditions, and as there are other changes desired in regard to prisoners, the authorities did not deem it expedient to precipitate these changes, and so no opinion was rendered by the Attorney-General.

We feel that it is our duty to bring the subject to the attention of the General Assembly, in order that the law may be understood and obeyed, or, if in the wisdom of the lawmakers the working of such prisoners should be continued, then there should be a constitutional amendment to that effect.

# COUNTY CONVICT CAMPS.

There are forty-four camps in thirty-seven counties, the prison population being augmented by prisoners from neighboring counties. Thirty-one have reported, but only twentyseven give the number confined, as follows:

White males	 	 	 	177
Colored males	 	 	 	. 796
Color not given	 	 	 	100
Colored females	 	 	 	3
Total	 	 	 	1.076

Twelve of these were boys under sixteen. The three women are employed as cooks in the Guilford camps; Anson, Buncombe, Nash, Randolph, Sampson and Mecklenburg No. 2 not reporting. Bertie reports prisoners quartered at the County Home and working the farm there, not giving data.

There are over twelve hundred prisoners in the camps, and attention has been called by some of the visitors to the apparent youth of these men. Nine deaths during the year. Comparatively little tuberculosis; one prisoner with the disease was pardoned, another occupies a separate tent at night, and one died. Four counties reported that blacks and whites occupied the same room or tent at night. These were advised of its illegality. Four others reported as follows: "Separate divisions" of the same room; "curtains between"; "same room, different ends"; "yes, with divisions." We do not think that this meets the requirements of the law, which is absolute separation of the races in their sleeping quarters.

Six counties report no whipping, punishment for infraction of rules, confinement in steel cell and deprivation of tobacco or other privilege. The other camps punish by flogging with the leather strap. No religious services in eight; in others occasional. Guards receive from \$20 to \$40 per month; supervisors, from \$30 to \$100. There is no classification of prisoners. Felons, misdemeanants and men working out fines wear the stripes and receive like treatment.

We repeat the same recommendation made three years ago, that these county camps be placed under the supervision of the State Prison Board or some other State board. This will save expense to the taxpayer and, what is of higher importance, better the condition of the prisoners. Every prisoner should have moral and some educational advantages as reformative agencies, so that when returned to the community he may be a help and not a hindrance. Therefore we recommend that any policy which may be agreed upon shall include the appointment of prison chaplains and other means for reformation.

Reports have been received from all jails except Halifax and Randolph and the new county of Lee, whose jail is in course of construction. A close scrutiny of the tabulated reports of the commissioners and the visitors' reports show these facts:

- 1. Bathing facilities range from none at all to hot and cold shower baths. As a rule, new prisoners are admitted without bath or change of clothing, and thus introduce vermin. If a bath were compulsory upon admission and the jail could own a few suits of clothing to be worn while the old clothes were being washed, the difficult problem of keeping the buildings in condition would be nearer a solution.
- The old bucket system for the disposition of excreta is in use in sixteen counties. This should be replaced with sewerage and sanitary arrangements.
- 3. The daily cleansing of the cells or rooms required by law should be strictly enforced.
- 4. Two-thirds of the counties give three daily meals of wholesome prison fare and most of them furnish coffee once a day.
- 5. Twenty-nine counties report no religious services; others are ministered to by the local preachers, the King's Daughters and the Women's Christian Temperance Union. This is a great lack, but is explained in part by the fact that a number of our jails are unoccupied for months at a time.

# Present at time of report:

White males	163
White females	11
Colored males	365
Colored females	53
Total	592

Fourteen have died.

Of the number confined, 19 white and 7 colored were insane, leaving 566 prisoners, most of whom were awaiting trial.

Counties remodeling old buildings, constructing new ones or contemplating changes have been advised of the legal requirement of the absolute separation of the races, sexes, the tuberculous and the insanc.

New buildings have been completed in Buncombe, Craven, Caswell, Duplin, Rowan and Perquimans; Davidson's has been remodeled; Forsyth has added an extensive concrete annex, up to date in every particular; Yancey and Lee are constructing new buildings; Pasquotank will build or remodel, and Mecklenburg has a modern jail projected.

New buildings are needed in Burke, Clay, Dare and Davie. New Hanover jail, although enlarged, does not meet the needs, and the officials, in order to prevent sickness from overcrowding, sent a number of persons awaiting trial to be confined at the county camp until the term of court. Beaufort jail, though reported in excellent condition, has been badly overcrowded. Person jail is too small. Lincoln, Rockingham, Transylvania and Tyrrell jails need improvement. Reports from individual counties are included herewith.

#### COUNTY HOMES FOR THE AGED AND INFIRM.

The reports of the county commissioners and those of the visitors are included in the annual report. Duplin, Madison, Montgomery, Haywood and Onslow have creeted new buildings, those of Onslow and Haywood occupying new farm sites. Tyrrell's has been repaired and improved.

The following Homes need improvement in buildings: Cabarrus, Clay, Dare, Davidson, Davie, Lincoln, Rockingham, Transylvania, Wilkes and Yancey. Some of these counties have expended money on other internal improvements, but will soon improve their Homes.

Number of inmates at time of report (eight counties not reporting) and cost of caring for the poor were as follows: Cared for in the Homes, 1,336 persons, at a cost of \$89,873.93; outdoor relief to 5,426, at a cost of \$92,771.93; total, 6,762, at a cost of \$182,645.69. This amount in the Homes is exclusive of farm products.

These figures, compared with those of preceding years, show a much larger increase in the number given outdoor relief than the increase in the Homes. The sum expended for the outdoor relief exceeds the amount for the inmates of Homes. This tendency to outdoor relief should be checked. If the county commissioners would make it a rule to closely scrutinize the poor lists and adopt the policy of giving only temporary relief to persons in their own homes, thus tiding them over distressed circumstances and permitting them to regain the plane of self-support, and requiring all who must receive regular and continued help to go to the Homes, much money would be saved the counties and, what is of great importance, unnecessary dependence and pauperization would be guarded against.

Number of children in the Homes, 37 white and 20 colored; total, 57. Continued efforts are made to secure homes for normal children elsewhere than in the county institution. Those in charge are, as a rule, either infants or abnormal, physically or mentally.

#### PRIVATE LICENSED HOSPITALS,

These institutions are required by law to make semiannual reports to the Board of Charities. The licenses of Broadoaks Sanatorium, Dr. Carroll's and Telfair Institute have been renewed. During the year Dr. B. B. Williams has been

licensed to open Williams' Sanatorium at Greensboro and Dr. J. J. McKanna, of Reidsville, has obtained license. The Perfected Liquor Cure Institution at Greensboro has been discontinued. Telfair Institute has been removed from Asheville to commodious new quarters in Greensboro. The institutions in Greensboro were inspected before license was granted.

These private sanatoria, subject by law to the inspection and regulation of the Board of Public Charities, should be visited at least twice annually, and attention is called to the fact that no funds are appropriated for this purpose.

# PRIVATE BENEVOLENT INSTITUTIONS.

Questions and letters were mailed to seventy-five private orphanages, hospitals and other benevolent institutions. Many of them have reported, and show a great and growing work in the field of private charity. They embrace orphanages, hospitals for the sick and injured, homes for the aged, rescue homes, associated charities and other organizations for the alleviation of suffering and the uplift of humanity. Reports are included in the general report.

#### INSPECTIONS AND MEETINGS.

The Board is in the unfortunate position of having no direct appropriation, and therefore cannot inspect the institutions except at the time of meetings or as opportunity arises to the individual members. Regular semiannual inspections should be made in a systematic way, and can be done with a slight increase of funds and some liberty in expenditure. Three meetings have been held—one at Winston-Salem and two at Raleigh. Inspections have been made of the Hospital at Raleigh, the Dangerous Insane Department, the Penitentiary, the Soldiers' Home, the School for the Blind, the Department for the Colored Blind and Deaf, the Hospital at Goldsboro, the Williams Sanatorium and Telfair Institute at Greensboro, the County Home of For-

syth and the jail of Wayne. In addition have been visited the Odd Fellows' Orphanage and Odd Fellows' Home for the Aged and the City Hospital at Goldsboro and the Rescue Home at Greensboro.

## NEW MEMBERS.

The Board has lost by death two members—Commissioner W. F. Craig, of Marion, and Commissioner E. L. Haughton, of Pollocksville. Governor Glenn appointed Mr. Joseph G. Brown, of Raleigh, and Mr. Henry C. Dockery, of Rockingham, to fill out the unexpired terms.

## GENERAL WORK OF THE OFFICE.

In addition to the collecting of data by sending out blanks and inquiries at stated intervals, the heavy correspondence with the county boards of visitors (voluntary workers), the various reports made to Chairman and Board, and the individual eases of insane, orphans or wayward boys whose friends constantly consult the Secretary of the Board, there is all the other clerical work of the office and a constant call from all parts of the United States for information respecting our laws regarding institutions and sociological questions. This exchange of information from other States is a source of much help in arriving at proper and modern standards of care. Such inquiries are promptly answered. Fuller reports of the work can be found in the quarterly reports made to the Board.

The Library has acquired by gift a number of valuable books during the past year.

Special attention has been given to the subject of tuberculosis in county institutions. The blanks sent out to the commissioners and other officials included the law for the separation of the prisoners from other inmates, and the rules for their earc, compiled by Dr. Lewis, of the Board of Health.

# NATIONAL CONFERENCE OF CHARITIES AND CORRECTIONS.

This noted body met at Richmond, Va., May 6th to 13th. The Secretary attended as a delegate, duly appointed by Governor R. B. Glenn. Section meetings were held in the mornings, great public sessions in the evenings and institutions were visited in the afternoon. The Penitentiary, the Industrial School for Boys at Laurel and the Hospital for the Colored Insane at Petersburg were visited. The Secretary was honored by being invited, with several other members of the conference, to receive with Governor and Mrs. Swanson at the mansion at a reception tendered the conference. Leave of absence was granted by the Board, the Secretary defraying her own expenses.

BOARDS OF VISITORS,

Many new members have been added to our list of visitors, and others who will be sadly missed have been called to their reward. The earnest co-operation of these boards in the counties, working without compensation, has resulted in vastly improved conditions and a higher standard of care. We desire to publicly thank them for this efficient service.

Acknowledgments are due Dr. R. II. Lewis for interest and assistance, to the Governor and the State officials for aid and sympathy. The State owes the Chairman, Commissioner W. A. Blair, a debt of gratitude for his whole-souled interest and prompt attention to the details of the work, and to all the members for their interest in the work, for which they receive no monetary consideration. With my personal thanks to the Board,

Respectfully,

Daisy Denson, Secretary.

# STATE INSTITUTIONS.

## STATE HOSPITAL AT MORGANTON.

John McCampbell, M. D., Superintendent.

#### POPULATION.

5. Office, domestic and ontdoor expenses	46,323.37
_	

otal......\$165,009,19

Ten thousand dollars of the above amount was paid on last year's debt. The appropriation for maintenance was \$145,000 per annum. Disbursements were \$165,000, of which \$10,000 was last year's deficiency, making \$155,000 for the current year. Outstanding indebtedness, \$20,000. Net value of the farm and dairy products was \$24,623.03. Per capita cost of maintenance, \$152.55. Appropriation needed for support during the next biennial period, \$175,000 annually. Special appropriations for the following purposes will be asked for: For bakeshop, \$2,500; for spur track to railroad, \$10,000; for colony buildings, \$30,000.

During the biennial period of 1907-1908 the Hospital Commission expended for this institution: For 115 acres of land, \$4,500; eight cottages for attendants, \$4,800; addition to lanndry and repairs, building nurses' home, about \$23,000.

Thirteen hundred and thirty-five patients were treated—an increase of 144 over the whole number of last year.

Fire protection fairly good, but not as good as it should be,

The general health of the patients has been very good. No epidemic or serious accident. About twenty have escaped, and half of these have been recaptured. Number of deaths, 42. Percentage of mortality upon whole number treated, 3.1. Discharged as improved, 62; as cured, S1. Percentage of cures upon admissions, 37.67. Refused for lack of room, 147. Chronic cases, from 90 to 95 per cent. of the hospital population. Epileptics, 26. As a rule, epileptics are not received. Number of patients from the eastern district, 30. Employed, 525, in the wards, on the farm and grounds, in laundry and sewing room. There are about 500 volumes in the institution library. Dancing, games, walking and riding and baseball for the men during the season are the recreations. Regular religious services. No special facilities for hydrotherapy. Fifteeu tuberculosis patients cared for, apart from others. Number of attendants, 37 men, 52 women, The hospital cemetery receives special care. Nine hundred acres. The hospital, equipment, land, etc., is valued at \$1,000,000.

> John McCampbell, M. D., Superintendent.

#### STATE HOSPITAL AT RALEIGH.

(Inspected April 8th by Commissioners E. L. Haughton, A. C. McAlister and the Secretary, and found in excellent condition.)

2. Clothing			6,629.11
3. Subsistence			42,730.46
4. Ordinary re	epairs		4,322.97
5. Office, dome	estic and outdoo	r expenses	$\dots$ 15,322.97

Total	 \$99.211.50

#### Extraordinary expenses:

- 1. New buildings, land, etc......\$71,000.00
- 2. Permanent improvements to existing buildings, 10,688,09

Total......\$81,688.09

The annual appropriation was \$95.800. Whole number treated during the year, 711—an increase of 61 over the previous year. Receipts were \$109,764.21; disbursements, \$109,899.59. Outstanding indebtedness, \$89.52. Per capita cost of maintenance, \$167.25. Estimated net value of the farm and dairy products, \$23,217.86. For maintaining the present number in charge \$118,250 annually will be needed, but if the epileptic colony is ready for occupancy this amount will not be sufficient.

The Hospital Commission has purchased 1,140% acres adjoining the present grounds, at a cost of \$53,500. For carpenter shop, \$3,800, and \$4,200 for storeroom. It has constructed an annex to the building for males and equipped the same for 100 patients. A colony for \$5 females is under process of construction, and it has contracted for buildings for epileptic colonies to be erected upon the land recently bought. These colonies for epileptics will be under the charge of the present hospital. There are now 16 epileptics cared for, who will be transferred to these buildings. Epileptics will be received as soon as these structures are completed.

The general health has been good. No epidemic or serious accident. Some escapes; the majority have been returned to the hospital. We have allowed some to remain at home, as their people asked it.

Number of deaths, 41. Percentage of mortality upon the whole number treated, 5. Percentage of cures upon admissions, 49 per cent. Discharged as improved, 4. Number of patients refused admission—epileptics, 15; idiots, 3; senility, 7; paralysis, 3; inehriety, 3; no room, 47; total, 78.

Of the number in charge, 80 per cent, are chronic cases; 3 tuberculosis patients. Provision has not yet been made for the separation of this class. Attendants—male, 19; female, 26. There is a training school in connection with the work. Dancing and song service for recreation. We have no library. Special apparatus for hydrotherapy has not been introduced. Twelve patients from the western district; 16 pay patients; 320 are occupied in garden, laundry, sewing, knitting, fancy work, sweeping and cleaning the wards.

Acreage, 1,300%. Estimated value of land, hospital equipment, etc., \$418,200.

JAMES McKee, M. D.,

Superintendent.

The annual appropriation for snpport was \$65,000. Patients treated luring the year, \$57—an increase of 58 over the previous year. Releipts have been \$83,205.75; disbursements, \$82,828.28. The estimated let value of farm and dairy products was \$8,540.90. Per capita cost of maintenance, \$122.145. Outstanding indebtedness is \$11,000, which was borrowed to meet the deficiency in the maintenance fund. The appropriation which will be needed for the support of the institution luring the next biennial period will be, for the year 1909, \$83,750, and for 1910, \$90,000.

During the two years 1907-1908 the Hospital Commission has expended \$24,991.38 for the purchase of land, farm equipment, em-

ployees' houses, boiler, electric generator and other much-needed improvements. The Commission has let the contract for the construction of four detached buildings, which will accommodate twenty patients each; two of the buildings to be used for epileptics and two for tubercular patients. It is hoped that these will be completed in six months. The four will cost about \$24,000, not including heating and furnishing.

Fairly good protection against fire, but specially constructed fireescapes are ueeded.

The general health has been fair, with no serious accident or epidemic. One escape, not recaptured. Number of deaths, 85. Percentage of mortality upon whole number treated, 9.91. Discharged as improved, 30; as cured, 83. Percentage of cures upon admissions, 36.40. Nine patieuts have been refused for want of room; one pay patient; 86.85 per cent. are chronic cases. Epileptics, 44. This class is being received at the hospital. All of these epileptics are more or less demented. Thirty-eight tubercular patients. This class is separated from other patients. Three hundred and fourteen are employed on the farm, ward work, sewing room, etc. Dances, concerts and occasional outdoor sports for recreation. Perhaps 10 per cent. can read. Baths are used in treatment of patients. Special care of the hospital cemetery. There are 21 male and 31 female attendants. No training school.

Acreage, 690; 360 in cultivation and 330 in pasture and wood. The hospital buildings are valued at \$277,500; equipment, \$250,000, and land, \$27,500.

W. W. Faison, M. D.,

Superintendent.

#### HOSPITAL FOR THE DANGEROUS INSANE.

(Inspected April 8th by Commissioners E. L. Haughton and A. C. McAlister and the Sccretary, and found in satisfactory condition.)

James R. Rogers, Medical Superintendent. Raleigh.

No alterations or improvements in this department during the year.

The following is the table of the movement of population for the year 1908:

	Men.	Women.	Total.
Number of inmates present November 30, 1907		14	56
Number received during the year ending November 30, 1908		1	19
Whole number treated during the year	60	15	75
Number discharged or died during the year		1	12
Discharged as cured			8

		Women.	Total.
Died			4
Daily average attendance during the year,	48	14	62
Remaining November 30, 1908	47	14	61
Daily average number of officers and em-			
ployees	6	1	7
EXPENDITURES.			
1. Salaries aud wages		\$1.9	22.13
2. Clothing			97.96
3. Subsistence			75.22
4. Office, domestic and outdoor expenses.			73.05
Total		\$5,7	68.36

Percentage of cures upon admission, 28. They are turned over to the courts when discharged as cured. General health has been good. Escaped, 3; not recaptured. No serious accident or epidemic. Patients have little or no employment. No land. No amusement. None have been refused for want of room, but eleven have been received beyond the capacity of the wards, and they occupy prison cells at night, which is to be deplored. Receipts and disbursements were \$5,768.36, paid out of the fund of the State's Prison. No outstanding indebtedness. Percapita cost of maintenance was \$93.04. For support during the next biennial period \$7,500 annually will be needed. Protection against fire is fairly good. The laud and building are the property of the State's Prison.

The needs of the institution are the same as recommended in former reports.

James R. Robers, M. D.,

Medical Director.

(Former reports of the Superintendent of the State's Prison and of the physician in charge deplore that this department should remain a part of the prison. For several years past the annual increase has been about seven, and the capacity of the institution (forty-nine) has long beeu overtaxed, the additional patients sleeping in prison cells, the number now cared for being eleven. This placing of patients in cells is heartly disapproved by them.)

# NORTH CAROLINA SCHOOL FOR THE DEAF AND DUMB.

Prof. E. McK. Goodwin, Principal.

vember 30, 1908			249
Daily average number of officers and em-			
ployees			60

#### EXPENDITURES.

#### Current expenses:

1.	Salaries	and	wages	 	 	 .\$28,	349.	84
0	C12 12 1							

- 2. Clothing
   1,800.00

   3. Subsistence (commissary and fnel)
   15,176.53
- 4. Ordinary repairs—no separate account kept.
- Office, domestic and outdoor expenses—no separate account.

#### Extraordinary expenses:

- 1. New bnildings, land, etc.....
- 2. Permanent improvements to existing buildings. .\$4,250.00

Receipts for the year were: Appropriation for maintenance, \$46,000; special, \$4,250. Disbursements, \$52,540.27. Outstanding indebtedness, \$2,292.10. Per capita cost, \$185. Earnings were \$3,947.83.

The institution can accommodate 270. The compulsory attendance law has not been enforced, as there is not sufficient room. If it were enforced, more room would be needed for 150 to 200 children. None have been refused. The amount needed for maintenance during the next biennial period will be \$55,000 annually. The health of the children has been very good. No serious accident or epidemic. The electric plant, concrete floors and road improvements authorized by the last General Assembly have been completed. We need a new building to accommodate at least 100 children. No changes have occurred in the industrial or literary courses or in the domestic arrangements. We find that practically every scholar becomes self-supporting.

Of the new pupils admitted, congenitally deaf, 24; others became deaf as follows: nnknown, 12; measles and mumps, 1; scarlet fever, 2; rising in the head, 1; meningitis, 1; chicken pox, 1; congestion of the brain, 1; fever, 1; catarrh, 2; rising in the neck, 1; brain fever, 1; cold in the ears, 1. Onset of disease at the age of one year, 2; one and a half, 1; two at 3; one at 3; one at 5; one at 11, and one unknown.

E. McK. Goodwin,

Principal.

### NORTH CAROLINA SCHOOL FOR THE BLIND AND THE DEAF.

(Inspected by Commissioner Joseph G. Brown and the Secretary, and found satisfactory.)

vember 30, 1908	92	73	165
Daily average attendance	80	70	150
Whole number during the year	96	86	182

The department can accommodate 245 children. None have been refused for want of room. The special session of the Legislature of 1908 passed a compulsory attendance law for the blind children, but this has not yet been enforced. There will be sufficient room when the law is enforced, but the maintenance fund would have to be increased \$10,000 annually. The appropriation for maintenance was \$60,000 for the two departments, the white blind and the colored blind and deaf. Disbnrsements were about \$62,500. Ontstanding indebtedness, approximately \$2,500. The amount needed for support for the next biennial period will be \$65,000 annually. Per eapita cost, a little over \$200.

During the present year the plastering has been renewed, the pipe organ installed, and the fireproof library building is now in process of construction.

There has been no serious accident or epidemic. Condition of general health very good. No changes have been made in the industrial or literary conrses. Scholars, after graduation, become largely selfsupporting. About 85 per cent, care for themselves.

Curi	ent expenses:
1.	Salaries and wages\$33,070.05
2.	Clothing 4,833.57
3.	Subsistence 15,505.18
4.	Ordinary repairs 4,923.93
5.	Office, domestic and outdoor expenses 16,007.20

Extraordinary expenses:

- 1. New buildings, land, etc.....\$10,000.00
- 2. Permanent improvements to existing buildings, 2,500.00 Officers and teachers, 58; servants, 37.

### $Colored\ Department.$

(Inspected in April by Commissioners E. L. Haughton and A. C. McAlister and the Secretary, and found satisfactory.)

Number on the roll November 30, 1908	50	49	99

The colored department can accommodate 220. None have been refused for want of room. No epidemic or serious accident. The general health has been very good. No changes in the literary or industrial courses. Laundry machinery and a story have been added to the girls' building during the year. Per capita cost of this department was \$175.

We get nearly all of our vegetables in season, and much of our milk and some beef and pork from the farm and dairy. Net income from the farm and dairy for the past two years was estimated at more than \$1,500.

No means in this department for the isolation of contagious and infectious diseases. Sick wards seriously needed, and repairs to the buildings.

Refund physician's salary		
Total	\$13,873.41	
Cotal receipts	\$41,119.55	

We were able to meet expenses from the funds received, and to make some permanent improvements. It was necessary to suspend work on the new office building, owing to insufficient funds. This new building is far enough under way to be already roofed. A shed was constructed to be used on St. John's Day, the anniversary which we celebrate. This will prove a comfort and convenience to our visitors and will prevent the annual construction of temporary booths.

The whole number of children cared for during the year was 369; went to their own people, 24; to other approved homes, 13; ran away, 1; died, none. Probably fifteen of this number are self-supporting. Children received not younger than six, seldom over twelve; girls discharged at eighteen and sixteen for boys. Present capacity, 325.

In October there was an epidemic of scarlet fever in a light form. About ten per cent, of the children had the disease, but very few of them were in bed. The health of the children is now splendid. No deaths during the year.

Sewerage. Good water from bored well 320 feet deep. As protection against fire, water is pumped to two tanks; in addition there is connection with the Oxford water supply and two fire hydrants in the grounds; these supplied with hose. Easy exits from the buildings. We have the cottage system, somewhat modified. Central sewing room, dining rooms and laundry. In the cottage homes, the school and the varions industrial departments much effort is directed toward developing individuality in the children. We believe that we meet with fair success in this important effort. Industrial training in sewing, laundry, printing office, shoe shop, woodwork, dairy and on the farm, also literary course.

There are now twelve of our children in the colleges and high schools of the State. We place some children in private homes, but endeavor to exercise the greatest care in this responsible, delicate duty. Ten girls and three boys were placed in foster homes last year. We are constantly trying to improve our system of supervision of children placed in homes. We have had a field worker a part of the year, who has aided in this necessary work. We have the co-operation of the Masons in the different localities in looking after the children in private homes under the jurisdiction of their several lodges. We hope to do more efficient and thorough work along this line in the future.

The true normal Christian home ought to be the best place in the world for rearing children. We hope those interested in the betterment of humanity and the extension of the kingdom of God will enter earnestly into the effort to keep fatheriess children with good mothers when this is found to be possible. We discourage the breaking-up of homes and the removal of children to institutions, nuless this course, after thorough investigation and consideration, seems to be the hest way to deal with the situation.

The support and the extension of the Oxford Orphan Asylum will necessitate increased voluntary offerings of our people to supplement the regular appropriations. We desire that the good people of North Carolina should have knowledge of this work, and that they estimate it at its real worth. We would not have it overestimated nor underestimated.

W. J. HICKS.

Superintendent.

2.	Permanent i	mproveme	nts to	existing	huildings.	. 200.00

Potal......\$2,297.73

Capacity of the institution, 150. Both sexes received. Admitted at three years; discharged at seventeen for hoys and eighteen for girls. No epidemic or serious accident. Present health of the children is very good. No sewerage; excreta removed daily. No protection

against fire. We have one building for boys, one for girls and one for infants. Industrial and literary conrses taught. Six in high schools. We do not place in private homes.

We are fairly well supported. Cost of caring for a child and educating, \$70 per annum. Receipts have been \$8,791.82, and disbursements were \$9,800.75. Outstanding debt on account of new buildings, \$1,008.93.

We have erected and completed the following new buildings: A shoe and harness shop, with new tools, in which a class of eight boys are learning trades; a blacksmith and wood shop, in which a class of ten boys are at work for the public as well as for the home (in these shops first-class workmen are employed as instructors); a three-story granary for farm products; a schoolroom connected with the infant department.

We shall continue to strive until the institution has reached that position in which it can perform the great mission for which it was founded. Without the most gracions appropriation from our State the home could not possibly exist another year.

HENRY P. CHEATHAM, Superintendent.

### SOLDIERS' HOME.

### CAPT. R. H. BROOKS, Superintendent.

The annual appropriation for support during the last blennial period was \$15,000. The special appropriation of \$5,000 supplied water for fire protection and added a new dining room and kitchen, with rooms for nurses, to the hospital, with heating apparatus, and roofs upon the cottages. No outstanding indebtedness. While no one has been refused for lack of room, many have had to remain upon the waiting list until rooms could be prepared for them. We will need \$17,000 per annum for support and \$2,000 annually for improvements.

The following is the table of the movement of population for 1908:

Number on the roll November 30, 1908	128
Admitted during the year	
Died	
Discharged	
Remaining November 30, 1908	

The percentage of mortality is nearly 20 per cent. Average number of patients in the hospital during the year, 32.

The Home has no regular trained nurse, but there are two white nurses, who are very capable, and the old soldiers get very good attention. There is a special dining room and special diet for the sick. The general health of the veterans has been good. Average age, seventy-five. No special means provided for entertainment and recreation, except innocent games, magazines and papers. Col. Fred. Olds frequently takes the Band of Sunshiners ont to sing and recite for them. Religious services by the varions denominations.

The Danghters of the Confederacy have contributed during the year to the payment of a mrise for the hospital, gifts of furnitine have been made by that organization, and some memorial beds given by patriotic citizens. The only urgent need of the institution is for an increase in maintenance fund.

B. F. Dixon,

Secretary of Executive Board.

### THE NORTH CAROLINA TUBERCULOSIS SANATORIUM

Dr. J. E. Brooks, Superintendent.

The Sanatorinm is located on the Aberdeen and Rockfish Railroad, eight miles from Aberdeen. Nine hundred and fifty-one acres, a portion of which is very fertile and will be converted into dairy and poultry farms, milk and eggs being the chief diet of consumptives. Plenty of fresh spring water and sixty horse power in the creek. There are four buildings—one seven-room farm house, one dining room, kitchen and laundry building, one two-story cottage, with capacity for care of thirty-four patients; barns and feed houses. Ten patients have been admitted to the institution; five now in charge. Available beds, 34. One trained nurse and one attendant. Patients who pay are charged \$7 per week. Buildings insured. No special fire protection. Expenditures have been a little less than \$16,000.

Remarks.—We now have patients calling and writing from all parts of the State.

James E. Brooks, M. D.,

Superintendent.

## STONEWALL JACKSON MANUAL TRAINING AND INDUSTRIAL SCHOOL.

### Mr. Walter Thompson, Principal.

(In October, 1907, the organization of the Board of Trustees of the Stonewall Jackson Manual Training and Industrial School was effected, with Mr. J. P. Cook, of Concord, as chairman. At a subsequent meeting Mr. Walter Thompson was elected superintendent.)

This institution has been located three miles from Concord. There are 290 acres. During the past year a deep well has been dng. Two cottage hnildings are nearing completion; cost, ahout \$13,000. Sewerage and fire protection in course of construction. Insured. There have been many gifts—none very large; from the King's Daughters, \$750. Concord gave the site and \$1,000. Receipts during the two years, ahout \$15,500; disbnrsements, \$20,000. A number of applications on file for admission, but the institution has not yet been opened for children. The King's Daughters have pledged \$5,000 for the erection of a cottage.

Walter Thompson,

Superintendent.

Exti	aord	inary expe	nses:							
1.	New	buildings,	land,	etc		 	 			

3. Subsistence .....

4. Ordinary repairs .....

5. Office, domestic and outdoor expenses......

Receipts for the year, November 30, 1907, to November 30, 1908, were \$195,519.21; disbursements, \$146,673.71. The amount of money now to the credit of the prison is \$84,619.34. The amount of earnings from the camps was \$117,236.18. Of this sum, \$58,236.18 was cash and \$39,000 in railroad bonds.

No improvements or additions to the buildings. They have been kept in good repair.

All new prisoners are examined physically. No epidemic, and the general health has been good. Died, 16. Percentage of mortality upon whole number in charge, 2½ per cent. Two deaths from tuberculosis; thirteen cases in charge; they are cared for in special infirmary, separated from other prisoners. Two prisoners received gunshot wounds. Corporal punishment has been administered 293 times. Escaped, 42; recaptured, 19, at an average expense of \$33.81. No classification or grading of prisoners. As reward for good conduct the prisoner is given five days per month off of his sentence and 50 cents per month in cash, paid upon completion of his term. Other forms of punishment besides flogging, dark cell, deprivation of time allowance and loss of commutation money. Religious services at the prison and farm. Sunday school at the prison. No regular chaplain. No

provision for regular services at the camps, though local ministers are invited to hold service. No library nor library fund.

Prisoners at the camps are confined within the stockade limits on Sunday; chained at night. Blacks and whites confined in the same sleeping apartments at the camps; separated at the farms. They have a variety of good, wholesome food and coffee regularly. The length of time a convict is worked on the railroad building depends npon his general physical condition. If his health breaks down from any cause, or if he becomes enfeebled, he is withdrawn. The physical condition does not necessarily deteriorate after working on the roads several years, if he is given proper attention, fed properly, worked properly, etc., as we endeavor to have done. Boys are not separated from the men. In charge, 7 under sixteen, 85 under twenty-one. Number of prisoners received during the year, November 30, 1907, to November 30, 1908, was 153. Number remaining November 30, 1907—white men, 176; white women, 7; colored men, 461; colored women, 34; total, 678.

Prisoners in charge November 30, 1908: White males—Central Prison, 25; Farm No. 1, 75; Farm No. 2, 50; Hoskins' Camp, 11; Chaffin's, 13; Busbee's, 8; Cox's, 0. Colored males—Central Prison, 42; Farm No. 1, 84; Farm No. 2, 75; Hoskins' Camp, 64; Chaffin's, 56; Busbee's, 68; Cox's, 69. White females—Central Prison, 8. Colored females—Central Prison, 5; Farm No. 2, 28. Totals—Central Prison, 80; Farm No. 1, 159; Farm No. 2, 153; Hoskins' Camp, 75; Chaffin's, 69; Busbee's, 76; Cox's, 69—681.

Education of prison population: Good English, 4; collegiate, 1; common school, 1; read and write, 328; read, 35; none, 312; total, 681.

Age of prisoners in charge: Twelve to fifteen, 6; sixteen to twenty, 101; twenty-one to twenty-nine, 285; thirty to thirty-nine, 172; forty to forty-nine, 67; fifty to fifty-nine, 34; sixty to sixty-nine, 14; seventy and seventy-three, 2.

J. S. Mann,

Superintendent.

### BROADOAKS SANATORIUM.

(Licensed by the Board of Public Charities.)

Dr. Isaac M. Taylor, Proprietor.

Morganton.

The following table gives the movement of population for the six months ending July 1, 1908;

Men. Women, Total. Number of patients remaining January 1, 1908 ..... 29 13 Admitted during the six months..... 16 33 Whole number treated..... 30 32 62 Discharged recovered ..... 3 7 4 Discharged improved ..... 6 10 16 Discharged unimproved ..... 12

	Men.	Women.	Total.
Died		2	2
Whole number removed			37
Daily average			26
Patients remaining July 1, 1908	9	16	25
Average number of officers and employees,			16

Of the number treated during six months, insane, 45; drug habitues and inebriates, 14; other conditions, 3.

Residences by States—North Carolina, 35; South Carolina, 12; Georgia, 2; Tennessee, 3; Virginia, 4; and one each from Illinois, Florida, West Virginia, New York, Missouri and the District of Columbia. Accommodations for fifty patients.

Present officers are: Isaac M. Taylor, resident physician in charge; Dr. Louis G. Beall, resident assistant physician; Mrs. Sallie Taylor, matron

The matron is directly in charge of the nursing force. She has had about four years' experience in nursing for us. The senior male attendant was for two years at the State Hospital at Morganton. There are three female day nurses and one female night nurse, three male day nurses and one male night nurse. The housekeeper and dining-room attendant are during the day indirectly in charge of some of the patients.

No epidemic or serious aecident.

City waterworks; connected with city sewerage. There is a hydrant in the yard for protection against fire; nine extinguishers conveniently placed. The kitchen is protected by two fusible extinguishers. There are two 100-foot lines of hose connected, with wrenches and spanners on a hose cart. The night watch is on duty in both wards. The new steam honse will take all fires 85 feet away from the building.

All charges are based on a minimum rate of \$15 per week.

Most cases coming to our care may be placed in one of the following classes: (a) Mild mental diseases, nervons diseases not confining patient to bed or room, convalescent eases, senile cases. (b) Mental cases, somewhat disturbed, needing constant attention of nnrse, acute melancholia, neurasthenia, the feeble, those confined to bed. (c) The most troublesome and disturbed mental cases, drug habits, inchriety.

Charges—for Class A, \$15 to \$20 per week; for Class B, \$20 to \$25 per week; for Class C, \$25 per week, upward. Extra charges for surgical operations, severe and prolonged illness, extra nursing and consultations.

We have completed the new wing and are just finishing a steam house and cold-storage plant; have renovated the hot water, heating and plumbing, and are about to complete the therapentic baths. Our place is advancing in development and nsefulness each year.

Isaac M. Taylor, M. D., Superintendent and Resident Physician.

### Report December 31, 1908.

Dr. Isaac M. Taylor, president, and associated with him as partner and resident physician is Dr. Louis G. Beall. Mrs. Sallie C. Taylor, matron.

The following is a table of the movement of population for six months ending December 31, 1908;

	Men.	Women.	Total.
Number of patients remaining July 1, 1908,	9	16	25
Admitted dnring six months	27	14	41
Discharged cnred	4	.5	9
Discharged improved	13	9	22
Discharged not improved	7	3	10
Died	2	1	3
Daily average number of patients			26
Daily number of officers and employees			19

Of the 66 patients in charge during this period, 49 were insane, 9 were inebriates and drug habitues and the others suffering from nervous conditions.

Residence States were as follows: North Carolina, 42, representing 26 counties; Virginia, 5; South Carolina, 11; and one each from West Virginia, Tennessee, Georgia, Illinois, Missouri, Massachnsetts and District of Columbia.

Present capacity, 50. Male and female departments are wholly separate. Four attendants of each sex; a night attendant of each sex. No serions illness, accident or epidemic.

All charges are based on a minimum rate of \$15 per week; for drng cases and inebriates, \$25 per week.

The alterations and additions reported in progress in July have been completed. The most important are the addition of bath apparatus for hydrotherapy and the removal of the heating boilers to a central point eighty feet from the building, minimizing the danger from fire; a cold-storage room, which will add to the comfort of the patients. The plumbing has been thoroughly overhauled.

ISAAC M. TAYLOR, M. D., Superintendent.

### DR. CARROLL'S SANITARIUM.

(Licensed by the Board of Public Charities.)

Dr. Robert S. Carroll, Superintendent. Asheville.

The following table gives the movement of population for the six months ending July 1, 1908;

					Men.	Women.	Total.	
Nnmber	of	patients,	remaining	January 1	,			
1908					. 7	6	13	

Timber or butterite, remaining our day, at			
1908	7	6	13
Number present July 1, 1908	7	8	15

	Men.	Women.	Total.
Number admitted	18	8	26
Discharged recovered	7	3	10
Discharged improved	8	1	9
Died			
Whole number removed			24
Daily average number of patients			13
Average number of officers and employees,			21

Of this number of patients, insane, 10; drug habitues, 6; nervons, 10.

Residence by States — North Carolina, 6; South Carolina, 3; Georgia, 4; New York, 3; Ohio, 3; Pennsylvania, 2; Kentneky, 2; and one each from Tennessee, Virginia and Wisconsin.

On Angust 1st, Oak Lodge, a beautiful 25-room building on the Highland Home property, will be opened. This will increase the capacity from 1s to 30 patients and give an ideal home for patients of this class. It is a three-story frame-and-stone building; four bath rooms, six protected rooms, sixty feet protected porch and three other porches, with steam heat, hot and cold water in all rooms except protected rooms; a large club room, with pianola and billiard table. It nestles under the trees and is really inviting in its peaceful and quiet situation. This is the first of a series of four buildings which we hope to erect in the development of the ideal Highland Home Sanitarium. For several months we have been unable to accommodate the patients who have applied, and now have several on the waiting list. But we think that Oak Lodge will not only increase our efficiency and simplify our work, but will provide quarters for outside patients which are probably not surpassed in the South.

Present officers are: Robert S. Carroll, M. D., president; William L. Dunn, M. D., vice-president; R. Pettns, G. N., superintendent of nurses. Miss Pettus, the chief nurse, is a graduate of the Government Hospital, Washington, D. C. There are nine female and four male attendants.

There has been no epidemic or serious accident. Good fire protection. Rate of charges, \$25 to \$75 per week.

There is a training school for nurses and attendants in connection with the sanitarium. The degree of trained nurse is given after three years of study, training and practical experience, provided the work done has been satisfactory. There is a second course of two years open to male students, which offers the degree of trained attendant. A post-graduate course of one year is offered graduates of other training schools. This includes instruction in hydrotherapy, massage, hygieue, nursing of nervous and mental diseases, and hospital house keeping.

ROBERT S. CARROLL, M. D.,

President.

### PERFECTED LIQUOR CURE INSTITUTION.

This institution, which was under the charge of Dr. J. B. Gnnter, at Greensboro, has been discontinued.

### TELFAIR SANITARIUM.

(Licensed by the Board of Public Charities.)

W. C. ASHWORTH, M. D., President.

ASHEVILLE.

This institution, for the treatment of inebriates, was opened April 20, 1907. After August 1st the sanitarium at Asheville will be closed and the new and up-to-date building in Greensboro will be ready for patients.

The following is the table of the movement of population for the six months ending July 1, 1908:

Men. Women, Total.

Number of patients present January 1,			
1908	3	3	6
Number admitted in the six months	20	6	26
Discharged recovered	6	3	9
Died (apoplexy)	1		1
Whole number removed			22
Remaining July 1, 1908	2	2	4
Daily average number of patients	4	2	6
Average number of officers and employees,			4

Male and female departments wholly separated; one attendant of each sex.

Officers are: W. C. Ashworth, M. D., president; J. M. Millikan, vice-president.

No epidemic or serious accident.

Residence States—North Carolina, Virginia, New Jersey, South Carolina, Colorado, Florida, Oklahoma, Tennessee.

Fire escapes.

Rates of charges, \$25 to \$50 per week.

The new sanitarium in Greensboro will contain about thirty rooms. The departments for men and women are entirely separate. City sewerage. Adequate fire protection. It is well located, in Glenwood Park, private and free from noise and excitement incident to city life.

W. C. ASHWORTH, M. D.,

President.

### TELFAIR SANITARIUM, GREENSBORO, N. C.

### December 31, 1908.

(Inspected by the Secretary of the Board of Public Charities, August 8, 1908, and found satisfactory.)

The Telfair Sanitarinm was moved from Asheville on August 1st. Dr. W. C. Ashworth is president and J. M. Millikan is vice-president. Capacity of the hospital is 30. Male and female departments wholly separate. One attendant for each sex. There is no trained nurse. Charges, \$15 to \$50 per week. No epidemic or serious accident.

	Men.	Women.	Total.
Number of patients present July 1, 1908	- 22	8	30
Admitted dnring six months	20	6	26
Died			
Daily average number of patients			8
Daily average number of officers and em-			
ployees			3

Patients received from North Carolina, Virginia, New Jersey, Georgia, South Carolina and Tennessee. Those from this State were from Cabarrus, Stanly and Guilford counties.

### WILLIAMS' PRIVATE SANATORIUM.

(Licensed by the Board of Public Charities, Inspected Angust 8th by the Secretary and found satisfactory.)

Dr. B. B. Williams, Superintendent.

GREENSBORO.

Williams' Private Sanatorium is located at 1020 West Market Street, Greensboro. The building is steam heated, electric lights, airy rooms, baths and all conveniences. Alcoholism, morphine and other drug addictions treated. This institution was opened for patients on April 13, 1908. Dr. B. B. Williams, president; Mr. John R. Robinson, manager.

	Men.	Women.	Total.
Number of patients present July 1, 1908,			5
Present during the six months ending			
December 31, 1908	38	3	41
Discharged cured	35	2	37
Died			
Daily average number of patients			3
Daily average number of employees			3

Capacity of the sanatorium, 12 beds. Male and female departments are not wholly separated. One attendant for each sex. One trained nurse. No accident or epidemic,

Residence States: North Carolina, Sonth Carolina, Georgia, Virginia, Tennessee, Twelve counties of North Carolina, Rates of charges: Alcoholism, \$100; drng addictions, \$125; nenrasthenia and rhenmatism, \$30 per week. B. B. WILLIAMS, M. D.,

President

### THE McKANNA THREE-DAY LIQUOR CURE HOSPITAL.

(Licensed by the Board of Public Charities.)

Dr. J. J. McKanna, President.

REIDSVILLE

This institution, for the care of inebriates, was opened June 1, 1906, Officers in charge are: Dr. J. J. McKanna, President, and Dr. J. W. McGebee, M. D.

### BAPTIST ORPHANAGE.

### M. L. Kesler, Superintendent.

THOMASVILLE,

This orphanage is supported and controlled by the Baptist denomination of the State. It is directly under a board of trustees.

Number children remaining October 31, 1904	346
Number admitted during the year, to October 31, 1908	63
Whole number in charge	409
Become self-supporting	35
Died	1
Placed in families (except those returning to relatives)	
Remaining October 31, 1908:	
Boys, 183; girls, 190; total	373

Children not under 5 nor over 12 years old are taken, and both sexes are received. Present capacity, 385. Health of the children is good. Sewerage. Cottage system. No regular protection against fire; hand buckets. Literary and industrial courses tanght. Special attention paid to developing individuality. Seven now in colleges or high schools. We do not place out children. We are well supported in caring for them. Improvements during the year have been a library building and a new infirmary, costing \$12,000.

Total receipts'	for the year	were	\$59,811.38
Disbursements			59,811.38

Indebtedness, \$3,520. This was report at end of fiscal year June 25, 1908.

Actual cost of maintaining and instructing 360 children for the year:

Food, fnel, clothing, etc	13,188.04
Salaries	7,727.50
Laundry expenses	452.29
Telephone rent	68.40
Pastor's salary	150.00
Shoe-shop account	2,250.72
Farm products consumed (estimated)	3,587.97
Medicine and medical attendance	445.76
Postage, traveling expenses, schoolbooks, etc	865.76
Contributions in kind	1,894.58
Total cost	30,631.02

Actual cost, per capita, per month......\$7.08

M. L. Kesler, Superintendent.

### PRESBYTERIAN ORPHANS' HOME

REV. JOHN WAKEFIELD, Superintendent. BARIUM SPRINGS.

This orphanage is under the control of the Presbyterian Syuod of North Carolina.

Number children admitted during year 63
Placed in families
Become self-supporting 36
Whole number in charge during the year
Died
Remaining October 31, 1908

Children of hoth sexes are received. Those of foreign hirth or parentage are taken if parents were residents of the State at the time of their death. Illegitimate children are not received if the mother is living. Fatherless children from 6 to 18 are received. Capacity of the institution, 180. There have heen seven cases of scarlet fever; present health good. Excreta removed weekly. No special protection against fire. Literary and industrial courses tanght. We do not place children in homes. We have the cottage system. Special attention paid to developing individuality. We are fairly well supported. Receipts and dishursements were \$23,500.

We are now contemplating adding water and sewerage system, electric lights and a printing plant to publish a weekly paper.

John Wakefield, Superintendent.

Number admitted during the year ending October 31, 1908	13	6	19
Placed in families and returned to friends			21
Self-supporting Dismissed Remaining October 31, 1908		31	1 60

Admitted at 3 years of age; boys discharged at 15 and girls from 16 to 18. Both sexes and foreign-born admitted. There has been an epidemic of malaria. Present health is good. Sewerage and surface closets. Two-inch pipes in the buildings and fire plugs within a square and a half. The children are housed in two large buildings. One pupil in college. We have placed a few in private homes, but do not like to do it. Yes, we are well supported in caring for the children. Receipts, \$7,032.82; disbursements, \$7,669.81. A new corn crib has been built by our own force. Water pipes have been extended to the stock shed. Literary course and training in farm and domestic work.

Walter J. Smith, Superintendent.

### METHODIST ORPHANAGE.

REV. JOHN N. COLE, Superintendent.

RALEIGH.

This institution is maintained and controlled by the North Carolina Conference of the Methodist Episcopal Church, South.

Number children admitted during year ending October	
31, 1908	30
Whole number in charge 13	31
Become self-supporting	3
Died	1
Remaining October 31, 1908 1	31

Both sexes received. Admitted from 6 to 12 years of age and discharged at 18. Capacity of the orphanage is 200. No serious accident or epidemic; present health of the children is good. One large building at present, but working towards the cottage system. No children are placed out until they finish the course. Institution has sewerage; no special fire protection. Literary course and sewing, etc., taught. We are well supported in caring for the children. Receipts and disbursements \$23,000.

Superintendent.

### SACRED HEART ORPHANAGE.

RT. REV. LEO HAID, Superintendent.

BELMONT.

The Roman Catholic Orphanage for girls is located at Belmont, Gaston County. It is under the control of St. Mary's Catholic Church, with Mother Mary Teresa in charge.

Number remaining October 31, 1907	25
Number admitted during the fiscal year	7
Whole number in charge during the year	32
Remaining October 31, 1908	21

Girls are received without restriction as to age. Present capacity 30. No accident or serious illness; present health of the children is excellent. One large building. No special protection against fire. Industrial courses taught. Receipts, \$265; disbursements, \$2,000. One child placed in private home. Added a classroom during the year. There is a system of oversight of children placed out. We are not well supported in the care of the children.

Mother Mary Teresa,

### ROMAN CATHOLIC ORPHANAGE FOR BOYS.

FATHER THOMAS F. PRICE, Supt. NAZARETH (near Raleigh).

This institution was opened in 1899 with four children in charge. It is beautifully situated three miles from the city and seventy-five feet above the Capitol grounds. It is under the control of the Roman Catholic Church.

Number children remaining October 31, 1907	40
Admitted during the fiscal year	15
Placed in families	3
Become self-supporting	4
Remaining October 31, 1908	48
Died	

Age of admission 4 and of discharge 16. Only boys taken. Capacity, 60. No epidemic or serious accident; general health of the children good. No sewerage. Fire extinguishers. One building for the children. Special attention paid to individuality. Both industrial and literary courses taught. None in colleges or high schools. Three children placed out in 1907. All of our support is in the form of donations. After children are placed out we see that they are well cared for and lose none of their moral training.

THOMAS P. HAYDEN, Chaplain.

### THE CHRISTIAN ORPHANAGE.

REV. JAMES L. FOSTER, Superintendent. ELON COLLEGE.

This institution is under the control of the Southern Christian Convention

	Boys.	Girls.	Total.

Remaining October 31, 1908			26

Children of both sexes and foreign-born received. May not be received under 5; discharged at 18. No epidemie or serious aceident; present health of children is good. No sewerage; excreta removed and composted. We are planning to develop a cottage system; at present one building. We are developing the family idea. Children attend the district graded school. Work on the farm. Receipts and disbursements about \$3,000. Some farm buildings have been added. With farm products we do well for support of the children.

Our, work has done well during the past year. Good health, good crops, a very reasonable financial support, with many donations in kind.

James L. Foster,

Superintendent.

### ODD FELLOWS' ORPHAN HOME.

### J. F. Brinson, Superintendent.

Goldsboro.

The Home is located on a twenty-acre plat of land at Goldsboro. The first building was opened in 1892. It is maintained and controlled by the Odd Fellows of the State.

	Boys.	Girls.	Total.
Number ehildren remaining October 31, 1907		48	98
Number admitted to end of fiscal year (April)			. 34
Placed in families			
Died			
Become self-supporting			9
Remaining October 31, 1908			121

Age of admission 5 to 15. Discharged at 17 and 18. Both sexes received. Capacity for 140. Fevers for nearly three months, but present health good. Sewerage. Fire extinguishers and fire escapes and eity fire department.

The children attend the graded school of the town. They work on the farm and do the work of the house.

Much is done to develop individuality. Two in colleges. An annex to the dining-room and dormitories were added during the year. Receipts, \$13,598,15; disbursements, \$8,626.89. We are well supported in caring for the children. We employ a music teacher, who teaches in the afternoons. The boys are helping in the printing of the "North Carolina Odd Fellow."

When the new Jacobi Memorial Building is completed and an adequate steam-heating plant and laundry added, the present plant, ineluding the Home for Aged Odd Fellows, will be valued at about \$125,000.

J. F. Brinson,

Superintendent.

### NORTH CAROLINA CHILDREN'S HOME SOCIETY,

W.	В.	STREETER,	Superintendent.	Greensboro.

This society receives children of both sexes from one day to 15 years old, and places them in private families. It is supported entirely by voluntary contributions.

Number children on hand October 31, 1907	. 13
Received during the year	. 86
Whole number in charge	99
Placed in families	. 86
Remaining October 31 1908	. 13

We have the cottage system in its fullest sense, the family home, and the capacity is unlimited. In all 309 have been so placed. We are well supported in the care of the children. Strict oversight is kept of the children until of age. Receipts and disbursements for the year, about \$8,000. Experience has taught that the actual cost of caring for a destitute child during his minority on the Children's Home Society plan, is about \$100. W. B. STREETER,

Superintendent.

### BUNCOMBE COUNTY CHILDREN'S HOME.

This is a county institution controlled and supported by Buncombe County. The commissioners appoint a board of managers and they in turn employ a competent man and woman to take charge of the Home. Mr. J. P. Howatt is the present chairman of the board.

	Boys.	Girls.	Total.
Number children remaining October 31,

Self-supporting				
Remaining October 31, 1908			19	

Children of both sexes received. Admitted at 4 years and discharged at 18. Capacity, 50. Health of the children good. No sewerage. No special protection against fire. Cottage system, Special attention to developing individuality. Industrial and literary courses taught. Seventeen in the academy. We place children iu private homes. Noue now placed. Receipts, \$3,000; expenditures, \$2,500. The plant has been enlarged by the addition of seven acres of land and a two-story building, with outbuildings. We are well supported J. M. LYERLY. in providing for the children.

President

### ALEXANDER HOME.

Mrs. C. M. Carson, President.

CHARLOTTE.

This institution is under the control of the Presbyteriau churches of the city. In 1895 the present home was given by Mr. R. B. Alexander. It is supported by voluntary contributions from the Sundayschools and from private individuals. In charge, 20. Only one death has occurred since the opening of the Home. Children are received at 4 years of age, though some exceptions. Both sexes received. We try to secure homes for them. Capacity 25 or 30. There has been an epidemic of whooping-cough; health at present is very good. City fire department. Sewerage. Though housed in one building, the number is limited. Children attend the city graded schools. We place out children when we can find good homes. We are moderately well supported. About \$1,500 was expended on improvements during the past year. Children are too widely scattered to continue personal oversight, but we keep in touch through correspondence.

Mrs. C. M. Carson, President.

### LINDLEY TRAINING SCHOOL.

	_	_	_			
-7	HISS.	ISARET.	R	WHAT	LON.	Matron

ASHEVILLE.

This institution is a rescne home for girls. It was opened about thirteen years ago, and is interdenominational, supported by voluntary contributions. It is five miles from the city with a farm of 28 acres. A farmer and his wife occupy a cottage on the place and cultivate the land. A matron and assistant have control of the institution. When possible, the girl seeking admission pays from \$5 to \$10 per month. In addition, they must assist in the housework. Every girl must make voluntary application and must agree to obey the rules. We prefer that they should remain two years. When they have no friends to care for them, we place them in service in good homes.

Number of girls in the Home at last report	11
Number of children	11
Number of girls received during the year	13
Number of infants	10
Number now present:	
Girls	13
Children	14

Receipts, \$4,927.72; expenditures, \$2,012.42,

One-half are reclaimed.

Mrs. M. E. Hilliard, Acting President.

### REST COTTAGE.

MISS WINFRED R. Cox, Matron.

GREENSBORO.

Our rescue home is supported by contributions from individuals from various parts of the country. We have no board or persons to look to.

Children received over 2 years old. Any age for wayward girls. Capacity, 25. No serious accident or epidemic; health good. No sewerage; city scavenger. Insurance. Personal care. Industrial and literary courses tanght. Receive no compensation from people. Oversight of those who are placed ont. About 70 per cent reform. Receipts, 8644.47; disbursements, \$585.09. Winfreed R. Cox.

Matron.

### FAITH COTTAGE

Lucius B. Compton, Superintendent.

ASHEVILLE.

Faith Cottage is a rescue home, located at 53 Atkinson Street, Asheville. It is a two-story building of seventeen rooms. The Home was opened June 2, 1903. It is supported by free-will offerings, a faith work, and is not controlled by any church or organization.

Women. Infants.

Number of inmates remaining October 31,		
1907	6	2
Whole number in charge during the year	22	9
Placed in families	5	
'Died		2
Remaining October 31, 1908	3	1

Present capacity of the institution, 16. There have been cases of scarlet fever and typhoid fever; present health good. Sewerage. Taught industrial work. One girl in a Bible school. Receipts were \$854.26; disbursements, \$770.89. Nearly all make professions, but just how many really reform would be impossible to tell. Condition for admission is a willingness to forsake former life. Discharged when fit to take position or return to friends, or when unwilling to comply with the rules.

Rose Fareler.

Secretary.

### CRITTENTON HOME.

Mrs. M. C. Carter, Superintendent.

CHARLOTTE.

This rescue home was opened June 27, 1905. It is under the management of a board composed of members from each Protestant church. Girls who have left the right path and truly wish to reform are received. No slum cases are admitted.

	Women.	Infants
Whole number in charge during year	37	18
Number remaining October 27, 1907	. 11	9
Placed in families	. 3

No age limit for admission; discharged at 21. Present capacity of the institution, 40. Whooping-cough during the year. Present health is good. Cottages. The building has two porches all the way around if and is easily accessible with ladders in case of fire. No sewerage. Industrial and literary courses taught. None in colleges or high schools yet. We are well supported in the care of the children. Receipts, \$2,538.46; disbursements, \$2,342.19. Preparations are now being made for heating and water supply.

Rose Fairlee,

Secretary.

# SOUTHERN ORPHANAGE AND INDUSTRIAL TRAINING SCHOOL FOR COLORED YOUTH,

W. H. QUICK, Superintendent.

SANFORD.

This institution was chartered in 1905. It is not controlled by any church or organization. Now in charge, 13 children; 15 have been placed in families. Children from 5 to 12 years received. Both sexes. General health has been good. Town sanitary system in force. A new schoolroom has been built. Receipts about \$50; disbursements, \$250. We are not well supported in the care-of the children. We need the aid of money to enable us to pay teacher, support, feed and clothe the children.

W. H. Quick,

Superintendent.

### COLORED ORPHAN HOME OF WESTERN NORTH CAROLINA.

REV. J. PERRY, Superintendent.

WINSTON-SALEM.

The Colored Orphan Home is located near Winston-Salem. It is governed by a board of trustees appointed by the churches.

	Boys.	Girls.
Number children remaining October 31, 1907	15	13
Whole number during the year		30
Died		1

Children who are orphans received from 2 years up and discharged at 21. The Home has six rooms. No accident or serions epidemic; present health good. No sewerage; excreta hauled off. Receipts, \$628.93; disbnrsements, \$444.45. In some things we are well supported. No additions or improvements.

J. Perry,
Superintendent.

### CATHERINE KENNEDY HOME.

Mrs. Roger Moore, President,

WILMINGTON.

The Benevolent Society, which was chartered over fifty years ago, has established this Home for old ladies who have had advantages in times past and who are unable to make a living. We have two methods of caring for them. Some pay \$100 admission, which gives them food and shelter for life, they snpplying other needs. In the annex they pay no admission fee, but pay \$12 per month.

Number of inmates in the Home October 31, 1907 10	
Admitted during the year 2	
Died 1	
Number remaining October 31, 1908	
Receipts for the year were\$1,046.00	
Dishursements 1 077 05	

The Home is maintained by interest on investment mainly. Good sewerage and water supply. Insured. It is undenominational.

We have five names now on our waiting list.

Mrs. Roger Moore, President L. B. Society.

### THE SALEM HOME.

Mrs. M. E. Vogler, President.

WINSTON-SALEM.

This institution was founded in 1887. It is located on South Main Street, Salem. It is a comfortable home for old ladies. No condition for admission; any needy woman or child who has no one to help her.

Number remaining October 21 1000	11

City fire department for protection against fire. Good sewerage and water supply.

Receipts for th	ne fiscal year	\$1,604.14
Dishursements		1,514.62

Mrs B. F. Dixon,

Leader of St. Luke's Circle.

### ODD FELLOWS' HOME.

### J. F. Brinson, Superintendent.

GOLDSBORO.

This institution was opened during the past year and is located about one hundred and fifty yards to the north of the main building of the Orphanage. It is an imposing two-story structure with ample double porches on each side, and is called the "Home for the Aged and Infirm." There are as yet only three old persons in the Home. The building is well located, has sewerage and steam heat and is comfortable and homelike.

### ASSOCIATED CHARITIES.

REV. R. S. STEPHENSON, Superintendent.

RALEIGH.

This organization is composed of the subscribers to the fund for care of the poor of the city. Its object is to join the charitable forces of the city in a united effort to help the poor by upholding the family. Proper investigation of all cases coming before it is one of its governing principles. "Knowledge is the foundation of all intelligent and effective aid." "Intelligent giving and intelligent withholding are alike true charity."

The children of the graded schools always help with the Thanks-giving offering.

Subscriptions during twelve months, \$2,171.56. Cost of groceries and wood furnished the needy, \$1,104.88. Other items, drugs, nurse furnished the sick, coffins, board and lodging, etc.

R. S. Stephenson, Superintendent.

#### ASSOCIATED CHARITIES

Mrs. F. P. Wild, Secretary.

(D) .... b. ... b. ... inter 3. 3

ASHEVILLE.

This society was organized in 1884 as the Flower Mission and is known as the "Flower Mission and Associated Charities." The following figures are given for the period from November to April: Helped 140, refused 29. We have a district nurse, and invalid food is provided when necessary. Some transportation. A small sum is charged for clothing. Street begging has been eliminated to a great extent. We have an annual meeting and publish items in the daily papers. We are well supported. We have an office and secretary. Friendly Visitors also. We hold regular and frequent meetings of the committee. We are trying to help people to help themselves. We secure work for applicants whenever possible. Little work this winter and the demand for aid has been great.

Mrs. F. P. Wild, Secretary.

## ASSOCIATED CHARITIES.

Miss Annie Grogan, Secretary.

WINSTON-SALEM.

This association for the help and uplift of the poor was organized in March, 1905. Mrs. W. B. Taylor is president. We hold monthly

Secretary.

meetings of the board and an annual meeting, when the officers are elected. Wonders have been accomplished in preventing house-tohouse begging. Funds are raised by members of the board soliciting citizens for subscriptions.

Number of families aided during the fiscal year	552
Number of persons refused help	152
Receipts for the year	4.17
Disbursements	3.31
Balance from 1907 16	37.00

We have \$150 as a uurse fund. We are well supported by the public. The daily papers publish reports. No office. Visitors appointed at the monthly meetings.

ANNIE GROGAN,

## ASSOCIATED CHARITIES.

Miss Carrie L. Price, Secretary. Wilmington.

This association was organized in October, 1893. It is under a board of eighteen directors, the ministers of the churches, three physicians, five husiness men and one of the county commissioners. It is supported by \$1,500 per annum from the county, and contributions from the churches and from individuals. Besides the board of directors, there are twelve ladies who have charge of the districts and twelve Visitors.

Number of families aided during the	year 120
Receipts	\$2,391.52
Disbursements	2,501.06

Fresh-air outings are given by the churches and different organizations. There is a district nurse for the city, but not supported by this organization. Street begging has been almost abolished. We have an annual public meeting and a report is published. The public is informed of the work through the press. The secretary has charge of the office, which is open from 9 to 2 P. M.

> CARRIE L. PRICE, Secretary.

## ASSOCIATED CHARITIES.

Mrs. R. D. Blacknall, Secretary.

DURHAM.

This association was organized in October, 1903. The administration is vested in a committee of ministers and laymen. The office work is done by the secretary, who receives donations, hears, investigates and deals with applicants, and keeps a record and account of the business, being directly responsible to and in communication

with the committee. By agreement of the Ministers' Association, all churches care for their own needy members, and this class of applicants is brought at once to the notice of the pastors for relief. This office deals with emergency cases and those who are without resources. Relief is given on a basis of need, not personal character, and in the most practical way.

Number of fami	lies aided	during the	fiscal year	r 61
Refused help				15
Receipts				\$513.50
Disbursements .				510.82

No fresh-air outings or district nurse. We are only fairly well supported outside of the churches. No annual public meeting. Supported by pledges given by the city churches, the city and individuals. Statements published in the daily press.

The secretary is in the office from 10 to 12 daily except Sundays. Regular meetings of the committee. The authorized supplies are food, fuel and medicine, issued only by printed order slips signed by the secretary. Secondhand clothing given out without order. Other appeals are referred to the committee.

Mrs. R. D. Blacknall, Secretary.

This hospital was established in 1904. It is under the management of a board of directors, Available beds, 30. Nurses, 5. Number of charity patients during the year, 40. Schedule of charges; \$10 and \$15 per week. Fire protection, Buildings insured. Sewerage.

Julia A. Smith, Superintendent,

## REX HOSPITAL.

HON, RICHARD H. BATTLE, President.

RALEIGH.

On the 12th day of January, 1909, the cornerstone of the new and enlarged Rex Hospital was laid by the Grand Lodge of Masons of North Carolina. John Rex, a native of Pennsylvania, and one of the earliest settlers in Raleigh, died on the 29th of January, 1839, aged seventy-four. He died a bachelor and left his entire estate in North Carolina first to pay his debts, then to provide for the manumission of his slaves, seventeen in number, and their removal under the anspices of the African Colonization Society and their establishment in a colony in Africa, and the residue of his estate to be turned over to trustees for the establishment of a hospital, "for the sick and afflicted poor of the city of Raleigh."

The General Assembly of 1840-41 chartered a corporation under the name of the Trustees of Rex Hospital, which is managed by five citizens. These citizens are nominated by the commissioners or aldermen of the city for appointment by the Supreme Court of the State.

The executors of John Rex turued over to the trustees tweuty-one acres of land and \$9,602.06. This fund was invested and in April, 1861, it amounted to \$35,262.14. Most of the bonds in which this sum was invested became worthless as a result of the war. But by 1893 the solvent securities had again increased to about \$30,000, and the trustees bought a building which had been used for the care of patients and which was supported by the two Episcopal churches. This was enlarged and opened on May 1, 1894. The city contributing to its support.

The new building in course of construction will cost \$50,000. It is on the pavilion plan. It will accommodate sixty patients and fourteen nurses and will be thoroughly up to date in equipment.

The city appropriates \$2,000 per annum.

Number of patients in charge October 31, 1907	. 12
Admitted during the present fiscal year	. 340
Died	. 19
Discharged	. 321
Number remaining October 31, 1908	. 12
Ella J. H.	ARRIS,
	Matron.

## ST. LEO'S HOSPITAL.

Sister Veronica, Superintendent, Greensboro.

This hospital is modern and up to date in its building and equipment. It was opened for patients in 1906.

Number of patients remaining October 31, 1907	42

Admitted during the present year	196
Whole number treated during the year	202
Died	7
Discharged	195
Number remaining October 31 1908	7

Available beds, 16. Nurses, 7. About one-third of those treated were charity patients. Schedule of charges for pay patients: \$8 to \$25 per week. There is fire protection. Sewerage. Buildings insured. No insane or inebriates treated. Receipts were \$11,336.22 and disbursements \$11,208.61.

REV. RODNEY R. SWOPE, D.D.,

President of Hospital and Dispensary.

CHARLOTTE

## MERCY GENERAL HOSPITAL.

	This hospital receives no public funds for support. It	is under the
COL	atrol of Rev. Father Joseph, O. S. B.	
	Number of patients remaining October 31, 1907	14
	Number admitted during the year	201
	Died	11
	Discharged	109

SISTER M. DOLORES, Superintendent.

Available beds, 22. Nurses, 6. Charity patients during the year, 40. Schedule of charges for pay patients: \$10 per week in the wards; rooms, \$10 to \$20. Fire protection. Insured. Sewerage. No endowment fund. No insane or inebriates treated. New side porch and entrance, the opening under the building has been bricked up, which makes it warmer, and the house has been painted inside and out.

SISTER M. Dolores, Superintendent.

## INSTITUTIONS EXCLUSIVELY FOR THE COLORED.

## LEONARD MEDICAL SCHOOL HOSPITAL, SHAW UNIVERSITY.

Alice M. Emerson, Superintendent.

RALEIGH.

This institution was erected in 1885. It is open during the session of the school from October to May 1st.

Number admitted during the school year	126
Died	3
Discharged	123

Available beds, 23. Nurses, 3. Charity patients, 110. Charges for pay patients, \$1.50 to \$3 per week. Connection with the city mains and city fire department. Buildings insured. Sewerage. No endowment fund.

Receipts, \$85.50 from pay patients, \$227.29 from gifts; total, \$312.79. Expenses approximately \$2,000, paid from Shaw University funds. No changes. No inebriates or insane treated.

A new hospital with endowment fund is needed.

ALICE M. EMERSON. Superintendent.

### SLATER HOSPITAL.

A. J. Brown, Superintendent.

WINSTON-SALEM.

The cities of Winston and Salem, respectively, give \$300 and \$100 annually to the hospital without conditions,

	мен.	women.	Total.
Number of patients remaining October			
31, 1907	1	2	.3
Admitted during the present fiscal year,	34	20	54
Whole number treated during the year,	35	22	57
Died	6	1	7
Discharged		19	44
Number remaining October 31, 1908	4	2	6

Available beds, 24. Nurses, 4. Charity patients, 28. Schedule of charges for pay patients: \$3 per week for the general ward and from \$4 to \$6 for private wards. Buildings insured; no special fire protection. Sewerage, No endowment fund. Expenditures, \$811.82; receipts, \$816.19. No alterations or improvements during the year. No inebriates or insane treated.

The death rate among the male patients was due to the number of injured men who have been received, some dying a few hours after reaching the hospital.

A. J. Brown,

Superintendent.

## GOOD SAMARITAN HOSPITAL.

Mrs. Anna Robertson, Superintendent. Charlotte.

The hospital is under a hoard of managers appointed by the Bishop of the Episcopal Church of the North Carolina Diocese. No county or municipal funds received, except pay per day for patients who may be sent by them. Others pay what they cau. Schedule of charges for pay patients: \$1.25 per day. Charity patients, 160.

Number of patients remaining October 31, 1907	12
Admitted during the year	204
Whole number treated during the year, including outside	
patients	300
Died	18
Discharged	179
Number remaining October 31, 1908	5

Available beds, 20. Nurses, 4. City fire department, also buckets in the hospital. Sewerage. Insured. No endowment fund. No insane or inebriates treated. Expenditures, \$3,021.51; receipts, \$3,051.37.

MRS. JOHN WILKES,

President Board of Managers.

### PICKFORD SANITARIUM.

Dr. L. A. Scruggs, Superintendent.

SOUTHERN PINES.

This institution is for colored consumptives and is open from November to May. It is maintained by voluntary contributions chiefly, partly by pay patients. It was chartered in 1896. It is controlled by a board of trustees, of whom Dr. James McKee, Raleigh, is the president. There are both white and colored trustees, the superintendent being colored. No county or State funds received.

Number of patients remaining October 31, 1907	6
Number admitted during the year	28
Whole number treated during the year	34
Died	2
Discharged	29
Number remaining October 31, 1908	3

Available beds, 24. One nurse. Charity patients, 9. (All are more or less charity patients.) Schedule of charges: \$15 per month. No

special fire protection, which is much needed. Receipts have been \$614 and expenditures the same. There are three neat buildings on four acres of land, original cost, \$10,000. No dehts on the property. Funds for repairs urgently needed. We need endowment. Three thousand six hundred dollars will endow a bed perpetually; \$180 will support one patient one year; \$15 will support one patient one month.

L. A. Scruggs, M. D., Superintendent.

## ST. AGNES HOSPITAL AND TRAINING SCHOOL FOR NURSES.

MRS. A. B. HUNTER, Superintendent.

RALEIGH.

St. Agnes Hospital and Training School for Nurses was organized in 1896. Mrs. A. B. Hunter, superintendent; Dr. Hinbert A. Royster, surgeon in charge; Mrs. Catharine P. Hayden, resident physician. The institution is maintained in connection with St. Augustine's School for the Colored Race, under the charge of the Protestant Episcopal Church and controlled by a board of managers. It receives \$5 a week for patients sent in by the city physician, mayor or chief of police. The fiscal year ends May 1st.

Number of patients remaining October 31, 1907	19
Number admitted during the year	191
Discharged	191
Births	10
Died	20
Remaining May 1, 1908	9
Number of dispensary visits	476
Operations	93

Available beds, 24. Nurses, 21. Schedule of charges for pay patients: \$5 per week in the wards; \$7 per week for private room. Fire protection. Insured. Sewerage. No endowment. Expenditures, \$3,389.32; receipts, \$3,887.20. No insane or inebriates treated. No alterations to the old brilding. The new hospital building, which has cost about \$20,000, is nearing completion.

Mrs. A. B. Hunter, Superintendent.

## COUNTY HOMES.

## ALAMANCE.

The Home is about a mile from Graham and Burlington. In charge, 20. One colored male, epileptic idiot. He is confined. One other epileptic immate. Meat, vegetables, etc., at cost of \$1.50 per capita weekly. Superintendent is Simeon Thompson, Burlington; \$25 per month and support of family. He is a new man recently put in charge. Physician is Dr. H. M. Montgomery, Burlington; salary \$150 as county physician. Three admitted in six months and four deaths. Kitchen in fair condition. Wheat, corn and garden crops raised. Religious services by different denominations. One colored girl ten or twelve years old. Outdoor relief to 71 at an average of \$1.54 per month. General impression of the management not very favorable.

REV. J. M. HOLT,

Received March 12, 1908.

J. A. TURRENTINE, P. H. FLEMING.

#### SECOND REPORT.

The Home is unchanged as to buildings. Now in charge, 17. Two idiotic, one colored boy and one colored girl. The boy is confined. Died, 3. No other children, except the idiotic girl mentioned. She is 12 or 14 years old. Premises and building in good condition, General impression is favorable. Ontdoor relief to 64 at an average of \$1.58 per month.

Rev. J. M. Holl.

J. A. TURRENTINE, P. H. FLEMING.

Received September 28, 1908.

## <u>-</u>

## ANSON.

The following is taken from the grand jury report:

"We find the County Home in good condition, with few exceptions. The premises clean and well kept, the rooms and bedding clean, the inmates comfortably clothed and saying that they are well fed and well treated."

Buildings in need of some minor repairs.

Received September 26, 1908.

MRS. W. J. HUNTLEY.

#### BEAUFORT.

The Home is as heretofore reported as to buildings. It is in fine condition.

Dr. J. M. Gallagher.

Received June 4, 1908.

## BLADEN.

At present there are no poor in the County Home, but cared for outside. The building is a quarter of a mile from the courthouse. Two frame huildings, four rooms; ventilated by windows and doors. Open fires. Spring., No keeper at present. Mrs. William Whitted,

Received September 28, 1908.

MRS. JOHN McDowell,

## BUNCOMBE

The Home is as heretofore reported as to buildings. Can accommodate 200. Now in charge, 52. Ten are helpless. Four white women insane; 5 epileptics. Plenty of everything is grown on the farm and average weekly cost is \$1.50. Superintendent and his wife get \$100 per month for their services. Physician is Dr. Daniel Sevier; salary \$100 per month. Kitchen clean. Religious services Sunday afternoous by the Baptist denomination. One white and two colored children. Maintenance of the Home, jucluding Superintendent's salary, \$5,610.53 for the year. Repairs and improvements, \$3,393.93. Outdoor relief, \$2,536,72. MRS. WILLIAM TURNER.

Received October 2, 1908.

MRS. A. RAMSEUR.

## BRUNSWICK.

The Home is two and a half miles from the county seat, Two frame buildings; veutilated by windows and doors. Cisteru and well. Stoves. Now in charge, S. Two white females insane, Three epileptic. None confined. Sufficient amount of food. J. W. Wescott, Southport, is Superintendent. Receives \$30 per month. J. Arthur Dosher, M. D., is physician; salary, \$125 per auuum. Died, 1, eighty years old. Sick well cared for. Premises and kitchen in very good condition. Five acres in cultivation; hogs, chickens and cow. Garden vegetables and potatoes used for the Home. Regular religious services. No children. Some outdoor relief.

Remarks.—The County Home would be a credit to any county. Received May 15, 1908. J. ARTHUR DOSHER, M. D.

## BURKE.

The building is new and comfortable. Now in charge, 28. Two insane epileptics. Noue confined. Plenty of good, wholesome food. The Superintendent receives \$5.25 per capita and the proceeds of the farm. He is a good man for the place. Physician is Dr. J. L. Laxton, Morganton; paid \$3 per visit. Admitted in six months, 2. No deaths. The sick are well cared for. Have a nurse when necessary. One hundred and one acres, generally very poor land; 25 or 30 in cultivation. Corn, wheat and vegetables raised. Religions services monthly. Three idiot children, one white and two colored. Outdoor relief to 20 at \$3 per month each. General impression is favorable.

Remarks.—We are proud of our County Home and the way it is managed. It is in fine shape and well kept.

Received March 26, 1908.

ROBERT T. CLAYWELL.

The inmates are mostly epileptics, paralytics and idiots. Three of the latter—altogether the most helpless set of mortals to be found, according to number. The inmates are well cared for and the Home is in fine sanitary condition. Rooms are clean, beds and bedding and nice iron bedsteads. All precantions have been taken to prevent epileptics from falling into the fire, by iron bars properly placed in front of fireplaces. Grove and grounds are kept clean and some of the women raise flowers which look quite showy along the borders and seem to give much pleasure in the looking after them. The keeper is the right man in the right place. Good, pure well water,

J. L. LAXTON, M. D., Superintendent of Health of Burke County.

#### CABARRUS.

The Home is four miles from the connty seat. Seven frame bnildings of two, three, four and five rooms; ventilated by windows and doors. No protection against fire. Can accommodate 30; in charge, 28. Insane, I white male and I white female; confined, I; epileptic, I. All the food they need. Cost about \$65 per annum. Superintendent is John W. Cook, Concord; salary, \$540 per annum and board. He is a satisfactory officer. Physician is Dr. R. S. Young; paid \$2.50 per visit. The sick are well cared for. Kitchen is fair for the building. New buildings needed for the inmates. One hundred and sixty acres of good land; 100 cultivated. Mules, cattle and hogs. Corn, wheat, potatoes, oats and vegetables raised for the use of the Home. Shaded. Religious services every two months. One child has spinal trouble. Outdoor relief to 60 at an average of \$1.50 per month. General impression is favorable.

Remarks.—We recommend that the county erect new buildings with proper fire protection and new sanitary equipment.

J. M. HENDRIX,

Received June 15, 1908.

G. ED. KESTLER.

### CALDWELL.

The Home is three miles from the county seat. Four two-room frame huildings; ventilated by windows, doors and open fireplaces. No special fire protection. Screen over the open fireplace to prevent accident to the mentally defective. Spring water. Can accommodate 14: now in charge, 7. Five white mentally defective, though none are confined. No epileptics. Unlimited quantity of food, and variety, Average weekly cost of maintenance, \$1.50. Superintendent is paid \$6 per month per capita. He is satisfactory. Physician is Dr. C. L. Wilson, Lenoir; salary about \$150 per year. In six months, 1 death, blood poison. Sick are well cared for. The premises are clean and the Home is beantifully located; houses are practically new. Kitchen good. Thirty acres of poor land, needs improving; 15 in cultivation. One horse. Corn and vegetables used by the keeper. Some shade; not well shaded. No regular appointments for religions services. One child just entered a few weeks ago with its mother; had nowhere else to go. Ontdoor relief to fifty at from \$1 to \$5 per month. General impression is favorable. J. W. Curtis.

Received June 29, 1908.

J. W. CURTIS, Dr. C. L. Wilson.

#### SECOND REPORT

The Home is unchanged since the last report. Now in charge, 6; died, 1. The child previously reported has been taken by relatives.

Received September 28, 1908.

C. L. Wilson, M. D.

#### CAMDEN.

The buildings, etc., are as heretofore reported. Now in charge, one white and one colored female. No children. Deaths during six months, 1. The Home is about two miles and a half from churches. No outdoor relief at present.

Remarks.—Camden County for the last two years has not been taxed for the poor or prisoners to any extent. Large special taxes have been made for the cause of education.

Received May 1, 1908.

George H. Riggs.

#### SECOND REPORT.

No change since the last report. Not more than three persons in the Home at any one time. At present one white woman, who visits friends a part of the time. The keeper lives on the premises free of rent and farms rented land.

George H. Riogs.

Received October 9, 1908.

#### CASWELL.

, The Home is as previously reported. Now in charge, 18. None insane or epileptic. The Superintendent is E. B. Booker, Yanceyville; salary, \$150 per annum. He is a satisfactory officer. Dr. S. A. Malloy is the physician. In charge September 1, 20; since admitted, 1; died, 1; discharged, 2. The sick are well cared for. Premises in good condition. Kitchen good. Occasional religious services. No children, Outdoor relief to 80 or 90, from 75 cents to \$1. General impression is favorable.

Received March 7, 1908.

#### SECOND REPORT.

The Home is as previously reported as to buildings. Now confined, 17. No insane; no epileptic. Substantial food. Cost \$3 per week per capita. Superintendent is E. B. Booker, Yanceyville. He is satisfactory. Physician is Dr. S. A. Malloy. Died, 1. Sick are well cared for. Buildings have been repaired during the year. Shaded. No children. Outdoor relief to 80. General impression of the management is favorable.

S. A. Malloy, M. D.

Received September 4, 1908.

#### CATAWBA

Five good cottage buildings for the inmates, with good brick chimneys and open fireplaces and one large two-story house for the keeper. Ventilated by windows and doors. Well and pump. Can accommodate from 25 to 40. Now in charge, 19. None insane; four or five weakminded. One epileptic confined. Good, wholesome food. Superintendent is Robert Hoke, Conover; salary is \$350 and board of family. He is a satisfactory officer. Physician is Dr. J. H. West. Died, 1. Everything is neat and in good condition. House nicely painted, Kitchen very good. Two hundred acres of medium land; 75 or 100 cultivated. Crops are wheat, corn, a little cotton and vegetables. Not very well shaded. Only one little deformed colored child.

Remarks.—I hold services for the inmates of the Home once a month. I think from all I can learn that the county cares for the poor on an average or better than a great many other counties in the State.

REV. M. A. ABERNETHY.

Received September 21, 1908.

### CHATHAM.

The Home is well situated three and a half miles from the county seat. Seven frame buildings, 16 x 30 feet, two rooms each. Well

water. Open fires and stoves. Now in care of the Home, 30. Helpless, 2. Insane, 1 colored male. Seven epileptics. Ample supply of plain food, at per capita of \$1.25 per week. Superintendent is W. H. Ward, Pittshore; receives \$300 per year and board of family. Dr. Taylor, Bynum, is the physician; salary, \$10 per month. No deaths, 3 discharged. Premises in fairly good condition. Buildings in good repair. Brick buildings would be better than the present frame houses. Five hundred and fifty-three acres of average land; 125 in cultivation. Three mules, 16 cattle and 25 hogs. Religious services in a small chapel built for the purpose. No children. Two inmates locked up for disobedience. Outdoor relief to 100 at a cost of \$2,000 per year.

Mrs. HEFRY A. LONDON.

Received April 24, 1908.

#### SECOND REPORT.

The Home is unchanged since the last report. Now in charge, 34. Four white insane. One negro, violent, has fits and is confined. Eight epileptics. Died, 5. No children. Premises neatly kept and buildings in good repair. Outdoor relief to 100 at an average of \$20; total, \$2,000. General impression is favorable.

Received September 30, 1908.

MRS H. A. LONDON.

#### CHEROKEE.

The Home is three miles from Murphy. Two frame buildings, four rooms in one and two in the other. Both painted and in good condition. Windows and doors. Good.well. Open fireplaces. Now in charge, 3 whites—2 white women who can work and 1 white man who is unable to work, One of the women insane. None confined. No epileptics. They are fed good, common farm diet. Superintendent is Silas Anderson, Murphy. He receives \$5 per month each from the county. He is satisfactory. In charge during six months, 6. No deaths. None sick. Premises in good condition, houses and yard clean. Four lundred and two acres, 35 in cultivation. Crops are corn, cane, tobacco and vegetables used at the Home. Not shaded. Occasional religious services. No children. No outdoor relief. General impression is favorable.

Mrs. R. H. Hyatt.

Received October 8, 1908.

#### CHOWAN.

The Home is as heretofore as to buildings. Now in charge, 5. Insane, 3 colored women. Epileptic, 1. None confined. The Super-intendent is M. Minton Harrell, Edenton, Physician is H. M. S. Cason, M. D., Edenton, Admitted in six months, 2. Died, 2—one

from consumption. Sick well cared for. Premises in good condition. No children. Eleven receive ontdoor relief at \$2.18 per month. General impression of the management is favorable.

Received March 28, 1908. Rev. Robert B. Drane.

### SECCOND REPORT.

No change in the buildings, etc. Now in charge, 5. Three colored insane women, but not confined. No deaths in the six months. No children. Mild confinement for an hour or so of an obstreperous idiot. Outdoor relief to 12 at \$2.25 per month.

Remarks.—The general appearance of the Home is attractive and very creditable to the county. The weakmindedness of the majority of the inmates renders their care not an easy task. I am sure that the keeper and his wife do good and faithful service by them all.

Received December 26, 1908.

REV. R. B. DRANE, D. D.

## CLAY.

The Home is about two and a half miles from the county seat. One large building with six rooms; ventilated by windows and doors. No fire protection. Spring and well. Open fires. One inmate in charge. No insane or epileptic. Good country produce—all that they want to eat. Superintendent is Oscar Scroggs, Hayesville; gets §6 per month each and rent of farm. Dr. P. B. Killian is county physician; salary, \$25 per month. Only one inmate in six months. The Home is on a reasonably good farm and big grounds under good cultivation. Kitchen in very good condition. Twenty to 35 acres cultivated. No children. No religious services. General impression is very favorable.

There are seven persons who receive outdoor relief, staying with their own people.

L. F. Shuford.

Received May 15, 1908.

#### CLEVELAND.

The Home is three miles from the county seat. Three buildings. Main building is brick; others frame. Brick building has 18 rooms. It is ventilated by windows, doors and transoms. Well. Open fires. Can accommodate 40. Now in charge, 11 white and 8 colored. Insane, 1 white woman; epileptic, 1 white woman and 1 colored boy. None confined. Bread, meat, milk, butter and vegetables, as much as they want. Average cost \$3 per month, with the produce of farm additional. Superintendent receives \$35 per month in cash. Physician is Dr. T. E. McBrayer, Shelby; salary, \$30 per month. No deaths. Sick well cared for; no special attendant. Some of the

inmates could make quilts at little expense. The Home is on the public highway, conveniently arranged and in good repair. Kitchen in good condition. Two hundred and fifty acres good land; 125 in cultivation. Horses, cows, etc. Crops are corn, wheat, oats, molasses, for the use of the Home. Cotton, the money crop, goes to the treasury. Not much shade. Religious services once a month. No children. Some outdoor relief. The general impression is favorable.

Remarks.—The Home is kept as nicely as it can be for the amount spent for the same. It could be made a more desirable place by the use of more means

George Dover.

Received September 10, 1908.

## DARE

The Home is two miles from Manteo. Two frame buildings, four rooms each. Pump. Stove. Can accommodate 8. None in charge, nor have there been any immates for some time. Superintendent gets \$10 per month. General impression is favorable.

Remarks.—It is good and well kept as far as I can find out.

Received March 17, 1908. Charles L. Mann.

#### SECOND REPORT.

The Home is as heretofore reported as to buildings. Can accommodate 8. None now in charge. General impression is favorable.

No outdoor relief.

CHARLES L. MANN.

Received September 16, 1908.

## DAVIDSON.

The Home is as heretofore reported. Now in charge, 21. Two insane, 1 white and 1 black. Confined, 1. Epileptics, 2. As much food as they want. Keeper receives 15 cents per capita per day and the use of the farm. Andrew Crotts, Lexington, is Snperintendent. He is a good officer. Drs. Hill & Hill, Lexington, physicians; salary, \$100 per annum. In charge, September 1, 1907, 24; since admitted. 1; died, 4. The sick are cared for by the keeper's family. Premises neat and in fairly good condition. The kitchen is good, clean and very nice. Six or 7 acres in cultivation. Corn, cotton and oats raised. Outdoor relief to 70 at \$2 per month. General impression of the management is favorable.

James-Sauth.

Received April 13, 1908.

### SECOND REPORT.

The Home is as heretofore reported. Now in charge, 24. Three insane, 2 white and 1 colored. Two epileptics. The keeper is paid

\$4.50 per month each and the use of the farm. He is satisfactory. Admitted during six months, 3. Died, 1; left, 1. No provision for religious services. One feebleminded colored boy. Outdoor relief to 60 at \$2.50 per month,

Remarks.—The county commissioners are considering putting up new and better buildings.

James Smith.

Received October 19, 1908.

## DAVIE.

The Home has one brick building with three large rooms and three small log houses. Situated in a grove of beautiful oaks. Windows. Open fires. Well water. In charge, 8. None insane, but one epileptic. Two very small children, one black and one white. Plenty of plain food is allowed. The Superintendent bears a good name. Physician is M. D. Kimbrough, M. D., Mocksville. Most of the rooms were clean, but some of the buildings need repairs. No provision for religious services.

Remarks.—I talked with all the poor, and they were cheerful and seemed contented. I always carry them a freat and they love to see me come. One idiotic colored man insists upon shaking my hand every time, and I never refuse. The inmates all love the Superintendent's wife.

Mrs. A. M. Nall.

Received April 13, 1908.

#### DUPLIN

The new Home is about one mile from the county seat. Two brick buildings, tin covered. One is 16 x 70 feet and one 16 x 54, with an ell 50 feet long. Elight rooms in the building for whites and five or six in that for the blacks. Ventilated by windows and doors. Pumps. Stoves. Can accommodate fifteen or more. Now in charge, 5—3 whites and 2 blacks. Superintendent lives in the same building with the whites. Two black epileptics—one old and of little mind, the other deformed. All the food they want. Costs about \$60 per month, including salary of the Superintendent, who gets \$22.50 and board. D. C. Uzzell, Kenansville, is Superintendent. He is satisfactory. Physician is Dr. J. A. Ferrell; salary, \$100 per year. Admitted during six months, 3. Died, 2. All new brick buildings and kitchen is good. Sixty-five acres of fair land; 15 in cultivation. Corn and vegetables raised for the Home. Little shade yet. Occasional religious services. No children. General impression is favorable.

Remarks.—The present Home has just been purchased and new buildings put up. The commissioners intend to make it a model Home

for the poor. It has not been completed long enough to do much as ret. We have a list of poor who take an allowance and remain with relatives.

A. P. Farrior.

Received June 24, 1908.

#### SECOND REPORT.

Nothing new to report in regard to the Home since the last report. Received September 26, 1908.

A. P. Farrior.

## EDGECOMBE.

The Home is as heretofore as to bnildings. Now in charge, 37. nsane, 1 colored woman, not confined. Three epileptics. Per capita ost of maintenance per week, \$2.10. Superintendent is W. T. Graham, Tarboro; salary, \$37.50 per month and board. He is a satisfactory officer. Physician is W. J. Thigpen, Tarboro;; \$50 as County superintendent of Health. Number in charge september 1, 31; since dimitted to March 1, 18. Four deaths and three have left the Home. The houses are well arranged and well kept, situated in a large oak grove. Kitchen in good order. Four hundred and fifty-five acres only woodland; 70 in cultivation. Mules, cows and hogs. Grain and egetables raised and used for the Home. Occasional religious serves. No children. Ontdoor relief to 125 at \$1 per month. General impression is favorable.

James R. Gaskill.

Received March 23, 1908.

## FORSYTH.

The Home is a modern, up-to-date building, located three miles rom the county seat. One building 100 x 150 feet. Brick with metal oof and broad piazzas; 44 living rooms. Windows on weights, and ransoms over all the doors. Fire extingnishers and good water ressure from a large tank. Fine well of drinking-water pumped to Il the floors by electric motor. Steam heated, radiators in all the ooms. Can accommodate 75; now in charge, 47. Two bedridden; 19 nentally defective. Of these 4 insane are confined. Included in the 9 are 2 epileptics. Good food. Enough is raised on the farm to supdy the table. County pays other expenses. C. C. Flynt is Superinendent; salary, \$600 per year, with board and rooms for self and amily. He is satisfactory. Physician is Dr. S. F. Pfohl, Winstonsalem; salary, \$600 for all county work. Admitted in six months, 18 whites and 20 colored. Died, 4-one from consumption. Competent ick nurse employed at \$600 per year, with board and lodging. Very ew are intelligent enough to make anything and most of them too feeble to work. Grounds and buildings are well arranged and everything is neat and in good condition. Two hundred and fifty acres of good land; 100 in cultivation. Five mules, 4 cows and 14 hogs. Wheat, corn, oats and potatoes raised for use of the Home. Extra grain is sold. The Home is new and the trees are too small yet to furnish shade. The pastors of the city churches alternate and give one service a month to the Home. Three children, too small to be taken from their mother. Outdoor relief to two persons, \$3 per month to one and \$5 to the other, General impression of the management very good.

EDWARD S. CROSLAND.

H. W. FOLTZ, W. P. HILL.

Received June 20, 1908.

## SECOND REPORT.

The Home is as heretofore reported as to buildings. Now in charge, 50. Insane, 5 white, 2 colored. Confined, 4. Epileptic, 1. Died during six months, 6. Discharged, 15. Two children. Outdoor relief to 5.

Remarks.—We urge the purchase of 200 feet of hose for fire protection. Good water pressure and hydrants, also fire extinguishers, but no hose.

#### GASTON.

The Home is as heretofore reported as to buildings. Now in charge, 14. Six helpless. One white male insane and confined. One epileptic. All they want of bread, meat, vegetables, molasses, butter, milk and coffee. Cost about \$1,75 per week. Died, 2. Kitchen in good condition. Preaching once a month by the Presbyterian minister. No children. Outdoor relief to 66 at a cost of \$1,500 per year. General impression is favorable. Other items unchanged.

Received September 26, 1908.

J. P. REID.

GRAHAM.

(No Home.)

#### GATES.

There are three buildings. Those for the inmates are all new and well kept. Pump and well. Stoves and open fires. Can accommodate fifteen or twenty. Now in charge, 6. Insane, 1 colored woman and 2 colored boys. Good and wholesome food. The keeper is Mrs. M. E. Riddick. She is satisfactory. The physician is Dr. George D. Williams, Gatesville. Fees for visits. In charge September 1, 5; since

admitted to March 1, 3; died, 2. Sick well cared for. Kitchen in good condition. Thirty acres; 15 in cultivation. A horse, hogs and cows, etc. Crops are corn, cotton, peanuts and potatoes. Shaded. Ashes used for improving the land. No provision for religious services. No children. No punishment. Outdoor relief to 4 at \$2.50 per month. General impression of the management is favorable.

Received March 6, 1908.

MARTIN KELLOGG.

#### GRANVILLE.

The Home is one mile from the county seat. Three brick buildings about 18 x 30 feet. Superintendent's residence is a frame building of five rooms, a nice home. Four frame buildings, 10 rooms. A chapel. Ventilated by windows and doors. Well, Open fires. Can accommodate 30. In charge, 19. Insane or idiotic, 5-3 white and 2 colored females. Epileptics, 2. Sufficient amount of meat, bread, cabbage. peas, beans, salad, flour, sugar, coffee. Cost per week, \$2.50 per capita. Superintendent is W. S. Daniel, Oxford, R. F. D. No. 6; receives \$35 per month and board of family. He is a new man and is all right. Physician is Dr. S. D. Booth; salary, \$30 per month. In charge September 1, 16; since admitted to March 1, 3. No deaths. The sick are well cared for. Some of the inmates like to knit. We have a fine location, good and comfortable buildings and the inmates are well cared for. Good dining rooms; kitchen in good condition. About 500 acres, mostly sandy land; 75 acres open, 40 to 50 in cultivation. Corn. peas, vegetables, etc. Used for the Home. The Home is in a nice oak grove. Ashes and manure used in improving the lands. A good chapel and occasional preaching. One boy. No punishment. Outdoor relief to 100 at \$1 per month. General impression of the management favorable. The Superintendent is sober, faithful D. N. HUNT. and industrious.

Received March 6, 1908.

#### SECOND REPORT.

The Home is as heretofore reported as to buildings. Now in charge, 20. Five insane—1 white and 4 colored women. None confined. Two epileptics. Died, 1; discharged, 2. The Home is located in a beautiful grove and we hope to make it a model Home. Regular religious services. No children. No outdoor relief.

Remarks.—I have visited and personally inspected the County Home. I find things in good condition. Our unfortunates are well cared for and have plenty to eat. We have an excellent Superintendent and he and his able assistant, his wife, give all of their time to the immates.

D. N. Hunt.

Received September 23, 1908.

#### GREENE.

The bnildings, etc., are as heretofore reported. Now in charge, 5. Helpless, 3; insane, 1. None confined. Superintendent is Mrs. Ida Dail, Snow Hill. She receives \$9 per month for each inmate and the use of the farm. She is satisfactory. Physician is Dr. W. B. Mnrphy, Snow Hill. He receives \$15 per month for county institutions. Died, 1. Kitchen good. One hundred and thirty acres; 20 cleared and in cultivation. Crops are corn and cotton. Shaded. Occasional religious services. No children. General impression is favorable. Some outdoor relief. Mrs. Dail, the keeper, is kind and attentive to the inmates.

L. V. Mobrill.

Received Angust 4, 1908.

## HARNETT.

The Home is a mile and a half from the county seat. It is entirely new. One frame building, one story, three rooms for inmates and five for the Superintendent, and one with two rooms for other inmates. Ventilated by windows and doors. No special fire protection. Well, Open fires. Can accommodate 14. Now in charge, 4. One epileptic. Bread, meat, vegetables, coffee and other food from the keeper's table; all fed alike. Connty pays the keeper 30 cents per day for each inmate. Superintendent is M. R. Morgan, Lillington. He is a satisfactory officer. Dr. J. W. Halford, Chalybeate, is county physician; paid by regular fees. No deaths. Sick well cared for. It is a pleasant country home surrounded by a farm and is on the public road. One hundred and twenty acres; 25 in cultivation. Corn and cotton are the crops. The farm is rented by the keeper. Kitchen fairly clean and well kept. Young shade trees. No provision for religions services. One child three years old with the mother. Ontdoor relief to 35 or 40 at from \$1 to \$5 per month. General impression is favorable.

Remarks.—One hundred and twenty-five acres were recently purchased by the county and a new and comfortable Home erected thereon. The keeper rents the farm from the county and occupies a part of the building, as it is not all needed by the poor. Immates appear contented and say that they are well cared for.

DR. J. H. WITHERS, C. MCARTAN, H. T. FAUCETTE.

Received August 14, 1908.

#### HAYWOOD.

The county has recently purchased a farm with comfortable buildings situated six miles from Waynesville and has removed the impacts to the new Home. Occasional religious services. Two children, Other items as previously reported.

Received May 1, 1908.

Mrs. M. J. Branner.

SECOND REPORT.

The poor are now cared for on the new farm in three frame buildings. The county will soon erect new buildings with steam heat and modern improvements. Water from spring. Stoves and fireplaces. Now in charge, 14. One white insane. One epileptic. All the food needed, cooked palatably and in a clean kitchen. Cost of maintenance, \$6 per month each. Superintendent is R. C. Moody, Waynesville, R. F. D. Physician paid fees for services. One hundred acres good land. Cost to the county of new Home, \$10,000. Crops are corn, wheat, oats and vegetables. Shaded. Outdoor relief to 5.

Remarks.—I visited the Connty Home and found the inmates well pleased with the new Home. It is a desirable location. The present keeper and wife seem very kind to the inmates. Had prayer service, reading and singing, which they much enjoyed.

Received November 11, 1908.

MRS. M. J. BRANNER.

## HENDERSON.

The Home is as heretofore reported as to buildings. Now in charge, 4 whites. None insane or epileptic. No children. No deaths during the six months. Ample amount of food at \$2.50 per week. Sick well cared for. Buildings in good repair. Kitchen clean and neat. Ahout 100 acres fairly good land; 25 in cultivation. Outdoor relief to 40 at \$3 per mouth.

Remarks.-I find things fairly comfortable and clean.

Received March 19, 1908, Mrs

MRS. LILA R. BARNWELL.

#### SECOND REPORT.

The Home is as previously reported. Now in charge, 3. No children. Outdoor relief to 36 at an average of \$3 per month.

Remarks.—Inmates are all in good health. Dr. Waldrop and I think the conditions there are favorable.

Received September 16, 1908.

MRS. LILA R. BARNWELL.

### HERTFORD.

The Home is situated about half a mile from the village of Union and seven miles from the county seat. One house for the Superintendent, with kitchen and outhouses and four cottages of two rooms each for the inmates; all frame. Each room has three windows and a door. Pump. No special protection against fire. Open fires, Brick chimney in each room. Can accommodate 16. Now in charge, 7. Confined, 1 insane epileptic. Such food as is usually grown on a farm. Expense of the County Home for the last year in excess of farm, \$352.28. Superintendent is M. M. Brown, R. F. D., Ahoskie, He is satisfactory. Physician is Dr. J. H. Mitchell; salary, \$75 per annum. Died, 1. One returned to native county. Sick well cared for. Some work a little in the garden. Premises in good condition, neat and well kept. Kitchen fairly good. Sixty-eight acres; 20 in cultivation. Horse, cow and hogs. Crops are corn, cotton, peannts and vegetables. Only a few shade trees. Occasional prayer meetings held. No children. Outdoor relief to 16 at \$2 per month each. General impression of the management is favorable.

Remarks.—We have one man, an epileptic, who is at times violent and dangerons, and it becomes uccessary to chain him. We recommend that the State take charge of him.

W. P. Shaw.

John A. Northcott, John E. Vann.

Received August 27, 1908.

## IREDELL.

The Home is as heretofore reported. In charge, 29. One harmless white insane person, confined; runs away. One epileptic. Weekly per capita cost of maintenance outside of farm products, \$1. Superintendent is W. C. Perry, Barium Springs; receives \$30 per month and board of family of five. He is satisfactory. Physician is Dr. M. R. Adams, Statesville; pay, \$20 per month. Died, 6 in the past year. Sick well cared for. A good colored nurse. Some of the inmates could make baskets, mats, etc. Some of the women could quilt if they had the materials, but most of them do not want to work. The Home is located on a high hill, well drained, light soil, kept clean and in good condition. Plain honses: no porches. Kitchen small: large range. It is neat and orderly. Two hundred and twenty-five acres; land medium quality; 50 acres cultivated. Mules, cows and pigs. Crops are corn, wheat, oats and vegetables for the use of the Home. Religious services occasionally in the open air. One colored boy there temporarily while getting well. As soon as he recovers work will be found for him. Ontdoor relief to 75. General impression is favorable.

Remarks.—What is most needed at the Home is a chapel where services can be held. A large dining room has been recently built. It is divided in the center by a curtain, and the whites are on one

side and the negroes on the other. Some of the commissioners and other people are anxious to move the Home nearer the county seat and have an up-to-date building erected. MRS. D. A. MILLER, · Received May 13, 1908,

Mrs. A. L. Corle

#### JACKSON

The situation of the Home is good, one mile from the county seat. Two frame buildings, five rooms in each; ventilated by windows. Open fires. Spring. Can accommodate 10. Now in charge, 3. One white insane man. One epileptic. All the food they want, such as is raised on the farm. Weekly per capita cost, \$2.25. R. L. Knight is Superintendent. He is satisfactory. Physician is Dr. A. A. Nichols, Painter; salary, \$50 per annum. During six months, 5 in charge, One insane person removed and one death. The sick are well cared for. The premises are well arranged and in good condition. Kitchen good. One hundred acres good bottom-land and npland. Two horses and cattle. Corn, wheat, oats, clover, potatoes, tobacco and garden vegetables. Some shade, Clover turned under to improve the land, No children. No provision for religious services. Outdoor relief to 8 at a cost of \$3.25 each. General impression is favorable.

Received April 28, 1908.

REV. A. W. DAVIS.

## JONES.

The Home is in the woods two miles from the county seat. One frame building of eight rooms, pantry and hall; one log building with two rooms. Ventilated by windows. No fire protection. Open well. Fireplaces. Can accommodate 20 or more. Now in charge, 2, No insane or epileptic. No Superintendent. Physician is Dr. W. W. Early, Trenton; salary, \$50 per year for one visit per month; other visits extra pay. Died, 2. There is no attendant. Those sick are cared for by the other inmates. Premises in fair condition. The house is new. Kitchen in fair condition. One acre used as a vegetable garden. Shaded. Preachers go out to see the inmates several times a year. No children. Some outdoor relief. General impression is favorable.

Remarks.—The County Home is in fair condition. The inmates are treated fairly well. Every Christmas the ladies of the town go out and carry them nice things to eat, clothes, etc. They also have some preacher to attend on this day. JULIAN K. WARREN.

Received September 8, 1908.

#### JOHNSTON.

The County Home is five miles from the county seat. Six frame buildings; ventilated by windows and doors. Well. Open fires and stoves. Can accommodate 40. Now in charge, 22. Seven helpless. Two white men and three white women insane and three of these confined. Two epileptics. G. M. Hinton, Smithfield, R. F. D., is Superintendent. He receives \$5.25 per month for each inmate and \$10.50 for each insane person. Physician is Dr. L. D. Wharton, Smithfield; salary, \$175 per annum. One admitted and one died during the six months. Premises in good condition. Two hundred acres of fairly good land; 40 in cultivation. Corn, cotton, tobacco and vegetables raised for the support of the inmates. Shaded. Occasional religious services. One four-year-old child with her mother. General impression of the management is favorable.

Received November 13, 1908.

MRS. W. S. STEVENS.

## LENOIR.

The Home is one mile from the county seat. Five frame buildings; ventilated by weighted windows. Pump. Wood heaters. Can accommodate 30. Now in charge, 20. One white female insane. None confined. One colored epileptic. All they desire of good wholesome food; fair variety. Cost per capita weekly, \$1.25. Superintendent is Mrs. Agnes Lee, Kinston; paid \$15 per month and her husband receives \$12 per month. County physician is Dr. Pridgen; fees per visit. Admitted during six months, 20; died, 2. Inmates and matron care for the sick. Premises neat and in good condition. Kitchen exceptionally neat. Forty-two acres poor sandy land; 30 in cultivation, Hogs, cow and chickens. Vegetables, corn and peas raised. Fine young grove. No religious services as yet, but will be from this time. No children. No ontdoor relief.

Remarks.—Two of the committee visited the home on September 10 and were very agreeably surprised to find everything done decently and in order. It is the committee's intention to create ways and means of brightening and cheering the lives of the immates.

REV. JOHN H. GRIFFITH.

Received September 12, 1908.

Chairman.

## LINCOLN.

The Home is as heretofore reported. In charge, 18. All imbecile. One confined. Three epileptics. Good food at a cost of \$1.25 per week. Superintendent is M. L. Heavener; remuneration, \$3.50 per

capita and rent of the land. He is satisfactory. Doctor receives \$12.50 per month, furuishing medicine. No deaths and no admissions. Occasional religious services. No children, Outdoor relief to 33 at a cost of \$1.54 per month. General impression of the management is favorable.

Remarks.—No general improvement. County commissioners do not see the way to sell and buy another site, but would pay the keeper more if they could.

R. Z. JOHNSTON, Chairman;

e ii they could.

R. Z. Johnston, Chairman; D. T. Johnson,

Received March 6, 1908.

MISS KATE SHIPP, MRS. R. S. REINHARDT.

## MACON.

The Home is as heretofore reported. Now in charge, 7. No insane; one epileptic. No children. Superintendent receives \$6 per month for each inmate and the use of the farm. Physician is Dr. F. L. Siler; salary, \$100 per year. No deaths. Number in charge during six months, S. Kitchen good. General impression is favorable. Other items as previously reported.

Remarks.—The keeper receives \$6 per month for each person and what he can make on the farm, which is very little—from \$125 to \$130 per year. The system is at fault. Manager should receive a salary and the products of the farm beloug to the Home. A very detailed specification of his duties should be given the mauager and this should be a part of his contract. Until some arrangement of this kind is made things must continue about as they are uow.

REV. J. A. DEAL, W. H. HIGGINS, R. F. JARRETT.

Received April 9, 1908.

SECOND REPORT.

The flome is as previously reported. Now in charge, 9. One epileptic; two partially iusane. Superintendent is James N. McConnell, Frankliu. He receives \$6 per month for each inmate and proceeds of the farm. Physician is Dr. W. A. Rogers, Franklin. No deaths. Outdoor relief to 20 at \$2 per month. General impression is favorable.

Rev. J. A. Deal.

REV. J. A. DEAL, Mrs. J. C. Wright,

Received September 12, 1908.

## MARTIN.

The condition of the Home for the Aged and Infirm is the same as formerly reported.

WILLIAM E. WARREN, M. D.

Received September 8, 1908.

#### MONTGOMERY.

The Home is as heretofore reported. Practically uo change.

Received May 27, 1908.

R. T. POOLE.

SECOND REPORT.

The Home is two miles from the county seat. Four old buildings as heretofore reported and three new buildings now nearing completion. A modern brick building with twelve rooms and two smaller ones with four rooms each. Windows and doors for ventilation. Well. Buckets for protection against fire. Heaters. Can accommodate 30. Now in charge, 9. Insane white men, 2; no epileptics. Sufficient amount of food at a per capita cost of 88 per month. Present Superintendeut is W. C. Hurley, Troy. The plan of keeping the Home will be changed on October 1st. Physician is Dr. J. B. Shamburger. He receives \$25 annually. Admitted in six months, 2; died, 2. Sick are well cared for. Premises in excellent condition. Kitchen neatly kept. Seventy-six acres of fair land; 5 in cultivation. Shaded. Occasional religious services. One infant. No system of outdoor relief. General impression is favorable.

Remarks.—The new building is not yet occupied; will be in thirty days. We have a Home which is a credit to our county.

Received September 8, 1908.

R. T. POOLE.

#### MOORE.

The Home is situated two miles from the county seat. Six frame buildings 16 x 40 feet, one story. Two rooms and closets to each building; two doors; the windows with glass, and open fireplaces. No special fire protection, but these buildings are 80 feet apart. Well and spring. Now in charge, 9. Insane, 2. Confined, 1. As much plain, wholesome food as they want. Samuel D. Stuart is Superintendent; receives \$8 per month per capita and use of the farm. The physician is Dr. Gilbert McLeod, Carthage; fee, \$1.50 per visit. No deaths. Sick well cared for. Kitchen clean and comfortable. One hundred and sixty acres; quality below the average of farm land. Two-horse farm. Horses, cows, hogs and chickens. Crops are grain, potatoes, vegetables. No children. No provision for zeligious services. Outdoor relief to 71 at a cost of \$2.75 per month.

Received March 26, 1908.

JOHN CAMPBELL.

#### SECOND REPORT.

The Home is as previously reported. Now in charge, 13. Two insane, one white and one colored woman. One confined. No children.

John Campbell.

Received September 19, 1908.

## NEW HANOVER.

The Home is nuchanged as to buildings. Water snpply from cisterns. Forty or fifty can be comfortably cared for. Now in charge, 15. No insane or helpless. Four epileptics, two white and two colored. Furnished as much bread, meat and vegetables as they want. Cost, \$1 per week outside of farm products. J. R. Hardee is Snperintendent; salary, \$100 per month. He is a satisfactory officer. Physician is Dr. W. J. McMillan. During six months, died, 2. Attendant for very sick patients. Premises neat and clean. One hundred acres in cultivation. Corn, peas, potatoes and general truck raised. Religious services regularly. One child. Some outdoor relief.

Remarks.—I am glad to report a very favorable condition of affairs at the Home. The Superintendent is a good manager and an experienced farmer and under his management the farm is coming to a higher state of fertility and crops are looking well. He has increased the area of cultivation. Has some fine stock, hogs and poultry.

Received June 3, 1908. A. G. Hankins.

## ONSLOW.

This county has had no County Home until now. A building is in course of construction.

G. H. Simmons.

Received April 2, 1908.

#### PAMLICO.

The Home is located on the courthouse square. Two frame buildings 90 x 24 and 32 x 24. Four rooms for the colored and eleven rooms in the building for whites. Ventilated by windows and doors. Well, Wood stoves. Can accommodate 25. Now in charge, 9. No insane. One epileptic. Good, wholesome food. Cost about \$2 per week. Superintendent is George N. Reed, Bayboro; salary, \$9 per month. He is satisfactory. Physician is Dr. D. A. Dees; paid by the visit. One death. Sick well cared for. Some of the inmates might do light cobbling. Premises in fair condition. Kitchen fair. Two acres; raise only vegetables. Shaded. Inmates go to church in the town. No children. Ontdoor relief to 17 at about \$3 per month. General impression is favorable.

Received September 11, 1908.

## PERSON.

The County Home is two and a half miles from the county seat.

Three frame buildings. Ventilated by windows and doors. No

special fire protection. Well and spring. Open fires. Can accommodate 25. Now in charge, 6. No insane. One epileptic occasionally confined. Ordinary farm fare, as much as an average person needs. Cost from \$1 to \$1.25 per week. Superintendent is Sam Morris, Roxboro; salary, \$20 per month and board of family. He is satisfactory. Dr. W. A. Bradsher is physician, Roxboro. Paid in fees. In charge September 1, 1907, 9. Since admitted, 2. Died 3, 2 from old age and 1 had fits and was burned. Two were able to leave the Home. Sick well cared for; an attendant necessary. The premises in general are reasonably neat and clean and in good condition. Kitchen fairly clean. Three hundred and eight acres of very fertile farm land. Crops are corn, tobacco and vegetables; part sold for use of the Home and part used by inmates. Shaded. No children. One whipped to compel obedience. Ontdoor relief to fifty or sixty at average of \$1.50 per month. General impression is favorable.

Remarks.—The County Home is self-supporting. Some years an excess is made on the farm, N. C. Newbold.

Received July 18, 1908.

#### SECOND REPORT.

The Home is located on a good farm of 308 acres of fine tobacco land and is self-sustaining. There are ten good-size rooms for the use of the inmates. They seem to be kept neat, clean and well ventilated. Five inmates, and two of these can do some work. One negro girl and one white man insane. Ordinary plain diet at a cost of about \$2 per week. Superintendent is S. M. Morris, Roxhoro; salary, \$20 per month and house and board of family. There were 18 inmates March 1, and two since admitted. One old lady has died and 14 have left. Dr. W. A. Bradsher, Roxhoro, is physician; he receives \$2.50 per month for one visit and regular fees in case of sickness. Church near. I think that the Home is about as well kept as any I have ever visited.

Rev. J. A. Hornadax.

Received November 13, 1908.

## PERQUIMANS.

The Home is three miles from the county seat. There are three frame buildings for inmates, one store and barns. Ventilated by windows and doors. Three wells and one pump. Heaters. Can accommodate 15. Now in charge, S. One white man insane. Two epileptics. None confined. Plain ample food. Cost ahout \$2 per week. Superintendent is F. Stallings, Winfall; salary, \$250, farm and store. He is satisfactory. Physician is Dr. S. F. McMullan, Hertford; \$200 per annum. No deaths. Sick well cared for. Five could do light work, basketry and chaircaning. Kitchen good. One

hundred acres, 3 cows and 2 horses. Crops are cotton, corn, potatoes and peanuts. Shaded. Church very near. No children. Outdoor relief to 50 at \$5 per month. General impression is favorable.

Received September 8, 1908.

B. S. LASSITER.

## PITT.

The Home is five miles from the county seat. The buildings are frame. Can accommodate 30. Now in charge, 22. Ventilated by windows and doors. Pump and well. Open fires and stoves. Helpless, 7. Four insane and three of these epileptic. One confined. All they want to eat. Arden Tucker is Superintendent; salary, \$300. Physician is Dr. Joseph E. Nobles, Greenville; salary, \$300. Number in charge September 1, 1907, 20; since admitted, 6; died, 5; discharged 1-had escaped from the State Prison. The sick are well cared for. Premises neat, in good condition and well cared for. Kitchen excellent. One hundred and eighty-seven acres: 25 in cultivation. Two horses, one cow and hogs. Corn, potatoes, peanuts, peas and abundance of garden vegetables raised. Shaded. Provision for religious services, a chapel. No children. Outdoor relief to a number at \$2.50 per month. General impression of the management is favor-J. W. SMITH. able.

Received July 7, 1908.

ROBERT N. NICHOLS.

#### RICHMOND.

The Home is about two and a half miles from the county seat. Eight two-room and one five-room frame dwellings. Ventilated by windows and doors. Two wells. Ladders and buckets for protection against fire. Open fireplaces and plenty of pine wood. Can accommodate 25. Now in charge, 22. No insane; but one white man, two white women and one colored woman weakminded. Two colored epileptics. None confined. All they can eat of good, wholesome food, with variety of vegetables. Superintendent is James W. O'Brien, Rockingham; salary, \$200 per year and board for self and family of five. Physician is Dr. N. C. Hunter, Rockingham; salary, \$200 per year. Admitted during six months, 5; died, 8. Sick well cared for. The four who are able to work are pleasantly employed gardening. The premises are well arranged and neatly kept. The Home is on an elevated site and can be seen for miles. One hundred and thirtytwo acres average land; 60 in cultivation. One horse, one mule, two cows. Wheat, oats, corn, peas, potatoes and vegetables used for the Home. Shaded. Orchards. The Methodist, Baptist and Presbyterian preachers average monthly preaching on Sunday afternoon. No

children. Average of \$1 per month to 100 in their own homes. General impression of the management is favorable and the occupants seem contented.

J. S. Ledbetter,

Received January 2, 1909.

R. A. Johnson.

#### ROBESON.

The Home consists of four frame houses for the immates, two rooms each, with three windows and a door. Pump. Open fires. Now in charge, 10. Two blind, two insane, 1 idiot, one epileptic. Good food. Dr. H. T. Pope, Lumberton, is the physician. Eight or ten acres in cultivation. Crops are oats, corn and potatoes. Other items previously reported.

J. P. MCNELL.

Received April 24, 1908.

#### SECOND REPORT.

The Home is unchanged. Now in charge, 9. Insane, one white and one Indian. Idiotic, one black. One epileptic. Superintendent is W. G. Reynolds, Lumberton; he receives \$7.50 per month for each inmate. No deaths.

J. P. McNell.

Received October 17, 1908.

## ROCKINGHAM.

The buildings, etc., of the Home as previously reported. Now in charge, 38. Two insane white women. Average weekly cost of maintenance, \$7. Superintendent receives \$25 per month and board of family. He is a satisfactory officer. Dr. Samuel Ellington is the physician; salary, \$100 per annum. Number in charge September 1, 38; admitted to March 1, 6. Died, 2. Some of the immates come and go, spending the winter in the Home and leaving in the spring. Sick inmates have special attention and are well cared for. About ten to fifteen help on the farm and garden. The women like to kuit. The location of the Home is fine. Kitchen clean, but premises are not well arranged. Three hundred acres of fair farm land; 75 in cultivation. Crops are corn and wheat, used for the Home. No provision for religions services. No children. Ontdoor relief to twelve or fifteen at an average of \$3 per month. General impression of the management is favorable.

Remarks.—We need a new County Home all in one building; at present the buildings are small and scattered over two acres of ground and difficult to heat in winter. The Superintendent is a good man who does all in his power for the comfort of the immates.

IRA R. HUMPHREYS, WILLIAM CUMMINGS.

Received March 4, 1908.

#### SECOND REPORT.

The Home is unchanged. One idiot. Admitted during six months, 7; died, 5. Sick well cared for. Other items as reported.

Received September 4, 1908.

IRA HUMPHREYS.

# ROWAN.

The Home is as heretofore reported as to buildings, etc. Now in charge, 7 white and 3 colored. No insane or epileptics. Sufficient amount of food. Mrs. Patterson is the Superintendent. She is satisfactory. The physician is Dr. I. H. Foust. Admitted during six months, 7. Discharged, 6. Died, 1. Sick well cared for, Premises and kitchen in good condition and repair. No provision for religious services. No children, Some outdoor relief. General impression of the management is favorable.

Rev. F. J. Murdocch.

Received May 15, 1908.

#### RUTHERFORD.

The Home is as heretofore reported as to buildings. Now in charge, 36. Four insane and confined. Two epileptics, Good food and plenty of it. Superintendent is Henry Jones, Rutherfordton; salary, \$500 per annum. Physician is Dr. E. B. Harris; \$2 per visit. Died, 2, during six months. The sick are well cared for. Kitchen in good condition. Shaded. Religious services, Several small children. No ontdoor relief. General impression of the management is favorable. Other items previously reported.

E. B. Harris, M. D.,

T. B. TWITTY, M. D.

Received June 8, 1908.

## SECOND REPORT.

The Home is unchanged. Now in charge, 37. Helpless, 6. Insane, 5. None confined. Two epileptics. Food good. Superintendent is satisfactory. Died, 2. Five children. No outdoor relief. General impression is favorable.

E. B. Harris, M. D.,

Received October 3, 1908,

T. B. TWITTY, M. D.

## SAMPSON.

The Home is unchanged since the last report.

Mrs. T. L. Hubbard,

Received March 12, 1908.

REV. T. M. LEE.

## STANLY.

The Home is as heretofore reported as to haildings. Now in charge, 12. One helpless. Four idiots. One epileptic. All they want of good, substantial food. Superintendent is W. J. Underwood, Albemarle; receives \$20 per month and board of family. He is satisfactory. Physician is Dr. J. N. Anderson; pay \$1.50 per visit. Three deaths from pneumonia during six months. Sick are cared for by the family of the keeper. Premises neat; buildings comparatively new and fairly well ventilated. Crops are corn, wheat, oats, rye and garden vegetables. Regular religious services. No children. Outdoor relief to 40 at \$2.50 per capita per month. General impression is favorable.

Remarks.—We think that our Home will compare favorably with others in the State. We hope to see it in better shape and nearer self-sustaining. A chapel is soon to be hullt on the premises and the ministers of the various denominations will hold regular services.

Received May 1, 1908.

S. H. MILTON.

#### STOKES.

The Home is as heretofore reported as to buildings. Now in charge, 16. Three weakminded, two white women and one colored male. Confined, 1. Epileptic, 1. Inmates are not allowanced as to food, but have as much as they want of meat, bread, vegetables and some milk and butter and coffee. The Superintendent receives \$5 per month for each inmate. He has the use of the farm and pays the county \$100 per year. Superintendent is W. R. Stephens, Meadows. He is satisfactory. Physician is Dr. J. Walter Neal, Meadows; salary, \$100 for jail and Home. Number in charge September 1, 17. Since admitted, 5. Died, 3. Discharged, 4. None able to work, except two, who can assist some. Kitchen in very good condition. One child, whose mother was burnt and she sent her child to the Home. General impression of the management is favorable. Other items as previously reported.

Remarks.—I talked with the inmates of the Home for some time and they all told me that they were satisfied with their treatment. That the keeper and his wife are very kind to them, always treated them well and that they had no complaint to make.

Received March 16, 1908.

N. O. Petree.

## TRANSYLVANIA.

The Home is in a fine location, two miles from the county seat. Two frame buildings 14 x 24 feet; two rooms in each with a door and two windows to each room. Spring, Open fires. No special fire protection. Can accommodate 8. Now in charge, 5; three of whom are feebleminded, one a boy fourteen years old. Plain food in sufficient quantity. Keeper is William P. McGaha; salary, 86 per capita per month and the use of the farm. He is considered satisfactory. Physician is Dr. Goode Cheatham; salary, 850. Admitted during six months, 2; died, 1. The buildings have received a new coat of whitewash inside and out and are in fairly good condition. The keeper's house, just above them, is new. No Home kitchen; the room occupied by the old couple and the feebleminded boy is used also for cooking. Twenty acres, 12 under cultivation. Two horses, cow and oxen. Vegetables and grain raised and used for the Home. Very slightly shaded; might be improved in this respect. Occasional religious services. Outdoor relief to 20 at \$3,50 per month. So far as we could judge, the general impression of the management is favorable.

Remarks.—We visited the County Home, inspected the houses and saw all the inmates. The houses have lately been whitewashed inside and out and look neat,

REV. CHALMERS D. CHAPMAN,

REV. ROBERT G. TUTTLE.

Received April 15, 1908.

## TYRRELL.

The buildings are now undergoing repairs and everything about the Home and little farm is neat and clean. The kitchen has been thoroughly repaired with decided improvement. In charge, two; one white girl has epileptic fits and her mind is impaired. The two inmates are fed from the keeper's table. Cost, \$2.50 per week. Superintendent is W. H. Gurkin, Columbia; receives \$2.50 per week for each inmate and the use of the farm. He is satisfactory. Physician is Dr. J. L. Spruill; \$1 per visit. Well cared for when sick. Truck, corn, melons and vegetables raised for the use of the keeper. Not much shade. No children. No religious services. Outdoor relief to 9 at \$2.50 per month.

Remarks.—Under the management of our efficient board of county commissioners much needed repairs are now being made to the Home. I visited the Home yesterday and was favorably impressed with the work, which is now nearing completion.

J. C. Meekins, Sr.

Received March 7, 1908.

#### VANCE.

The Home is as heretofore reported as to buildings. Now in charge, 13. Three insane. None confined or epileptic. Superintendent is

satisfactory. Physician is Dr. J. H. Tneker, Heuderson. Admitted, 2; discharged, 1. No deaths. No children. Other items as heretofore reported. General impression is favorable.

Received March 30, 1908.

DR. F. R. HARRIS.

## WAKE.

The Home is unchanged as to buildings. Can accommodate 90 to 100. Now in charge, 83. Helpless, 7. Insane, 11 whites and 21 colored. Confined, 2. Epileptics, 8. Pienty of good food, with variety in diet. Superintendent is a satisfactory officer. County physician is Dr. J. W. McGee, Jr., Raleigh. Admitted in six months, 18. Died, 16. Discharged, 2. Teu are ahle to assist in the farm work. Buildings and grounds in good condition. Kitchen good. Six hundred and ninety-nine acres; 150 in cultivation. Corn, cotton, oats, potatoes and vegetables in abundance. Shaded. Regular religious services in the chapel. One child three years old. Some outdoor relief to 126 at a cost of \$1 per month each. General impression is favorable.

Received October 8, 1908.

I. C. BLAIR, Chairman; JOHN A. MILLS.

## WARREN.

The buildings at the Home are unchanged since the last report. Now in charge, 20. Two insane, but not confined. A sufficient amount of food at a cost of \$2 per week. Superintendent is J. S. Davis, Warrenton; pay \$7 per month for each inmate and use of the farm. He is a satisfactory officer. Physician is Dr. M. P. Perry; salary, \$20 per month. Admitted in six months, 7. Died, 5; one of consumption. Sick well cared for. Premises in good condition. Kitchen good. No children. Outdoor relief to 60 at a cost of \$1.47 per month. General impression is favorable.

P. H. ALLEN, Chairman;

R. A. BOYD,

Received March 28, 1908.

I. A. HUDGINS.

## WASHINGTON.

The County Home is in its usual good condition. Now in charge, 2 colored males. For its size it is the best in Eastern Carolina. Received May 27, 1908. W. F. Beasley.

## WAYNE.

There has been no chauge in the Home since the last report.

Received March 20, 1908.

M. L., Lee.

## WILKES.

The Home is ou a farm two miles from the county seat. Six or seven log houses, 12 x 14 feet each and oue frame building, all poorly ventilated. Two to four rooms to each building. No protection against fire. Well. Open fires. Ten to fifteen can be comfortably accommodated. Now in charge, 17. Able to do light work, 2. Helpless, 8. Four whites iusane: three confined. Four epileptics. Three regular meals of good, wholesome food, well prepared. Superintendent is Rev. J. N. Brooks, North Wilkesboro; receives 14 cents per day each and use of the farm. He is a satisfactory officer. Physiciau is Dr. John Q. Myers; salary, \$37.50 per year. Number in charge September 1, 12; since admitted, 5. No deaths. Sick are well cared for by the Superiutendeut and family. The premises and buildings dilapidated aud old-time looking. Kitchen good. Oue hundred acres of poor and not very productive land. No stock and not much cultivated. Crops are coru and vegetables used for the inmates. Shaded. Religious services every fifth Sunday. No childreu. No outdoor relief. General impression of the management favorable. Needs new buildings aud improvement of the farm. John Q. Myers, M. D.

Received March 21, 1908.

## YANCEY.

The Home is ou Jack's Creek, six miles from the county seat. One frame building, 40 x 20, one story, and kitcheu, 20 x 16; four rooms, besides kitcheu. No protection against fire. Spring. Open fires. None can be kept as they should be; five now in charge. The keeper and family live in the same building and nurse the poor when sick. Of the five, one is a white insane woman, and there are two children, a clubfoot girl and a boy, illegitimate. Superintendent is William Rolaud, Willhite; paid \$6.25 per month for each; he is satisfactory. No county physician at present; physician paid by the visit. The building is dilapidated and on a very poor farm of 25 acres. Not a good garden on the land; not shaded. No religious services. Outdoor relief to ten or twelve, at \$3 per mouth.

Remarks.—The Home is a disgrace to our county. I earnestly hope that we may soon be better prepared to care for our unfortunates. It is as well kept, I judge, as the meager remuneration will allow.

Received July 8, 1908.

W. B. Robertson, M. D.

# COUNTY PRISONS.

## ALAMANCE.

The prison is as heretofore reported. Free of vermin. Religious services but seldom. Now in charge, 6 colored males. During six months, 25 colored and 11 white; total, 36. No deaths.

J. M. HOLT,

Received March 11, 1908.

J. A. TURRENTINE, P. H. FLEMING.

## SECOND REPORT.

The prison is as heretofore reported as to buildings. Now confined, 18; 7 white, 11 colored. No deaths. General impression is favorable.

REV. J. M. HOLT,

J. A. TURRENTINE,

Received September 28, 1908.

P. H. FLEMING.

## ANSON.

The prison is built of wood and brick and is not fireproof. It is  $40 \times 66$  feet. City water. Cage is  $30 \times 18$ , and now holds 11 prisoners. Windows barred and has fly screens. Well ventilated. Stove. Sufficient bedding. Sexes separated. Water in the cells. Plenty of substantial food. Sewerage. No provision for bathing. Cage has vermin. No religious services. Now confined, 11 negro males, 3 white males; one insane and awaiting room at the hospital. One prisoner died in the last six months from gunshot wounds.

Remarks.—The jail, with a little care, could be kept more cleanly. Received September 2, 1908. Dr. J. M. BOYETTE.

#### BEAUFORT.

The prison is unchanged as to building. It is in fine condition—clean cots, new clothes and whitewash in plenty, but everything badly overcrowded. Forty-two prisoners, two of whom are women. One of the women is insane.

DR. J. M. GALLAGHER.

Received June 4, 1908.

## BLADEN.

The prison is built of brick. Fireproof. Force pump. Building is x 35 feet, two stories and six cells. Windows on weights. Special putilation. Furnace. Sufficient amount of bedding and no suffering rom cold. Sexes separated. Drinking-water twice daily. Plenty of lood. Coffee. Buckets for bathing. Pipe. Free of vermin. Occisional religious services. Now confined, 7 colored males. No eaths. Some religious books and reading matter. General impresson is favorable.

Mrs. William Whittee,

Received September 28, 1908.

MRS, JOHN McDowell,

## BUNCOMBE.

The new prison is built of brick, iron and concrete. It is fireproof, igh pressure water system. Five stories. Rooms vary in size; no didence of crowding. One sash to the windows opens. Steam heated, attress and two quilts or blankets. Second floor for females. Water I the time. As much food as desired. There are concrete floors and walls with plenty of water for cleanliness. Bath tubs. Closet every cell. Free of vermin. Salvation Army has regular services, ow confined, 7 white males, 1 white female, 6 colored males and colored females; total, 16. No death in jail in three years. Testaents. General impression is very favorable.

Received August 21, 1908.

M. L. STEVENS, M. D.

## BRUNSWICK.

The jail is built of brick. It is fireproof. Two stories. No sufring from cold. Sufficient bedding. Sexes separated. Plenty of esh water. Cleansed by hose. Basins in cells. Free of vermin. casional religious services. Now confined, 1 white male. Died, paralysis. General impression is favorable.

Remarks.—All prisoners are well cared for and the jail is a very od one.

J. Arthur Dosher, M. D.

Received May 15, 1908.

#### BURKE.

There has been no change in the jail building. Sexes separated, cesh water three times daily. No warm drink. Required to wash, cée of vermin. No religious services. Now confined, 3 colored and white males. No deaths. General impression of the management favorable.

Remarks.—The same old jail, but hope to report a new one next fall that this one has been remodeled. ROBERT T. CLAYWELL. Received March 26, 1908.

#### CABARRIIS

The prison is built of brick. City water and fire department. It is 50 x 50 feet, two stories and six cells. Generally two prisoners to a cell. Ventilated by windows, barred. Steam heat. No suffering from cold. Sexes separated. Drinking-water three times daily. Two meals per day. No coffee. Water and lime used for cleanliness of jail. Sewerage. No vermiu, Religions services every third Sunday. Now confined, 4 colored males, 1 white male and 1 white female. The two latter serving sentence, others awaiting trial. Confined during six months, 70; white males, 25; colored males, 41; white females, 2; colored females, 2. No deaths. General impression is favorable,

Remarks.—Prisoners seem to be contented and cared for as well as circumstances will permit. JOHN M. HENDRIN.

Received June 15, 1908.

G. Ed. Kestler.

## CALDWELL.

The prison is built of brick and steel and is fireproof. Tank of water. Built on modern plans. Two stories and eight cells. Ventilated by windows. Stoves. Sufficient amount of bedding. separated. Drinking-water as required. Food not limited, coffee. Painting and disinfectants to preserve cleanliness. Bath tub; not required to bathe. Sewerage. Free of vermin. Occasional religious services. Now confined, 2 white males awaiting trial. No deaths. Never overcrowded. General impression is favorable.

> J. W. CURTIS. Dr. C. L. WILSON.

Received June 29, 1908.

SECOND REPORT.

Prison as previously reported. None now confined. Impression is C. L. WILSON, M. D. favorable.

Received September 28, 1908.

## CAMDEN.

The prison building is as heretofore reported. No prisoners in our jail.

Remarks.-I think that Camden is an exception to the rule, or rather what is generally seen in the various prisons. With rare exception do we burden the jailer with the care of prisoners more than three months duty in the year. The door of the county prison stands ajar most of the time. No intoxicating liquors sold here for sometime and the prospects are that it will be quite a time before any will GEO. H. RIGGS. be legally sold.

Received May 1, 1908.

#### SECOND REPORT.

The county prison is at present unoccupied. No change since the 1st report. We simply need a prison as a scarecrow to evildoers.

Received October 9, 1908.

Geo. H. Riccis.

GEO. II. IX

## CARTERET.

The prison is built of brick. Fireproof. City fire department near, t is 60 x 16 feet, with four rooms 14 x 16 feet. From one to four risoners to a cell. Windows barred. Ventilated otherwise than by indows. Stoves. No suffering in cold weather, sufficient amount of edding. Sexes separated. Drinking-water three times a day. Good leals and warm coffee when desired. Tubs are provided and prisoness are required to take a full bath once a week. Rooms scoured and me used. Excreta carted away. Free of vermin. No punishment, to intoxicating liquors. No religious service regularly. Only one olored male now confined. No deaths during the six months. General impression is favorable.

Mrs. W. H. Hendricks.

Received March 4, 1908.

#### SECOND REPORT.

The prison is as heretofore reported. Now confined, 2 colored cales. No deaths. Occasional religious services.

Remarks.—New bedding is to be purchased for the next prisoners. Those now confined will soon be out. The Charity and Help

Department of the Epworth Leagne of the Methodist Church is assisting us in the work.

Mrs. W. H. Hendricks.

Received September 12, 1908.

Mrs. H. H. Willis.

## CASWELL.

The prison is built of brick and concrete. Fireproof. Waterworks a the building. Two stories, six cells. Ventilated by windows and therwise. Stoves. No suffering from cold. East end for females, rest end for males. Fresh drinking-water twice a day. Coffee and three good meals. The jail is cleansed by means of hose attached to the pump. Bath basin. Required to wash. Sewerage, tree of vermin. No religious services. Confined, 3 colored males waiting trial. None confined for sentences. No deaths. General impression of management is favorable.

Received March 7, 1908.

S. A. MALLOY, M. D.

#### SECOND REPORT.

The prison is built of brick and cement. Waterworks. Ventilated by windows and doors. Stoves. Sewerage. Drinking-water as desired. Sufficient food. Free of vermin. No religious services. No deaths. Now confined, 2. General impression is favorable.

Received September 4, 1908.

S. A. MALLOY, M. D.

## CATAWBA.

The prison is built of brick, about 20 x 40 feet and two stories. There is a tank and pump and will soon have waterworks. Windows barred. Sexes separated. Sewerage. Occasional religious services. No deaths.

Remarks.—I think that our jailer is a very good man, and he looks after the prisoners all right.

REV. M. A. ABERNETHY.

Received September 21, 1908.

## CHATHAM.

The prison is unchanged as to building. Sufficient amount of bedding. Sexes separate. Ample supply of plain food, coffee. Provision for bathing. Lime and water used for cleansing the jail. Excreta carried out and buried; line used freely. No vermin. No religious services. Now confined, 2 black males; during six months, 3. No deaths. General impression is favorable.

Remarks.—Would recommend that sewer pipes be placed from the jail to the creek, 200 yards off, which would improve the sanitary condition of the jail very much.

G. R. PILKINGTON,

Received April 24, 1908.

MRS. HENRY A. LONDON.

## SECOND REPORT.

The prison is as last reported. Now confined, 5 colored males and 2 white; total, 7. General impression is fair.

Received September 30, 1908.

MRS. H. A. LONDON.

## CHEROKEE.

The jail is built of brick. Well with a pump. One story with three cells. Windows barred. Ventilated by windows. States. Some suffering in cold weather. None now confined.

Received October 8, 1908.

MRS. R. H. HYATT.

#### CHOWAN.

The prison is as heretofore reported as to buildings. Waterworks. Free of vermin. No religious services. Now confined, 19 colored males, 2 colored females. During six months 27, five of these white. One colored male died of pneumonia. General impression of the management is favorable.

REV. ROBERT B. DRANE.

Received March 28, 1908.

#### SECOND REPORT.

No change in the building. Now coufined, 3 colored males, 1 colored female. Confined during six months 22, colored. General impression is favorable.

Remarks.—Prohibition in Edenton has much relieved the county jail.

REV. ROBERT B. DRANE, D. D.

Received December 26, 1908.

## CLAY.

The jail is a log building of two rooms. Shutters to the windows. Heated by stoves. Not comfortable in cold weather. Only one room used for prisoners. Driuking-water as needed. Plenty of food and coffee. No provision for bathing. No special means for cleansing the jail. Bad arrangement for removal of excreta. No prisoners at present. Two white Federal prisoners recently released. No deaths. As to the jailer's part impression of management is favorable. No improvements have been made in the building.

L. F. Shufferd.

Received May 15, 1908.

#### CLEVELAND.

The prison is built of brick and steel and is considered fireproof. Tank of water. Building is 20 x 60 fect. Two stories, six cells. Windows barred, Steam heated. All the bedding necessary. Sexes separated. Drinking-water as needed. Sufficient amount of food. No warm drink. Free of vermin, Disinfectants used. Sewerage, Occasional religious services. General impression of the management is favorable. Now confined, 11 colored males, 1 white male; 1 colored female. No deaths.

Remarks.—The county prison is in good hands and the prisoners are well kept.

S. C. Hendricks,

Received September 10, 1908.

#### DARE.

The jail building is inferior. Needs much improvement, Seldom or never have any prisoners confined therein. Management fair. All the fresh water and food desired. Stove and sufficient bedding.

Remarks.—The jail is not fit to confine men in.
Received March 17, 1908.

CHARLES L. MANN.

#### SECOND REPORT.

The jail building is as heretofore reported. It is not safe and a few days ago the sheriff took prisoners to Pasquotank jail for safe-keeping. Two made their escape last week. Surely needs repairs.

Received September 16, 1908.

Charles L. Mann.

#### DAVIDSON.

The jail is as heretofore reported. Drinking-water as wanted and required to bathe. No punishment. Now confined, 1 insane pauper. During six months, 47. No deaths.

James Smith.

Received April 13, 1908.

#### SECOND REPORT.

The jail is being remodeled and eularged. No prisoners now confined.

James Smith.

Received October 19, 1908.

#### DAVIE.

The jail is unchanged since the last report. No prisoners now in charge.

Remarks.—We need a new prison badly; I think I could break out of this one, myself.

Mrs. A. M. Nail.

Received April 13, 1908.

#### DUPLIN.

The new jail building is built of brick with steel cells and is fireproof; 24 x 36 feet, two stories; nine rooms, with corridors. Three steel cells 5 x 8; two cells 8 x 8 and four rooms 10 x 10 feet. Wiudows screened with wire. No veutilation except windows and doors. Coal stove. Sufficient amount of bedding for comfort. We have not had a woman since the jail was remodeled, but ample arrangement for the separation of the sexes. Drinking-water several times a day. Waterworks. Prisoners wash at will. Sufficient amount of food and warm drink to the old or sick. Sewerage. Have had some vermin, but cells were fumigated and cleansed. Religious services at intervals. Now confined, 4 colored males; 1 white male insane epileptic has been in jail two years. Coufined during six months, 6 colored males and 1 white. No deaths. A. P. FARRIOR.

Received June 24, 1908.

SECOND REPORT.

Nothing new to report in regard to the jail. No deaths. None now confined. A. P. FARRIOR.

Received September 26, 1908.

## EDGECOMBE.

The prison is as heretofore reported, Brick, one story, four cells. Ventilated by windows only. Stoves. No suffering from the cold. Sufficient bedding. Sexes separated. Waterworks in the cells. Meat and bread aud vegetables, with coffee in the morning. Every possible means used to preserve the cleauliness of the jail. Sewerage. No vermin. No religious services. Now confined, 3 males, serving sentences of three, four aud six months, and 3 awaiting trial. During six months were confined 85. No deaths. Jas. R. Gaskill.

Received March 23, 1908.

## FORSYTH.

The jail is built of brick 30 x 50 feet. A new concrete annex the same size is to be built at ouce. City fire departments and hydrauts on three sides. Three stories and five cells in the present building; new building will have 24. Windows and doors. Steam heat. No suffering from cold. Sleep in hammocks and have two to four blankets. Women have beds. Sexes separated. Drinking-water all the time. Food good; two meals; no coffee or warm drink. Sconred and disinfected. Bathtubs in each room and required to bathe, Sewerage. Free of vermin. Religious services every Thursday and occasionally on Sunday. Now confined, 20; 1 white male and 3 females serving sentence. Four from the convict camp sick or unable to work, the remaining awaiting trial. Average number confined, about 30. They are changing all the time. Four-fifths of the prisoners are colored. Two deaths—one blood poison and one from heart failure. No Federal prisoner. General impression of the management is quite favorable. REV. E. S. CROSLAND,

W. P. HILL,

Received June 20, 1908.

H. W. FOLTZ.

#### SECOND REPORT.

The new annex to the jail is built of concrete and is fireproof. It is  $23 \times 60$  feet. Three stories and basement with 32 cells. Four can be placed in the new cells. Ventilators in the roof and walls of the annex. Steam heated. Bathtub in each department. Required to bathe once a week. Free of vermin, but hard to keep it so. Now confined, 1 white male, 16 colored males, 6 colored females; total, 23. Other items as reported.

Remarks.—The jailer would like to have half a dozen cheap snits so he can have new prisoners cleansed before admission to cells.

REV. E. S. CROSLAND, W. P. HILL, H. W. FOLTZ.

Received December 16, 1908.

## GASTON.

The prison is built of brick and concrete. Well on the premises. Building is 40 x 50 feet, two stories. Seven rooms. Sashes of windows on hinges and open when the weather permits. Windowsbarred. Sufficient bedding. No suffering from cold. Sexes separated. Drinking-water several times daily. All they want to eat. Coffee or tea. Tubs and basins, required to bathe. Disinfectants and sconring. Sewerage. Religions services. Now confined, 2 white males, 2 black males. No deaths. Impression of management is very favorable.

Remarks.—Commissioners require county physician to submit monthly written reports of convict camps, jail and Home, covering general conditions of each; treatment of immates, food served, sanitation, stock, etc. These reports have served to keep up very closely with the above-named places and have been of great benefit.

Received September 26, 1908.

J. P. REID.

## GATES.

The prison is as heretofore reported as to building. Fresh drinking-water twice a day and two good meals. Water and basins for bathing; prisoners required to wash. The jail is swept and scoured. Excreta removed in buckets. Free of vermin. No intoxicating liquors allowed. No religious services. One white male and 4 colored. Confined during six months, 1 white and 6 colored. No deaths. General impression is favorable.

Received March 6, 1908.

MARTIN KELLOGG.

#### GRANVILLE.

The jail is built of brick. Cement floors. Fireproof. Protected from fire by waterworks and fire department. The building is 30 x 60 feet, two stories; 5 cells 8 x 10; 4 to 6 to a cell. Ventilated otherwise than by windows. Stove. No suffering from cold. One mattress and several blankets to each prisoner. Sexes separated. Drinking-water all the time. Two meals a day. The jail is disinfected. Free of vermin. Sufficient arrangements for bathing, and prisoners are required to wash. Sewerage. No religious services. Now confined, 2 white and 1 colored male. During six months, 28 colored and 2 whites. No deaths. General impression of the management is favorable.

D. N. HUNT.

Received March 6, 1908.

#### SECOND REPORT.

The jail is as heretofore reported as to buildings. No religions services, but will try to look after this matter. Now confined, 2 colored males. No deaths. Other items as previously reported.

Remarks.—I have visited and inspected our county jail. It is in good condition and well kept. The prisoners say that they have plenty to eat. The jailer is a clever, sober man and attentive to his business.

D. N. HUNT.

Received September 23, 1908.

#### GREENE.

The prison is unchanged as to buildings. No religious services. Confined from September 1, 1907, to August 1, 1908, 10. Of these one colored male insane. No deaths. General impression is favorable.

Remarks.—All prisoners, so far as I can learn, have been kindly treated and properly cared for.

L. V. Morrill.

Received Angust 4, 1908.

#### HARNETT.

The prison is brick and cement. It is fireproof. A reservoir is in the upper story. Size of building is  $40 \times 50$  feet. Two stories, twelve cells. Barred windows with wire screens. Ventilated by windows. Furnace. No suffering from cold. Sufficient bedding. Sexes separated. The tank is filled with water daily. Prisoners are fed from jailer's table. Waterworks. Sewerage. Free of vermin. Scrubbed and cleansed. No religious services. Now confined, 1

colored male for ninety days; 5 colored males awaiting trial. During six months were confined 3 white insane males and 12 colored males; total, 15. General impression is favorable. No deaths,

Remarks.—Our jail is a new brick building with steel cells, doors, etc. Prisoners have use of a large room during the day. Each cell has a window 5 x 2½ feet in the end and is well ventilated. The jail is connected with the courtroom by a closed bridge to prevent escape of prisoners.

DR. J. H. WITHERS.

C. McArtan, H. T. Faucette.

Received August 14, 1908.

# HAYWOOD.

The prison is as heretofore reported. Regular religions services. Now confined, 7—1 black and 1 white for burglary, and 5 white males insane.

Remarks.—The county physician and I have interviewed the county commissioners in regard to the removal of the insane from the jall to some place or building where they may have more sunshine and more pleasant environments.

Mrs. M. J. Branner.

Received May 1, 1908.

## SECOND REPORT.

The prison is two stories and has eleven rooms and cells. Windows can be raised or lowered from the top. Seven windows in the main room, with iron gratings. Bath rooms. Disinfectants freely used. Sewerage. All the food they need.

Remarks.—When this report was made out there was not a single prisoner in the jail—the first time that this has been the case in making my reports.

MRS. M. J. BRANNER.

Received November 11, 1908.

#### HENDERSON.

The prison is as heretofore reported as to buildings. It is kept as clean as possible. No deaths. None now confined.

Remarks.—It gives me great pleasure to report that there are no prisoners in our jail at present. At the last criminal court the indee complimented the county on the small number of cases on the docket.

Mrs. Lila Ripley Barkwell.

Received March 19, 1908.

#### SECOND REPORT.

The prison is as heretofore reported. It is steam heated. No suffering from cold. Sufficient bedding. Sexes separated. Water

all the time. Abundant amount of food. Coffee for breakfast. Tubs. Required to bathe. The prison is kept as clean as possible. Now confined: 4 white males, 1 white female, 6 colored males, 2 colored females; total, 15. No deaths.

- Remarks.—The reason there are so many in jail is that it is just before court. Most of them are confined for minor offenses.

Received September 16, 1908.

Mrs. Lila R. Barnwell.

#### HERTFORD.

The jail is built of brick and cement and is fireproof. Well and pump. The building is 32 x 32 feet and one story high. Three cells and one room. Room is nsed for females, but seldom have female prisoners. Ventilation from top and by window. Wire screens at the windows. Furnace. No suffering from cold. Sufficient bedding. Fresh water twice daily. Sufficient amount of food. The prison is scoured and disinfected. Sewerage. Bowls for bathing. Free of vermin. Seldom any religions services. No deaths. None now confined. General impression is favorable. W. P. Shaw,

JOHN A. NORTHCOTT, JOHN E. VANN.

Received August 27, 1908.

## IREDELL.

. The prison is as heretofore reported. It is not fireproof, but there is a system of waterworks and the city fire department. Sufficient amount of bedding. Fresh water as needed. Two meals, with eoffee. Scrnbbing and disinfectants used to cleanse the building. Required to bathe. Sewerage. No vermin. Occasional religious services. Confined: S colored males and 4 whites. No deaths. General impression is favorable.

Mrs. A. L. Coble.

Received May 13, 1908.

## JACKSON.

The building is brick and is fireproof. Waterworks. The jail is two stories high,  $24 \times 26$  feet and 8 cells. Ventilated otherwise than by window. Stove. No suffering from cold; sufficient bedding. Sexes separated. Drinking-water in the jail. Good food and coof fee. Bathtub, and required to bathe. No vermin. Sewerage. No religious services. Now eonfined, 6 white males. No deaths. General impression is favorable.

Received April 28, 1908.

## JONES ..

The prison is brick and cement with steel cells; fireproof; 27 x 35 feet. Three cells and one room. Windows barred. Stoves. Three blankets and a mattress to each prisoner. Sexes separated. Drinking-water twice a day. Meat and meal. Jail is scoured. Basins. Not required to wash. Free of vermin. None now confined. One hanged. General impression is favorable.

Remarks.—The jail is a very nice brick building with cement floors.

No one has been confined in jail since last term of court.

Received September 8, 1908.

JULIAN K. WARREN.

## JOHNSTON.

The prison is built of brick. Two stories. Six cells, \$x 10 feet. Ventilated by windows. Stove. As much bedding as desired. Sexes separated. Fresh drinking-water as needed. Disinfectants. Excreta removed in buckets. Free of vermin. Religious services frequently. No deaths.

Remarks.—The jail is well kept. The prisoners are furnished comfortable bedding, plenty of plain food, and the sanitary conditions are looked after.

Mrs. W. S. Stevens.

Received November 13, 1908.

## LENOIR.

The prison is built of brick. Supposed to be fire-proof. Fire department near. Building is  $40 \times 50$  feet; 2 stories, 7 cells. Windows not obstructed. Ventilated by windows and otherwise. Steam heat. Separate apartments for the sexes and for juvenile prisoners. Waterworks in every room. Sewerage. Two meals a day; all they will eat. Coffee to the feeble. Two bathtubs, one for each sex. Required to bathe. No religious services. No deaths. It is a modern jail. The impression of the management is pleasantly favorable. Now confined; 2 white and 11 colored males.

Remarks.—A committee of two inspected the jail this morning and were favorably impressed with what was seen and the courtesy extended by the deputy sheriff.

REV. JOHN H. GRIFFITH.

Received September 18, 1908.

## LINCOLN.

The prison is as heretofore reported as to building, etc. No suffering from cold. Sexes in separate rooms. Fresh drinking-water three

or four times a day. Good food. Coffee twice a day. The building is whitewashed several times a year. Towel baths, Excreta removed in bnckets. Free of vermin, Occasional religious services. Now confined: 1 white and 1 colored male. During six months, 16—white, 8; black, 8. No deaths. General impression of the management favorable.

Remarks.-Glad to see a nice record kept by the jailer. Management fairly good. The jail is not safe, but the jailer seems to keep all in good order. REV. R. Z. JOHNSTON, Chairman;

> D. T. JOHNSON. MISS KATE SHIPP.

Received March 6, 1908.

MRS. R. S. REINHARDT,

## MACON.

The prison is as heretofore reported. Now confined, 1 colored male, No vermin. No deaths. Not overcrowded. Confined during six months, 26—one of these a white insane woman. General impression of the management is good. REV. J. A. DEAL,

MISS JULIA McDowell. MRS. L. M. RANKIN. R. F. JARRETT.

Received April 9, 1908.

SECOND REPORT.

The prison is unchanged. Some fleas in evidence; spraying with disinfectants. No religious services. Now confined: 1 white and 1 colored male. No deaths. General impression is favorable.

REV. J. A. DEAL,

Received September 12, 1908.

Mrs. J. C. Wright.

## MARTIN.

The jail is built of brick and is fireproof. Two stories, 8 cells. Three prisoners can be easily placed in each cell. Windows can be closed. Ventilated by windows and otherwise. Stoves. Qnilts, matresses and blankets. Sexes separated. Drinking-water three or four imes daily. Amount of food allowed by law. Coffee. Kept clean by scrubbing and sweeping. Provision for bathing. Free of vermin. Occasional religious services. None now confined. General impression is favorable. WILLIAM E. WARREN, M. D.

Received September 8, 1908.

#### MECKLENBURG.

The prison is unchanged as to building since the last report. Now confined: 2 white males, 14 negro males and 4 negro females; total, 20. All city water needed, but prisoners are not required to bathe. Sewerage. The prison is not free of vermin, and the means used for the cleansing of the jail are inadequate. No intoxicating liquors allowed. Religions services on Sundays. Corn bread and pork. No warm drink and no vegetables. Number in charge during six months: 74 white males, 12 white females; total white, 86; 300 colored males, 43 colored females; total black, 343; grand total, 429.

Remarks.—The furnace does not supply sufficient heat between 2 and 5 A. M. to keep the prisoners comfortable. The supply of blankets for the negroes is inadequate—only twenty-four much need blankets for forty men. The food is not what it ought to be; plentiful, but poorly prepared and monotonous; weeks and months pass and no vegetable is served.

REV. Francis M. Osborne.

Received March 19, 1908.

#### MONTGOMERY.

The prison is as heretofore reported. Four negro men awaiting trial. R. T. POOLE.

Received September 8, 1908.

## MOORE.

The prison is as heretofore reported. Sexes separated. No suffering from cold. Fresh water three times daily. All the food they want. Bathtnbs. Free of vermin. No religious services. Now confined, 14 colored males. During six months, 71. No deaths. General impression is favorable.

Received March 26, 1908.

#### SECOND REPORT.

The prison is as previously reported. Now confined, 1 white male, insane.

Received September 19, 1908.

## NEW HANOVER.

The prison is unchanged since the autumn report. Hot and cold shower baths, and prisoners are required to bathe. Free of vermin. Religious services. Now confined: 9 white males, 42 colored males,

4 colored females; total, 55—8 of these for murder and others for different offenses. All awaiting court; some have been confined since September 26, 1907. Besides the 55 now in jail, 30 males have been sent to the convict camp and 2 women to the County Home—all colored but 1 male; these prisoners awaiting trial, but sent to the camp because of the crowded condition of the jail building. Confined during six months, 348; of these 300 were colored. No deaths in jail, but one prisoner removed to the hospital, died there. General impression of the management of the jail is very favorable.

Remarks.—The jail was taxed to its ntmost capacity on account of the lapse of one term of court, thereby overcrowding; but the jailer is a good and efficient officer and has kept the premises in good condition.

A. G. Hankins.

Received March 1, 1908.

## ONSLOW.

The prison is as heretofore reported as to buildings. No punishment. Now confined, 1 white male, epileptic. During six months, 3 white and 7 colored. No deaths. General impression of the management is favorable.

G. H. SIMMONS.

Received April 2, 1908.

## SECOND REPORT.

The prison is as heretofore reported. Now confined, 1 colored male. One death since March 1. Free of vermin. No religions services. General impression of management is favorable.

Received September 8, 1908.

G. H. SIMMONS.

## PAMLICO.

The prison is built of brick, 30 x 30 feet. Two stories, four rooms. Windows not obstructed. Ventilated by windows. Wood stove. Sufficient bedding. Drinking-water as needed. Sufficient amount of food. No provision for bathing. Excreta removed in buckets. No religious services. Now confined, 3 colored males. No deaths. General impression is favorable. W. T. Mayo.

Received September 11, 1908.

#### PERSON.

The prison is brick and steel; fireproof; 30 x 25 feet. One story with six rooms and cells. Windows barred. Ventilated by windows.

Stoves. No suffering in cold weather. Sufficient bedding. Sexes separated. Drinking-water three times daily. Three meals and coffee. Swept, and lime need. Tubs and bowls; required to wash. Sewerage. Free of vermin. No religions services. Now confined: 2 white males and 2 colored males awaiting trial. During six months; 2 whites (insane), and 5 colored male prisoners. No deaths. General impression is favorable.

N. C. Newbold.

Received July 18, 1908,

#### SECOND REPORT.

The prison is only one story  $25 \times 30$  feet. It is entirely too small for the demands made upon it at times. Three rooms and three cells. The rooms are  $10 \times 10$  feet; cells  $6 \times 8$ . The number of prisoners placed in each room and cell depends, of course, upon the number of prisoners held. At present only fonr—2 colored males; 1 white female; 1 white male, insane. The windows barred. Heated by stoves and comfortable. Sewerage. Plenty of plain food. Drinkingwater three times daily. No provision for religious services regularly. Upon the whole, I am satisfied that the prison is well kept as possible under the circumstances.

Rev. J. A. Hornadax.

Received November 13, 1908.

## PEROUIMANS.

The old jail has been condemned and demolished. A good new jail is being built.

B. S. LASSITER.

Received September 8, 1908.

## PITT.

The prison is built of brick, with steel cells 22 x 44 feet, and two stories. Two cells 16 x 16, two 8 x 12, two 6 x 12. Windows barred. No other ventilation except by windows and doors. Stoves. All necessary bedding. Sexes separated. Water in each cell. Sufficient amount of food. Scoured. Bathtubs. Basins in each cell. Sewerage. Free of vermin. Now confined: 9 colored males; 1 white man, insane and epileptic; 1 colored woman, insane. The man has been confined since March, 1906. No deaths.

Remarks.—The jail is very well equipped. Fitted with electric lights, waterworks and sewerage. Separate bathtubs for white and colored. It is well heated and ventilated. It is seldom ever crowded.

J. W. SMITH,

Received July 7, 1908.

ROBERT N. NICHOLS.

## RICHMOND.

The prison is built of brick with wooden floors; 40 feet square; wo stories; four steel cells. Windows barred. City waterworks. Firmace, hot air. Races and sexes separated. Meat, bread, vegetaoles, altogether sufficient. Cleansed with soap and hot and cold vater. Porcelain bathtub, city water, and required to use it. Sewerge. Sheriff is forced occasionally to whip a hard case to stop loud cursing and indecent language. The white and colored preachers of he town give them some attention. Now confined, 22 negroes, to be tried next week. One death during the six months; heart failure. mpression of the management is quite favorable. No suggestions exept we will try to have more cells added for white men and women; Il prisoners at present are negroes. J. S. LEDBETTER.

Received January 2, 1909.

R. S. Johnson.

#### ROBESON.

The jail is a brick building; fireproof; 60 x 60 feet; two stories; 6 rooms and cells. Cells are 7 x 71/2. Wire screens over the winows. Steam heated. Sufficient bedding. Sexes separated. City ire department. Two meals a day. Drinking-water three times aily. Tub; required to wash. Disinfectants used for cleansing he jail. No vermin. No regular religious services. Two Indians, 2 whites and 10 colored prisoners. Usually the largest number at a ime is 30. One death. Books and Bibles furnished. General imression is favorable. J. P. MCNEILL.

Received April 25, 1908.

## ROCKINGHAM.

The jail is nnchanged. Heated by stove. No suffering in winter. resh water three times daily. Poor facilities for bathing—one large an for all the prisoners. Sewerage. Free of vermin. No punishnent. No religious services. No prisoners sentenced to jail. All go the roads or are hired out on farms. No deaths. The managenent is as good as it can be with the present building.

*Remarks.—We will have to build a new jail soon. Our county

as just finished a new conrthonse and will proceed with the jail in he near future, I think. Our present building does not meet the reuirements of law. IRA R. HUMPHREYS,

Received March 4, 1908.

WILLIAM CUMMINGS.

#### SECOND REPORT.

The prison is unchanged. None now confined. We keep no prisoners for punishment; the jail is used for prisoners unable to give bond and awaiting trial. No deaths. Management favorable.

Remarks.—We must have a new jail as soon as the courthouse is paid for. The next board of commissioners are expected to build a jail.

IRA R. HUMPHREYS.

Received September 4, 1908.

## ROWAN.

The new jail is built of brick, steel and cement. Two stories. Two rooms with 8 cells each and one room with 3 cells. Cells 7½ feet square. Steam-heated; air vents. No suffering from cold. Sufficient food. We found one female prisoner in the room with three cells. City water in each room. Coffee on Sunday. Disinfectants used. Bathtub in each room. Not compelled to bathe, but allowed to do so. Vermin are constantly brought in by hoboes who remain but one night. No provision for religious services. Now in charge: 7 white males, 2 colored males and 1 colored female. Three deaths in six months; one man died from effects of liquor and exposure to cold, one shot by deputy sheriff whom he had cut with a knife, one put in jail while delirions from pnenmonia.

Remarks.—This is a new jail, which does not in our judgment comply with the law, which we think requires five distinct rooms; nor have rooms been provided for consumptives, as a statute passed since the contract for the jail was made requires. The solicitor called the attention of the grand jury to it. The grand jury reported that it was not in accordance with the law, but county commissioners continued to build it as contracted for.

F. J. Murkdoch,

H. T. TRANTHAM,
JAMES D. HEILIG.

Received May 15, 1908.

SECOND REPORT.

The jail is as previously reported. Now confined: 7 white males, 1 white female; 13 colored males, 3 colored females; total, 24. One white female, 1 white male and 1 colored male insane. White and black females in the same apartment, different cells. Insane in same apartments, different cells, with other prisoners. The jail is uncleanly and vermin are there that could be exterminated. This new jail cost about \$1.000 per cell for each of 19 cells and was constructed without regard to the Attorney-General's opinion that section 1336 requires five distinct rooms for prisoners.

REV. F. J. MURDOGE.

Received September 10, 1908.

#### RUTHERFORD.

The prison is as heretofore reported. Fresh drinking-water three times daily. Coffee. Washed and swept. No provision for bathing. Excreta removed. Free of vermin. No punishment. Now confined. 2 white males. No deaths. General impression of the management is favorable.

DR. E. B. Harris,

Received Jnne 8, 1908.

Dr. T. B. TWITTY.

#### SECOND. REPORT.

The prison is unchanged. No suffering from cold, sufficient bedding. Sexes separated. Plenty of food and drinking-water often. Free of vermin. No religions services. Now confined: 3 whites and 4 blacks. No deaths. General impression is favorable. The town works its prisoners on a chain gang and houses them in the jail at night.

E. B. HARRIS, M. D.,

Received October 3, 1908.

T. B. TWITTY, M. D.

## SAMPSON.

The jail is unchanged since the last report. Now confined, 1 colored male,

Mrs. T. L. Hubbard,

Received March 12, 1908.

Rev. T. M. Lee.

## STANLY.

The prison is as heretofore reported as to bnilding. Snificient amount of bedding. No snifering from cold. Sexes separated. Drinking-water as needed. Sufficient amount of food. Required to bathe. Sewer pipe for removing excreta. No vermin. No prisoners now confined. General impression is favorable.

R. E. Austin.

Received May 1, 1908.

#### STOKES.

The jail is as heretofore reported as to buildings, etc. Now confined: 3 colored and 1 white male, awaiting trial. During six months, 7. One white insane man, sent to the hospital. Not allowanced as to food. Coffee once a day. This, and prisoners required to wash. Lime, water, broom and soap for cleansing the jail. Fresh water as wanted. Occasional religions services. No deaths. Record kept. General impression of management is fairly good.

Received March 16, 1908.

N. O. Petree.

#### TRANSYLVANIA.

The prisou is rough stone with plaster surface. It is not fireproof. Fire department near-by. The building is 30 x 38, two stories; four rooms, 14 feet square. Iron gratiug at the windows; no other ventilation. Small stove in one cell; fireplaces in two rooms and the other warmed by flue from below. Mattresses and ample covering, placed on the floor. Sexes separated. Water as often as called for. Sufficient quantity of food, warm drink. Cells swept daily. No provision for bathing. Required to wash. No vermin. No intoxicating liquor. Closets in each cell disinfected once a week. Occasional religious services. Now confined, 2 white males; terms two years and six months. During six months, 16, one of these a white insane woman since removed to the hospital. No deaths. Bibles.

Remarks.—We visited the prison and the jailer showed us all courtesy and willingly answered inquiries. It is an old stone building kept in passable repair. A new building would be a great improvement, though it may not be feasible at present, but it should be built in time. Strict sanitation should be enforced, as the cells seemed damp and lacking in sunlight, especially those in the rear. They are all in the second story; the jailer and family occupy the lower story.

REV. CHALMERS D. CHAPMAN, Chairman;

REV. ROBERT G. TUTTLE,

REV. WILLIAM P. CHEDESTER.

Received April 15, 1908.

#### TYRRELL.

The jail is as heretofore reported as to building. None confined. No provision for bathing. Excreta carried out in tubs. No vermin, No deaths. No record. General impression is unfavorable.

Remarks.—My impression is that the management is very poor. No special care seems to be paid to the whole matter.

Received March 7, 1908.

J. C. MEEKINS, SR.

#### VANCE.

The prison building is as heretofore reported. Ventilator, besides windows. No suffering from cold. Free of vermin. No religious services. Now confined: 11 colored prisoners, 1 female. No deaths. General impression of the management is favorable.

Received March 30, 1908.

Dr. F. R. HARRIS.

#### WAKE.

The prison is unchanged since last report as to buildings. Sufficient amount of bedding. Sexes entirely separated. Sufficient amount of food; no warm drink. Water, soap and lime used for cleansing the jail. Not absolutely free of vermin. No punishment. Religious services. Now confined: 9 white males, 12 colored males and 1 colored female; total, 22. Confined during six months: 130 white, 319 colored; total, 449. No deaths. Not overcrowded. General impression is favorable.

Remarks.—We again recommend that the sheriff have the windows cleansed of paint so that there may be no obstruction to the sunlight; sunlight is wholesome in the broadest sense.

1. C. Blair, Chairman; John A. Mills.

Received October 8, 1908,

## WARREN.

The prison building is as heretofore reported. Stoves. Sufficient amount of bedding. Fresh drinking-water as needed. Sufficient amount of food, coffee. Provision for bathing. Free of vermin. No religious services. Now confined, 4. During six months, 14, two of whom were insane. No deaths. General impression of the management is favorable.

P. H. ALLEN. Chairman:

P. H. ALLEN, Chairman

R. B. Boyd,

Received March 28, 1908.

J. A. Hudgins.

## WASHINGTON.

The jail is in its usual good condition. Now confined: 2 colored and 1 white male.

W. F. Beasley.

Received May 27, 1908.

#### WAYNE.

There has been no change in the prison since the last report.

Received March 20, 1908.

M. L. Lee.

## WILKES.

The prison is built of brick; not fireproof; 30 x 40 feet; two stories, four rooms 12 x 12. Windows, closed shutters over the glass. No suffering in cold weather. Bunk with blankets. Sexes separated. Drinking-water as wanted. Two meals, coffee once a day. Disinfectants and scouring. Basin for bathing. Sewerage. Free of vermin. No religious services. Now confined: 2 colored and 6 whites. No deaths. Poor record kept. Impression of the general management is favorable.

John O. Myers, M. D.

Received March 21, 1908.

# COUNTY CAMPS.

## ALAMANCE.

The camp is as heretofore reported. No female prisoners. Three meals and coffee three times daily in the winter. Drinking-water as wanted. Required to bathe once a week. Blankets washed once a year. Soap, water and disinfectants used to keep the camp clean. Free of vermin. Straw in the mattresses changed three or four times a year. Some prisoners whipped, for profanity and refusal to work, by the overseer. The sick are well cared for in the stockade by attendants. No death, None known to have tuberculosis. The county physician makes an occasional inspection. Work ten hours. Two employees. Superintendent \$35 and guard \$30. Very rarely have any religious services. In the camp-house and stockade on Sunday. Chained together at night. Boys and men together; one boy at present. Now confined: 2 white and 9 colored: total, 11.

REV. J. M. HOLT, J. A. TURRENTINE, P. H. FLEMING

Received March 11, 1908.

SECOND REPORT.

The camp is as reported heretofore. Now confined: 2 white and 7 black males. Superintendent is paid \$50 per month and guards \$35. No deaths. No tuberculosis. Rev. J. M. Holt,

J. A. TURRENTINE, P. H. FLEMING.

Received September 28, 1908.

## ANSON

The following is taken from the grand jury report:

"The chain gang is in good condition, beds and bedding clean. The convicts say that they are well treated, and receive good fare. Our committee examined a regular meal which was being prepared for them and found it composed of good and wholesome food."

Received September 26, 1908.

MRS. W. J. HUNTLEY.

#### CABARRUS.

The camp is a frame building 18 x 70 feet; 1 story. White and blacks in the same building, separated by wire. No special means for extinguishing fire. Good ventilation. Four coal stores, No suffering

from cold, Five blankets each. No women, Three-quarters pound of meat each day, coffee in the morning. Drinking-water as needed. Bathe weekly. Blankets washed every three months. Excreta removed. Very little and very moderate punishment. The sick are well cared for by the county physician in the camp. No deaths. No tuberculosis. County physician makes a monthly inspection. Work from sun to sun, with an hour and a half to two hours for dinner. Three guards and a supervisor. Supervisor receives \$70 per month and guards \$1.50 per day. No religious services. Chained together at night. Boys are kept in camp. Now in charge: 9 white males and 28 colored; total, 37. Three of the colored for mnrder, sentences five to eight years; 1 white male for murder, eight months,

Remarks.—We find the camp in good condition, well kept, well managed, prisoners have plenty of food, raiment and shelter. We find the gang doing splendid work in building good roads in our county. J. M. HENORIN.

Received June 15, 1908.

G. Eo. KESTLER.

## COLUMBUS.

The county camp is a canvas tent. Races separated in sleeping quarters. Stoves. No suffering in cold weather. Snfficient amount of bedding. No female prisoners. All the food they want. No deaths. No tuberculosis. Monthly inspection of the camp by county physician. Worked from seven to six hours. Superintendent and two guards; salary, \$80 to superintendent, \$40 to guards. Religious services. In camp on Sundays. Chained together at night. No boys. Received Angust 10, 1908. JACKSON GREER.

## DAVIDSON.

The camp is a frame building, 18 x 36 feet. One story, three rooms. Whites and colored separated at night. Buckets for extinguishing fire. Heaters. No suffering from cold. No women. All the food they want. Three meals per day; no warm drink. Required to bathe once a week. Blankets washed once a month. Bnilding scalded and scoured. Excreta hauled away. Free of vermin. Straw in the mattresses changed once a month. Punishment inflicted upon oneflogging for disobedience. County physician cares for prisoners. No deaths; no tuberculosis. Worked ten hours per day. One superintendent and one guard. Snperintendent receives \$60 per month and guard \$40. No religious services. Kept in stockade on Snuday.

Chained together at night. No boys. Now in charge: 15 colored males, 2 white; total, 17. Terms,  $2\frac{1}{2}$  years, 2 years, and fifteen for two to six months.

James Smith.

Received April 13, 1908.

#### SECOND REPORT.

No change since last report. Prisoners are whipped for disobedience, etc. No deaths. No tuberculosis. Now confined: 8 colored males and 1 white male.

James Smith.

Received October 19, 1908.

#### EDGECOMBE

Tents are used for the prisoners at the camp. Now confined, 39 colored males. Died, 1 from pneumonia. The sick are cared for at the hospital. Whites and blacks are separated at night. No special protection against fire, Heaters. No suffering from cold. No female prisoners. All the food they want. Three meals per day. Water as needed. Required to bathe. Blankets washed twice a month. Excreta removed daily and buried. Free of vermin. New mattresses as needed. No punishment. County physician makes monthly inspection, Worked ten hours. Four employees. No religious services. In camp on Sunday. Chained together at night. Boys at one end of same tent with the men.

James R. Gaskill.

Received March 23, 1908.

## FORSYTH.

Temporary movable camp. Frame, metal roof. One 16 x 60 and one 16 x 90 feet. White and colored separated at night. Water buckets for extinguishing fire. The larger building has windows and ventilators also. Coal stoves. All the heat necessary in cold weather, A straw mattress for two and from two to four blankets for each man. No females. All the food they want. Three meals; coffee for breakfast. Swept every day. Scoured when needed and disinfected. Excreta removed to a third of a mile away to sink. Free of vermin. Straw changed in the mattresses every four weeks. Strapping for every one who breaks prison rules, by superintendent of the camp. The sick are well cared for. Attended by the county physician, and removed to the jail or hospital if needed. No deaths. No tuberculosis. Physician visits the camp weekly. Work from sun to sun. Twenty employees; salaries from \$20 to \$75 per month, Regular religious services once a month. Prisoners are kept on the camp grounds on Sunday. Prisoners are fastened by a short chain to a long chain. In case of fire or alarm, the unlocking of one end releases them from the building, but they are chained so they cannot escape. Boys confined with the men. Now confined: 16 white males, 64 colored males, 3 of whom are under sixteen.

REV. E. S. CROSLAND, W. P. HILL.

Received Jnne 20, 1908.

W. H. FOLTZ,

SECOND REPORT.

No change in the buildings and management of camp since last report. Now in charge: white males, 16; colored males, 82; total, 98. Six of the colored are under sixteen. Prisoners are sent ont from the Recorder's Court and from the Superior Court, and camp officials have only the names and length of sentence.

REV. E. S. CROSLAND, W. P. HILL, W. H. FOLIZ.

Received December 16, 1908.

## GASTON.

#### CAMP No. 1.

The camp is built of wood, with heavily barred windows and doors. It is 65 x 30 feet; three rooms, Races separated. Spring water. Ventilators at top of building. Large wood or coal heater. Snfficient bedding. No female prisoners. Three meals daily and occasionally coffee. Water-boys snpply drinking-water constantly. Required to bathe. Blankets washed weekly. Camp is scoured and disinfected. Excreta hauled off and buried. Free of vermin, Straw in the ticks changed as needed. Corporal punishment in moderation, a few lashes inflicted upon several, administered by the superintendent. The sick are well cared for. One death, blood poisoning from thoracic abscess. One suspected case of tuberculosis, a trusty, kept in separate tent. County physician makes an inspection nearly every week. Worked from sun to sun. Superintendent and four guards; salaries, \$35 to \$90. Religious services. In camp on Sunday. Prisoners chained at night to a long rod rnnning through the building. Boys confined with men. Confined: 20 black males, 13 whites.

## CAMP No. 2.

Frame bnilding  $55 \times 30$  feet. Races separated at night. Well. Confined: 18 colored males, 2 of whom are under sixteen; 16 whites. Other items similar to Camp No. 1. J. P. Reid.

Received September 26, 1908.

#### GRANVILLE.

The camp has two frame buildings, 14 x 15 feet, and one steel cage, 9 x 18 x 7 feet. Whites and blacks separated at night. Spring water. Heaters. Ventilation by windows. No suffering from cold. A matress and four donble blankets to four men. No women. All the food they want. Three meals; no warm drink. Required to bathe. Blankets washed about once a month. Camp is scoured and lime used. Excreta carried off. Free of vermin. New mattresses once in three months. Punished by whipping. Small whip used. The sick are well cared for. No deaths. No tuberculosis. Hours of work, from snn to sun. Three employees. Superintendent receives \$60 per month, two guards \$32.50. No religious services. Locked in cage on Sunday. Prisoners are not chained together at night. Some wear chains all the time. Boys confined with the men. Now confined: 10 colored males, 2 nnder sixteen, and 4 white males; total, 14.

Remarks.—We have ordered another steel cage and will soon have more room for prisoners.

D. N. Hunt.

Received September 23, 1908.

## HAYWOOD.

The camp is a frame building, one story. Whites and blacks are in separate rooms. Stoves. No suffering in cold weather. Sufficient bedding. Plenty of food. Drinking-water as needed. Required to bathe. Free of vermin. No severe pnnishment. Sick reasonably well cared for. County physician makes monthly inspection. Work eight honrs per day. Occasional religious services. Prisoners are kept in and around camp on Sunday. I think the convicts are treated kindly.

Mrs. M. J. Branner.

Received May 1, 1908.

#### SECOND REPORT.

The camp is a frame building with three medium-size rooms. Whites and blacks confined in the same room. Running water near. Stoves and open fireplaces. Ventilated by windows and doors. Sufficient bedding. Three daily meals and coffee. Straw frequently changed in the mattress. Whipping has been inflicted once for laziness. No deaths; no tuberculosis. Boys confined with men. Occasional religious services.

Remarks.—I wish that the convicts might have religious instruction and preaching more frequently.

Mrs. M. J. Branner.

Received November 11, 1908.

## HENDERSON.

The prisoners at the camp are housed in tents at present. Whites and blacks are not confined together at night, Ample supply of food. Three meals and coffee twice a day. Drinking-water as wanted. Required to hathe. Blankets washed frequently. No punishment. The sick are well cared for in a separate building. No deaths. Monthly inspection made of the camp by the county physician. Worked ten hours. Two employees at \$30 per month. Prisoners chained together at night. No boys in charge.

Remarks.—Most of the prisoners now in charge are for minor offenses. They are well cared for and kindly treated.

Received March 19, 1908.

LILA RIPLEY BARNWELL.

#### SECOND REPORT.

The camp is as heretofore reported as to tents, etc. Sufficient hedding. Stoves. No suffering from cold. All the food they want. Three meals; coffee twice a day. Drinking-water as needed. Change clothes and hathe twice a week. Blankets washed frequently. No deaths. No therechosis. Worked ten hours. No boys, / Confined: 5 colored and 1 white male.

Remarks.—The camp was never in better condition. Three convicts belonging to this county. The others hired from another county. They are well cared for and humanely treated.

Received September 16, 1908.

MRS. LILA R. BARNWELL.

## TREDELL.

The camp is a portable frame building, 40 x 18 feet, divided into two rooms. Whites and blacks are separated at night. Good ventilation. Stoves. No suffering in cold weather. Blankets and straw ticks. No female prisoners. Ample supply of food. Three meals a day and coffee for hreakfast. Drinking-water as needed. Required to bathe. Soap, water and disinfectants used. Free of vermin except when hrought in by new prisoners. Excreta removed. Corporal punishment inflicted for refusal to work and for assault. Straw in the mattresses changed and hlankets washed as needed. Sick are attended by the county physician. If very ill they are hrought into the county jail. No deaths. No tuberculosis. Monthly inspection made by the connty physician. Worked ten hours. Four employees. Superintendent receives \$45, guards \$30. Religious services, At the camp on Sunday. Chained together at night. There has been but one boy on the chain gang, and he had the liberty of the camp.

Received May 13, 1908.

MRS. A. L. COBLE.

### MECKLENBURG.

The two camps of Mecklenburg are frame buildings, 18 x 90 feet, three rooms. Races separated. Ventilated by windows and doors. Stoves. Buckets for extinguishing fire. No suffering in cold weather. Sufficient bedding. Women in separate apartments. Three meals a day, no warm drink. Drinking-water as wanted. Required to bathe. Blankets washed weekly. Soap and disinfectants for cleansing the camps. Excreta hauled away. Free of vermin. Straw in mattresses changed as needed. Punishment inflicted upon some of the prisoners. Sick cared for by the county physician. No tuberculosis. Monthly inspection made of the sanitary condition of the camp. Worked from sun to sun. Five employees. Salaries vary from \$45 to \$100 per month. Religious services. Kept in camp on Sunday. Chained to a guy-rood at night.

Remarks.—The prisoners are well cared for and the camps are in good condition.

JOHN C. McDowell.

Received June 10, 1908.

#### MOORE.

The camp is built of wood, 20 x 40 feet; one story, two rooms. White and colored prisoners separated. No special means of protection against fire. Wood heaters. Ventilated by windows. No suffering from the cold. No female prisoners. All the food they want. Three meals a day. Drinking-water as wanted., Required to bathe. Blankets washed once a month. Building washed and scoured. Excreta removed to a sink. Free of vermin. Straw in the mattersses changed twice a year. Some punishment, by the superintendent. The sick are well cared for at the camp or jail. No deaths. No tuberculosis. County physician makes monthly inspection. Worked from sun to sun. Three employees. Supervisor receives \$40 and guards \$30. Religious services. In camp on Sunday. Chained together at night. Boys with the men. Now confined: 17 colored males, 2 of whom are under sixteen.

Received March 26, 1908.

### SECOND REPORT.

No change since above report. Now in charge, 12 colored males. Received September 19, 1908.

John Campbell.

### NASH.

The camp is a frame building, \$2 x 18 feet; one story, three rooms. White and colored prisoners are separated at night. Water barrels

for extinguishing fire. Stoves; no snffering in cold weather. Cots and blankets. Three meals per day, not allowanced. No coffee or warm drink. Drinking-water as needed. Required to bathe. Blankets washed once a month. Disinfectants. Excreta removed. Free of vermin. Flogging inflicted upon two prisoners; very seldom resorted to. The sick are cared for in camp by the county physician. One death from pneumonia. None known to have tuberculosis. The physician does not make a monthly inspection of the sanitary condition of the camp. Honrs of work, from snn to sun. Eight employees. Religious services. In the stockade on Sunday. No boys. Three women, one of whom is white. Cook and seamstress. Twenty-eight males; of these two are white.

J. B. Boddie.

Received June 3, 1908.

#### PERSON.

The camp is usually in a house rented near the work to be done on the roads. Quarters are comfortable. Whites and blacks are confined in the same room. No special protection against fire. Ventilated by doors and windows. No suffering in cold weather. No female prisoners. As much food as desired. Three meals, and coffee occasionally. Drinking-water as needed. The camp is kept as clean as possible. Excreta removed. Free of vermin. Straw in ticks changed as needed. No corporal punishment. Deprivations for disobedience. We care for the sick as well as we can. No deaths. No tuberculosis. Physician comes sometimes for inspection. Work all day except in bad weather. Three employees; \$67.50 and \$20. Seldom have religious services. In camp on Sunday. Chained together at night. Boys confined with men. Now in charge, 2 colored males.

Received July 18, 1908.

N. C. NEWBOLD.

#### SECOND REPORT.

The camp in the winter months is located on the premises of the County Home. A one-story building with two rooms 16 x 20 feet for the prisoners and one room 16 x 12 for the guard. We have now in course of construction a portable structure which will be 6 x 18 feet and divided into two rooms, one for white prisoners and one for blacks. Anti-germ disinfectants are used in the camp and every precaution is taken to preserve cleanliness. There are only two colored convicts now working the roads. They are well fed and well cared for as far as I can learn. Three meals a day and eoffce for breakfast. R. A. Spencer, Roxboro, is superintendent; his salary is \$65 per month. Guard receives \$25. Prisoners are kept in the camp on Sunday. At night they are chained each to a log. No special provision for religious services.

Received November 13, 1908.

#### PITT.

The camp has a tent 18 x 40 feet and a cook room 10 x 12. There is only one room for prisoners, but a division in the room for the blacks and whites. Buckets for fire protection. Stoves and heaters. No suffering in cold weather. Sufficient bedding and food. Three meals a day; no coffee or warm drink. No female prisoners. Drinking-water as needed. Washed, scrubbed and lime used. Excreta removed daily. Whipped for disobedience, by the superintendent. Sick are well cared for; nursed at the camp. No deaths. No tuberculosis. Physician makes a monthly inspection and report. Worked from sunrise to sunset. One guard for each ten prisoners. Supervisor and guards cost \$1,200 per annum. No religious services. Chained together at night. Boys with the men.

Received July 7, 1908.

J. W. SMITH, ROBERT N. NICHOLS.

#### ROCKINGHAM.

The convicts are housed in army tents. White and colored prisoners are confined in the same room. No special means of extinguishing fire. Stoves. No suffering from cold. All the bedding they want. No female prisoners. Three meals a day and coffee. Not allowanced. Drinking-water at all times. Required to bathe once a week. Blankets washed once a month. Straw in the mattresses changed twice a year. Free of vermin. No punishment inflicted. The sick are well cared for at the camp by the county physician. No deaths. No prisoners known to have tuberculosis. Hours of work, 7:30 to 5. Fourteen employees. Salary of the superintendent \$60; guards, \$25. No religous services. Prisoners are chained together at night. Boys confined with the men. There are 45 prisoners in the camp, about one-half of whom are white men. They are sent from the counties of Caswell, Stokes, Snrry and Rockingham.

Received March 4, 1908.

IRA R. HUMPHREYS.

### SECOND REPORT.

Four large army tents. White and colored confined in the same room. Stoves. No suffering from cold. Punished for trying to escape. Whipped. Sick well cared for. No deaths. No tuberculosis. Boys are trusties and carry water. There are at present fifty prisoners sentenced from Rockingham, Stokes, Surry and Caswell. Rockingham County pays the court costs of prisoners for their work.

Received September 4, 1908.

IRA R. HUMPHREYS.

### ROWAN.

The camps are as heretofore reported as to buildings. Prisoners required to bathe once a week. Blankets washed twice a year. Excreta removed 100 yards. Free of vermin. Straw in mattresses changed once in two months. A dozen have been whipped for cursing, fighting, not working. Slight cases of sickness kept in camp; serions cases sent to jail. No deaths; no known cases of tuberculosis. County physician does not make a monthly inspection of the sanitary condition of the camp. Worked about ten honrs. Five employees. Supervisors paid \$60; gnards, \$30, \$40 and \$50; at the other camp, \$60, \$45, and three at \$35. No religions services lately. In camp on Sunday. Chained together at night. Boys confined with the men. In Camp No. 1, 5 white males and 17 colored, one of the colored under sixteen. At Camp No. 2, 2 white and 26 colored males.

Remarks.—We found these camps in good condition. The prisoners are well fed and not overworked and the supervisors able to control them with discipline less harsh than heretofore. We were struck by the great number of young convicts. Perhaps nine-tenths were under twenty-five years old.

REV. F. J. MURDOCH,

H. T. TRANTHAM,

Received May 15, 1908.

JAMES D. HEILIG.

### SECOND REPORT, CAMP NUMBER ONE.

The white and colored prisoners are not confined in the same room at night. No special protection against fire. Windows and doors afford ventilation. Three stoves. No suffering from cold. A straw tick for two and a blanket for each. No female prisoners. Five pounds of meat per week and all they want of other things. Coffee once a day. Three meals in the week and two on Sunday. Fresh drinking-water as often as wanted. Required to bathe once a week. Blankets washed twice a year. Germo-insecticide is used and camp swept three times a day. Water-closet 100 yards from tent. Free of vermin. Straw in the mattresses has been changed four times this year. Eight or ten have been whipped (for fighting and not working), by the superintendent. Sick are well cared for-in camp unless very sick, when they are taken to the jail. No deaths. No tuberculosis. Monthly inspection and report made to the commissioners by the superintendent of health. Work from sun to sun, with an hour for dinner. Six employees. Supervisor receives \$65 per month; four guards, \$35, and the blacksmith \$2 a day. Occasional religions services. In hot weather prisoners are allowed outside in the shade on Sundays; in cold weather remain in the tent. Prisoners chained together at night. Two boys, kept with the men. Number now in charge: 3 white males, 32 colored; two of the colored claim to be under sixteen, but do not look it. REV. F. J. MURDOCH.

Received September 19, 1908.

#### CAMP NUMBER TWO.

The white and colored prisoners are separated at night. Ventilated by windows. Three stoves. No suffering from cold. Three blankets each. One female prisoner; washes and patches. Five pounds of meat weekly, other food as much as they want. Three meals, coffee once a day; on Sunday two meals. Drinking-water as wanted. Required to bathe once a week. Blankets washed once a montb. Germoinsecticide used. Water-closet 200 yards from tent. Free of vermin. Straw in the ticks changed once every one to two months. Half a dozen have been wbipped (for fighting, cursing, not working), by the superintendent, by authority of commissioners. The sick are well cared for-at the camp unless very sick, and then in jail. No deaths. One prisoner is suspected of having tuberculosis. He is confined in the same room with other prisoners. County physician makes mouthly report. Work from sun to sun, with an hour at dinner at this season; more in the summer. Six employees. Supervisor gets \$60 per month, assistant \$50, one guard \$40, one \$35 and the man in charge of blacksmithing \$50. Occasional religious services. Kept in the shade on Sundays when warm enough, otherwise in tents. Chained together at night. No boys. Number in charge: 10 white males, 26 colored males, 1 colored female; total, 37.

Remarks.—We think that the convicts are better treated than formerly. Much better than five years ago. We all observe that the negro couvicts are younger than they used to be. One only appeared to be over 25. The majority seemed to be over rather than under 21. We think that they get tired of being sent to the gang, and quit their meanness.

REV. F. J. MURDOCH.

### SAMPSON.

Tents are used for the road force. White aud colored in the same tent. Stoves. No suffering from cold. One mattress and two blankets. No female prisoners. Three meals a day; drinking water as wanted. Required to bathe. The tents are moved from place to place as the men work. Free of vermin. Mattresses used. One white man lashed for running away, by the superintendent. There has been no serious sickness since the camp was started. No deaths. No tuberculosis. County physician makes a monthly inspection. Work from sun to sun. Three employees. Superintendent is paid \$50 and guards \$25. No religious services. Kept in camp on Sunday. Prisouers chained together at night. Boys in the same tent with adults.

Mrs. T. L. Hubbard,

Received March 12, 1908.

REV. T. M. LEE.

### WAYNE.

There has been no change in the camp since the last report. Received March 20, 1908. M. L. Lee.

### HOUSE OF CORRECTION-GUILFORD COUNTY.

Women and children are confined at the House of Correction.

The building is built of wood and is two stories, 40 x 60 fcet, with eight large rooms. Rooms 18 x 20 fcet, Ventilated by windows, Heated by hot air. Well water. Three meals. Coffee if they want it, Drinking-water as wanted. Free of vermin. Required to bathe. Excreta removed and buried. The sick are well cared for in a separate room, with physician and attendant. There is a small farming tract attached, and prisoners work this. The women sew, cook and wash. Supervisor receives \$50 and guard \$30 per month. Religious services on Sunday. Now confined: 1 white woman, 2 white boys; 3 colored women and 12 colored boys.

G. F. HACKETT,

Received September 19, 1908.

Superintendent.

AN ACT TO BE ENTITLED AN ACT TO AMEND CHAPTER 85, VOLUME 2 OF THE REVISAL OF 1905, RELATING TO THE BOARD OF PUBLIC CHARITIES.

The General Assembly of North Carolina do enact:

Section 1. That Joseph G. Brown, W. A. Blair, A. C. McAlister, Henry C. Dockery and Carey J. Hunter be and they are hereby appointed as the members of the Board of Public Charities of the State of North Carolina, and that their terms of office shall begin on July first, nineteen hundred and nine. That the said Carey J. Hunter and A. C. McAlister shall each hold their term of office for two years, and that Joseph G. Brown and Henry C. Dockery shall hold their offices for four years, and that W. A. Blair shall hold said office for a term of six years. That all vacancies occurring for any cause shall be filled by the appointment of the Governor for the unexpired term. He shall also appoint members of said board as the terms of those herein appointed expire, and that the term shall be six years.

Sec. 2. That all laws in conflict with this act are hereby repealed.
Sec. 3. This act shall be in force from and after its ratification.
Ratified this the 5th day of March, A. D. 1909.

AN ACT TO AMEND CHAPTER 66, VOLUME 1, REVISAL OF 1905, RELATING TO THE BOARD OF PUBLIC CHARITIES.

The General Assembly of North Carolina do enact;

Section 1. That section two thousand eight hundred and seven (2807) of the Revisal of one thousand nine hundred and five be and the same is hereby amended by adding at the end of said section the following: "Provided, that the actual expenses of the members of said board, or the secretary or such other official as hereafter may be appointed by said board, incurred while making such inspections of the charitable and penal institutions as the board may deem necessary, shall be paid."

Sec. 2. All laws or clauses of laws in conflict with this act are hereby repealed.

Sec. 3. This act shall be in force from and after its ratification. Ratified this the 9th day of March, A. D. 1909.

AN ACT TO REQUIRE ALL WHITE EPILEPTICS OF THE STATE
TO BE ACCOMMODATED, MAINTAINED AND CARED FOR
AND TREATED AT THE STATE HOSPITAL AT RALEIGH,

The General Assembly of North Carolina do enact:

SECTION 1. That whenever it becomes necessary for any white person of this State, afflicted with the disease known as epilepsy, to be

confined or to receive hospital treatment, such person shall be accommodated, maintained, cared for and treated at the State Hospital at Raleigh. Said epileptics shall be committed by the clerks of the Superior Courts of the several counties to said State Hospital at Raleigh in the manner now provided by law for the commitment of insane persons to the several hospitals for the insane, and when such person shall be committed it shall be the duty of the Superintendent of the State Hospital at Raleigh and he is required to receive such person and care for, maintain and treat him or her at said hospital at Raleigh: Provided, said superintendent shall find such person to be afflicted to such extent as to properly be a public charge; and Provided further, that any person so committed who is able to pay shall be charged actual cost of maintenance.

Sec. 2. That all epileptics now being confined and cared for and maintained at the State Hospital at Morganton shall be transferred from said State Hospital at Morganton to the State Hospital at Raleigh.

Sec. 3. That all laws and clauses of laws in conflict with any of the provisions of this act are hereby repealed.

SEC. 4. That this act shall be in force from and after the completion of the buildings now being erected at the State Hospital at Raleigh by the State Hospital Commission for the care and maintenance of white epileptics.

Ratified this the 9th day of March, A. D. 1909.

AN ACT FOR THE SEPARATION OF WHITE AND COLORED PRISONERS IN THE STATE PENITENTIARY AND IN THE COUNTY JAILS AND CONVICT CAMPS DURING SLEEPING AND EATING HOURS.

The General Assembly of North Carolina do enact:

Section 1. That white and colored prisoners shall not be confined or shackled together in the same room of any building or tent, either in the State penitentiary or at any State or county convict camp, during the eating or sleeping hours, and at all other times the separation of the two races shall be as complete as practicable.

Sec. 2. That any officer or employee of either the State or any county in the State having charge of convicts or prisoners who shall violate or permit the violation of this act shall be guilty of a misdemeanor, and upon conviction shall be fined not more than fifty dollars or imprisoned not more than thirty days.

Sec. 3. That this act shall be in force from and after its ratification.

Ratified this the 8th day of March, A. D. 1909.

AN ACT TO PRESCRIBE THE MODE OF CAPITAL PUNISH-MENT IN NORTH CAROLINA,

The General Assembly of North Carolina do enact:

Section 1. That death by hanging nuder sentence of law in North Carolina shall be and is hereby abolished and electrocution or death by electricity substituted therefor.

Sec. 2. The mode of executing a death sentence must in every case be by cansing to pass through the body of the convict or felon a current of electricity of sufficient intensity to cause death, and the application of such current must be continued until such convict or felon is dead; and the warden of the penitentiary of North Carolina or, in case of his death, inability or absence, a deputy warden shall be the executioner; and when any person, convict or felon shall be sentenced by any court of the State having competent inrisdiction to he so executed, such punishment shall only be inflicted within a permanent death chamber which the superintendent of said State penitentiary is hereby authorized and directed to provide within the walls of the North Carolina penitentiary at Raleigh, North Carolina. The superintendent of said State penitentiary shall also cause to be provided, in conformity with this act and approved by the Governor and Conncil of State, the necessary appliances for the infliction of the punishment of death in accordance with the requirements of this act. For the expenses of such appliances a sum not exceeding one thousand dollars shall be allowed and paid out of the treasury upon the warrant of the Auditor of the State.

Sec. 3. That upon the sentence of death being pronounced against any person in the State of North Carolina convicted of a crime pnnishable by death it shall be the dnty of the judge pronouncing such death sentence to make the same in writing, which shall be filed in the papers in the case against such convicted person, and a certified copy thereof shall be transmitted by the clerk of the Spperior Conrt in which such sentence is pronounced to the warden of the State penitentiary at Raleigh, North Carolina, not more than twenty nor less than ten days before the time fixed in the judgment of the conrt for the execution of said sentence; and in all cases where there is no appeal from said sentence of death and in all cases where said sentence is pronounced against a prisoner convicted of the crime of rape it shall be the duty of the sheriff, together with at least one deputy, to convey to the penitentiary at Raleigh such condemned felon or convict forthwith upon the adjoirnment of the court in which said felon was tried, and deliver said convict or felon to the warden of said penitentiary: Provided, that in all cases where an appeal is taken from the death sentence by any person or persons convicted of a crime pnnishable by death, except the crime of rape, such convicted felon or convict shall not be taken or conveyed to said penitentiary unless,

in the judgment of the sheriff of the county in which said felon was tried and the solicitor prosecuting said felon, it shall be deemed necessary for the safety and safe-keeping of said convicted person or felon during the pendency of said appeal.

Sec. 4. The said warden or deputy warden (in case of the disability, death or absence of the warden), unless a suspension of execution be ordered, shall cause the person, convict or felon against whom the death sentence has been so pronounced to be electrocuted as provided by section two of this act. At such execution there shall be present the warden or deputy warden, the surgeon or physician of the penitentiary and twelve respectable citizens. The counsel and any relatives of such person, convict or felon and a minister or ministers of the gospel may be present if they so desire.

Sec. 5. The warden, together with the surgeon or physician of the penitentiary, shall certify the fact of the execution of the coudemned person, convict or felon to the clerk of the Superior Court in which such sentence was pronounced, and said clerk shall file such certificate with the papers of the case and enter the same upon the records thereof.

Sec. 6. Should the condemned person, convict or felon be granted a reprieve by the Governor or obtain a writ of error, or a new trial be granted by the Supreme Court of the State of North Carolina, or should the execution of the sentence be stayed by any competent judicial tribunal or proceeding, notice of such reprieve, new trial, appeal, writ of error or stay of execution shall be served upon the warden or deputy warden of the penitentiary by the Sheriff of Wake County, in case such condemned person is confined in said penitentiary, or upon any sheriff having the custody of any such condemned person, also upon the condemned person himself. In case of an appeal, should the Supreme Court find no error in the trial or should the execution of the sentence be stayed by any competent judicial tribunal of proceeding, such condemned person, convict or felon shall be executed as is provided in section two of this act, the Governor of North Carolina setting the day for said execution; and it is hereby made the duty of said Governor to set the date for said execution and notify the warden of the penitentiary thereof.

Sec. 7. Should a new trial be granted the condemned person, convict or felon against whom sentence of death has been pronounced, after he has been conveyed to the penitentiary, then he shall be conveyed back to the place of trial by such guard or guards as the warden of said penitentiary shall direct, their expenses to be paid as is now provided by law for the conveyance of convicts to the penitentiary.

Sec. 8. Nothing in this act shall be construed to alter in any manner the execution of the sentence of death imposed on account of any crime or crimes committed before the ratification of this act. SEC. 9. Upon application, written or verbal, of any relative as near as the degree of fourth cousin of the person executed, made at any time prior to the execution or on the morning thereof, the body, after execution, shall be prepared for burial under the supervision of the warden or deputy warden and shall be returned to the nearest railroad station of the relative or relatives asking for such body. The cost of preparing said body for burial, including transportation, shall in no case exceed the sum of fifty dollars, and shall be paid by the State of North Carolina upon a warrant of the Auditor of said State. In the event that no relative asks for the body of such executed person, convict or felon, the same shall be disposed of as other bodies of convicts dying in the penitentiary.

Sec. 10. That this act shall be in force from and after its ratification.

Ratified this the 6th day of March, A. D. 1909.

JAILS-HOW TO BE CONSTRUCTED.

The Constitution, Article XI, section 6: It shall be required by competent legislation that the structure and superintendence of penal institutions of the State, the county jails and the city police prisons secure the health and comfort of the prisoners, and that male and female prisoners be never confined in the same room or cell.

Section 1336, Chapter 24, Volume I, Revisal of 1905: Five apartments.—The common jails of the several counties shall be provided with at least five separate and suitable apartments, one for the confinement of white male criminals, one for colored male criminals, one for colored male criminals, one for other prisoners.

Section 3660, Chapter 81, Revisal of 1905: In improper apartments.—If the sheriff or jailer shall wantonly or unnecessarily confine those committed to his custody in any apartment other than that provided and designated by law for persons of the description of the prisoner, he shall be guilty of a misdemeanor.

PAGE 206, BIENNIAL REPORT OF THE ATTORNEY-GENERAL, 1907-1908.

BOARD OF PUBLIC CHARITIES,

Raleigh, N. C.

Replying to your favor requesting an opinion as to the meaning of the word "apartment," iu section 1336 of the Revisal, I would say that there is a marked distinction in the words "cell," "room" and "apartment." A cell is a very small and close place, used for the confinement of prisoners. A room is a particular portion of space reserved for the occupation of some person or object. An apartment is a larger and more comprehensive term than either of these, and may include both. I would say that an apartment is a distinct division of a building, separated from the other parts of the building.

Under section 1336 of the Revisal of 1905, a jail should be constructed somewhat as follows: One floor should be divided into two apartments, separated by a hallway, each apartment being subdivided into cells, in the one apartment to be confined the white male prisoners and in the other the white female prisoners. The second floor should be divided into two apartments and each apartment subdivided into cells, and in one of these apartments the colored male prisoners should be confined and in the other the colored female prisoners. Now, as to the other apartment, which it says is for other prisoners, I should construe that to mean for the criminal insane persons, and it seems that this should be separate and apart from the other apartments, or it could be placed upon the third floor of the building or in an adjoining wing or an outhouse of the building. There should be a solid partition between the whites, the blacks and the criminal insane, as the intention is to not allow any communication of any kind whatever between the races. It seems to me that the fifth apartmentthat is, the one for the criminal insane-should be subdivided into two apartments, in order that the races may be separated. * * *

> HAYDEN CLEMENT, Assistant Attorney-General,

COUNTY SUPERINTENDENTS OF HEALTH,

[Chapter 95, Revisal of 1905.]

Section 4445: Duties_of.—The duty of the county superintendent of health shall be to carry out, as far as possible, such work as may be directed by the sanitary committee and by the State Board of Health. He shall always promptly advise the secretary of the State Board of Health of the unusual prevalence of disease in his county, especially of typhoid fever, diphtheria, yellow fever, smallpox and cholera. He shall make the medico-legal post-mortem examinations for coroners' inquests, attend the inmates of the home for the aged and infirm and the prisoners in the jail or convict camps of his county, and make examination of lunatics for commitment. He shall be the sanitary inspector of the home and jail, including concict camps of his county, making MONTHLY REPORTS to the board of county commissioners and to the secretary of the State Board of Health.

AN ACT PROVIDING FOR THE SEPARATION OF PRISONERS SUFFERING WITH TUBERCULOSIS FROM OTHER PRISONERS.

[CHAPTER 567, PUBLIC LAWS 1907.]

The General Assembly of North Carolina do enaet:

Section 1. That the Board of County Commissioners of the respective counties of North Carolina shall provide in the jailhonse or in any camp or place where prisoners are committed for keeping or sentenced to a term of imprisonment in any county in the State of North Carolina, separate cells or rooms or a place in which shall be confined any prisoner or prisoners who may be committed for keeping or sentenced to said prison or place of confinement for a term of imprisonment, who has been examined by the County Superintendent of Health and pronounced by the said County Superintendent of Health as being affected with tubercolosis.

Sec. 2. That it shall be the duty of any sheriff of any county when a prisoner is placed in his custody for the purpose of being committed to jail or any place of confinement mentioned in this act, who said sheriff has been informed or has any reason to believe or snspect is suffering with tuberculosis, to have any such prisoner examined by the County Superintendent of Health, and if said prisoner shall be pronounced by said County Superintendent of Health as a tuberculous prisoner, then said prisoner shall be separated from the other prisoners and confined in a separate cell or place provided for by this act.

SEC. 3. That it shall be the duty of the Board of Directors of the State's Prison to provide separate cells or apartments in the said State's Prison in which shall be kept any prisoner or prisoners who may be sentenced to that institution for a term of imprisonment, who after being examined and pronounced by the physician in charge as being affected with tuberchlosis.

Sec. 4. That the cells and places of confinement provided for in this act for prisoners affected with tuberculosis shall be kept exclusively for said tuberculous prisoners, and under no circumstances or condition shall any other prisoner be committed or sentenced to the institutions and places of imprisonment mentioned in this act, who is well and not affected with tuberculosis, be confined in the cells or places of confinement therein provided for tuberculous prisoners: Provided for in this act, either in the conty jail or camps or the State's Prison, have been used and occupied by any prisoners affected with tuberculosis, the said cells or places of confinement shall not be used for any other prisoners until the County Superintendent of Health or the physician in charge and health authorities of the State's Prison have been notified, and the said cells or places of confinement

have been thoroughly fumigated and disinfected under the supervision of the said County Superintendent of Health or the physician in charge and the health authorities of said State's Prison, in the manner prescribed and required by the State Board of Health.

SEC. 5. Whenever any prisoner or prisoners shall be committed to any of the prisons or places of confinement designated in this act, it shall be the duty of the sheriff of the county or the warden of the State's Prison, as the case may be, in the event any such prisoner or prisoners be known or snspected by said anthorities to be suffering with tuberculosis, to have any such prisoner or prisoners examined by the Connty Superiutendent of Health or the physician in charge within five days after they have been committed or sentenced to said prison.

Sec. 6. That nothing contained in this act shall be so construed as to interfere with or prevent the county or State authorities from working together all prisoners on public works as now provided for by law.

Sec. 7. That any person or persons violating any of the terms or provisions of this act shall be guilty of a misdemeanor and upon conviction shall be punished in the discretion of the court.

Sec. 8. This act shall be in force from and after August first, one thousand nine hundred and seven.

In the General Assembly read three times, and ratified this the 4th day of March, A. D. 1907.

RULES FOR THE MANAGEMENT OF PRISONERS HAVING CONSUMPTION.

- 1. They should be confined in a special cell, or compartment, with a sunny exposure, if possible.
- 2. They should have their own special drinking-cups and tableware.
- 3. They should be provided with spit-cups with handles, so that they can be held near the mouth. Some antiseptic solution, or at least water, to prevent the drying of the spit before it is destroyed, should be put in the cup. The cups should be scalded out every day.
- They should be absolutely forbidden to spit on the floor or walls and made to use the spit-cups always.
- 5. They should be supplied with the most nutritious food that circumstances will permit.
- They should be allowed as much fresh air as possible—day and night.
- 7. They should not be required to do any work that will tire them, as fatigue is harmful.

S. The cell or room when vacated by a consumptive should be immediately disinfected, by washing the entire interior of an iron cell and the wood-work, in case of a room, with a 1-1000 solution of bichloride of mercury. Plastered wall should be whitewashed.

RICHARD H. LEWIS, Secretary State Board of Health.

RULES AND REGULATIONS FOR THE CONDUCT OF PRIVATE INSTITUTIONS FOR THE CARE AND TREATMENT OF IX-SANE PERSONS, IDIOTS, FEEBLEMINDED PERSONS AND INEBRIATES.

No. 1. All persons desiring to open or maintain an institution for the treatment and care of insane persons, idiots, feebleminded persons or inebriates must apply for license as per form prescribed, which will be sent to them upon request by the Secretary of the Board of Public Charittes, Raleigh, North Carolina.

No. 2. License will be granted noon such application, no objection appearing, and will be issued in the form approved by the board and attached to these regulations.

No. 3. Said license shall be good for the period therein named, but may be vacated and annulled at any time, by action in the Superior Court of Wake County, by the Board of Public Charities when it shall appear to the satisfaction of said board that the managers of said institution for insane persons, idiots, feebleminded persons or inebriates have been guilty of gross neglect or of cruelty or immorality.

No. 4. Said license shall be exposed to public view in the office of the superintendent of said institution.

No. 5. The superintendent of said institution for the care and treatment of insane persons, idiots, feebleminded persons or inebriates, shall file with the Board of Public Charities a copy of its by-laws, rules and regulations for its daily governance, and a statement of its rates of charges.

No. 6. The said institution shall be open to the inspection of the Board of Public Charities or any representative thereof, which inspection shall be performed when and as often as the board may see fit.

No. 7. The superintendent of said institution shall report to the Board of Public Charities, on the first days of January and July, respectively, of each year, in reply to inquiries duly sent from the office of the board; and said inquiries shall always include in their number the names of the officers of the institution, the number and residence of all patients in the institution, and of those admitted and discharged during the preceding six months, and such other matters as may be necessary for the full information of the inspecting or reporting representative of the board.

No. 8. The hooks of the institution shall at all times be open to the inspection of the Board of Public Charities or any member thereof.

No. 9. The superintendeut of the institution for the care and treatment of insane persons or inebriates, or its active medical officer, shall he a physician in good standing, holding license from the State Medical Board of North Carolina,

No. 10. The female department, if any, shall he wholly separated from the male department.

No. 11. The chief attendants in both departments shall be trained nurses.

No. 12. In the event of a death in the institution, if no resident consulting physician has been in attendance, the coroner shall be notified to take action.

No. 13. Such additions to these regulations will be made as experience may require.

FORM OF APPLICATION FOR LICENSE.

To the Board of Public Charities of North Carolina:

In compliance with chapter 1 of the Public Acts of 1899, heing an
act concerning private hospitals or homes for the care and treatment
of the insane, inebriates, idiots and feehleminded persons, I,
of the town of, county of, State of North Caro-
lina, hereby apply for a license to conduct and maintain within this
State an institution for the treatment and detention of;
and I promise to obey the law and to ahide by the regulations of the
Board of Public Charities. I declare and state that the proposed
location of such institution is in the town of, county of
State of North Carolina.

location of such institution is in the town of county of
State of North Carolina.
(Describe the institution.)
The number of persons for whom accommodations will be provided
is; the name of the person to be placed in charge is
; and I also further declare that the said is a
physician in good standing, holding license from the Medical Board
of North Carolina, and has had an experience of years'
medical attendance in
(Give names below of three reliable persons as reference.)
Dated at this day of A D 19

Subscribed and sworn to before me, this day of 19....
